SAFETY MESSAGE

Goat Rocks Fire, October 01, 2022

RISK MANAGEMENT PLAN:

- 1. We will risk our lives a lot to save SAVABLE lives.**
- 2. We will risk our lives a little to save SAVABLE property.**
- 3. We will not risk our lives at all for lives or property that are already lost.**

Safety is our number one priority!

Fire Weather Forecast

FORECAST NO: 18
FORECAST FOR: Saturday
SHIFT DATE: 10/01/2022
DATE AND TIME ISSUED: 09/30/2022 at 1900

NAME OF FIRE: Goat Rocks
UNIT: WA-GPF
SIGNED: *Todd Carter* - Incident Meteorologist
509-319-0474 (cell) / todd.carter@noaa.gov

WEATHER DISCUSSION: *** BREEZY SATURDAY ***

We are expecting a surge of easterly winds Saturday. This moderate surge will potentially override slope and valley winds on westerly aspects. Lower elevations of the western portion Div W (4612 area) will have less wind than the ridges which will blow at 10 to 15 mph. Terrain will steer the wind in southeast and northeast directions as well. East winds diminish Saturday evening. Sunday into the beginning of next week will be warmer than normal with low relative humidity in the afternoon. Some minor marine moisture will moderate the heat and dryness toward the middle and end of the week but not by much.

SATURDAY:

WEATHER: Mostly Sunny near Packwood. Cloudy in the morning near White Pass with morning drizzle. Clouds decreasing afternoon.

MAXIMUM TEMPERATURE: 2500-3500 feet. 68-73° 72° at ICP

MINIMUM RELATIVE HUMIDITY: 35-42%. Drier west parts Divs W, A

20-FOOT WINDS:

- **Ridgetops:** East wind 9 to 14 mph gusting to 20 mph.
- **Div A:** East tendency 5 to 8 mph gusting to 14 mph steering southeast down the Coal Creek Drainage.
- **Div W:** East to northeast 5 to 8 mph gusting to 12 mph.
- **Div Z:** East 6 to 8 mph gusting to 15 mph.

CHANCE OF WETTING RAIN ($\geq 0.25''$): 0%.

LIGHTNING ACTIVITY LEVEL: 1.

MIXING HEIGHTS/INVERSIONS: Weak surface inversions, lifting after 1000 PDT.

AVIATION: Haze and smoke moving downwind (West). Significant terrain obscuration not expected after 1000.

SATURDAY NIGHT:

WEATHER: Becoming clear.

MINIMUM TEMPERATURE: 45-53° 48° at ICP.

MAXIMUM RELATIVE HUMIDITY: 75-85%.

20-FOOT RIDGETOP WINDS:

- **Ridgetops:** Northeast wind 7 to 10 mph gusting to 13 mph.
- **Divisions:** Downslope/downvalley 2 to 5 mph after 1900. Some gusts to 11 mph early.
- **Coal Creek:** Downslope/downvalley 2 to 5 mph after 1900. Some gusts to 13 mph early evening.

CHANCE OF WETTING RAIN ($\geq 0.25''$): 0%

LIGHTNING ACTIVITY LEVEL: 1.

MIXING HEIGHTS/INVERSIONS: Falling to Near surface.

EXTENDED OUTLOOK: The warming trend continues into Sunday and Monday and next week with lower relative humidity and light wind. Temperatures will be climbing toward the 80 degree mark once again. The 8-14 extended forecast favors above normal temperatures and near normal chances for precipitation however any chances of precipitation may come mid October..

FIRE BEHAVIOR FORECAST

FORECAST NUMBER: 20	TYPE OF FIRE: Wildfire
FIRE NAME: Goat Rocks	OPERATIONAL PERIOD: 1 st October 2022
DATE ISSUED: 30 th September 2022	TIME ISSUED: 1500 Hours
UNIT: WA-GPF, WA-PCC, WA-WFS	SIGNED: Robert Scott /s/ Robert Scott – FBAN 530.990.4048

INPUTS

WEATHER SUMMARY: See Fire Weather Forecast for Details

Temp - 73, Relative Humidity – 35%, Winds – 5 to 8 upslope and 8 to 13 NE gusting to 20 at ridgetops.

FUELS (PSA NW05):

Fuel types consist primarily of a mixed conifer closed mature evergreen forest. Seasonal drying and curing have the live fuels at a level they can contribute to fire spread. Heavy fuels are actively contributing to intensity, duration and fire spread. Pocket card Thresholds – Watch out: Wind > 10 mph, RH < 30%, Temp > 80 & 100 hr fuel moisture < 14.

