INCIDENT OBJECTIVES (ICS 202)

1. Incident Name:		2. Operational Period: 0700 -1900	
GOAT ROCKS		Date/Time From: 10/19/2022 0700 WED	Date/Time To: 10/19/2022 1900 WED
3. Objective(s):			
Management Objectives and Commanders Intent:			
<ul style="list-style-type: none"> • Our foremost priority is to always provide for firefighter and public safety. • Utilize deliberate risk management to balance fire suppression with minimizing exposure to hazards. This will include following local and agency guidelines to inhibit the spread of COVID-19. • Maintain positive relationships with all stakeholders and ensure the continued open communication with local agencies and landowners to deliver timely and accurate dissemination of information. • Prioritize suppression strategies and tactics that have the highest probability of success and that limit firefighter exposure to hazards. Utilize existing roads, trails, and natural barriers to keep the fire footprint as small as possible. Consult with resource advisors when developing plans for suppression and repair activities. • Monitor fire behavior and smoke impacts, and respond appropriately to protect life, property, infrastructure, improvements, recreation, cultural and natural resources. • Manage human resources assigned to the incident in a manner that promotes a positive work environment and ensure that everyone is treated with dignity and respect. • Manage the fire cost effectively, commensurate with the direction of the Agency Administrators and values at risk. 			
4. Operational Period Command Emphasis:			
<ul style="list-style-type: none"> • Coordinate with Lewis County Emergency Management, Lewis County Fire Department and Sherriff's Office, and the Cowlitz Ranger District on evacuation planning and dissemination of information. • Continue daily to assess road and area closures and provide recommendations to implement or rescind as appropriate. • Maintain a presence in the community of Packwood, Upper and Lower Timberline, and Goat Rocks Communities. Continue to share accurate information with the community to maintain positive relationships. • Prioritize the protection of structures, infrastructure, communities, and cultural and critical habitat. • Suppression actions in wilderness will follow MIST guidelines, and are limited to chainsaws, pumps, and aircraft. Suppression within inventoried roadless areas must be approved by the Agency Administrator and Regional Forester. • Continue repair and clean-up of forest roads that have been used for control lines and implement suppression repair for any control lines that are no longer needed. • Coordinate with assigned agency resource advisors to ensure that all tactical actions meet agency specific objectives. Utilize weed wash station prior to going to the line and before demobilization. • Ensure accountability of resources and continually evaluate and mitigate hazards as well as fire behavior. Implement team IWI process in the event of accident or emergency and include medical plan in daily IAP. 			
General Situational Awareness:			
<ul style="list-style-type: none"> • Steep and rugged terrain, rolling material, and unstable footing. • Enhanced hygiene (especially handwashing), PPE, and monitoring practices help limit the infection rate of the first responders. • Reduced workload leading to complacency, taking actions to ensure job readiness.

Fire Weather Forecast

FORECAST NO: 36
FORECAST FOR: Wednesday
SHIFT DATE: 10/19/2022
DATE AND TIME ISSUED: 10/18/2022 at 1900

NAME OF FIRE: Goat Rocks
UNIT: WA-GPF
SIGNED: Scott Kennedy - Incident Meteorologist
252-269-9497 (cell) / scott.kennedy@noaa.gov

WEATHER DISCUSSION:

High pressure will continue across the fire area today bringing slightly warmer and drier conditions. Highs will generally be in the 70s with minimum relative humidity in the 20 percent range. Dispersion will be poor with smoke trapped below the inversion through mid afternoon. Winds will generally be light and terrain driven.

WEDNESDAY:

WEATHER: Smoke trapped below the inversion will lift after 1400. Smoke and haze lingering through the afternoon. Few clouds.

MAXIMUM TEMPERATURE: 2500-3500 feet. 72-78° 79° at ICP

MINIMUM RELATIVE HUMIDITY: 20-30%

20-FOOT WINDS:

- **Ridgetops:** South to southeast 2 to 4 mph, becoming southwest 4 to 8 mph in the afternoon.
- **Div A:** South to southeast 2 to 4 mph, becoming west to southwest 3 to 6 mph in the afternoon.
- **Div W:** East to southeast 2 to 4 mph, becoming west to northwest 3 to 6 mph in the afternoon.

CHANCE OF WETTING RAIN ($\geq 0.25''$): 0%.

LIGHTNING ACTIVITY LEVEL: 1.

