INCIDENT OBJECTIVES (ICS 202)

1. Incident Name:		2. Operational Period: DAY/NIGHT	
FLAT/ANVIL		Date/Time From: 09/24/2023 0700 SUN	Date/Time To: 09/24/2023 2100 SUN
3. Objective(s):			
<p>Objectives (includes Flat and Anvil Fires):</p> <ol style="list-style-type: none"> 1) Expose firefighters to the least amount of risk necessary to accomplish work assignments during all phases of the incident. 2) Limit fire size and control the fire perimeter to protect values at risk. 3) Maintain and enhance relationships with stakeholders, cooperators, and partners. 4) Provide accurate and timely incident information to the public utilizing inciweb, public meetings, and social media. 5) Minimize adverse impacts to cultural, recreation, natural resources, watershed, wilderness, wildlife habitat, and local business concerns. 6) Utilize strategic planning to develop implementation plans for a range of potential fire expansion scenarios. 7) Support Rogue River-Siskiyou National Forest initial attack as requested by duty officers. <p>Leaders Intent: Assigned incident responders will conduct themselves professionally in a way that encourages positive dialogue about hazard and risk evaluation and mitigation. This will be done across all areas of incidents from patrol and monitor to complex fireline engagement, indirect attack, and structure protection.</p> <p>Incident personnel are knowledgeable about the values at risk, public safety concerns, fireline hazards, risk analysis, and alternatives available for suppression actions.</p>			
4. Operational Period Command Emphasis:			
Plans are worthless, but planning is everything.			
General Situational Awareness:			
Take advantage of periods of rest and recovery to prepare for the next tempo increase and operation.			
5. Site Safety Plan Required? Yes <input type="checkbox"/> No <input checked="" type="checkbox"/>			
Approved Site Safety Plan(s) Located			
6. Incident Action Plan (the items checked below are included in this Incident Action Plan):			
<input checked="" type="checkbox"/> ICS 202	<input type="checkbox"/> ICS 207	Other Attachments:	
<input checked="" type="checkbox"/> ICS 203	<input checked="" type="checkbox"/> ICS 208	<input type="checkbox"/>	_____

Fire Weather Forecast

FORECAST NO: 66
PREDICTION FOR: Sunday Operational Period
DATE: September 24th, 2023
FORECAST ISSUED: 1800 September 23rd, 2023

Fire: Flat
UNIT: OR-RSF-000209
IMET: Jimmy Taeger (240) 778-5291
Signed: Jimmy Taeger

*****Flood Watch in Effect for Anvil and Flat Fires Sunday Evening through Monday Evening*****

WEATHER DISCUSSION:

Conditions will deteriorate throughout the day as a strong disturbance approaches the region. Breezy winds late morning will become strong by late afternoon, with gusts near 50 mph possible late. Light to moderate rain is possible during the day Sunday, then heavy rain will develop Sunday night into Monday. Around 2-4 inches of rain is possible from Sunday through Tuesday. A Flood Watch remains in effect for possible debris flow across the burn scar from heavy rain.

TODAY:

WEATHER: Cloudy, with periods of showers. Breezy winds becoming strong by the afternoon.
MAX TEMP: Valleys: 62-66° **MIN RH:** Valleys: 70-80%
Ridgetops: 52-57° **Ridgetops:** 75-85%

CHC WTG RAIN: 75% **LAL:** 1 **HAINES:** 3 (Low)

20FT WINDS: Valleys: Southerly 5-10 mph with gusts to 17 mph, increasing to 10 to 20 mph with gusts to 30 mph around 1100, increasing to 20-30 mph with gusts to 40 mph around 2000.
Ridgetops: Southerly 8-13 mph with gusts to 20 mph, increasing to 10 to 20 mph with gusts to 35 mph around 1100, increasing to 25-35 mph with gusts near 52 mph around 2000.

MIXING HEIGHT: Rising to 2,000 ft AGL by 1400. **TRANSPORT WIND:** South 15-25 mph.

