

INFRARED INTERPRETER'S DAILY LOG

Incident Name: White River WA-OWF-000319	IR Interpreter(s): Trisha Boll Trisha.boll@usda.gov	Local Dispatch Phone: WA-CWC 509-884-3473	Interpreted Size: 10,899 Acres White River only Growth last period: 79 Acres
Flight Time: 2033 PDT Flight Date: 10/13/2022	Interpreter(s) location: Whitefish, MT Interpreter(s) Phone: 406-212-7878	GACC IR Liaison: Jim Grace GACC IR Liaison Phone: 541-771-4521	National Coordinator: Tom Mellin National Coord. Phone: 505-842-3845
Ordered By: WA-OWF 509-884-3473	A Number: A-113	Aircraft/Scanner System: N350FV/TK9	Pilots/Techs: Tech: Wren
IRIN Comments on imagery: Two passes, imagery is pretty good, some georeferencing issues		Weather at time of flight: Clear	Flight Objective: IR heat perimeter and heat sources
Date and Time Imagery Received by Interpreter: 10/13/2022 2048 PDT		Type of media for final product: IRIN Log, Shapefiles, File Geodatabase, KMZ, PDF Maps Digital files sent to: NIFS and FTP	
Date and Time Products Delivered to Incident: 10/14/2022 0352 PDT uploaded to NIFS 10/13/2022 0355 PDT uploaded to ftp site		https://ftp.wildfire.gov/public/incident_specific_data/pacific_nw/2022_Incidents_Washington/2022_White_River_WA-OWF-000319/IR/20221014	
Comments /notes on tonight's mission and this interpretation: Began with IR heat perimeter from the previous mission for both White River and Meander fires. White River – 10,899 acres mapped tonight, with 79 acres of growth Meander – 65 acres mapped tonight, with 3 acres of growth. Heat perimeter growth was observed mainly on the east-northeast flank, where it continues to back north downslope toward White River. Activity is still noted in the Soda Creek drainage, as is yesterday's pocket of intense heat to the east of Devils Club Creek. There were many small areas of interior intense heat mapped tonight, along with some intense heat along the perimeter, usually associated with some heat perimeter expansion. No isolated heat signatures were detected outside of the main heat perimeter. Meander fire: Intense Heat remains where the perimeter grew yesterday to the east and a bit to the south. The perimeter has not changed in acreage overnight. The data was uploaded to NIFS, and included in the geospatial data, but it was not put on a map.
