## INCIDENT OBJECTIVES (ICS 202)

<b>1. Incident Name:</b>		<b>2. Operational Period: DAY</b>	
FLAT/ANVIL		Date/Time From: 09/18/2023 0700      MON	Date/Time To: 09/18/2023 2100      MON
<b>3. Objective(s):</b>			
<p>Objectives (includes Flat and Anvil Fires):</p> <ol style="list-style-type: none"> <li>1) Expose firefighters to the least amount of risk necessary to accomplish work assignments during all phases of the incident.</li> <li>2) Limit fire size and control the fire perimeter to protect values at risk.</li> <li>3) Maintain and enhance relationships with stakeholders, cooperators, and partners.</li> <li>4) Provide accurate and timely incident information to the public utilizing inciweb, public meetings, and social media.</li> <li>5) Minimize adverse impacts to cultural, recreation, natural resources, watershed, wilderness, wildlife habitat, and local business concerns.</li> <li>6) Utilize strategic planning to develop implementation plans for a range of potential fire expansion scenarios.</li> <li>7) Support Rogue River-Siskiyou National Forest initial attack as requested by duty officers.</li> </ol> <p>Leaders Intent: Assigned incident responders will conduct themselves professionally in a way that encourages positive dialogue about hazard and risk evaluation and mitigation. This will be done across all areas of incidents from patrol and monitor to complex fireline engagement, indirect attack, and structure protection.</p> <p>Incident personnel are knowledgeable about the values at risk, public safety concerns, fireline hazards, risk analysis, and alternatives available for suppression actions.</p>			
<b>4. Operational Period Command Emphasis:</b>			
Anticipate change – Changes in your assignment or where you have been working do not necessarily mean that you change the pace of operations. Work to maintain superiority over the pace of operations by anticipating changes and talking out scenarios. This gives you time to react and stay ahead of changing fire conditions.			
<b>General Situational Awareness:</b>			
In a complex fire environment, navigating dynamic hazards, tasks, and variables requires a thoughtful approach. It's essential to maintain a strong command presence, stay adaptable and open to new information, as challenges can arise unexpectedly. Effective communication, collaboration, and problem-solving become even more crucial. Developing a structured yet flexible strategy, fostering a culture of continuous Learning can help individuals and teams thrive in complex environments.

# Fire Weather Forecast

**FORECAST NO:** 60  
**PREDICTION FOR:** Monday Operational Period  
**DATE:** September 18<sup>th</sup>, 2023  
**FORECAST ISSUED:** 1800 September 17<sup>th</sup>, 2023

**Fire:** Flat  
**UNIT:** OR-RSF-000209  
**IMET:** Brooke Taber 802-735-7196  
**Signed:** *Brooke Taber*

### WEATHER DISCUSSION:

A weak cold front will produce increasing relative humidity values, along with cooler temperatures and some intervals of clouds today. However, breezy ridgetop winds will prevail at 10 to 15 mph with localized gusts 15 to 25 mph, but lighter winds in protected valleys. Ridgetop winds shift back to the northeast on Monday night into Tuesday and continue gusty at times, with slightly better recoveries.

### TODAY:

**WEATHER:** Becoming partly sunny with patchy smoke.  
**MAX TEMP:** Valleys: 78-85°  
 Ridgetops: 68-75°

**MIN RH:** Valleys: 28-35%  
 Ridgetops: 31-36%

**CHC WTG RAIN:** 0%      **LAL:** 1      **HAINES:** 3(Low)

**20FT WINDS:** Valleys: Light downslope becoming north 5-10 gusts 10-15 mph after 1200.  
 Ridgetops: Northeast 10-15 mph gusts up to 20 mph, become north 15-20 gusts up to 25 mph by 1300.

**MIXING HEIGHT:** Rising to 4,000 ft AGL by 1200.      **TRANSPORT WIND:** Northeast around 30 mph.

### TONIGHT:

**WEATHER:** Partly cloudy with patchy smoke.  
**MIN TEMP:** Valleys: 46-53°  
 Ridgetops: 53-61°

**MAX RH:** Valleys: 78-88%  
 Ridgetops: 35-45%

**CHC WTG RAIN:** 0%      **LAL:** 1

**20 ft WINDS:** Valleys: North winds 5-10 mph, becoming downcanyon at 4-8 mph after midnight.  
 Ridgetops: North 10-15 mph gusts 20-25 mph, becoming northeast after midnight.

