Comments /notes on tonight's mission and this interpretation: Initial Perimeters were copied from NIFS Daily Wildfire Perimeter 08/24/2022 @ 0251 PDT to begin interpretation for 8/24/2022 data. Potter Fire: Start 627 IR Acres, Interpreted 627 Acres. This fire is located on the Northeast side of Potter Mountain Fire perimeter appears to be holding. No additional growth. Patch of intense heat on the southeast perimeter, small pockets of intense heat in the north portion of the perimeter. Large areas of dense scattered heat from the middle of the perimeter to the east. Other than a few isolated heat sources the west portion of the incident is beginning to cool. **Note – shapefiles are labeled with MDT to match imagery date/time. Times posted on this and supporting documents are in PDT (time of local incident).