TONIGHT:

WEATHER: Windy, with periods of heavy rain and possible debris flow near burn scar. Isolated thunderstorm late
MIN TEMP: Valleys: 52-55° **MAX RH:** Valleys: 90-100%
Ridgetops: 50-53° **Ridgetops:** 90-100%

CHC WTG RAIN: 100% **LAL:** 2

20 ft WINDS: Valleys: S 15-25 mph with gusts to 35 mph.
Ridgetops: S 25-35 mph with gusts to 52 mph.

MONDAY:

WEATHER: .Windy. Periods of heavy showers and iso t-storms. Debris flows possible near burn scars.
MAX TEMP: Valleys: 62-66° **MIN RH:** Valleys: 75-85%
Ridgetops: 50-55° **Ridgetops:** 80-90%

CHC WTG RAIN: 100% **LAL:** 2 **HAINES:** 3 (Low)

20FT WINDS: Valleys: S 10-20 mph with gusts to 30 mph
Ridgetops: S 20-30 mph with gusts to 45 mph.

MIXING HEIGHT: Rising to 2,000 ft AGL by 1400. **TRANSPORT WIND:** South 20-30 mph.

EXTENDED OUTLOOK: Multiple disturbances moving across the region will bring unsettled weather at times next week. Heaviest rain is expected late Sunday into Monday. Winds will also continue to strengthen through Sunday night.

Fire Behavior Forecast #70

Name of Incident: FLAT and ANVIL	Administrative Unit: OR-RSF
Date & Time Issued: September 23, 2023 @ 1900	Operational Period: September 24, 2023
FBAN: Steve Ziel	Signed: /Z/

Assumptions: Fuels remained dry yesterday, and will likely get wet today (very wet!). Fire behavior will be “conditional” today due to changing conditions including wind and rain. Potential duration of fire spread will be limited by timing and amount of precipitation, and wind. Sufficient precipitation is likely prior to the forecast strong est winds to diminish/limit the potential for significant fire spread. The effects of wind and rain will not be uniform across the fire area. Ridge tops will receive the strongest winds by late day, while the general area is expected to have receive significant precipitation through the period (Flood Watch). High relative humidity, cloudy skies, and light showers will likely moderate fire behavior before it rains, and before the peak ridge top winds. Heavy sheltered fuels will continue to burn until soaked. The Flat fire continues to have scattered heat sources and will be affected by similar rain/wind.

Weather Summary

See attached Fire Weather Forecast

Fire Behavior Summary

Fuels in the fire area include very high load fluffy *Timber Litter (TL9)*, closed canopy *Timber Litter (TL5)* with needles, branches/ heavy fuel concentrations, and large *Timber with Understory (TU5)* shrubby open timber canopy. Primary tree species include mixed sizes of Douglas Fir/mixed conifer timber stands. Shrub fields and understory species include Oregon Myrtlewood, maple(s), manzanita, other shrub-form hardwoods. **Numerous snags and heavy fuel concentrations (often shrub covered) are common throughout all areas.** Live fuels (shrubs) are seasonally dry and may contribute to fire spread. **Moss** is common in timber stands as a ladder/spotting fuel. **Gorse (highly flammable shrub)** is common in timber harvest areas, especially on west side of fire area.

Today’s “Peak Period” fire behavior: Expect moderate to active fire activity on steep fuel rich slopes before it rains. Fire behavior may include limited surface fire spread on steep wind facing slopes, with continued backing with flanking. Rollout and falling snags on steep slopes may accelerate backing and produce flare-ups. Slope reversals may result in upslope surface fire spread. Monitor wind speed throughout the operational period. Heavy moss may contribute to spotting and torching, Gorse may exhibit high intensity fire effects. Snags will be falling more frequently due to length of time burning and increased wind.

* Fine fuel moisture= 14% (exposed). Probability of Ignition 10%-20% (exposed). Group torching spotting to <.25 mile.

