INCIDENT ACTION PLAN Flat Fire & Anvil Fire

Sunday, October 15, 2023 0700-1900 Operational Period

For "After Hours" Emergencies:

OUTSIDE ANVIL CAMP: Call 911, then contact Communications at (971) 713-0379. IN CAMP: Call Communications at (971) 713-0379, or go to the Medical Unit (staffed 24-hours.)

Fire Weather Forecast

FORECAST NO: 54 NAME OF FIRE: Anvil/Flat FORECAST FOR: Sun, Oct 15, 2023 Day Shift **UNIT:** OR-RSF-000413 FORECAST ISSUED: Sat Oct 14, 2023, 1900 PDT **SIGNED:** Bob Tobin - IMET

WEATHER DISCUSSION: A few light showers are possible through the morning, otherwise variable clouds through the day and warmer on Sunday. The next significant weather system will move into the region Monday morning. This will bring widespread moderate to heavy rain and windy conditions to the fire area on Monday. This disturbance will move out of the region on Tuesday. Expect lingering light rain Tuesday morning and slightly warmer temperatures. Then we can expect a warming and drying trend the remainder of the work week as high pressure dominates the weather.

TODAY: Cloudy in the morning. A slight chance of rain in the morning. Then partial clearing in the afternoon.

Max Temperature(°F): Below 2500 ft. 62-68° (Up 3-5°)...Above 2500 ft. 55-60° (Up 3-4°)

Min RH: (Valleys) 55-65% (Down 10-20%)

20 FT Winds:

Valleys and Slopes: South 5-7 mph with gusts to 10 mph.

Ridgetops: South 10-12 mph with gusts to 20 mph.

CWR (0.25"+): 0% LAL: 1. Haines: 3 (Very Low)
Inversion: Weak Breaking: 1000 Mixing Heights: 2800 ft/AGL.

TONIGHT: Becoming cloudy with rain likely after 0300. Areas of fog/mist.

Min Temperature (°F): 45-55° F Max RH: 90-100%

20 FT Winds:

Slope/Valleys: South 7-10 mph.

Ridgetops: South 10-15 mph with gusts 20-25 mph.

CWR (0.25"+): 40% **LAL:** 1. **INVERSION:** Weak inversion after 2030.

EXTENDED OUTLOOK:

Monday...Rain. Windy. Highs: 50-60°. Min Humidity: 80-100% Winds: Southwest 15-20 mph with gusts 35 to 40 mph.

Tuesday...A chance of rain in the morning...clearing in the afternoon. Highs: 60-70°. Min Humidity: 60-70% Winds: Northeast-east 8-10 mph.

Wednesday...Mostly sunny. Highs: 65-75°. Min Humidity: 50-60% Winds: Northeast-east 7-10 mph with gusts to 15 mph.

PLEASE submit your weather observations to the IMET.

Snap a picture of your obs and text them to: 509-844-7003

Fire Behavior Forecast #91							
Name of Incident: Anvil and FLAT	Administrative Unit: OR-RSF						
Date & Time Issued: October 14, 2023 @ 1900	Operational Period: October 15, 2023						
FBAN: Steve Ziel	Signed: /Z/						

<u>Assumptions:</u> A few light showers, then partial clearing in the afternoon will continue to result in minimal fire activity. Fire spread is unlikely due to moist/wet fuels. The previous cycles of moisture will linger across the fire area. Isolated, <u>sheltered</u>, <u>heavy fuels will continue to smolder</u> and serve as future heat sources until fully consumed, or more rain occurs. The Anvil and Flat fires continue to retain widely scattered heat sources resulting from previous drought conditions, and a full summer of drying.

Weather Summary See attached Fire Weather Forecast Fire Behavior Summary

<u>Fuels in the fire area</u> include very high load fluffy *Timber Litter (TL9)*, closed canopy *Timber Litter (TL5)* with needles, branches/heavy fuel concentrations, and large *Timber with Understory (TU5)* shrubby open timber canopy. Primary tree species include mixed sizes of Douglas Fir/mixed conifer timber stands. Shrub fields and understory species include Oregon Myrtlewood, maple(s), manzanita, other shrub-form hardwoods. *Large snags and heavy fuel concentrations (often shrub covered) are common throughout all areas*. Live fuels (shrubs) are seasonally dry and may contribute to fire spread. <u>Moss</u> is common in timber stands as a ladder/spotting fuel. <u>Gorse</u> (highly flammable shrub) is common in timber harvest areas, especially on west side of fire area.

<u>Today's potential fire behavior</u>: Showers and partly cloudy skies will continue to result in wet/moist surface fuels. Today's fire behavior will include isolated/scattered pockets of smoldering in heavy fuels. Gorse may burn with wind even when damp. Snags continue to fall due to length of time burning and wind. <u>Heavy fuels (logs, stumps) will retain long-term heat due to a whole summer of drying.</u> Primary fire behavior characteristic for the day continues to be "smoldering".

* Fine fuel moisture= 20% + (exposed). Probability of Ignition is 0%-5%. Group torch spotting to <.00 mile.

Fuel Type/Model	Rate of Spread	Flame Length	Ridge Top Gusts	to 15 mph
If your work area looks like -	Ch/hr = FPM		Ch/hr	FL
Timber Litter (TL9) Fluffy/leafy	<1 ch/hr.	< 1 feet	< 1	< 1
Timber w/ Shrub Understory (TU5)	<1 ch/hr.	< 1 feet	< 1	< 1
Timber Litter – conifer needles (TL5)	<1 ch/hr.	< 1 feet	< 1	< 1

Specific Assignments:

FLAT – Monitor smoke location and characteristics. Evaluate weather, including ridge top winds and rainfall. Low reburn potential due to area wide rain on fuels containing unburned pockets, fire killed shrubs, and ragged edge burn pattern.

