Incident: Bolt Creek Fire

SAFETY MESSAGE

Safety Briefing EVERY DAY for Every Firefighter on the Fireline

HAZARDS AND RISKS IDENTIFIED

Fireline: There is a lot of unsecured line that could pose a control problem with increased winds. Know your Escape Route and where your Safety Zone is, at all times. Use lookouts that know fire behavior and can give adequate updates and warning. In case of an emergency situation regarding fire behavior, everyone in a Division must be able to be notified. Think about a severe wind event or fire blowup condition and how you would react to it. Also maintain a safe working distance from dozers, fallers, bucket and retardant drops.

Night Operations: Make sure you know the country you're working in before engaging, best practice is to see the ground during the day. Follow the 10 standard fire orders and 18 situations that call watch out.

Powerlines: Fire activity near high voltage electrical lines can cause serious injuries to firefighters. Be aware of your surroundings, lookup and communicate any identified powerlines to your crewmembers. Contact the local power company when lines are threatened or involved. See IRPG pg.24

Driving: These dirt roads can become extremely dusty and impair your ability to see ahead, plan accordingly DO NOT make up time with increased speed. Continue to stay alert for Wolves, Horses, or Wildlife on the roads, especially at dawn and dusk. Slow down and take your time, be respectful to others and share the road.

Communications: Be sure you have all the correct frequencies for Command, Tac and Air Operations. TEST THEM! Ask questions if you are unsure of an assignment or procedure. A person's attitude and the ability to communicate well, plays a major role in SAFETY!

Hot, Dry Weather & Dehydration: Water is best - drink a little often rather than a lot infrequently. Fruit juice in the morning instead of coffee!

Changing Weather Conditions Chance of Thunderstorms: Post lookouts. Communicate observed change in weather to ALL line resources and to COMMUNICATIONS on command frequency. Review and follow Thunderstorm safety IRPG pg. 21

Medical Emergencies- Streamline your emergency response. Use the medical Incident Report that is ON the back cover of the IAP. It is also on pages 118/119 in the IRPG, a.k.a. the pink section.

Line Safety Officer(t): Zebron Watts
