INCIDENT OBJECTIVES (ICS 202)

1. Incident Name:		2. Operational Period: DAY	
FLAT/ANVIL		Date/Time From: 09/20/2023 0700 WED	Date/Time To: 09/20/2023 2100 WED
3. Objective(s):			
<p>Objectives (includes Flat and Anvil Fires):</p> <ol style="list-style-type: none"> 1) Expose firefighters to the least amount of risk necessary to accomplish work assignments during all phases of the incident. 2) Limit fire size and control the fire perimeter to protect values at risk. 3) Maintain and enhance relationships with stakeholders, cooperators, and partners. 4) Provide accurate and timely incident information to the public utilizing inciweb, public meetings, and social media. 5) Minimize adverse impacts to cultural, recreation, natural resources, watershed, wilderness, wildlife habitat, and local business concerns. 6) Utilize strategic planning to develop implementation plans for a range of potential fire expansion scenarios. 7) Support Rogue River-Siskiyou National Forest initial attack as requested by duty officers. <p>Leaders Intent: Assigned incident responders will conduct themselves professionally in a way that encourages positive dialogue about hazard and risk evaluation and mitigation. This will be done across all areas of incidents from patrol and monitor to complex fireline engagement, indirect attack, and structure protection.</p> <p>Incident personnel are knowledgeable about the values at risk, public safety concerns, fireline hazards, risk analysis, and alternatives available for suppression actions.</p>			
4. Operational Period Command Emphasis:			
<p>Things will happen around us that are unintended, or not planned. To always experience success is an unrealistic expectation. In these moments, all we can own is how we choose to respond. How we decide to show up as person to these situations will directly influence our response and impact the potential for a positive and constructive outcome. Engaging in these situations as the best person we can be displays compassion for the situation and for others that are involved.</p>			
General Situational Awareness:			
<p>Flexibility is similar to adaptability, but the two are not the same. In relation to your attitude and behaviors at work, they can be defined as follows: Flexible in the way you work. Willing to accommodate others' needs and not be preoccupied with your own objectives. Adaptable to the prevailing circumstances, i.e. having the ability to adapt to the way other people work and cope with differences in conditions or environment.</p>			
5. Site Safety Plan Required? Yes <input type="checkbox"/> No <input checked="" type="checkbox"/>			
Approved Site Safety Plan(s) Located			
6. Incident Action Plan (the items checked below are included in this Incident Action Plan):

Fire Weather Forecast

FORECAST NO: 62
 PREDICTION FOR: Wednesday Operational Period
 DATE: September 20th, 2023
 FORECAST ISSUED: 1800 September 19th, 2023

Fire: Flat
 UNIT: OR-RSF-000209
 IMET: Jimmy Taeger (240) 778-5291
 Signed: *Jimmy Taeger*

WEATHER DISCUSSION:

Critical Fire Weather Conditions for Gusty Ridgetop Winds and Low Humidity through Thursday
 Relative humidity will quickly lower Wednesday afternoon after poor to moderate overnight recovery. This, combined with breezy northerly wind gusts of 20 to 30 mph, will create critical fire weather conditions through the period.

TODAY:

WEATHER: Mostly clear with patchy smoke.
 MAX TEMP: Valleys: 71-77°
 Ridgetops: 58-63°

MIN RH: Valleys: 27-33%
 Ridgetops: 20-29%

CHC WTG RAIN: 0% LAL: 1

HAINES: 4(Low)

20FT WINDS: Valleys: Downslope 4 to 8 mph, becoming north 5-10 with gusts 10-18 mph after 1400.
 Ridgetops: Northeast 10-15 mph with gusts to 25 mph, become north 10-15 with gusts up to 30 mph after 1400.

MIXING HEIGHT: Rising to 4,000 ft AGL by 1100.

TRANSPORT WIND: North Northeast around 25 mph.

