3. Objective(s):			
Management Objectives			
<ul style="list-style-type: none"> • Provide for firefighter and public safety using ongoing risk analysis and reasonable mitigation of identified hazards. • Minimize impacts to communities and infrastructure, and minimize acres burned on private lands along Highway 2 corridor. • Maintain and enhance relationships with cooperators, stakeholders, landowners, and communities. • Provide accurate and timely information to the public. • Protect tribal, cultural, aquatic, and wildlife resources and sensitive plant sites by coordinating with Resource Advisors. • Treat each other with dignity and respect and act professionally on the fire and in the community. • Manage costs commensurate with values at risk and update Agency Administrators daily. 			
Control Objectives			
<ul style="list-style-type: none"> • Maintain the fire north of Highway 2 utilizing the existing suppression strategy to stop the fire spread to at-risk values. • To control fire, utilize complete suppression and point protection strategies in areas around structures and values. • Keep fire east of Index-Galena Road (FR63) and west of Beckler Creek Road (FR65). • Continue to monitor the fire in the wilderness, only taking action to maintain a fire within the identified east/west parameters. 			
4. Operational Period Command Emphasis:			
<ul style="list-style-type: none"> • Provide a positive presence to the community and the public impacted by the fire. • As the safety of personnel is our highest priority, continually use a deliberate analysis of risk as you engage the fire. <p>Communicating the risks and problems you identify and considering the actions you can take to improve or manage the issue is crucial.</p> <ul style="list-style-type: none"> • Review your LCES in all areas of your work environment. Take 10 minutes as a crew to review your communications in the work area, identify escape routes that will lead you to safety if conditions change, and evaluate the safety zones to ensure they are adequate for you, your crew, and other resources. • Be aware of values at risk inside and adjacent to the fire perimeter. Engage and suppress fire when safe, and employ appropriate tactics for the situation.

Fire Behavior Forecast # 10

Name of Incident: Bolt Creek	Administrative Unit: WA-NWS
Date & Time Issued: October 18, 2022 @ 1900	Operational Period: DAY/NIGHT 10/19-20/2022 (0700-0700)
FBAN: Steve Ziel	Signed: /z/ <i>[Signature]</i>

Assumptions: *Very similar mild autumn weather conditions will continue to moderated fire behavior potential – but, it is still “fire season in the middle of October”. We continue to have all the ingredients for active fire behavior with moderate RH, abundant dry fuels, and numerous heat sources across a large area. Expect favorable burning conditions between 1300-1800 during peak heating, and best air mixing. All fuels are very dry, leaves are falling, and the shrubs are entering dormancy. The combination of wind, temperature, humidity, and a heat source may result in very active fire behavior. Southerly aspects are remaining sunny, while north aspects are gaining shadow time. Monitor rate of surface drying when the inversion breaks.*

Weather Summary

*See attached Fire Weather Forecast

Fire Behavior Summary

Fuels in the fire area are primarily composed of *Timber Litter*, and *Timber with Understory*. Primary tree species include mixed sizes of Douglas Fir, Western Hemlock, with scattered cedar. Local timber litter is compact to fluffy with green moss. Shrub and understory species include mixed hardwoods, and dog-hair conifer thickets. Large snags and heavy fuel concentrations are common throughout all areas. Live woody fuels are marginally contributing to fire rate of spread and fire intensity. Fuel conditions change by elevation, and aspect. Low crown base height (ladder fuels) and thick moss are present in most of the timbered areas. *Lots of hardwood leaf litter.*

Today's potential fire behavior will likely include limited transition from smoldering/creeping to active surface fire spread with flare ups and occasional torching. Primary spread mechanism includes flames creeping into unburned fuels that result in moving fire and flare ups. Wind/slope alignment on may contribute to flare ups with isolated torching. Fire activity may extend later on southwest aspects (warmer, dryer, longer). Moderate re-burn/re-ignite potential where fuels have lightly burned and in patchy burn areas. Moss may contribute to torching and snags may fall causing flare-ups.

* **Fine fuel moisture= 6%-9%, 1000hr. moisture=12%, Woody fuels 190%, Probability of Ignition-40%-60%**

Fuel Type	Rate of Spread	Flame Length	Spotting Distance
...If your work area includes -	(CH/HR = FPM)	Feet	
Timber Litter (TL5) Heavy	3-5	2	0.1 mi.
Timber w/ Understory (TU5) Heavy	6-8	6-8	0.1 mi.
Timber w/ Understory (TU2) Moderate	7-9	3-4	0.1 mi.