### TUESDAY:

**WEATHER:** Becoming partly sunny.  
**MAX TEMP:** Valleys: 76-82°  
 Ridgetops: 66-74°

**MIN RH:** Valleys: 27-35%  
 Ridgetops: 32-40%

**CHC WTG RAIN:** 0%      **LAL:** 1      **HAINES:** 3(Low)

**20FT WINDS:** Valleys: Upslope/northeast at 4-8 gusts 10-14 mph.  
 Ridgetops: Northeast winds 10-15 mph gusts 17 to 27 mph.

**MIXING HEIGHT:** Rising to 4000 ft AGL by 1200.      **TRANSPORT WIND:** Northeast around 30 mph.

**EXTENDED OUTLOOK:** Breezy ridgetop winds prevail through midweek with slightly cooler temperatures and daily thermal belts. A better onshore wind is possible toward late week with higher humidities and lower temperatures.

Nearby Weather Observations

# Fire Weather Forecast

FORECAST NO: 22  
 PREDICTION FOR: Monday Operational Period  
 DATE: September 18<sup>th</sup>, 2023  
 FORECAST ISSUED: 1800 September 17<sup>th</sup>, 2023

Fire: Anvil  
 UNIT: OR-RSF-000413  
 IMET: Brooke Taber 802-735-7196  
 Signed: *Brooke Taber*

### WEATHER DISCUSSION:

**\*\*\*Red Flag Warning for Breezy Ridgetop Winds and Near Critically Low Humidities Until Noon Today\*\*\***

A weak cold front will produce increasing relative humidity values, along with falling temperatures and some clouds by Monday afternoon. However, breezy northeast ridgetop winds will prevail at 10 to 15 mph with gusts 15 to 25 mph and shift to the north by 1200. Lighter winds in protected valleys. Ridgetop winds shift back to the northeast on Monday night into Tuesday and continue gusty at times, with slightly better recoveries.

### TODAY:

WEATHER: Breezy midslope and ridgetop winds with improving humidities.  
 MAX TEMP: 66-74°  
 MIN RH: 42-48%  
 MARINE LAYER DEPTH: 1200 feet.

CHC WTG RAIN: 0%      LAL: 1      HAINES: 3 (Low)

20FT WINDS: **Valleys:** Downvalley 4-8 mph, becoming upcanyon/upslope after 1400 with localized gusts up to 12 mph.  
**Ridgetops:** Northeast 10-15 mph gusts 18-24 mph, becoming north 15-20 gusts 22-27 mph after 1200.

### TONIGHT:

WEATHER: Partly cloudy with areas of smoke.  
 MIN TEMP: 46-54°  
 MAX RH: 42-52% ridges to 85-95% valleys  
 MARINE LAYER DEPTH: 1200 feet

CHC WTG RAIN: 0%      LAL: 1

20 ft WINDS: **Valleys:** Northeast/downslope winds 4-8 mph gusts up to 12 mph.  
**Ridgetops:** Becoming northeast 10-15 with localized gusts 15 to 25 mph.

### TUESDAY:

WEATHER: Mostly cloudy and smokey in the valleys, becoming sunny on the ridgetops.  
 MAX TEMP: 68-75°  
 MIN RH: 38-48%  
 MARINE LAYER DEPTH: Around 1400 feet and partial lifting by 1400.

CHC WTG RAIN: 0%      LAL: 1      HAINES: 3 (Low)

20FT WINDS: **Valleys:** Upslope/northeast at 4-8 gusts 10-14 mph.  
**Ridgetops:** Northeast winds 10-15 mph gusts 15 to 25 mph.

**EXTENDED OUTLOOK:** Breezy ridgetop winds prevail through midweek with slightly cooler temperatures and daily thermal belts. A better onshore wind is possible toward late week with higher humidities and lower temperatures.

