HEALTH AND SAFETY MESSAGE

INCIDENT: Bolt Creek

DATE: 10/02/22

TIME: ALL

Major Hazards and Risks: Driving, Hazard Trees, Steep Terrain, Rolling Materials, Rugged Access, Heavy Equipment Operations, Cumulative Fatigue.

Safety and

- **Hazard Trees-** are a common issue on the Fireline where we work hard to keep up our situational awareness and mitigate those hazards. *Situational Awareness* doesn't stop at the edge of the fire! In the Team's past experiences here, near misses with snags occurred, a couple not on the actual fire line.
- **Powerlines-** Fire activity near high voltage electrical lines can cause serious injuries to a firefighter. Be aware of your surroundings, lookup and communicate any identified powerlines to your crewmembers. Contact your supervisor or the local power company when lines are threatened or involved. Review your IRPG on powerline safety.
- **Situational Awareness-** In addition to keeping tabs on your assignment, working environment, coworkers and adjoining forces, remember another situation to be aware of is your crew's level of complacency. Complacency leads to "Normalization of Deviance" which can lead to accidents.

SAFETY IS

And This Too:

Watch Out Situation of the Day

18. TAKING A NAP NEAR THE FIRELINE

Defensive Driving Tips:

- Expect the unexpected.
- Follow posted speed limits.
- Anticipate other driver's actions.
- Look before you enter into an intersection.
- Never exceed your safe stopping distance.
- When traveling together, allow for spacing.
- Get out of the vehicle and move around every 2 hours.
- Keep your eyes on the road at all times.
- Signal all turns/lane changes well in advance.
- Passengers stay awake to help driver stay awake.
- Know the "blind spots" on your vehicle.
- Always drive with your lights on.
- Do not use radio or cell phone while driving.
- Always wear your seat belt.
- Driving should be your only concern.