MIXING HEIGHTS/INVERSIONS: Low level inversion below 2500 ft, lifting after 1400 PDT.

AVIATION: Dense smoke below the inversion through mid afternoon. Smoke may continue along mid slopes bringing poor visibility through the afternoon.

WEDNESDAY NIGHT:

WEATHER: Mostly Clear. Smoke settling in the valleys.

MINIMUM TEMPERATURE: 47-55°

44° at ICP.

MAXIMUM RELATIVE HUMIDITY: 55-65%

20-FOOT WINDS:

- **Ridgetops:** East to southeast 2 to 4 mph.
- **Near Div A/W Break:** Becoming downslope/downvalley 2 to 5 mph.
- **Div W:** Becoming downslope/downvalley 2 to 5 mph.

CHANCE OF WETTING RAIN ($\geq 0.25''$): 0%

LIGHTNING ACTIVITY LEVEL: 1.

MIXING HEIGHTS/INVERSIONS: Falling to near surface in the valleys.

EXTENDED OUTLOOK:

The upper ridge over the Pacific Northwest will begin to break down Thursday with onshore flow redeveloping bringing cooler temperatures and higher minimum relative humidity. A series of weather systems to move across the fire area beginning Friday afternoon and continuing into next week that will bring beneficial rainfall, much cooler temperatures, and high humidity.

Fire Behavior Forecast

Fire Behavior Forecast: 36	Type of Fire: Wildfire
Fire Name: Goat Rocks	Operational Period: 10/19/2022
Date Issued: October 18th, 2022	Time Issued: 1900
Unit: WA-GPF, WA-PCC, WA-WFS	Signed: /s/ Scott Linn FBAN

Weather Summary: **Low RH values continue**
See Fire Weather Forecast for details

	1000 hr	15	15	15	14	15	15	15	15	16

Fuels: Mix conifer timber, TU5 and TL9, with Douglas-fir, western hemlock, and scattered western red cedar. Duff is around 6 inches deep. North slopes are denser timber and higher fuel moistures. Scattered plantations of Doug-fir regeneration are represented GS2.

General Fire Behavior

The fire is terrain and fuel driven under low humidity and continues to back into the wind and downslopes easily. Moderate to occasional active fire behavior is expected this afternoon with surface fire spread and single-tree torching. Spotting distance up to 1/10 mile can be expected. Shading from smoke may limit overall fire activity throughout the day.

Fine Dead Fuel Moisture = 5%	ROS (ch/hr)		Flame Length (ft)		PIG	Spot Dist
Fuel Model	Head	Flank	Head	Flank	U/S	
GS2 – Grass & Shrub	3	2	1	.1	56%	.1 mile
TU5, TL9 – Timber Litter	5-9	3-7	4-6	3-5	56%	.1 mile

Specific Fire Behavior

Div A: The fire will continue to actively back downslope from the Three Peaks ridge and will likely continue to impact forest road 041. With southern winds the flanking fire will become aligned with the slope and make run upslope towards Three Peaks Ridge on the east flank. Limited fire spread is expected with smoldering and creeping along the rest of the Division.

Div W: Moderate fire activity with surface spread on the north part of the division. The rest of the division should see limited fire activity with smoldering and creeping.

Div Z: There is potential for the fire to make an upslope run from Coal Creek to Bear Grass Butte on the eastern part of the Division. Otherwise expect to see minimal fire behavior with backing and creeping.

Structure Group: Limited fire activity is expected within the structure group.

Air Operations

Low level inversion and smoke lingering in the valley will limit the use of aviation throughout the day.

Safety

There are many areas on all divisions that have unburned fuel between the fireline and fire, be alert to the fires location to your position.

HEALTH AND SAFETY MESSAGE

SAFETY* starts with *YOU

We are **ALL** accountable for **SAFE** behaviors

INCIDENT: GOAT ROCKS FIRE	DATE:10/19/2022 TIME: 0600-2230
----------------------------------	---------------------------------

Major Hazards and Risk: Steep Terrain, Fatigue, Communications, Hydration, Nutrition, Driving Hazard, Rolling Material, HAZARD TREES, Hypothermia, Complacency

Human Factors to Situational Awareness

Low Experience Level with Local Factors

- Unfamiliar with the area or the organizational structure.