Fuel Type/Model	Rate of Spread	Flame Length	Ridge Top Gusts to 35 mph	
			Ch/hr	FL
If your work area looks like -	Ch/hr = FPM			
Timber Litter (TL9) Fluffy/leafy	8 ch/hr.	3 - 4 feet	15	6
Timber w/ Shrub Understory (TU5)	7 ch/hr.	5 - 6 feet	12	7
Timber Litter – conifer needles (TL5)	5 ch/hr.	1 -2 feet	8	2

Specific Assignments:

FLAT – Monitor smoke location and characteristics. Evaluate weather, including wind speed and direction. Moderate reburn potential with many areas containing unburned pockets, fire killed shrubs, and ragged edge burn pattern.

ANVIL – Expect areas of active fire with upslope surface spread, backing, and active flanks. Rolling materials may cause flare-ups. Undetected spot fires may become active with wind. Several areas of likely slope reversal may cause upslope spread when backing across creeks. Burning/falling snags may contribute to flare-ups, and rollout.

Air Operations: Strong wind may affect approach/departure from bucket drops. Expect smoky conditions on north east side of fire.

Safety

Changing conditions require re-evaluation of actions. If the conditions are changing ask “how fast, how much, when, where”. Consider the effects of change on your planned action – may require adjusting your actions to mitigate changing conditions. Verify forecast values....consider “will our situation get better or worse, will it get worse before it gets better?” *ALWAYS EXPECT CHANGE – EXCEPT FROM A VENDING MACHINE.

*Today’s Fire Behavior Forecast contains 656 (+33 from previous) words written for your situational awareness.

Division/Group Assignment List (ICS 204 WF)

|---|--|
| <ul style="list-style-type: none"> • Hazard Trees/Chain Saw Operations • Building/Working on Direct Fireline • Helicopter/Air Operations • UTV Use • Heavy Equipment/Chipping • Wildlife -Rattlesnakes, bears etc. • Driving & Traffic • Indirect Fireline • Structure Protection & HAZMAT • Night Operations | <ul style="list-style-type: none"> • Mop-up/Rehab • Spotting & Rolling material • Steep rocky, rough terrain -falls/slips • Severe Weather & Extreme fire Behavior • Heat Related Illness/Dehydration • Smoke Exposure • Personal Hygiene- Sanitize twice daily • Poisonous Plants • Complex communications |
|---|--|

Accumulated (chronic) Fatigue is defined as fatigue from which normal rest does not produce recovery. Accumulated fatigue is often caused by extended periods of stress with inadequate recovery periods, which results in decreased productivity, compromised immune function, and reduced alertness. Fatigued workers perform poorly, behave carelessly, tolerate greater errors, and become inattentive. Chronic fatigue often results in increased stress, which may present itself through certain behavioral and physiological indicators, such as those described below:

Behavioral indicators:

- Decreased motivation and low morale.
- Increased irritability and depression.

Physiological indicators:

- Confusion, poor problem-solving.
- Poor attention/decisions.
- Extreme emotional responses.
- Poor abstract thinking.
- Poor concentration/memory.
- Social/behavioral changes.

Recommendations for chronic fatigue/stress are:

- Take longer periods of rest/recovery.
- Ensure that workers are adequately rested before they begin work shifts.
- Provide periodic rest breaks to allow physical and mental recovery.
- Alternate between heavy and light tasks.
- Eat well-balanced meals regularly, with energy supplements during periods of high exertion.
- Maintain hydration.
- Ensure workers maintain good personal hygiene.
- Maintain high standards of physical fitness and work capacity.
- In extreme cases, personnel may need to be relieved of their duties.

Don't let cooling temperatures and moderated fire behavior lull you into a sense of false security. Maintain a high level of situational awareness continually assess trigger points, escape routes, and safety zones. Take care of one another.