TONIGHT:

WEATHER: Mostly clear with patchy smoke.
 MIN TEMP: Valleys: 46-53°
 Ridgetops: 53-59°

MAX RH: Valleys: 75-85%
 Ridgetops: 40-60%

CHC WTG RAIN: 0% LAL: 1

20 ft WINDS: Valleys: Becoming downcanyon at 4-8 mph after midnight.
 Ridgetops: North 10-15 mph with gusts 20 mph, becoming northeast after midnight.

THURSDAY:

WEATHER: Mostly clear with patchy smoke.
 MAX TEMP: Valleys: 76-82°
 Ridgetops: 63-70°

MIN RH: Valleys: 25-31%
 Ridgetops: 28-35%

CHC WTG RAIN: 0% LAL: 1

HAINES: 3(Low)

20FT WINDS: Valleys: Upslope/north 5-10 with gusts 15-18 mph.
 Ridgetops: North northeast 10-15 mph with gusts to 25 mph, becoming north after 1300.

MIXING HEIGHT: Rising to 4000 ft AGL by 1200.

TRANSPORT WIND: Northeast around 20 mph.

EXTENDED OUTLOOK: Cooler and higher humidities are expected by the weekend. Chances of light rain return early Saturday, with increasing chances into early next week.

WEATHER DISCUSSION:

Critical Fire Weather Conditions for Gusty Ridgetop Winds and Low/Moderate Humidity through Thursday

Breezy northerly winds are expected Wednesday, with gusts near 30 mph possible close to the ridges. Relative humidity will lower to near 40% by the afternoon. Patchy drizzle or light rain may develop across western portions of the fire in the morning, then improve around 0900.

TODAY:

WEATHER: Patchy drizzle before 0900, then mostly clear with areas of smoke.
 MAX TEMP: 63-70°
 MIN RH: 35-45%.
 MARINE LAYER DEPTH: Around 800 feet, lifting by 1300.

CHC WTG RAIN: 0% LAL: 1 HAINES: 4 (Low)

20FT WINDS: **Valleys:** Upslope/northeast at 4-8 gusts 10-15 mph.
Ridgetops: North-northeast winds 10-15 mph with gusts to 25 mph, becoming north northwest after 1400 with gusts to 30 mph.

TONIGHT:

WEATHER: Mostly clear with areas of smoke.
 MIN TEMP: 47-54°
 MAX RH: 50-60% ridges to 77-80% valleys
 MARINE LAYER DEPTH: 900 feet

CHC WTG RAIN: 0% LAL: 1

20 ft WINDS: **Valleys:** Northeast/downslope winds 4-8 mph gusts up to 12 mph.
Ridgetops: Becoming northeast 10-15 with localized gusts 25 mph.

THURSDAY:

WEATHER: Mostly clear with areas of smoke.
 MAX TEMP: 64-71°
 MIN RH: 40-50%.
 MARINE LAYER DEPTH: Around 800 feet, lifting by 1100.

CHC WTG RAIN: 0% LAL: 1 HAINES: 3 (Low)

20FT WINDS: **Valleys:** Upslope/north northeast at 4-8 gusts 10-12 mph.
Ridgetops: North winds 10-15 mph with gusts to 25 mph, becoming north northwest after 1400.

EXTENDED OUTLOOK: Cooler and higher humidities are expected by the weekend. Chances of light rain return early Saturday, with increasing chances into early next week.

Nearby Weather Observations

Fire Behavior Forecast #66

Name of Incident: FLAT and ANVIL	Administrative Unit: OR-RSF
Date & Time Issued: September 19, 2023 @ 1900	Operational Period: September 20, 2023
FBAN: Steve Ziel	Signed: /Z/

Assumptions: Critical fire weather conditions for gusty N-NE ridgetop winds and low/moderate humidity. *A little cooler with improved RH, but still “peak of season” 90th percentile ERC fire conditions. The effects of ridgetop winds may provide challenging fire behavior during the operational period. New acreage on Anvil provides additional/different wind/slope alignments, and fire spread influences. Fire spread will depend on the effects of wind, otherwise slope and gravity spread will dominate the fire on lower slopes and valley locations. The Flat fire continues to have scattered heat sources.*

