INCIDENT OBJECTIVES (ICS 202)

1. Incident Name:	2. Operational Period: DAY SHIFT	
09/22/2022 - 09/24/2022 0700 - 2000 WHITE RIVER/IRVING PEAK/MINNOW	Date/Time From: 09/22/2022 0700 Thur	Date/Time To: 09/24/2022 2000 Sat
3. Objective(s):		
4. Operational Period Command Emphasis:		
<p>Strategic Framework: The White River, Irving Peak, and Minnow Ridge fires are being suppressed with a combination of strategies and tactics that provide the highest likelihood of success while mitigating risks to responders. Values at risk include human safety, private property, recreational resources and critical habitat for T&E species.</p> <p>Management Objectives:</p> <ul style="list-style-type: none"> • Ensure the safety and well-being of emergency responders and the public by making timely risk-informed decisions that align with the values at risk. • Protect the communities of Lake Wenatchee and the surrounding area from wildfire impacts. • Protect infrastructure (private property, recreation sites and View Point RAWs) by engaging agency resource advisors, partners, and community stakeholders in effective communication and planning. • Where it will not impeded suppression and safety objectives, apply tactics which limit impacts to and support management goals of Glacier Peak Wilderness, Canyon Creek Inventoried Roadless Area, and endangered terrestrial and aquatic species. • Foster good relationships with local cooperators, stakeholders, and the public by providing coordinated, accurate and timely information. • Keep cost commensurate with values at risk by working with the local unit and coordinating with the Agency Administrator and Incident Business Advisor. • Treat each other with dignity and respect and act in a professional manner on the fire and in the community. • Coordinate with the COVID-19 Advisors and Health Liaison to ensure COVID mitigation measures and COVID response are in alignment with Agency expectations and adapt, as necessary, to changing conditions. <p>Control Objectives:</p> <p><u>White River Fire</u> - Implement confine, contain, and control strategies to prevent fire spread east of the 6400 road and south of the USFS 6500 system road.</p> <p><u>Irving Peak Fire</u> - Implement confine, contain, control strategies to prevent fire spread south of the USFS 6500 system road. Utilize natural features (such as rock escarpments, avalanche chutes and streams) to the north to limit fire spread within the planning area.</p> <p><u>Minnow Ridge Fire</u> - Scout and assess FS road 6210, identify and locate pre-existing containment lines from the 2018 Cougar fire. Identify values at risk to the south and west of the incident for infrastructures.</p>

Fire Weather Forecast

FORECAST NO: 35
FORECAST FOR: Thursday through Saturday
SHIFT DATE: 9/22/2022 - 9/24/2022
DATE AND TIME ISSUED: 9/21/2022 at 1200

NAME OF FIRE: White River/Irving Peak
UNIT: WA-OWF
SIGNED: *Jon Fox* - Incident Meteorologist
Jonathan Fox

WEATHER DISCUSSION: A slow moving upper level low pressure system will finally push east of the fires on Thursday ushering in a much cooler and more moisture laden air mass. It will also bring windy conditions, especially for westward facing aspects and exposed ridges. The winds will begin to ease Thursday night, but another weak system pushing through southern British Columbia on Friday will deepen the marine layer and could deliver some light rain or sprinkles to western portions of the Irving Fire. The cooler weather will end by the weekend into early next week as strong upper level ridging rebounds over the Pacific Northwest returning dry and warm conditions.

Thursday:

WEATHER: Mostly sunny. Cooler and breezy.

MAXIMUM TEMPERATURE: 64-70F valleys and mid slopes and 51-54F ridgetops.

MINIMUM RELATIVE HUMIDITY: Valleys and mid-slopes: 30-38%. Ridgetops: 38-45%

20-FOOT RIDGETOP WINDS:

- **Ridgetops and west facing slopes:** West-northwest 6 to 10 mph increasing to 12 to 17 mph in the afternoon with gusts of 25-30 mph.
- **Valleys:** Light west to northwest wind through mid-morning, increasing to 6 to 10 mph in the afternoon with gusts to 20 mph.