Your Safety Team – Skeet Houston (SOFC), Wes Lathen (SOFC), Tracy Connelly (SOFC)

COMMUNICATIONS SAFETY MESSAGE: DO NOT REMOVE THE AIRGUARD CHANNEL FROM ANY OF THESE ZONES

RESOURCE ADVISOR SPECIAL INSTRUCTIONS FOR OPERATIONAL RESOURCES

HELP PREVENT SPREAD OF GORSE PLEASE!!

Weed wash when:

- Checking into the incident as well as checking out.
- Going into and leaving the Anvil Fire area to keep gorse and scotch broom off public, tribal, and private lands.
- There are currently 3 weed washes: Anvil Camp, at the intersection of Cape Blanco Rd. and Hwy 101, and up the Elk River Road just east of DP 732.

Gorse is a very thorny shrub that was introduced from Europe in the late 1800's. It has since become the #1 most invasive species on the southern Oregon coast, taking over forest and farmlands and playing a key role in more rapid spread of wildfire. Seeds remain viable in the soil for 80 years or more, making prevention key. PLEASE DO YOUR PART AND WEED WASH DAILY!

FISH SCREENS: On all foot valves on pumps and tenders on Sixes, Illinois, Rogue, Lawson Creek, Hunter Creek, Elk River, Panther Creek, Butler Bar and any other fish-bearing streams. These are in addition to screens on pump hoses, and READs can/will deliver!

PREVENT PORT-ORFORD-CEDAR ROOT DISEASE: At draft sites use bleach for water sources identified by resource advisors unless advised otherwise. Mix one gallon of bleach per 1,000 gallons of water in the engine or water tender. **DO NOT** dump leftover bleach on ground or near water bodies as it is lethal to aquatic life.

BLEACH REQUIRED AT DRAFT SITES:

- East of DP640 on the Sixes River
- East of confluence of State Creek (Red Rock) on the Elk River

LOOK FOR FLAGGING: Orange and black polka dot and yellow flagging mark resource areas to protect. Do not disturb.

-THANK YOU FOR BEING STEWARDS OF THE LAND!

SOPs for Repair Status Tracking in Field Maps

DIVS will change **Repair Status** from **In Use – Fire Management** → **Repair Needed**

DIVS will coordinate with READs and direct the repair work.

DIVS will change **Repair Status** from **Repair Needed** → **Completed – Ready for Inspection**

READs will change **Repair Status** to **Completed – Inspected**

General SOPs for Field Maps

DO NOT enter Air Operations points (sling sites ☺ , helispots ● , etc.) through Field Maps. Go through your DIVS and they will provide a lat/long to the Air Ops Chief for approval.

If you want to Delete something, find the **Delete this feature?** field and change to one of these options: **Yes – Editing Mistake** or **Yes – No Longer Needed**

FLAT/ANVIL INCIDENT

OR-RSF-000209 (FLAT) OR-RSF-000413 (ANVIL)

SUBMITTING TIME

- CTRs and Shift Tickets should be submitted at a minimum, every other day.
- Justifications are required in the remarks when posting Time without meal breaks.
- Hazard Pay is required to be justified in the remarks, such as: "Firefighting on an uncontrolled Fireline."
- The preferred method of turning in CTR's, Shift Tickets, or other associated Time documents is direct to our Finance email: 2023.flat.or.finance@firenet.gov or 2023.anvil.finance@firenet.gov.
- Taking a picture of your signed CTR/Shift Ticket is perfectly acceptable.
- If electronic delivery is not an option for you, we will accept hard copies at Finance.
- Our Finance email does not have an auto reply.

Fillable PDF CTR/Shift Ticket:

Acceptable PDF's- We provide acceptable templates on the Virtual Documentation page within the IAP. However, we accept any version that is signable and has all of the required fields. Be mindful of what browser you open the PDF in, downloading the PRSDF form tends to prevent filling and signature issues.