ERC – 35, 90% = 52 100 hr fuel moisture < 13% 1000 hr fuel moisture < 14%

OUTPUTS

FIRE BEHAVIOR GENERAL:

Smoldering and creeping will give way to surface fire today in exposed locations. Fuel moisture levels will drop quickly as drier east winds impact the fire area. Expect surface spread as fire becomes organized. Fire moving into heavier fuel could produce some isolated torching, but intensity will be reduced moving into the evening hours.

Fine Dead Fuel Moisture = 9%	ROS (ch/hr)		Flame Length (ft)		PIG	Spot Dist
Fuel Model	Head	Flank	Head	Flank	U/S	
GS2 – Grass & Shrub	1	.4	.7	.4	32%/20%	.2 mile
TU5, TL9 – Timber Litter	3 - 5	1	3 - 4	1 - 2	32%/20%	.2 mile

(Fire behavior predictions are for 73 degrees, 35% RH, MFWS 2 mph, and 10FM 12%)

FIRE BEHAVIOR SPECIFIC:

Div A: Potential exists for fire movement down Coal Creek from the Coal Creek slop. East wind alignment with Coal Creek could move surface fire down canyon toward the Coal Creek hand line. Moderate intensity fire moving toward the hand line is unlikely but should be considered.

Div W: East wind impacts on the 4012 Rd should be less than other areas of the fire as little opportunity for wind a topographic alignment exists. Some increased fire activity is possible but fire intensity should mitigate after sun down.

Div Z: Unstaffed. East wind could bring pockets of heat back to life and create areas of fire movement. High elevation areas are more likely to experience surface fire. Flanking fire above Dam Creek toward the north can not be ruled out. Fire reaching the wilderness boundary could move north in the wind along the ridge above the Clear Fork and Dam Creek confluence.

Structure Group: Torching is the main concern for fire activity in and around structures today. While unlikely, embers from torching represent a spotting potential. Monitor wind direction and smoke production for signs of increased fire activity.

AIR OPERATIONS:

Clear conditions can be expected.

SAFETY

Taking a nap near fireline. "Watch Out Situation 18". Firefighters don't let firefighters take a nap near the line. Move it to the crummy or engine and post a lookout.

Review the first Common Denominator (IRPG Pg# 5): On relatively small fires or deceptively quiet areas of large fires. Ask yourself: 'What is this fire capable of in 1 hour or 3 hours?'

Take weather observations, communicate to Division resources. Refer to pages 45-48 of IRPG. If possible turn into IMET or Fire Behavior.

Aviation Watch Outs Nevada Team 4

As part of risk management, especially during high activity fires, each aviation manager and employee should be asking questions about every mission.

- Is the flight necessary?
- Who is in charge?
- Are hazards identified and known?
 - Have flight hazards been assessed? Have the pilots been informed?
- Should the operation or the flight be stopped due to a change in conditions? Consider the following:
 - Radio communications.
 - Environmental conditions – weather, visibility, terrain, elevation, temperatures.
 - Mission priorities.
 - Successful mission completion probabilities.
- Is there a better way to complete the mission?
- Is there pressure to complete a mission at all costs?
- Can you justify your actions?
- Is the mission airspace confined or congested?
 - Multiple aircraft.
 - Mixed types of aircraft.
 - Poor visibility.
- Do you have an escape route?
- Are any guidelines or policies being ignored?
- Is communication between any individuals strained or tense?
- Are you deviating from the assigned operation or flight?

Resource Advisor Message
Goat Rocks Fire
September 15, 2022

Please do your part to ensure that our fire management maintains the values at risk without compromising SAFETY. Everyone is doing a great job at being sensitive to resource issues – THANK YOU!

Please help us with the following:

- **Cultural Resources**
 - If you identify a cultural resource item, leave the item in place. GPS the location of the item and take a photo. Inform the Resource Advisor as soon as possible.
 - Avoid damaging or cutting down peeled cedar trees (see next page for examples of what to look for).

- **Identify, inventory, and GPS (Use of Field Maps Mobile App is preferred method for data collection, thanks!)**
 - Dozer line, staging areas, fueling sites, drop points, helispots, handline.
 - Fences, signs, and other improvements damaged by the incident.

- **Pumps**
 - All pumps and fuel containers should be placed in a spill containment mat and berm. All pumps should have screens (3/32 inch). Talk to your Resource Advisor if you need screening.

