Spot Forecast for 8 ROAD...WA DNR

Forecast is based on forecast start time of 1800 PDT on October 17.
If conditions become unrepresentative, contact the National Weather Service.

Please contact our office at (206) 526-6095, if you have questions or concerns with this forecast.

.DISCUSSION...High pressure through Wednesday will continue to pattern of warm and dry conditions. Smoke and haze from nearby wildfires is likely to reduce visibility and air quality most of the requested forecast period. Fire weather conditions will remain elevated through Wednesday given semi-unstable conditions and low afternoon RH values. Critical conditions will be avoided given light wind speeds. A wind shift from northwest to east is expected Tuesday evening. Decent RH recovery is expected each overnight period. Much drier conditions are likely just to the east of the fire towards Mt Rainier-will monitor RH trends closely both days to account for this, especially as winds shift to the east.

SAFETY MESSAGE

October 18, 2022

Situational Awareness: Trees & Snags

Snags, fire weakened trees, green trees. They come down and will continue to come down. The thing is not to be near them when they fall not just because of the bole of the tree but all the resulting breakage and debris that happens when trees fall. Different species have different degradation rates & root strength.

- Look up, look down, and look around. Keep your head on a swivel.
- Identify, communicate, and mitigate tree hazards in your fire operations.
- Utilize whatever information/guidance you have access to make deliberate decisions before engaging.
- Call in professional help if needed; i.e. fallers.
- **IRPG Pg. 20: Hazard Tree Safety**

Very little on a fire falls up!

Safety Officer: Kurt Krech SOF2

FOR A MEDICAL EMERGENCY: IDENTIFY ON SCENE INCIDENT COMMANDER BY NAME AND POSITION AND ANNOUNCE "MEDICAL EMERGENCY" TO INITIATE RESPONSE FROM IMT COMMUNICATIONS/DISPATCH.

Use the following items to communicate situation to communications/dispatch.

1. CONTACT COMMUNICATIONS / DISPATCH (Verify correct frequency prior to starting report)

Ex: "Communications, Div. Alpha. Stand-by for Emergency Traffic."

2. INCIDENT STATUS: Provide incident summary (including number of patients) and command structure.

Ex: "Communications, I have a Red priority patient, unconscious, struck by a falling tree. Requesting air ambulance to Forest Road 1 at (Lat./Long.) This will be the Trout Meadow Medical, IC is TFLD Jones. EMT Smith is providing medical care."

Severity of Emergency / Transport Priority	<input type="checkbox"/> RED / PRIORITY 1 Life or limb threatening injury or illness. Evacuation need is IMMEDIATE <i>Ex: Unconscious, difficulty breathing, bleeding severely, 2^o - 3^o burns more than 4 palm sizes, heat stroke, disoriented.</i> <input type="checkbox"/> YELLOW / PRIORITY 2 Serious Injury or Illness. Evacuation may be DELAYED if necessary. <i>Ex: Significant trauma, unable to walk, 2^o - 3^o burns not more than 1-3 palm sizes.</i> <input type="checkbox"/> GREEN / PRIORITY 3 Minor Injury or Illness. Non-Emergency transport <i>Ex: Sprains, strains, minor heat-related illness.</i>

On-Scene Incident Commander		Name of on-scene IC of Incident within an Incident <i>(Ex: TFLD Jones)</i>
Patient Care		Name of Care Provider <i>(Ex: EMT Smith)</i>

3. INITIAL PATIENT ASSESSMENT: Complete this section for each patient as applicable (start with the most severe patient)

Patient Assessment: See IRPG page 106

Treatment:

4. TRANSPORT PLAN:

Evacuation Location (if different): (Descriptive Location (drop point, intersection, etc.) or Lat. / Long.) Patient's ETA to Evacuation Location:

Helispot / Extraction Site Size and Hazards:

5. ADDITIONAL RESOURCES / EQUIPMENT NEEDS:

Example: Paramedic/EMT, Crews, Immobilization Devices, AED, Oxygen, Trauma Bag, IV/Fluid(s), Splints, Rope rescue, Wheeled litter, HAZMAT, Extrication