- Option 1 - Resource fills out CTR/Shift Ticket and e-mails to supervisor for signature. Supervisor digitally signs CTR then e-mails signed copy back to resource AND resource forwards to Finance: 2023.flat.or.finance@firenet.gov or 2023.anvil.finance@firenet.gov.
- Option 2 - Resource fills out CTR, supervisor (if comfortable) signs directly on same device. Resource e-mails CTR directly to 2023.flat.or.finance@firenet.gov or 2023.anvil.finance@firenet.gov.

Picture of Hard Copy CTR/Shift Ticket:

- Option 1 - Resource fills out hard copy CTR, supervisor signs hard copy. Resource takes a picture of the signed document, reviews picture to ensure it's legible, and emails to Finance: 2023.flat.or.finance@firenet.gov or 2023.anvil.finance@firenet.gov.
- Option 2 - Resource fills out hard copy CTR, snaps a picture of CTR and e-mails/texts to supervisor. Supervisor digitally signs CTR then e-mails signed copy back to resource AND 2023.flat.or.finance@firenet.gov or 2023.anvil.finance@firenet.gov.

Resources on Demob list:

- Ensure all required documents have been sent to Finance and ensure Time submittals are current.
- Demob can be accomplished virtually via email. Refer to Demob instructions in IAP.

Contact Finance with any questions: 208-891-7855

Great Basin Team 4

Virtual Check-In/Demob Process

Virtual Check-In Options:

Option 1:

Utilize QR code on IAP cover for check-in form or at <https://bit.ly/2Rr545v> (case sensitive, all lower case) to expedite check-in.

Option 2:

Stop by check in and provide the information in person.

Demobilization Process

Please ensure you complete the following steps to successfully demob from the incident:

If you are not on the demob list - or this is an Emergency DEMOB

1. Your *incident supervisor* must submit a General Message (213) to the DEMOB email. The 213 must include the Resource Order number and name of the resource to be demobilized. The time and date of release and whether or not the resource is wanting a reassignment.

Then,

2. Return any items you checked out from Supply and Communications.
3. Complete Ground Support inspection. (If required).
4. Complete the FINANCE Process as described in the Finance Message in the IAP.
5. Call the DEMOB number to complete the process.

IF YOU REQUIRE AIR TRAVEL

- Please click the **Demob Air Travel Request** button in the LinkTree (accessible from the QR on the IAP cover page), then call the DEMOB desk at least 72 hours before your scheduled DEMOB date to discuss flight/travel arrangements.

FOR MORE INFORMATION

Check-In - 208-891-6158

Demob - 206-473-9053

Please email General Messages to the appropriate Email box -

Incident Replacement Guidelines

Prior to release from the incident, personnel may request replacement of standard equipment and supplies (NFES) that were damaged, lost, consumed, or worn out during the incident. Personnel must document the request on the most applicable form – Incident Replacement Requisition (OF-315), Saw Parts Order, or General Message (OF-213). This request should include a description of the use on the incident and/or why the item(s) need to be replaced. Requests must be signed by the **Division Supervisor** then approved by the **Operations Section Chief** prior to taking to Supply. Worn out or damaged property **will be turned into the Supply Unit**.

Approval for replacement of non-standard items (**Non NFES**) may need to be approved by the Incident Business Advisor (INBA). You should initiate this process at least two days prior to demob.

Personnel who need to replace/repair damaged property will document the request on an OF-289, Property Loss or Damage Report. This form requires Incident Supervisor recommendation as well as Subject Matter Expert determination, if appropriate. The form will then need to be turned into the Comp/Claims Unit Leader, who will track the claim and facilitate approval by the Finance Section Chief (FSC). Additional documentation may be required by the FSC. The FSC will decide, or recommend to the INBA, as to whether the items can be replaced or repaired with incident funds. After approval, Supply/Ordering will issue S numbers.