Nearby Weather Observations

## Fire Behavior Forecast #64

<b>Name of Incident:</b> FLAT and ANVIL	<b>Administrative Unit:</b> OR-RSF
<b>Date &amp; Time Issued:</b> September 17, 2023 @ 1900	<b>Operational Period:</b> September 18, 2023
<b>FBAN:</b> Steve Ziel	<b>Signed:</b> /Z/

**Assumptions:** *RFW for NE wind with low RH on ridgetops through noon Monday (Anvil fire). Expect a shift to strong northerly wind by afternoon, with increasing clouds. Recent warming and drying has resulted in "peak of season" dry conditions. The effects of ridgetop winds may provide dynamic fire behavior during the operational period. Additional acreage on Anvil provides new wind/slope alignments, and fire spread concerns. Fire spread will depend on the effects of wind, otherwise slope and gravity spread will dominate fire behavior on lower slopes and valley locations. The Flat fire holds persistent scattered heat sources.*

### Weather Summary

See attached Fire Weather Forecast

### Fire Behavior Summary

**Fuels in the fire area** are primarily composed of very high load fluffy *Timber Litter (TL9)*, closed canopy *Timber Litter (TL5)* with needles, branches/ heavy fuel concentrations, and open canopy *Timber with Understory (TU5)*. Primary tree species include mixed sizes of Douglas Fir/mixed conifer timber stands. Shrub fields and understory species include Oregon Myrtlewood, maple(s), manzanita, other shrub-form hardwoods. Local timber litter may be "fluffy" with hardwood leaves/needle draped shrubs; or thin and compact. *Numerous snags and heavy fuel concentrations (often shrub covered) are common throughout all areas.* Live fuels (shrubs and hardwoods) are seasonally dry and may contribute to fire spread. Moss is common in timber stands as a ladder fuel.

*Today's "Peak Period" fire behavior: Expect very active fire behavior with warm, dry, and windy ridge top winds. Fire behavior characteristics may include surface fire runs, with group torching on steep wind facing slopes, and downwind spotting to ½ mile. Rapid spread on slopes, active flanks, and sustained backing is likely with wind/slope alignment. Rollout and falling snags on steep slopes may accelerate backing and produce flare-ups. Slope reversals may result in robust upslope runs with torching. Heavy fuels will continue to consume in-place and serve as heat sources if/when conditions change. Monitor wind speed/direction throughout the operational period. Heavy moss may contribute to spotting and torching.*

\* Fine fuel moisture= 6% (exposed). Probability of Ignition 40%-60% (exposed). Group torching Spotting distance 0.5 mile.

Fuel Type/Model	Rate of Spread	Flame Length	25 mph RFW Wind	RFW Spot Size in 1-hour
If your work area looks like -	Ch/hr = FPM		ROS - FL	*from spot or interior flare-up
Timber Litter (TL9) Fluffy/leafy	9 -12 ch/hr.	5 - 6 feet	20 - 6'+	5-10 acres
Timber w/ Shrub Understory (TU5)	8 - 10 ch/hr.	7 - 8 feet	15 - 10'	4-6 acres
Timber Litter – conifer needles (TL5)	4 - 6 ch/hr.	2 -3 feet	10 - 4'	2-4 acres

### Specific Assignments:

**FLAT** – Monitor smoke location and characteristics. Evaluate weather, including wind speed and direction. Moderate reburn potential. Many areas contain unburned pockets, fire killed shrubs, and ragged edge burn pattern.

**ANVIL - Ridgetop RFW NE winds possible.** Evaluate flareup's for spotting potential. Expect multiple areas of fire spread including slope runs and rapid surface fire spread and active flanks. Expect fingering fire spread on slopes, with torching. Sustained backing and rolling materials may cause flare-ups. Undetected spot fires may become active with wind. Several areas of likely slope reversal may cause rapid uphill spread with creek crossing. Group torching may produce spot fires to .5 miles.

**Air Operations:** Valley smoke inversion that may not break until afternoon, Dense downwind smoke to the south and west.