CHANCE OF WETTING RAIN (> 0.10"): 0%

HAINES INDEX: 4 (low)

INVERSIONS: Weak surface inversion lifting around 1000.

LIGHTNING ACTIVITY LEVEL: 1

AFTN MIXING HEIGHTS: 6000 ft AGL

Friday:

WEATHER: Mostly cloudy. A slight chance of light rain or sprinkles, mainly on the western portions of the Irving Peak fire. Chance of rain on Irving Peak 20% with less than 10% chance on the other fires.

MAXIMUM TEMPERATURE: 60-65F valleys and mid slopes and 47-52F ridgetops.

MINIMUM RELATIVE HUMIDITY: Valleys and mid-slopes: 40-50%. Ridgetops: 55-65%

20-FOOT RIDGETOP WINDS:

- **Ridgetops:** West to northwest 10 to 15 mph with gusts of 20 to 25 mph.
- **Valleys:** Northwest to west 4 to 7 mph in the morning increasing to 5 to 9 mph in the afternoon with gusts to 15 mph.

CHANCE OF WETTING RAIN (> 0.10"): Less than 5%

HAINES INDEX: 2 (very low)

LIGHTNING ACTIVITY LEVEL: 1

AFTN MIXING HEIGHTS: 4500 ft AGL

Saturday:

WEATHER: Partly cloudy early, then mostly sunny. Warmer.

MAXIMUM TEMPERATURE: 67-73 F valleys and mid slopes and 54-60F ridgetops.

MINIMUM RELATIVE HUMIDITY: Valleys and mid-slopes: 30-36%. Ridgetops: 45-52%

20-FOOT RIDGETOP WINDS:

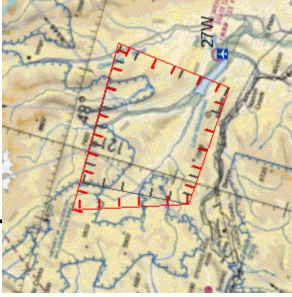

- **Ridgetops:** West to northwest 4 to 8 mph in the morning trending to the southwest in the afternoon with gusts to 12 mph.
- **Valleys:** Variable 0-3 mph in the morning becoming upslope 3 to 6 mph by midday.
- **CHANCE OF WETTING RAIN (> 0.10"): 0%**

HAINES INDEX: 2 (very low)

LIGHTNING ACTIVITY LEVEL: 1

AFTN MIXING HEIGHTS: 6000 ft AGL

Sunday through Tuesday Outlook: Sunny Sunday and Monday, Partly cloudy Tuesday. Valley highs in the mid 70s to lower 80s. Ridgetop highs in the lower to middle 60s. Light terrain driven winds.

Resource Advisor Guidance for White River and Irving Peak Fires

Forest Service:

LEAD READ/REAF: Don Youkey
360-547-2134

Resource Advisors will be readily available to Operations in camp & in the field to assess the potential effects of planned actions. All recommendations and requirements are linked to those in the WFDSS and are secondary to firefighter and public life, safety and property.

Equipment:

- All heavy equipment must be cleaned/weed washed prior to use on the fire, and prior to demob.
- All staging areas & drop points outside of road prism or trail system need prior approval from READ.

Cultural Resources:

- Please leave cultural resources in place. GPS or map, photo, and report to READ.

Dipping:

- Follow all Aquatic Invasive Fire Operation Guidelines.
- Keep track of number of buckets dipped from each source using dip site log and report to READ.

Drafting:

- Use Lake Wenatchee, Little Wenatchee River or White River for the primary sources of water, other sources can be used for mission critical activities.
- Use screens (3/32") for all pumping operations.
- Use catch basins under pumps & fuel cans. Ensure a spill kit is present with every operating pump.

Riparian Reserve (RR):

- If feasible, do not cut trees within 100 feet of fish bearing streams. The READ will identify fish bearing streams.
- Snags that need to be cut within the RR should be felled toward the water if feasible, and left onsite.
- Minimize damage to culverts, bridges etc.
- Minimize equipment travel in the Riparian Reserve. All landing sites will be outside of the RR.
- Minimize burn severity within the Riparian Reserve.