Items originally provided through use of preparedness funds which need to be replaced due to **normal wear and tear** (e.g. worn out tire tread, worn out chain saw bar, 5-yr old GPS that stops working, etc.) should be accomplished using home unit funds, not incident funds. If government property was damaged on the incident due to a specific event, (e.g. wind event destroys a tent) the incident could, upon receipt of required documentation and proof of damage, authorize replacement. **Replacement of non standard items that are worn out is the responsibility of the home unit.**

The OF-289, Property Loss or Damage Report is available at the Finance yurt or on the linktr.ee by accessing the QR code.

Please feel free to visit Finance, Logistics, or Operations if you have any questions.

Incident within an Incident (IWI) Plan (Updated 03/01/2023)

On Scene at location of the patient with significant injury

- Upon occurrence of a “**Medical Emergency**” within the incident involving significant injury, complex situation or fatality, the highest qualified person on-scene shall take control of the situation as the **On-Scene Incident Commander** and declare “**Medical Emergency**” on the incident Command Channel.
 - The nearest **Division /Group Supervisor or Operations Chief** will respond to the scene to support IWI or assume command.
 - On-Scene Incident Commander** or **Incident Communications** will take immediate action to clear all radio traffic on the incident Command Channel by broadcasting “**Emergency Traffic Only**”.
 - On-Scene Incident Commander** or **Division /Group Supervisor or Operations Chief** will notify Air Attack of IWI and provide the GPS location.
 - On-Scene Incident Commander** will complete Medical Incident Report (MIR) as soon as possible and relay to **Incident Communications**. *At no time during the incident will the name of the patient(s) be used over the radio.*
 - The nearest **Safety Officer** will respond to the IWI scene and assist the **On-Scene Incident Commander**.
-

ICP: Specific processes for C&G notification for both day and night will be determined upon arrival at each incident.

- Immediately upon notification of a serious incident requiring emergency action the **Communications** unit will make radio and text group notifications to the **Incident Commander, Medical Unit Leader, Planning Operations, Safety Officer, Air Operations, Plans Chief, Logistics Chief, Finance Chief, Information Officer and Liaison** who shall respond to the incident communications facility.
- In the absence of the **Incident Commander**, the **Plans Chief** will assume the lead role.
- Determine the most appropriate radio operator based on situation and experience.
 - The **Medical Unit Leader** normally operates the radio during patient assessment/care portion of the incident.
 - The **RADO's** are responsible for documentation.
- Utilize Incident Within an Incident Prompt Sheet
- The **Information Officer** will manage external communication. All information released from the incident shall be through the **Information Officer** with the approval of the **Incident Commander**.
- The **Incident Commander** will contact the **Agency Administrator** who will contact appropriate officials of the agency.
 - If the accident involves a fatality, the **Agency Administrator** will be responsible for implementing Agency specific protocols.
- For non-serious (green) incidents the Safety Officers or Medical Unit Leaders will notify the appropriate overhead as necessary.

***Non-medical IWI's (ex. fuel leaks, damaged equipment, road closures, hazardous situations, etc.) that are critical to personnel safety, will be announced over the Command Frequency and on the C & G text group.**

***Non-medical/non-critical IWI's notifications will be sent through the C & G text group.**

MEDICAL PLAN (ICS 206 WF)

