

INFRARED INTERPRETER'S DAILY LOG

Incident Name: Minnow Ridge WA-OWF-000479	IR Interpreter(s): Trisha Boll Trisha.boll@usda.gov	Local Dispatch Phone: WA-CWC 509-884-3473	Interpreted Size: 3,637 Growth last period: 105 Acres
Flight Time: 2028 PDT Flight Date: 10/13/2022	Interpreter(s) location: Whitefish, MT Interpreter(s) Phone: 406-212-7878	GACC IR Liaison: Jim Grace GACC IR Liaison Phone: 541-771-4521	National Coordinator: Jan Johnson National Coord. Phone: 801-824-5440
Ordered By: WA-OWF 509-884-3473	A Number: A-31	Aircraft/Scanner System: N350FV/TK9	Pilots/Techs: Tech: Wren
IRIN Comments on imagery: Single pass, alignment fairly good		Weather at time of flight: Mostly clear	Flight Objective: IR heat perimeter and heat sources
Date and Time Imagery Received by Interpreter: 10/13/2022 2009 PDT		Type of media for final product: IRIN Daily Log, Shapefiles, File Geodatabase, KMZ, PDF Maps Digital files sent to: NIFS and FTP (Address Below) /incident_specific_data/pacific_nw/2022_Incidents_Washington/ 2022_Minnow_Ridge_WA-OWF-000479/IR	
Date and Time Products Delivered to Incident: 10/14/2022 415 PDT			
Comments /notes on tonight's mission and this interpretation: Started interpretation with the NIFS perimeter from 10/13/2022 Intense heat and heat perimeter expansion was again observed on the east-southeast flank, extending south upslope to the west of Mad lake. There is an isolated heat source on the north of this area, between the new heat source and the existing main perimeter, 47° 56.500' N, 120° 40.271' W. The farthest east flank also has some new intense heat, still moving toward Marble Meadow. The southwest and western flank increased their intense heat along the perimeter as well, but not as significantly. Overall scattered heat has reduced within the heat perimeter, as has intense heat, except for the areas noted above.
