

INFRARED INTERPRETER'S DAILY LOG

Incident Name: Meander WA-OWF-000397	IR Interpreter(s): Trisha Boll Trisha.boll@usda.gov	Local Dispatch Phone: WA-CWC 509-884-3473	Interpreted Size: 91 acres Growth last period: 12 Acres
Flight Time: 2014 PDT Flight Date: 10/15/2022	Interpreter(s) location: Whitefish, MT Interpreter(s) Phone: 406-212-7878	GACC IR Liaison: Jim Grace GACC IR Liaison Phone: 541-771-4521	National Coordinator: Tom Mellin National Coord. Phone: 505-842-3845
Ordered By: WA-OWF 509-884-3473	A Number: A-116	Aircraft/Scanner System: N350FV/TK9	Pilots/Techs: Tech: Wren
IRIN Comments on imagery: One pass. Imagery pixelated, especially to SW of perimeter. Same imagery as for White River.		Weather at time of flight: Clear	Flight Objective: IR heat perimeter and heat sources
Date and Time Imagery Received by Interpreter: 10/15/2022 2134 PDT		Type of media for final product: IRIN Log, Shapefiles, File Geodatabase, KMZ, PDF Maps Digital files sent to: NIFS and FTP	
Date and Time Products Delivered to Incident: 10/15/2022 0303 PDT uploaded to NIFS 10/13/2022 0305 PDT uploaded to ftp site		https://ftp.wildfire.gov/public/incident_specific_data/pacific_nw/2022_Incidents_Washington/2022_Meander_WA-OWF-000479/IR/20221016	
Comments /notes on tonight's mission and this interpretation: Began with IR heat perimeter from the previous mission for both White River and Meander fires. Heat perimeter growth was observed mainly the eastern and southern flanks; expansion was generally southward. The western perimeter remains cool, with no observed scattered or isolated heat. Intense heat is associated mainly with the perimeter growth. Intense heat along the central interior has reduced from yesterday. Yesterday's isolated heat source identified to the southwest of the main fire perimeter has expanded slightly from the day before. Location: 47° 55.082' N121° 7.707' W and identified on the .pdf maps.
