Comments /notes on tonight's mission and this interpretation:			
Initial Perimeters were copied from NIFS Daily Wildfire Perimeter 08/20/2022 @ 0330 PDT			
Potter Fire: Start 597 IR Acres, Interpreted 614 Acres. This fire is located on the Northeast side of Potter Mountain Heat perimeter growth to the East, North and Southeast Cloud cover along the west portion of the perimeter. Was able to see some heat so that was mapped a small portion on the southeast boundary.			
**Note – shapefiles are labeled with MDT to match imagery date/time. Times posted on this and supporting documents are in PDT (time of local incident).