Distraction from Primary Task

- Radio traffic
- Conflict Previous errors
- Collateral duties
- Incident within an incident

Fatigue

- Carbon Monoxide
- Dehydration/ Heat stress
- Fitness level and time of year (long season) can reduce resistance to fatigue

Watch Out Situations

Unburned Fuel Between you and the Fire

Terrain and Fuels make Escape to Safety Zones Difficult

Definition of luck:
Success apparently brought on by chance rather than ones own actions.

FIREORDER OF THE DAY

Fight fire aggressively, having provided for safety first.

Fire Environment Factors: Fuel Characteristics

- Cured or curing grasses and leaves
- Continuous loads of dead fine fuels
- Heavy dead and down fuel loads
- Tight crown spacing (<20')
- Tall (deep) grass and shrub fuel beds
- Unusually low dead fuel moisture estimates (locally defined)

Special conditions (see page 36 in IRPG)

FINANCE

Goat Rocks Finance appreciates your hard work and awesome safety record. Your finance record is also amazing. Thanks for continuing to send in your CTRs and STs daily.

You may contact us at

2022.GoatRocks.Finance@firenet.gov

or call 435-671-1506.

SHORT-HAUL OPERATIONS

CAPABILITIES

- During an operational Short-Haul the helicopter is capable of inserting Short-Haulers into an area with tight canopy cover and/or technical terrain.
- Haul line lengths range from 100 feet to 350 feet.
- Short hauler and/or medical gear can be delivered to the medical scene even if extraction by short-haul is not necessary.

ORDERING

- EMT or Medical Incident IC determines medical extraction is required.
- Follow local established procedures and/or Medical Incident Report (MIR) in the IRPG.
- Confirm aircraft type, call sign, estimated time of arrival and frequency.
- Give site selection information when ordering: hazards (i.e. ash, smoke, snags, aerial), tree height, terrain, and patient transport configuration (supine or seated position). Repeat hazards and give updated weather conditions as well as brief patient update to responding helicopter.

PROCESS: The helicopter will fly to the coordinates provided. They will make contact with ground personnel on scene with the patient using an identified air-to-ground frequency. The helicopter will complete a short-haul recon and size up, gather patient update information and then fly to a landing zone (LZ) to configure for short-haul operations. The helicopter will be monitoring the appropriate air-to-ground, air guard and victor frequencies. From this point, ground resources should only contact the helicopter in case of an emergency. During the insertion and extraction process ground personnel must be clear of the area.

ON SCENE – EXPECT THE FOLLOWING

- 1 or 2 rescuers (at least one qualified as an EMT or higher)
- Backboard (if needed and not already on scene)
- All equipment necessary for patient extraction

The Patient Extraction Bag accommodates most backboards, TRS, SKED, and litters.

The Seat Harness is used for patients not requiring the use of a backboard.

Incident within an Incident (IWI)

On Scene at location of the patient with significant injury

Upon occurrence of a “**Medical Emergency**” within the incident involving significant injury, complex situation or fatality, the highest qualified person on-scene shall take control of the situation as the **On-Scene Incident Commander** and declare **Medical Emergency** on the incident Command Channel to **Goat Rocks Communications**. The nearest **Division/ Group Supervisor** or **Operations Chief, Safety** will respond to the scene to support IWI.

On Scene Incident Commander or **Goat Rocks Communications** will take immediate action to clear all radio traffic on the incident Command Channel by broadcasting “*Emergency Traffic Only*”.

On Scene Incident Commander or **Division Group Supervisor** or **Operations Chief** will notify Air Attack of IWI and provide GPS location incident and extraction point.

On-Scene Incident Commander will complete Medical Incident Report (MIR) as soon as possible and relay to Incident Communications. **At no time during the incident will the name of the patient(s) be used over the radio.**

Information Officer will manage external communication. All information released from the incident shall be through the **Information Officer** with the approval of the **Incident Commander**.

The **Incident Commander** will contact the **Agency Administrator** and local **Duty Officer** who will contact appropriate officials of the agency.

If the incident involves a fatality, the **Agency Administrator** will be responsible for implementing Agency specific protocols.

For non-serious (green) incidents that do not require transport to medical facility **On Scene Incident Commander** will notify **Division/ Group Supervisor** and **Safety**. These incidents do not require immediate notification through Goat Rocks Communication.

PUBLIC INFORMATION

Need an item from a store, such as a toiletry, a blanket, an extra jacket, etc.? Text PIO Bethany Urban to see if the local thrift store has it in stock. They have offered to donate items that firefighters need. Text Bethany with what you need and she will pick it up for you: 720-938-0996

Need something mailed to you?