Weather Summary
See attached Fire Weather Forecast

Fire Behavior Summary

Fuels in the fire area include very high load fluffy **Timber Litter (TL9)**, closed canopy **Timber Litter (TL5)** with needles, branches/heavy fuel concentrations and **Timber with Understory (TU5)** shrubby open timber canopy. Primary tree species include mixed sizes of Douglas Fir/mixed conifer timber stands. Shrub fields and understory species include Oregon Myrtlewood, maple(s), manzanita, other shrub-form hardwoods. **Numerous snags and heavy fuel concentrations (often shrub covered) are common throughout all areas.** Live fuels (shrubs) are seasonally dry and may contribute to fire spread. Moss is common in timber stands as a ladder fuel. **Gorse (highly flammable tall shrub)** is common in timber harvest areas, especially on the west side of the fire area.

Today’s “Peak Period” fire behavior: Expect very active fire behavior with strong ridge top winds. Fire behavior may include surface fire runs, group torching on steep wind facing slopes, and downwind spotting to ½+ mile. Rapid spread on slopes, active flanks, and sustained backing is likely with wind/slope alignment. Rollout and falling snags on steep slopes may accelerate backing and produce flare-ups. Slope reversals may result in robust upslope runs with torching. Monitor wind speed/direction throughout the operational period. Heavy moss may contribute to spotting and torching, Gorse may exhibit high intensity fire effects.

* Fine fuel moisture= 6% (exposed). Probability of Ignition 50%-60% (exposed). Group torching spotting to 0.9 mile.

Fuel Type/Model	Rate of Spread	Flame Length	30 mph GUSTS	GUST Spot Size in 1-hour
If your work area looks like -	Ch/hr = FPM		ROS - FL	*from spot or interior flare-up
Timber Litter (TL9) Fluffy/leafy	9 -12 ch/hr.	5 - 6 feet	20 - 6'+	8-10 acres
Timber w/ Shrub Understory (TU5)	8 - 10 ch/hr.	7 - 8 feet	17 - 10'	5-7 acres
Timber Litter – conifer needles (TL5)	4 - 6 ch/hr.	2 -3 feet	10 - 4'	2-4 acres

Specific Assignments:

FLAT – Monitor smoke location and characteristics. Evaluate weather, including wind speed and direction. Moderate reburn potential. Many areas contain unburned pockets, fire killed shrubs, and ragged edge burn pattern.

ANVIL - Ridgetop gusts to 30 possible. Evaluate flareup’s for spotting potential. Expect multiple areas of fire spread including slope runs and rapid surface fire spread and active flanks. Expect fingering fire spread on slopes, with torching. Sustained backing and rolling materials may cause flare-ups. Undetected spot fires may become active with wind. Several areas of likely slope reversal may cause rapid uphill spread with creek crossing. Group torching may produce spot fires to .9 miles.

Air Operations: Dense IFR downwind smoke to the south. Stagnant smoke in lower valleys. **NE wind clocking to NW -WINDY.**

Safety

At all times.....Keep informed on fire weather conditions and forecasts (read the Fire and Weather forecasts, observe weather changes throughout the day, listen to radio). **Know what your fire is doing at all times** (observe smoke, flames, direction, note changing conditions). **Base all actions on current and expected behavior of the fire** (evaluate your situation and the fire activity – anticipate rate of change, consider “what-if’s”, establish trigger points).

**Today’s Fire Behavior Forecast contains 650 (+13 from previous) words written for your situational awareness.*

6. Control Operations/Work Assignments:						
TASK - Implement high probability of success tactics to keep the fire North and East of the Elk River and out of adjacent structures.						
PURPOSE - Protect structures in the Elk River corridor and limit fire spread to the West.						
END STATE - Structures along the Elk River have been protected and fire spread to the West halted.						
NEEDS: 1 TFLD, 1 HEQB						
7. Special Instructions:						
Work bucket ships on the fire to limit growth.						
Medical support ground transport time is 2 hours.						
Coordinate actions with CFPA North Group as needed.