### Safety

**Potential for increased fire activity in several areas including wind driven fire spread and interior reburn...multiple areas of fire activity will require Lookouts, Communications, and Escape Routes and Safety Zones being established before engaging fire suppression (and throughout the operational period – watch for changing conditions).**

\*Today's Fire Behavior Forecast contains 648 (-63 from previous) words written for your situational awareness.

<b>6. Control Operations/Work Assignments:</b>						
TASK - Implement high probability of success tactics to keep the fire North and East of the Elk River and out of adjacent structures.						
PURPOSE - Protect structures in the Elk River corridor and limit fire spread to the West.						
END STATE - Structures along the Elk River have been protected and fire spread to the West halted.						
NEEDS: 1 FELB, 1 TFLD, 5 ENGS, 1 EXCA, 2 HEQB						
<b>7. Special Instructions:</b>						
Work bucket ships on the fire to limit growth.						
Medical support ground transport time is 2 hours.						
Coordinate actions with CFPA North Group as needed.

## **SAFETY MESSAGE**

*Fire fighter safety comes first on every fire, every time*

### **MAJOR 215 A HAZARDS AND RISKS**

- |   |  |
|---|--|
| <ul style="list-style-type: none"> <li>• Hazard Trees/Chain Saw Operations</li> <li>• Building/Working on Direct Fireline</li> <li>• Helicopter/Air Operations</li> <li>• UTV/ATV use</li> <li>• Heavy Equipment/Chipping</li> <li>• Wildlife -Rattlesnakes, bears etc.</li> <li>• Driving &amp; Traffic</li> <li>• Indirect Fireline</li> <li>• Structure Protection &amp; HAZMAT</li> </ul> | <ul style="list-style-type: none"> <li>• Mop-up/Rehab</li> <li>• Spotting &amp; Rolling material</li> <li>• Steep rocky, rough terrain -falls/slips</li> <li>• Severe Weather &amp; Extreme fire Behavior</li> <li>• Heat Related Illness/Dehydration</li> <li>• Smoke Exposure</li> <li>• Personal Hygiene- Sanitize twice daily</li> <li>• Poisonous Plants</li> <li>• Complex communications</li> </ul> |
|---|--|

#### **Situational Awareness**

The Cornerstone of good decision making is good situational awareness. Firefighters can increase their decision space by attaining and maintaining good situational awareness. To optimize your decision space, use your time efficiently by seeking information in new situations or utilizing SOP's for routine tasks.

In the wildland fire environment, decisions have serious consequences and often can have life-or-death implications for others. With so much on the line, you have the responsibility to understand the decision making process, the effect of time compression and develop the skills and confidence that enables you to make the best decision possible with the information and time available.

#### **DRIVING SAFETY**

Driving is one of the most hazardous things we do because we literally perform the task hundreds of times during our daily lives, we tend to take it for granted. Vehicle accidents are the source of more deaths and serious injuries to wildland firefighters than any other single cause.

- To be a safe driver you must want to be one. Take a good hard look at your driving habits.
- Inattentiveness is a major contributing factor in motor vehicle accidents within the wildland firefighting community.
- Avoid things that lure our attention away from driving such as: fatigue, eating/drinking, cell phone/radio use, etc.
- Safe driving starts with a safe vehicle. Before operating do, a thorough PM check to ensure vehicle is working properly

*Your Safety Team – Skeet Houston (SOFC), Wes Lathen (SOFC), Tracy Connelly (SOFC)*

# RESOURCE ADVISOR SPECIAL INSTRUCTIONS FOR OPERATIONAL RESOURCES

## PREVENT WEEDS PLEASE!!!! WEED WASH VEHICLES WHEN

- Moving equipment between divisions (including heavy equipment, transports, & utvs) Use the Old Mill Weed Wash once per day!
- Checking into the incident and when checking out (Old Mill Weed Wash)
- Going into and leaving the Anvil Fire area to keep gorse and scotch broom off public, tribal, and private lands

## FISH SCREENS

On all foot valves on pumps and tenders on Sixes, Illinois, Rogue, Lawson Creek, Hunter Creek, Elk River, Panther Creek, Butler Bar and any other fish-bearing streams. These are in addition to screens on pump hoses, and READs can/will deliver!