Controlled Unclassified Information//Basic

Medical Incident Report					
FOR A NON-EMERGENCY INCIDENT, WORK THROUGH CHAIN OF COMMAND TO REPORT AND TRANSPORT INJURED PERSONNEL AS NECESSARY. FOR A MEDICAL EMERGENCY: IDENTIFY ON SCENE INCIDENT COMMANDER BY NAME AND POSITION AND ANNOUNCE "MEDICAL EMERGENCY" TO INITIATE RESPONSE FROM IMT COMMUNICATIONS/DISPATCH.					
Use the following items to communicate situation to communications/dispatch.					
1. CONTACT COMMUNICATIONS / DISPATCH (Verify correct frequency prior to starting report) <i>Ex: "Communications, Div. Alpha. Stand-by for Emergency Traffic."</i>					
2. INCIDENT STATUS: Provide incident summary (including number of patients) and command structure. <i>Ex: "Communications, I have a Red priority patient, unconscious, struck by a falling tree. Requesting air ambulance to Forest Road 1 at (Lat./Long.) This will be the Trout Meadow Medical, IC is TFLD Jones. EMT Smith is providing medical care."</i>					
Severity of Emergency / Transport Priority	<input type="checkbox"/> RED / PRIORITY 1 Life or limb threatening injury or illness. Evacuation need is IMMEDIATE <i>Ex: Unconscious, difficulty breathing, bleeding severely, 2° - 3° burns more than 4 palm sizes, heat stroke, disoriented.</i> <input type="checkbox"/> YELLOW / PRIORITY 2 Serious Injury or illness. Evacuation may be DELAYED if necessary. <i>Ex: Significant trauma, unable to walk, 2° - 3° burns not more than 1-3 palm sizes.</i> <input type="checkbox"/> GREEN / PRIORITY 3 Minor Injury or illness. Non-Emergency transport <i>Ex: Sprains, strains, minor heat-related illness.</i>				
Nature of Injury or Illness & Mechanism of Injury			Brief Summary of Injury or Illness <i>(Ex: Unconscious, Struck by Falling Tree)</i>		
Transport Request			Air Ambulance / Short Haul / Hoist Ground Ambulance / Other		
Patient Location			Descriptive Location & Lat./Long. (WGS84)		
Incident Name			Geographic Name + "Medical" <i>(Ex: Trout Meadow Medical)</i>		
On-Scene Incident Commander			Name of on-scene IC of Incident within an Incident <i>(Ex: TFLD Jones)</i>		
Patient Care			Name of Care Provider <i>(Ex: EMT Smith)</i>		
3. INITIAL PATIENT ASSESSMENT: <i>Complete this section for each patient as applicable (start with the most severe patient)</i>			Great Basin Team 4 Medical Unit: VITAL SIGNS REPORT Age _____ Weight _____		
Patient Assessment: See IRPG PAGE 106 or use Vital Signs Report at right			Level of Consciousness: Alert and Oriented to: Person Place Time Event Responsive to: Verbal Stimulus Pain Stimulus Unresponsive		
Treatment:			Breathing: Not Normal Difficult/Labored Rate _____ Pulse Rate: Absent Present: _____/minute Skin Color: Normal Pale Bluish Red		
4. TRANSPORT PLAN: Evacuation Location (if different): (Descriptive Location (drop point, intersection, etc.) or Lat./Long.) Patient's ETA to Evacuation Location:			Skin Moisture: Normal Dry Moist Profuse Sweating Skin/Body Temp: _____°F Normal Hot Cold Cool Pupils: Equal and Reactive Unequal Dilated Constricted Blood Pressure: SYS _____/DIA _____ Oxygen Saturation with Pulse Oximeter (SaO2): _____ Blood Glucose Level: _____		
Helispot / Extraction Site Size and Hazards:					
5. ADDITIONAL RESOURCES / EQUIPMENT NEEDS: <i>Example: Paramedic/EMT, Crews, Immobilization Devices, AED, Oxygen, Trauma Bag, IV/Fluid(s), Splints, Rope rescue, Wheeled litter, HAZMAT, Extrication</i>					
6. COMMUNICATIONS: Identify State Air/Ground EMS Frequencies and Hospital Contacts as applicable					
Function	Channel Name/Number	Receive (RX)	Tone/NAC *	Transmit (TX)	Tone/NAC *
COMMAND					
AIR-TO-GRND					
TACTICAL					
7. CONTINGENCY: Considerations: If primary options fail, what actions can be implemented in conjunction with primary evacuation method? Be thinking ahead.					
8. ADDITIONAL INFORMATION: Updates/Changes, etc.					
REMEMBER: Confirm ETAs of resources ordered. Act according to your level of training. Be Alert. Keep Calm. Think Clearly. Act Decisively.