1. Incident Name:		3.	
FLAT/ANVIL		Branch: V	Division/Group SOUTH CONTINGENCY
2. Operational Period: DAY			
Date/Time From: 09/20/2023 0700	WED	Date/Time To: 09/20/2023 2100	WED

4. Operations Personnel			
PLANNING OPS	STEPHENS, CLAY	FIELD OPS	COATES, CLINT NORTON, KEVIN (T)
AIR ATTACK SUPERVISOR	HODGES, GENE; MELTON, MIKE	BRANCH DIRECTOR	SCHUSTER, JARED
		DIVISION/GROUP SUPERVISOR	BERGSENG, RILEY

6. Control Operations/Work Assignments:

TASK - Coordinate with CFPA South to identify contingency lines and get them into Field Maps. Identify resource needs if the fire gets established across Elk River Rd.

PURPOSE - To provide accurate intelligence on line placement a help with a coordinated response if fire crosses the Elk River Rd.

END STATE - All contingency lines are identified and placed in Field Maps. Resources are able to make a coordinated response if fire escapes primary containment lines.

NEEDS: 2 CHP2, 5 EXCA, 1 DZR, 2 FELLER BUNCHERS, 3 HEQB, 2 TFLD, 2 FOBS, 1, WT Type 1, 2 WT Type 2.

SAFETY MESSAGE

Fire fighter safety comes first on every fire, every time

MAJOR 215 A HAZARDS AND RISKS

- | | |
|---|--|
| <ul style="list-style-type: none"> • Hazard Trees/Chain Saw Operations • Building/Working on Direct Fireline • Helicopter/Air Operations • UTV Use • Heavy Equipment/Chipping • Wildlife -Rattlesnakes, bears etc. • Driving & Traffic • Indirect Fireline • Structure Protection & HAZMAT | <ul style="list-style-type: none"> • Mop-up/Rehab • Spotting & Rolling material • Steep rocky, rough terrain -falls/slips • Severe Weather & Extreme fire Behavior • Heat Related Illness/Dehydration • Smoke Exposure • Personal Hygiene- Sanitize twice daily • Poisonous Plants • Complex communications |
|---|--|

ADAPTABILITY/FLEXIBILITY DURING HIGH-TEMP PERIODS

The success of a firefighter's mission depends upon the crew's ability to alter behavior and dynamically manage resources to meet situational demands.

Adaptability/flexibility allows firefighters to alter a course of action based on new information, maintain constructive behavior under pressure and adapt to internal (body) and external (e.g., fire behavior, new assignment, and crew experience levels) changes that occur on the fire ground.

WHAT MAKES A FIREIFGHTER SUCCESSFUL AT FLEXIBILITY and ADAPTIBILITY

- Recognize and acknowledge change.
- Anticipate problems by utilizing risk management assessment tools.
- Interact constructively

While setting the tone for adaptability/flexibility it is important to establish an open, professional atmosphere that ensures a reporting culture. Utilizing leader's intent and the [IRPG](#) briefing guide ensure the crew understands the task, project or mission that needs to be accomplished. The most important tool to utilize while utilizing adaptability/flexibility is good two-way communication.

RETARDENT and WATER DROP SAFETY REMINDERS

- Be aware of the location and flight patterns of aircraft during drop operations.
- Ensure you have positive contact with the pilot before the drop.
- Use caution when working in areas covered by water/retardant. Surfaces may be slippery.
- Personnel can be injured by the impact of material dropped by aircraft. Clear personnel out of area.

Your Safety Team – Skeet Houston (SOFC), Wes Lathen (SOFC), Tracy Connelly (SOFC)

RESOURCE ADVISOR SPECIAL INSTRUCTIONS FOR OPERATIONAL RESOURCES

HELP PREVENT SPREAD OF GORSE PLEASE!!

