<b>Date and Time Imagery Received by Interpreter:</b> 10/12/2022 2131 PDT		<b>Type of media for final product:</b> IRIN Daily Log, Shapefiles, File Geodatabase, KMZ, PDF Maps <b>Digital files sent to:</b> NIFS and FTP (Address Below) /incident_specific_data/pacific_nw/2022_Incidents_Washington/ 2022_Minnow_Ridge_WA-OWF-000479/IR	
<b>Date and Time Products Delivered to Incident:</b> 10/13/2022 415 PDT			
<b>Comments /notes on tonight's mission and this interpretation:</b>  Started interpretation with the NIFS perimeter from 10/12/2022 0515 PDT  Intense heat and heat perimeter expansion was observed on the farthest east flank, extending toward Marble Meadow. The southwest and western flank increased their intense heat along the perimeter as well, but not as significantly. No isolated heat was observed outside of the perimeter, but there are several that are just inside the perimeter, the most notable being on the far north-central boundary.
