HEALTH AND SAFETY MESSAGE

Incidents: Bolt Creek Date: 9/26/22- Day and Night

Safety Concerns and Mitigation:

<u>Unplanned Public Interactions</u>: There is public entering the fire perimeter, mostly to deliver supplies to family members. Be alert of Non-Fire personnel entering the suppression area you're working in. Post lookouts in areas with heavy public to avoid any conflicts to your mission. If you believe a contact could be a threat to you or others disengage, go to a safe location and call Law Enforcement.

<u>Hazard Trees, Green and Snags, Long Term Concern</u>: Assess trees, establish decision points for disengagement. Flag trees, post lookouts in hazard areas, stand condition awareness, adjust mop-up standards. Assess area where congregating, i.e. parking, briefing, etc.

<u>Identify capabilities and limitations of equipment and operator</u>: Examine the protective equipment devices of the equipment to be used and operator PPE for serviceability. Check against agency specific guideline and ensure they are followed. Assign work according to operator skills and abilities. Review and apply contracts and agreements if appropriate.

<u>Powerlines</u>: Notify all responders of down powerlines and obtain radio check-back. Determine extend of hazard by visually tracking all lines in either direction. Be aware of your surroundings, lookup and communicate any identified powerlines to your crewmembers. Contact the local power company when lines are threatened or involved. See IRPG.

Common Denominators of Fire Behavior On Tragedy Fires

There are four major common denominators of fire behavior on fatal and near-fatal fires. Such fires often occur:

- 1. On relatively small fires or deceptively quiet areas of large fires.
- 2. In relatively light fuels, such as grass, and light brush.
- 3. When there is an unexpected shift in wind direction or in wind speed.
- 4. When fire responds to topographic conditions and runs uphill.

 Alignment of topography and wind during the burning period should always be considered a trigger point to re-evaluate strategy and tactics.