Weed wash when:

- Checking into the incident as well as checking out.
- Weed wash when moving equipment between divisions (including heavy equipment, transports, & utvs).
- Going into and leaving the Anvil Fire area to keep gorse and scotch broom off public, tribal, and private lands.
- There are currently 3 weed washes: Anvil Camp, at the intersection of Cape Blanco Rd. and Hwy 101, and up the Elk River Road just east of DP 732.

Gorse is a very thorny shrub that was introduced from Europe in the late 1800's. It has since become the #1 most invasive species on the southern Oregon coast, taking over forest and farmlands and playing a key role in more rapid spread of wildfire. Seeds remain viable in the soil for 80 years or more, making prevention key. Please do your part and weed wash daily!

FISH SCREENS: On all foot valves on pumps and tenders on Sixes, Illinois, Rogue, Lawson Creek, Hunter Creek, Elk River, Panther Creek, Butler Bar and any other fish-bearing streams. These are in addition to screens on pump hoses, and READs can/will deliver!

PREVENT PORT-ORFORD-CEDAR ROOT DISEASE: At draft sites use bleach for water sources identified by resource advisors unless advised otherwise. Mix one gallon of bleach per 1,000 gallons of water in the engine or water tender. DO NOT dump leftover bleach on ground or near water bodies as it is lethal to aquatic life.

LOOK FOR FLAGGING: Orange and black polka dot and yellow flagging mark resource areas to protect. Do not disturb.

-THANK YOU FOR BEING STEWARDS OF THE LAND!

SOPs for Repair Status Tracking in Field Maps

General SOPs for Field Maps

DO NOT enter Air Operations points (sling sites ☹️, helispots ●, etc.) through Field Maps. Go through your DIVS and they will provide a lat/long to the Air Ops Chief for approval.

If you want to Delete something, find the field and change to one of these options: or

FLAT/ANVIL INCIDENT

OR-RSF-000209 (FLAT) OR-RSF-000413 (ANVIL)

SUBMITTING TIME

- CTRs and Shift Tickets should be submitted at a minimum, every other day.
- Justifications are required in the remarks when posting Time without meal breaks.
- Hazard Pay is required to be justified in the remarks, such as: "Firefighting on an uncontrolled Fireline."
- The preferred method of turning in CTR's, Shift Tickets, or other associated Time documents is direct to our Finance email: 2023.flat.or.finance@firenet.gov or 2023.anvil.finance@firenet.gov.
- Taking a picture of your signed CTR/Shift Ticket is perfectly acceptable.
- If electronic delivery is not an option for you, we will accept hard copies at Finance.
- Our Finance email does not have an auto reply.

Fillable PDF CTR/Shift Ticket:

Acceptable PDF's- We provide acceptable templates on the Virtual Documentation page within the IAP. However, we accept any version that is signable and has all of the required fields. Be mindful of what browser you open the PDF in, downloading the PRSDF form tends to prevent filling and signature issues.

- Option 1 - Resource fills out CTR/Shift Ticket and e-mails to supervisor for signature. Supervisor digitally signs CTR then e-mails signed copy back to resource AND resource forwards to Finance: 2023.flat.or.finance@firenet.gov or 2023.anvil.finance@firenet.gov.
- Option 2 – Resource fills out CTR, supervisor (if comfortable) signs directly on same device. Resource e-mails CTR directly to 2023.flat.or.finance@firenet.gov or 2023.anvil.finance@firenet.gov.

Picture of Hard Copy CTR/Shift Ticket:

- Option 1 – Resource fills out hard copy CTR, supervisor signs hard copy. Resource takes a picture of the signed document, reviews picture to ensure it's legible, and emails to Finance: 2023.flat.or.finance@firenet.gov or 2023.anvil.finance@firenet.gov.
- Option 2 - Resource fills out hard copy CTR, snaps a picture of CTR and e-mails/texts to supervisor. Supervisor digitally signs CTR then e-mails signed copy back to resource AND 2023.flat.or.finance@firenet.gov or 2023.anvil.finance@firenet.gov.

Resources on Demob list:

- Ensure all required documents have been sent to Finance and ensure Time submittals are current.
- Demob can be accomplished virtually via email. Refer to Demob instructions in IAP.