Cutting Operations/Feller Buncher/ Skidder/ Processing Operations:

- Limit cutting of live trees greater than 25" diameter. Consult with READ if removal is necessary.

Dozer lines and handlines:

- Consult READ **prior** to construction of new dozer line, unless there is imminent threat to life and property, then **NO** READ consultation needed.
- In all cases, the use of roads and old dozer lines is **preferred**.
- Minimize dozer blade depth to exposed mineral soil; **avoid** excessive depth and large berms.
- Avoid dozer lines in stream channels or RR, unless **prior** approval has been given by READ.
- Equipment should stay on roads and dozer lines. **Avoid** cross-country travel.

White River & Irving Peak Fires

LOGISTICS INFORMATION

ICP HOURS

Food	0630 - 0800 and 1800 - 2000
Medical Tent	0600 - 2100 (available 24 hours)
Shower	0600 - 1200 and 1400 - 2100
Supply	0600 - 2100

Message

Batteries and garbage bags are available at Supply

THANK YOU

Finance Message

- If you have **GOVERNMENT PROPERTY DAMAGE OR LOSS** (or any other Claim information) to Report. NOTIFY FINANCE AS SOON AS POSSIBLE.
 - You can Send an email to Finance, Attn: COMP (we can send you Electronic forms and instructions)
 - Or come see the COMP in Finance.
 - PLEASE DO NOT WAIT UNTIL YOUR DEMOB!

- Please submit all signed time documents (CTR's, Shift Tickets, Resource Orders, Agreements, Casual Hire Forms, etc.) as a **PDF** to the email address or QR code:
2022.whiteriver.finance@firenet.gov

- Electronic CTRs and shift tickets are included in the QR code on the front page of the IAP. These forms are optional, you may continue to fill out paper copies, scan and email.
- Please name your documents as follows:
 - CTR_RO#_YYMMDD (*i.e. CTR_O24_220815*)
 - Multiple days CTR_RO#_YYMMDD-DD (*i.e. CTR_O25_220815-16*)
 - ST_RO#_YYMMDD (*i.e. ST_E5_220815*)
 - Multiple days ST_RO#_YYMMDD-DD (*i.e. ST_E14_220819-20*)
- When filling out time documents, continue to list the incident you were ordered on in the header, regardless of which fire you were working on. If the fire you worked on is not the fire you were ordered on, please note that in the comments section.

Thank you!

**White River / Irving Peak
ANDY PALMER-DUTCH CREEK PROTOCOL
UPDATED 08-31-2022**

LEADER'S INTENT: To establish travel times from key areas of the fire to ICP/MEDICAL UNIT as well as Harborview Medical Center in Seattle WA, Cascade Medical Center in Leavenworth WA, and Central Washington Hospital in Wenatchee WA via ground transportation. See Medical Plan (ICS206) for travel times via air. Not every DP is on this chart. Travel times are approximate and one should always consider weather, time of day, and traffic congestion.

Ground Transport Only	ICP Medical Unit	Cascade Medical Leavenworth (Level 5)	Central Washington Hospital (Level 3)	Harborview Seattle (Level 1) ABA Burn Center
DP 60	30 MINS	45 MINS	1.25 HRS	2.75 HRS
DP 100	20 MINS	30 MINS	1 HR	2.5 HRS
DP 104	30 MINS	45 MINS	1.25 HRS	2.75 HRS
DP 107	45 MINS	1 HR	1.5 HRS	3 HRS
DP 109	1.25 HRS	1.5 HRS	2.5 HRS	3.5 HRS
DP 144	20 MINS	45 MINS	1.25 HRS	2.75 HRS
DP 145	20 MINS	30 MINS	1 HR	2.5 HRS
DP 147	45 MINS	1 HR	1.5 HRS	3 HRS
DP 161	15 MINS	30 MINS	1 HR	2.5 HRS

STUDY YOUR MAP, KNOW WHERE YOU ARE WORKING, AND KNOW WHERE YOUR MEDICAL RESROUCES ARE LOCATED. SITUATIONAL AWARENESS IS YOUR JOB.