## PREVENT PORT-ORFORD-CEDAR ROOT DISEASE

At draft sites use bleach for water sources identified by resource advisors unless advised otherwise. Mix one gallon of bleach per 1,000 gallons of water in the engine or water tender. DO NOT dump leftover bleach on ground or near water bodies as it is lethal to aquatic life.

## LOOK FOR FLAGGING

Orange and black polka dot and yellow flagging mark resource areas to protect. Do not disturb.

## CONSTRUCT WATERBARS WHERE APPLICABLE—see repair plan for more details!

Waterbars prevent gulying by diverting water captured by a fireline.

- **Diagonal downhill:** Angle bars between 30 and 45 degrees in relation to fireline, avoid leading water on to roadways!
- **Depth of constructed water bar**
  - **Machine Line** - at least 6 inches; total height from bottom of ditch to the top of the waterbar should average at least 18 inches and not exceed 24 inches.
  - **Hand Line** - at least 4 inches; total height from bottom of ditch to top of waterbar should average at least 8 inches and not exceed 12 inches.
- **Dissipated:** If the outlet has the potential to create a gully, build a small rock "garden" to dissipate the flow (small chunks of wood will work).

Fire line Gradient (% slope)	Distance Between Waterbars (feet)
0 to 10%	Not needed
10 to 20%	100
21 to 40%	75
41 to 60%	50

Figure 1 – Diagram of Proper Waterbar Design

Utilize MIST (Minimum Impact Suppression Tactics) on Anvil Fire (page 96 of the IRPG)

~THANK YOU FOR BEING STEWARDS OF THE LAND!~

## PICK ME!!

And throw me in a trash bag, so my seeds don't spread!

### Noxious Weed Field Guide for the Gold Beach & Powers Ranger Districts

**Scotch Broom** CYSC4  
*Cytisus scoparius*  
Leaves 3-parted, few, thicker,  
& more pointed than French  
Flowers small, yellow  
Stems woody, dark green

**French Broom** GEMO2  
*Genista monspessulana*  
Leaves in 3s, hairy, dense,  
rounder, thinner & larger  
than Scotch  
Flowers small, yellow  
Stems woody

**Pampas Grass** COSE4  
*Cortaderia selloana*  
Leaves bluish-green or grey  
Flowers dense white  
Stems tall  
Evergreen bunchgrass

**False Brome** BRSY  
*Brachypodium sylvaticum*  
Leaves broad, hairy margins  
Spikelets pale green  
Stems hollow  
Bunch grass

**Canada Thistle** CIAR4  
*Cirsium arvense*  
Leaves alternate, lobed,  
yellow, spiny tips  
Flowers pink or purple  
Stems grooved

**Italian Thistle** CAPY2  
*Carduus pycnocephalus*  
Leaves deeply cut, spiny  
Flowers purple or pink  
Stems woolly, spiny

**Milk Thistle** SIMA3  
*Silybum marianum*  
Leaves wide, white veins  
Flowers red or purple  
Stems branch at top

**Yellow Starthistle** CESO3  
*Centaurea solstitialis*  
Leaves lower lobed,  
upper pointed  
Flowers yellow  
Stems rigid, winged, spiny

**Woolly Distaff Thistle** CALA20  
*Carthamus lanatus*  
Leaves spiny  
Flowers yellow  
Stems pale, rigid

If you're looking for something to do, this is satisfying, safe, and helpful to the local unit!

Thank you from the READ team!

# FLAT/ANVIL INCIDENT

OR-RSF-000209 (FLAT) OR-RSF-000413 (ANVIL)

## SUBMITTING TIME

- CTRs and Shift Tickets should be submitted at a minimum, every other day.
- Justifications are required in the remarks when posting Time without meal breaks.
- Hazard Pay is required to be justified in the remarks, such as: "Firefighting on an uncontrolled Fireline."
- The preferred method of turning in CTR's, Shift Tickets, or other associated Time documents is direct to our Finance email: [2023.flat.or.finance@firenet.gov](mailto:2023.flat.or.finance@firenet.gov) or [2023.anvil.finance@firenet.gov](mailto:2023.anvil.finance@firenet.gov).
- Taking a picture of your signed CTR/Shift Ticket is perfectly acceptable.
- If electronic delivery is not an option for you, we will accept hard copies at Finance.
- Our Finance email does not have an auto reply.