Contact Finance with any questions: 208-891-7855

Great Basin Team 4 Virtual Check-In/Demob Process

Virtual Check-In Options:

Option 1:

Utilize QR code on IAP cover for check-in form or at <https://bit.ly/2Rr545v> (case sensitive, all lower case) to expedite check-in.

Option 2:

Stop by check in and provide the information in person.

Demobilization Process

Please ensure you complete the following steps to successfully demob from the incident:

If you are not on the demob list - or this is an Emergency DEMOB

1. Your *incident supervisor* must submit a General Message (213) to the DEMOB email. The 213 must include the Resource Order number and name of the resource to be demobilized. The time and date of release and whether or not the resource is wanting a reassignment.

Then,

2. Return any items you checked out from Supply and Communications.
3. Complete Ground Support inspection. (If required).
4. Complete the FINANCE Process as described in the Finance Message in the IAP.
5. Call the DEMOB number to complete the process.

IF YOU REQUIRE AIR TRAVEL

- Please click the **Demob Air Travel Request** button in the LinkTree (accessible from the QR on the IAP cover page), then call the DEMOB desk at least 72 hours before your scheduled DEMOB date to discuss flight/travel arrangements.

FOR MORE INFORMATION

Check-In - 208-891-6158

Demob - 206-473-9053

Please email General Messages to the appropriate Email box -

Incident Replacement Guidelines

Prior to release from the incident, personnel may request replacement of standard equipment and supplies (NFES) that were damaged, lost, consumed, or worn out during the incident. Personnel must document the request on the most applicable form – Incident Replacement Requisition (OF-315), Saw Parts Order, or General Message (OF-213). This request should include a description of the use on the incident and/or why the item(s) need to be replaced. Requests must be signed by the **Division Supervisor** then approved by the **Operations Section Chief** prior to taking to Supply. Worn out or damaged property **will be turned into the Supply Unit.**

Approval for replacement of non-standard items (**Non NFES**) may need to be approved by the Incident Business Advisor (INBA). You should initiate this process at least two days prior to demob.

Personnel who need to replace/repair damaged property will document the request on an OF-289, Property Loss or Damage Report. This form requires Incident Supervisor recommendation as well as Subject Matter Expert determination, if appropriate. The form will then need to be turned into the Comp/Claims Unit Leader, who will track the claim and facilitate approval by the Finance Section Chief (FSC). Additional documentation may be required by the FSC. The FSC will decide, or recommend to the INBA, as to whether the items can be replaced or repaired with incident funds. After approval, Supply/Ordering will issue S numbers.

Items originally provided through use of preparedness funds which need to be replaced due to **normal wear and tear** (e.g. worn out tire tread, worn out chain saw bar, 5-yr old GPS that stops working, etc.) should be accomplished using home unit funds, not incident funds. If government property was damaged on the incident due to a specific event, (e.g. wind event destroys a tent) the incident could, upon receipt of required documentation and proof of damage, authorize replacement. **Replacement of non standard items that are worn out is the responsibility of the home unit.**

The OF-289, Property Loss or Damage Report is available at the Finance yurt or on the linktr.ee by accessing the QR code.

Please feel free to visit Finance, Logistics, or Operations if you have any questions.

GB Team 4

Incident within an Incident (IWI) Plan (Updated 03/01/2023)

On Scene at location of the patient with significant injury

- Upon occurrence of a “**Medical Emergency**” within the incident involving significant injury, complex situation or fatality, the highest qualified person on-scene shall take control of the situation as the **On-Scene Incident Commander** and declare “**Medical Emergency**” on the incident Command Channel.
 - The nearest **Division /Group Supervisor or Operations Chief** will respond to the scene to support IWI or assume command.
 - On-Scene Incident Commander** or **Incident Communications** will take immediate action to clear all radio traffic on the incident Command Channel by broadcasting “**Emergency Traffic Only**”.
 - On-Scene Incident Commander** or **Division /Group Supervisor or Operations Chief** will notify Air Attack of IWI and provide the GPS location.
 - On-Scene Incident Commander** will complete Medical Incident Report (MIR) as soon as possible and relay to **Incident Communications**. *At no time during the incident will the name of the patient(s) be used over the radio.*
 - The nearest **Safety Officer** will respond to the IWI scene and assist the **On-Scene Incident Commander**.
-

ICP: Specific processes for C&G notification for both day and night will be determined upon arrival at each incident.