- **Weed Washing Station**
 - Incoming equipment, please clean your vehicle and equipment of dirt and vegetation at the Weed Wash Station located in Packwood. Please wash them again when you demob*.
*For any equipment operating on Forest Road 1266: there is a large Scotch Broom infestation. Please clean equipment prior to moving to another road on the Fire.

- **Leave No Trace/Recycle**
 - Remove garbage, litter, etc. (including cigarette butts) from control lines, roads, drop points, staging areas, etc. and dispose of off-site.

Questions? Please contact your Resource Advisor:

Matt Mulanax

MEDICAL PLAN (ICS 206 WF)

Controlled Unclassified Information//Basic

Medical Incident Report

FOR A NON-EMERGENCY INCIDENT, WORK THROUGH CHAIN OF COMMAND TO REPORT AND TRANSPORT INJURED PERSONNEL AS NECESSARY.

FOR A MEDICAL EMERGENCY: IDENTIFY ON SCENE INCIDENT COMMANDER BY NAME AND POSITION AND ANNOUNCE "MEDICAL EMERGENCY" TO INITIATE RESPONSE FROM IMT COMMUNICATIONS/DISPATCH.

Use the following items to communicate situation to communications/dispatch.

- 1. CONTACT COMMUNICATIONS / DISPATCH** (Verify correct frequency prior to starting report)
Ex: "Communications, Div. Alpha. Stand-by for Emergency Traffic."
- 2. INCIDENT STATUS:** Provide incident summary (including number of patients) and command structure.
Ex: "Communications, I have a Red priority patient, unconscious, struck by a falling tree. Requesting air ambulance to Forest Road 1 at (Lat./Long.) This will be the Trout Meadow Medical, IC is TFLD Jones. EMT Smith is providing medical care."

Severity of Emergency / Transport Priority	<input type="checkbox"/> RED / PRIORITY 1 Life or limb threatening injury or illness. Evacuation need is IMMEDIATE Ex: Unconscious, difficulty breathing, bleeding severely, 2° - 3° burns more than 4 palm sizes, heat stroke, disoriented. <input type="checkbox"/> YELLOW / PRIORITY 2 Serious injury or illness. Evacuation may be DELAYED if necessary. Ex: Significant trauma, unable to walk, 2° - 3° burns not more than 1-3 palm sizes. <input type="checkbox"/> GREEN / PRIORITY 3 Minor injury or illness. Non-Emergency transport Ex: Sprains, strains, minor heat-related illness.
Nature of Injury or Illness & Mechanism of Injury	Brief Summary of Injury or Illness (Ex: Unconscious, Struck by Falling Tree)
Transport Request	Air Ambulance / Short Haul/Hoist Ground Ambulance / Other
Patient Location	Descriptive Location & Lat. / Long. (WGS84)
Incident Name	Geographic Name + "Medical" (Ex: Trout Meadow Medical)
On-Scene Incident Commander	Name of on-scene IC of Incident within an Incident (Ex: TFLD Jones)
Patient Care	Name of Care Provider (Ex: EMT Smith)

3. INITIAL PATIENT ASSESSMENT: Complete this section for each patient as applicable (start with the most severe patient)

Patient Assessment: See IRPG page 106

Treatment

4. TRANSPORT PLAN:

Evacuation Location (if different): (Descriptive Location (drop point, intersection, etc.) or Lat. / Long.) Patient's ETA to Evacuation Location:

Helispot / Extraction Site Size and Hazards:

5. ADDITIONAL RESOURCES / EQUIPMENT NEEDS:

Example: Paramedic/EMT, Crews, Immobilization Devices, AED, Oxygen, Trauma Bag, IV/Fluid(s), Splints, Rope rescue, Wheeled litter, HAZMAT, Extrication

6. COMMUNICATIONS: Identify State Air/Ground EMS Frequencies and Hospital Contacts as applicable

Function	Channel Name/Number	Receive (RX)	Tone/NAC *	Transmit (TX)	Tone/NAC *
COMMAND					
AIR-TO-GRND					
TACTICAL					

7. CONTINGENCY: Considerations: If primary options fail, what actions can be implemented in conjunction with primary evacuation method? Be thinking ahead.

8. ADDITIONAL INFORMATION: Updates/Changes, etc.

REMEMBER: Confirm ETA's of resources ordered. Act according to your level of training. Be Alert. Keep Calm. Think Clearly. Act Decisively.