### Fillable PDF CTR/Shift Ticket:

Acceptable PDF's- We provide acceptable templates on the Virtual Documentation page within the IAP. However, we accept any version that is signable and has all of the required fields. Be mindful of what browser you open the PDF in, downloading the PRSDF form tends to prevent filling and signature issues.

- Option 1 - Resource fills out CTR/Shift Ticket and e-mails to supervisor for signature. Supervisor digitally signs CTR then e-mails signed copy back to resource AND resource forwards to Finance: [2023.flat.or.finance@firenet.gov](mailto:2023.flat.or.finance@firenet.gov) or [2023.anvil.finance@firenet.gov](mailto:2023.anvil.finance@firenet.gov).
- Option 2 – Resource fills out CTR, supervisor (if comfortable) signs directly on same device. Resource e-mails CTR directly to [2023.flat.or.finance@firenet.gov](mailto:2023.flat.or.finance@firenet.gov) or [2023.anvil.finance@firenet.gov](mailto:2023.anvil.finance@firenet.gov).

### Picture of Hard Copy CTR/Shift Ticket:

- Option 1 – Resource fills out hard copy CTR, supervisor signs hard copy. Resource takes a picture of the signed document, reviews picture to ensure it's legible, and emails to Finance: [2023.flat.or.finance@firenet.gov](mailto:2023.flat.or.finance@firenet.gov) or [2023.anvil.finance@firenet.gov](mailto:2023.anvil.finance@firenet.gov).
- Option 2 - Resource fills out hard copy CTR, snaps a picture of CTR and e-mails/texts to supervisor. Supervisor digitally signs CTR then e-mails signed copy back to resource AND [2023.flat.or.finance@firenet.gov](mailto:2023.flat.or.finance@firenet.gov) or [2023.anvil.finance@firenet.gov](mailto:2023.anvil.finance@firenet.gov).

### Resources on Demob list:

- Ensure all required documents have been sent to Finance and ensure Time submittals are current.
- Demob can be accomplished virtually via email. Refer to Demob instructions in IAP.

Contact Finance with any questions: 208-891-7855

# Great Basin Team 4

## Virtual Check-In/Demob Process

### Virtual Check-In Options:

#### **Option 1:**

Utilize QR code on IAP cover for check-in form or at <https://bit.ly/2Rr545v> (case sensitive, all lower case) to expedite check-in.

#### **Option 2:**

Stop by check in and provide the information in person.

---

## Demobilization Process

Please ensure you complete the following steps to successfully demob from the incident:

**If you are not on the demob list - or this is an Emergency DEMOB**

1. Your *incident supervisor* must submit a General Message (213) to the DEMOB email. The 213 must include the Resource Order number and name of the resource to be demobilized. The time and date of release and whether or not the resource is wanting a reassignment.

Then,

2. Return any items you checked out from Supply and Communications.
3. Complete Ground Support inspection. (If required).
4. Complete the FINANCE Process as described in the Finance Message in the IAP.
5. Call the DEMOB number to complete the process.

### IF YOU REQUIRE AIR TRAVEL

- Please click the **Demob Air Travel Request** button in the LinkTree (accessible from the QR on the IAP cover page), then call the DEMOB desk at least 72 hours before your scheduled DEMOB date to discuss flight/travel arrangements.

### FOR MORE INFORMATION

## Incident Replacement Guidelines

Prior to release from the incident, personnel may request replacement of standard equipment and supplies (NFES) that were damaged, lost, consumed, or worn out during the incident. Personnel must document the request on the most applicable form – Incident Replacement Requisition (OF-315), Saw Parts Order, or General Message (OF-213). This request should include a description of the use on the incident and/or why the item(s) need to be replaced. Requests must be signed by the **Division Supervisor** then approved by the **Operations Section Chief** prior to taking to Supply. Worn out or damaged property **will be turned into the Supply Unit**.