- Immediately upon notification of a serious incident requiring emergency action the **Communications** unit will make radio and text group notifications to the **Incident Commander, Medical Unit Leader, Planning Operations, Safety Officer, Air Operations, Plans Chief, Logistics Chief, Finance Chief, Information Officer and Liaison** who shall respond to the incident communications facility.
- In the absence of the **Incident Commander**, the **Plans Chief** will assume the lead role.
- Determine the most appropriate radio operator based on situation and experience.
 - The **Medical Unit Leader** normally operates the radio during patient assessment/care portion of the incident.
 - The **RADO's** are responsible for documentation.
- Utilize Incident Within an Incident Prompt Sheet
- The **Information Officer** will manage external communication. All information released from the incident shall be through the **Information Officer** with the approval of the **Incident Commander**.
- The **Incident Commander** will contact the **Agency Administrator** who will contact appropriate officials of the agency.
 - If the accident involves a fatality, the **Agency Administrator** will be responsible for implementing Agency specific protocols.
- For non-serious (green) incidents the Safety Officers or Medical Unit Leaders will notify the appropriate overhead as necessary.

***Non-medical IWI's (ex. fuel leaks, damaged equipment, road closures, hazardous situations, etc.) that are critical to personnel safety, will be announced over the Command Frequency and on the C & G text group.**

***Non-medical/non-critical IWI's notifications will be sent through the C & G text group.**

MEDICAL PLAN (ICS 206 WF)

