<p><b>Comments /notes on tonight's mission and this interpretation:</b></p> <p><b>Initial Perimeters were copied from NIFS Daily Wildfire Perimeter 08/28/2022 @ 0333 PDT to begin interpretation for 8/28/2022 data.</b></p> <p><b>Potter Fire:</b> Start 629 IR Acres, Interpreted 629 Acres.                  This fire is located on the Northeast side of Potter Mountain</p> <p>Fire perimeter appears to be holding, no changed to perimeter.</p> <p>Couple of pockets of intense heat on the east side of the perimeter. Areas of scattered heat along the east and southern portions of the perimeter, with a few small pockets in the interior. Other than a few isolated heat sources the west portion of the incident continues to cool.</p> <p><b>**Note – shapefiles are labeled with MDT to match imagery date/time. Times posted on this and supporting documents are in PDT (time of local incident).</b></p>