Approval for replacement of non-standard items (**Non NFES**) may need to be approved by the Incident Business Advisor (INBA). You should initiate this process at least two days prior to demob.

Personnel who need to replace/repair damaged property will document the request on an OF-289, Property Loss or Damage Report. This form requires Incident Supervisor recommendation as well as Subject Matter Expert determination, if appropriate. The form will then need to be turned into the Comp/Claims Unit Leader, who will track the claim and facilitate approval by the Finance Section Chief (FSC). Additional documentation may be required by the FSC. The FSC will decide, or recommend to the INBA, as to whether the items can be replaced or repaired with incident funds. After approval, Supply/Ordering will issue S numbers.

Items originally provided through use of preparedness funds which need to be replaced due to **normal wear and tear** (e.g. worn out tire tread, worn out chain saw bar, 5-yr old GPS that stops working, etc.) should be accomplished using home unit funds, not incident funds. If government property was damaged on the incident due to a specific event, (e.g. wind event destroys a tent) the incident could, upon receipt of required documentation and proof of damage, authorize replacement. **Replacement of non standard items that are worn out is the responsibility of the home unit.**

The OF-289, Property Loss or Damage Report is available at the Finance yurt or on the linktr.ee by accessing the QR code.

Please feel free to visit Finance, Logistics, or Operations if you have any questions.

**Incident within an Incident (IWI) Plan (Updated 03/01/2023)**

***On Scene at location of the patient with significant injury***

- Upon occurrence of a “**Medical Emergency**” within the incident involving significant injury, complex situation or fatality, the highest qualified person on-scene shall take control of the situation as the **On-Scene Incident Commander** and declare “**Medical Emergency**” on the incident Command Channel.
  - The nearest **Division /Group Supervisor or Operations Chief** will respond to the scene to support IWI or assume command.
  - On-Scene Incident Commander** or **Incident Communications** will take immediate action to clear all radio traffic on the incident Command Channel by broadcasting “**Emergency Traffic Only**”.
  - On-Scene Incident Commander** or **Division /Group Supervisor or Operations Chief** will notify Air Attack of IWI and provide the GPS location.
  - On-Scene Incident Commander** will complete Medical Incident Report (MIR) as soon as possible and relay to **Incident Communications**. **At no time during the incident will the name of the patient(s) be used over the radio.**
  - The nearest **Safety Officer** will respond to the IWI scene and assist the **On-Scene Incident Commander**.
- 

***ICP: Specific processes for C&G notification for both day and night will be determined upon arrival at each incident.***

- Immediately upon notification of a serious incident requiring emergency action the **Communications** unit will make radio and text group notifications to the **Incident Commander, Medical Unit Leader, Planning Operations, Safety Officer, Air Operations, Plans Chief, Logistics Chief, Finance Chief, Information Officer and Liaison** who shall respond to the incident communications facility.
- In the absence of the **Incident Commander**, the **Plans Chief** will assume the lead role.
- Determine the most appropriate radio operator based on situation and experience.
  - The **Medical Unit Leader** normally operates the radio during patient assessment/care portion of the incident.
  - The **RADO’s** are responsible for documentation.
- Utilize Incident Within an Incident Prompt Sheet
- The **Information Officer** will manage external communication. All information released from the incident shall be through the **Information Officer** with the approval of the **Incident Commander**.
- The **Incident Commander** will contact the **Agency Administrator** who will contact appropriate officials of the agency.
  - If the accident involves a fatality, the **Agency Administrator** will be responsible for implementing Agency specific protocols.
- For non-serious (green) incidents the Safety Officers or Medical Unit Leaders will notify the appropriate overhead as necessary.

**\*Non-medical IWI's (ex. fuel leaks, damaged equipment, road closures, hazardous situations, etc.) that are critical to personnel safety, will be announced over the Command Frequency and on the C & G text group.**

**\*Non-medical/non-critical IWI's notifications will be sent through the C & G text group.**