Controlled Unclassified Information//Basic

Medical Incident Report																													
<p>FOR A NON-EMERGENCY INCIDENT, WORK THROUGH CHAIN OF COMMAND TO REPORT AND TRANSPORT INJURED PERSONNEL AS NECESSARY.</p> <p>FOR A MEDICAL EMERGENCY: IDENTIFY ON SCENE INCIDENT COMMANDER BY NAME AND POSITION AND ANNOUNCE "MEDICAL EMERGENCY" TO INITIATE RESPONSE FROM IMT COMMUNICATIONS/DISPATCH.</p>																													
<p>Use the following items to communicate situation to communications/dispatch.</p>																													
<p>1. CONTACT COMMUNICATIONS / DISPATCH (Verify correct frequency prior to starting report) <i>Ex: "Communications, Div. Alpha. Stand-by for Emergency Traffic."</i></p>																													
<p>2. INCIDENT STATUS: Provide incident summary (including number of patients) and command structure. <i>Ex: "Communications, I have a Red priority patient, unconscious, struck by a falling tree. Requesting air ambulance to Forest Road 1 at (Lat./Long.) This will be the Trout Meadow Medical, IC is TFLD Jones. EMT Smith is providing medical care."</i></p>																													
Severity of Emergency / Transport Priority	<input type="checkbox"/> RED / PRIORITY 1 Life or limb threatening injury or illness. Evacuation need is IMMEDIATE <i>Ex: Unconscious, difficulty breathing, bleeding severely, 2° - 3° burns more than 4 palm sizes, heat stroke, disoriented.</i> <input type="checkbox"/> YELLOW / PRIORITY 2 Serious injury or illness. Evacuation may be DELAYED if necessary. <i>Ex: Significant trauma, unable to walk, 2° - 3° burns not more than 1-3 palm sizes.</i> <input type="checkbox"/> GREEN / PRIORITY 3 Minor injury or illness. Non-Emergency transport <i>Ex: Sprains, strains, minor heat-related illness.</i>																												
Nature of Injury or Illness & Mechanism of Injury			Brief Summary of Injury or Illness <i>(Ex: Unconscious, Struck by Falling Tree)</i>																										
Transport Request			Air Ambulance / Short Haul / Hoist Ground Ambulance / Other																										
Patient Location			Descriptive Location & Lat./Long. (WGS84)																										
Incident Name			Geographic Name + "Medical" <i>(Ex: Trout Meadow Medical)</i>																										
On-Scene Incident Commander			Name of on-scene IC of Incident within an Incident <i>(Ex: TFLD Jones)</i>																										
Patient Care			Name of Care Provider <i>(Ex: EMT Smith)</i>																										
<p>3. INITIAL PATIENT ASSESSMENT: <i>Complete this section for each patient as applicable (start with the most severe patient)</i></p> <p>Patient Assessment: See IRPG PAGE 106 or use Vital Signs Report at right</p> <p>Treatment:</p>			<p>Great Basin Team 4 Medical Unit: VITAL SIGNS REPORT Age _____ Weight _____</p> <p>Level of Consciousness: Alert and Oriented to: Person Place Time Event</p> <p>Responsive to: Verbal Stimulus Pain Stimulus Unresponsive</p> <p>Breathing: Not Normal Difficult/Labored Rate _____</p> <p>Pulse Rate: Absent Present: _____/minute</p> <p>Skin Color: Normal Pale Bluish Red</p> <p>Skin Moisture: Normal Dry Moist Profuse Sweating</p> <p>Skin/Body Temp: ____°F Normal Hot Cold Cool</p> <p>Pupils: Equal and Reactive Unequal Dilated Constricted</p> <p>Blood Pressure: SYS _____/DIA _____</p> <p>Oxygen Saturation with Pulse Oximeter (SaO2): _____</p> <p>Blood Glucose Level: _____</p>																										
<p>4. TRANSPORT PLAN: Evacuation Location (if different): (Descriptive Location (drop point, intersection, etc.) or Lat./Long.) Patient's ETA to Evacuation Location:</p> <p>Helispot / Extraction Site Size and Hazards:</p>																													
<p>5. ADDITIONAL RESOURCES / EQUIPMENT NEEDS: <i>Example: Paramedic/EMT, Crews, Immobilization Devices, AED, Oxygen, Trauma Bag, IV/Fluid(s), Splints, Rope rescue, Wheeled litter, HAZMAT, Extrication</i></p>																													
<p>6. COMMUNICATIONS: Identify State Air/Ground EMS Frequencies and Hospital Contacts as applicable</p> <table border="1" style="width: 100%; border-collapse: collapse;"> <thead> <tr> <th>Function</th> <th>Channel Name/Number</th> <th>Receive (RX)</th> <th>Tone/NAC *</th> <th>Transmit (TX)</th> <th>Tone/NAC *</th> </tr> </thead> <tbody> <tr> <td>COMMAND</td> <td></td> <td></td> <td></td> <td></td> <td></td> </tr> <tr> <td>AIR-TO-GRND</td> <td></td> <td></td> <td></td> <td></td> <td></td> </tr> <tr> <td>TACTICAL</td> <td></td> <td></td> <td></td> <td></td> <td></td> </tr> </tbody> </table>						Function	Channel Name/Number	Receive (RX)	Tone/NAC *	Transmit (TX)	Tone/NAC *	COMMAND						AIR-TO-GRND						TACTICAL					
Function	Channel Name/Number	Receive (RX)	Tone/NAC *	Transmit (TX)	Tone/NAC *																								
COMMAND																													
AIR-TO-GRND																													
TACTICAL																													
<p>7. CONTINGENCY: <u>Considerations:</u> <i>If primary options fail, what actions can be implemented in conjunction with primary evacuation method? Be thinking ahead.</i></p>																													
<p>8. ADDITIONAL INFORMATION: <i>Updates/Changes, etc.</i></p>																													
<p>REMEMBER: Confirm ETAs of resources ordered. Act according to your level of training. Be Alert. Keep Calm. Think Clearly. Act Decisively.</p>