Specific Assignments:

- Div. A** – Monitor fire activity on lower slopes for flare-ups. Expect increased activity in recently burned areas north of Skykomish for due to river flow winds. Monitor Beckler River corridor, and SW/SW Sec. 6 below 6510 for flare ups and rekindle in ratty burn areas.
- Div. S** – Monitor flanking/backing on Heybrook Ridge, and 6022 Rd. (Sec. 26), and continued activity in lower Barclay Creek (Sec. 35).
- Div. P** – Monitor Hwy 2 corridor for flare ups. Potential areas of re-burn. Expect rolling materials on steep slopes in the tunnel area.
- Div. Z** – Expect continued flare ups, and areas of unburned fuels to consolidate in the Eagle Rock, and upper Eagle Creek area.

Air Operations: Moderate inversion breaking by mid-morning. Expect hazy/smoky conditions due to local fires.

Safety

Review Standard Fire Orders.....1. Keep informed on fire weather conditions and forecasts. 2. Know what your fire is doing at all times. 3. Base all actions on current and expected behavior of the fire.

Be alert to changing conditions – don't be lulled into the “same old/same old”.....fire behavior and weather processes are dynamic and ever changing throughout the day, week, season...

SAFETY MESSAGE SAFETY IS OUR FIRST PRIORITY

Fire fighter safety comes first on every fire, every time

LCES YOUR FIREFIGHTERS CODE OF CONDUCT INCIDENT RESPONSE POCKET GUIDE WORK-REST GUIDELINES

SAFETY THOUGHT

The choices that you make- minute by minute- have a lot to do with your own safety. Please choose wisely. Choose to wear your hardhat and other PPE. Choose to insist on a good briefing- ask questions if something is unclear. Choose to stop and analyze risks and seek and apply mitigations. If mitigation is insufficient, choose to turn down assignments that you are not comfortable with and explain why.

MAJOR HAZARDS AND RISKS

- Snags, Fire Weakened Trees
- Steep slopes
- Rolling material

- Large, heavy equipment
- Driving/highway/Mt roads
- Fire line Rehab

- Bee's & Rattle Snakes
- Wildlife
- Winds

PROFESSIONAL BEHAVIOR FOR WILDLAND FIRE FIGHTERS

Choosing to apply safe practices, all the experience available to you, massive amounts of common sense and all your tools as you perform your missions in a dangerous environment are the signs of the professional wildland fire fighters you all are. Please do your part to ensure everyone goes back to camp/home at the end of every shift. Close the loop inform others of hazards

**Provide good briefings – identify and communicate all the hazards
Provide measures to address them to lessen the risk**

2. If you cannot adequately lessen the risk, or still feel too uncomfortable, review your turn down measures or find a way to perform the mission that you feel better about.

3. Establish and communicate protocols for each person so that they can identify, report any unsafe overly risky conditions/situations.

Use the methods and procedures outlined in the IRPG and Red Book, to ensure that you cover all the safety bases as you perform your assignments in a high risk environment as safely as possible.

Perform daily AAR's to identify any ineffective or unsafe practices and better/safer/ ways to perform the missions in the future.

Medical Incident Report

FOR A NON-EMERGENCY INCIDENT, WORK THROUGH CHAIN OF COMMAND TO REPORT AND TRANSPORT INJURED PERSONNEL AS NECESSARY.

FOR A MEDICAL EMERGENCY: IDENTIFY ON-SCENE INCIDENT COMMANDER BY NAME AND POSITION AND ANNOUNCE "MEDICAL EMERGENCY" TO INITIATE RESPONSE FROM IMT COMMUNICATIONS/DISPATCH.

Use the following items to communicate situation to communications/dispatch.

1. CONTACT COMMUNICATIONS / DISPATCH (Verify correct frequency prior to starting report)

Ex: "Communications, Div. Alpha. Stand-by for Emergency Traffic."

2. INCIDENT STATUS: Provide incident summary (including number of patients) and command structure.

Ex: "Communications, I have a Red priority patient, unconscious, struck by a falling tree. Requesting air ambulance to Forest Road 1 at (Lat./Long.) This will be the Trout Meadow Medical, IC is TFLD Jones. EMT Smith is providing medical care."

Severity of Emergency / Transport Priority	<input type="checkbox"/> RED / PRIORITY 1 Life or limb threatening injury or illness. Evacuation need is IMMEDIATE <i>Ex: Unconscious, difficulty breathing, bleeding severely, 2° - 3° burns more than 4 palm sizes, heat stroke, disoriented.</i> <input type="checkbox"/> YELLOW / PRIORITY 2 Serious Injury or illness. Evacuation may be DELAYED if necessary. <i>Ex: Significant trauma, unable to walk, 2° - 3° burns not more than 1-3 palm sizes.</i> <input type="checkbox"/> GREEN / PRIORITY 3 Minor Injury or illness. Non-Emergency transport <i>Ex: Sprains, strains, minor heat-related illness.</i>