USPS it to:

Cowlitz Valley Ranger Station
Attn: Your Name, Your Resource Order
PO Box 670
Randle, Washington 98377

UPS it to:

Cowlitz Valley Ranger Station
Attn: Your Name, Your Resource Order
10024 US Highway 12
Randle, Washington 98377

Please have the sender include a return address in case there are delays.

MEDICAL PLAN (ICS 206 WF)

Controlled Unclassified Information//Basic

Medical Incident Report

FOR A NON-EMERGENCY INCIDENT, WORK THROUGH CHAIN OF COMMAND TO REPORT AND TRANSPORT INJURED PERSONNEL AS NECESSARY.

FOR A MEDICAL EMERGENCY: IDENTIFY ON-SCENE INCIDENT COMMANDER BY NAME AND POSITION AND ANNOUNCE "MEDICAL EMERGENCY" TO INITIATE RESPONSE FROM IMT COMMUNICATIONS/DISPATCH.

Use the following items to communicate situation to communications/dispatch.

1. CONTACT COMMUNICATIONS / DISPATCH (Verify correct frequency prior to starting report)

Ex: "Communications, Div. Alpha. Stand-by for Emergency Traffic."

2. INCIDENT STATUS: Provide incident summary (including number of patients) and command structure.

Ex: "Communications, I have a Red priority patient, unconscious, struck by a falling tree. Requesting air ambulance to Forest Road 1 at (Lat./Long.) This will be the Trout Meadow Medical, IC is TFLD Jones. EMT Smith is providing medical care."

Severity of Emergency / Transport Priority	<input type="checkbox"/> RED / PRIORITY 1 Life or limb threatening injury or illness. Evacuation need is IMMEDIATE <i>Ex: Unconscious, difficulty breathing, bleeding severely, 2^o - 3^o burns more than 4 palm sizes, heat stroke, disoriented.</i> <input type="checkbox"/> YELLOW / PRIORITY 2 Serious Injury or illness. Evacuation may be DELAYED if necessary. <i>Ex: Significant trauma, unable to walk, 2^o - 3^o burns not more than 1-3 palm sizes.</i> <input type="checkbox"/> GREEN / PRIORITY 3 Minor Injury or illness. Non-Emergency transport <i>Ex: Sprains, strains, minor heat-related illness.</i>	
Nature of Injury or Illness & Mechanism of Injury		Brief Summary of Injury or Illness <i>(Ex: Unconscious, Struck by Falling Tree)</i>
Evacuation Request		Air Ambulance / Short Haul/Hoist Ground Ambulance / Other
Patient Location		Descriptive Location & Lat. / Long. (WGS84)
Incident Name		Geographic Name + Medical <i>(Ex: Trout Meadow Medical)</i>
On-Scene Incident Commander		Name of on-scene IC of incident within an incident <i>(Ex: TFLD Jones)</i>
Patient Care		Name of Care Provider <i>(Ex: EMT Smith)</i>

3. INITIAL PATIENT ASSESSMENT: Complete this section for each patient as applicable (start with the most severe patient)

Patient Assessment: See IRPG PAGE 106

Treatment:

4. EVACUATION PLAN:

Evacuation Location (if different): (Descriptive Location (drop point, intersection, etc.) or Lat. / Long.) Patient's ETA to Evacuation Location:

Helispot / Extraction Site Size and Hazards:

5. ADDITIONAL RESOURCES / EQUIPMENT NEEDS:

Example: Paramedic/EMT, crews, immobilization devices, AED, oxygen, trauma bag, IV/fluid(s), splints, rope rescue, wheeled litter, HAZMAT, extrication

6. COMMUNICATIONS: Identify State Air/Ground EMS Frequencies and Hospital Contacts as applicable

Function	Channel Name/Number	Receive (RX)	Tone/NAC *	Transmit (TX)	Tone/NAC *
COMMAND					
AIR-TO-GRND					
TACTICAL					

7. CONTINGENCY: Considerations: if primary options fail, what actions can be implemented in conjunction with primary evacuation method? Be thinking ahead..

8. ADDITIONAL INFORMATION: Updates/Changes, etc.

REMEMBER: Confirm ETAs of resources ordered. Act according to your level of training. Be Alert. Keep Calm. Think Clearly. Act Decisively.