MEDICAL PLAN (ICS 206 WF)

Controlled Unclassified Information//Basic

Medical Incident Report

FOR A NON-EMERGENCY INCIDENT, WORK THROUGH CHAIN OF COMMAND TO REPORT AND TRANSPORT INJURED PERSONNEL AS NECESSARY.

FOR A MEDICAL EMERGENCY: IDENTIFY ON-SCENE INCIDENT COMMANDER BY NAME AND POSITION AND ANNOUNCE "MEDICAL EMERGENCY" TO INITIATE RESPONSE FROM IMT COMMUNICATIONS/DISPATCH.

Use the following items to communicate situation to communications/dispatch.

1. CONTACT COMMUNICATIONS / DISPATCH (Verify correct frequency prior to starting report)

Ex: "Communications, Div. Alpha. Stand-by for Emergency Traffic."

2. INCIDENT STATUS: Provide incident summary (including number of patients) and command structure.

Ex: "Communications, I have a Red priority patient, unconscious, struck by a falling tree. Requesting air ambulance to Forest Road 1 at (Lat./Long.) This will be the Trout Meadow Medical, IC is TFLD Jones. EMT Smith is providing medical care."

Severity of Emergency / Transport Priority	<input type="checkbox"/> RED / PRIORITY 1 Life or limb threatening injury or illness. Evacuation need is IMMEDIATE <i>Ex: Unconscious, difficulty breathing, bleeding severely, 2° – 3° burns more than 4 palm sizes, heat stroke, disoriented.</i> <input type="checkbox"/> YELLOW / PRIORITY 2 Serious Injury or illness. Evacuation may be DELAYED if necessary. <i>Ex: Significant trauma, unable to walk, 2° – 3° burns not more than 1-3 palm sizes.</i> <input type="checkbox"/> GREEN / PRIORITY 3 Minor Injury or illness. Non-emergency transport <i>Ex: Sprains, strains, minor heat-related illness.</i>	
Nature of Injury or Illness & Mechanism of Injury		<i>Brief Summary of Injury or Illness (Ex: Unconscious, Struck by Falling Tree)</i>
Evacuation Request		<i>Air Ambulance / Short Haul/Hoist Ground Ambulance / Other</i>
Patient Location		<i>Descriptive Location & Lat. / Long. (WGS84)</i>
Incident Name		<i>Geographic Name + Medical (Ex: Trout Meadow Medical)</i>
On-Scene Incident Commander		<i>Name of on-scene IC of Incident within an Incident (Ex: TFLD Jones)</i>
Patient Care		<i>Name of Care Provider (Ex: EMT Smith)</i>

3. INITIAL PATIENT ASSESSMENT: Complete this section for each patient as applicable (start with the most severe patient)

Patient Assessment: See IRPG PAGE 106

Treatment:

4. EVACUATION PLAN:

Evacuation Location (if different): (Descriptive Location (drop point, intersection, etc.) or Lat. / Long.) Patient's ETA to Evacuation Location:

Helispot / Extraction Site Size and Hazards:

5. ADDITIONAL RESOURCES / EQUIPMENT NEEDS:

Example: Paramedic/EMT, crews, immobilization devices, AED, oxygen, trauma bag, IV/fluid(s), splints, rope rescue, wheeled litter, HAZMAT, extrication

6. COMMUNICATIONS: Identify State Air/Ground EMS Frequencies and Hospital Contacts as applicable

Function	Channel Name/Number	Receive (RX)	Tone/NAC *	Transmit (TX)	Tone/NAC *
COMMAND					
AIR-TO-GRND					
TACTICAL					

7. CONTINGENCY: Considerations: If primary options fail, what actions can be implemented in conjunction with primary evacuation method? Be thinking ahead.

8. ADDITIONAL INFORMATION: Updates/Changes, etc.

REMEMBER: Confirm ETA's of resources ordered. Act according to your level of training. Be Alert. Keep Calm. Think Clearly. Act Decisively