ANVIL – Monitor smoke location and characteristics. Expect scattered areas of minimal fire behavior (smoldering) in heavy fuels. Snags are top-heavy with moisture, and the ground is wet, watch for rolling materials.

Air Operations: Clouds and showers in the morning, then variable clouds in the afternoon. Monitor ridge top ceiling.

Safety

Good opportunity to review and discuss some "what if's." Ensure all parties know what to do, where to go "IF" something happens.

Be alert to changing conditions – don't be lulled into the "same old/same old"... fire behavior and weather processes are dynamic and ever changing throughout the operational period, week, season...

SAFETY MESSAGE & DELIBERATE RISK ASSESSMENT-HAZARD SUMMARY

15 October 2023 SAFETY MESSAGE	EMPHASIS TOPIC: The weather roller-coaster continues. More showers today, followed by a brief break, then one more wet and windy day Monday with up to 1" of rain. Beyond Monday the weather looks good for getting some good work done. Stay dry this weekend and keep yourself and equipment ready. Resiliency is the key.	
Hazard	Mitigation	Post Risk
Extraction/Aircraft	Identify medivac sites and helispots. Initiate ground transport to accident site for transport capability. Identify EMT/EMTP from resources assigned to division. Provide line-qualified paramedics to each division as available. Review IWI protocol to ensure familiarity. Consider Short Haul if conditions dictate. Utilize agency, national guard and civilian medivac as treatment/timing dictates. Evaluate ongoing need for repositioning medical personnel.	HIGH
Hazard Trees	Use avoidance to limit exposure time. Fall ahead to avoid exposure. Use qualified fallers or alternate methods if needed. Conduct on-going risk analysis of all work areas. Follow Hazard Tree Safety Guidelines (IRPG page 20-21).	HIGH
Heavy Equipment	Post lookouts and road guards around equipment work areas. Establish communications with equipment boss and operator. Do not work downslope from equipment. Follow agency guidelines for chipping operations.	HIGH
Human/Environmental Factors	Engage as weather conditions permit. Provide visqueen for rainfall protection. Maintain an awareness of wildlife and poison oak. Provide warming, drying and laundry areas at ICP for crews and personal equipment. Maintain proper footing on slopes and awareness of rolling material.	MODERATE
Transportation	Improve lighting at HWY101 and Cape Blanco Rd intersection. Allow extra travel time commuting from Gold Beach to ICP. Identify equipment for clearing blocked roads due to weather impacts. Avoid washouts and low-lying areas during periods of rainfall. Evaluate travel routes daily for weather impacts and have secondary access/egress routes. Sign all incident travel routes. Provide daily updated travel plan maps. Practice defensive driving. Obey all speed limits on all roads and in school zones.	MODERATE
Public Interaction	Implement area and road closures as necessary. Maintain awareness of evacuation areas and provide accurate information dissemination. Maintain awareness of hunters within and adjacent to the perimeter.	LOW
Communication	Evaluate dead zones prior to engagement. Utilize human repeaters as needed. Ensure accountability of resources in problem areas. Spiking resources must have communication coverage.	LOW
Viral Transmission Mitigations, Communicable Disease	Maintain awareness of health and perform self-checks. Report and isolate if not feeling well. Use remote briefings and logistical layouts that provide for social-distancing as necessary. Establish liaison with Curry County Public Health.	LOW

SUPPRESSION REPAIR QUICK GUIDE – ANVIL FIRE Full Repair Plan is Available at the READ Tent Contact: Jeremy Gooding – L-READ(T). Ph: (808) 281-4781

Suppression repair is intended to mitigate or eliminate resource impacts caused by fire suppression activities and to restore the area to its natural appearance.

Weed Wash:

- Use Weed Wash Stations and do not transport contaminated material form one part of the fire to another. Also required on Demob.
- Weed wash is most important coming out of contaminated areas and before moving into clean areas.
- Prevention is the most powerful tool we have for managing invasive species like Gorse.

Repairing Line

- Pull berms back into the line, uniformly distributing soil and organic material to re-establish natural contours.
- Place or scatter available slash, trees, limbs, and tops to obliterate and blend the line while also providing cover for erosion mitigation.
- Attempt to blend slash into surrounding landscape as much as possible.
- Block access by unauthorized motor vehicles at potential entry points using woody material, boulders, or any locally available material.
- Provide drainage where needed with water bars to standard specifications.
- Chipped material piles need to be less than 4 inches in depth.
- On dozer line, install water bars on slopes greater than 45 percent. See Repair Plan for specifications.

Sensitive Areas:

- Repair within sensitive areas that were impacted during suppression actions require on-site REAF/ARCH. Check Field Maps for "monitor required".
- Look for flagging: Orange and black polka dot and yellow flagging marks resource areas to protect. Do not disturb.

Ditches, Culverts, and Drainages:

- · Return features to proper functional state.
- Clean inlets and outlets
- Establish drain dips.
- Restore new outer berms to pre-fire condition.
- Make sure ditches are clean and functioning.

See Anvil Suppression Repair Plan for specs on:

- Staging Areas/Drop Points
- Road repair and Road Used as Line
- Helispots
- Fences

Thank you for protecting our resources.

Human Resources Message

October 15, 2023

Anvil and Flat Fire Food Donations People helping People!

If you are interested in donating any unopened, pre-packaged food items, or fruit from your lunches, you may drop them off at the Human Resources yurt, which is located next to Supply. We have tables set up in HR so you can place your items on the tables.

We will also have food donation boxes placed in the yurts here at the ICP. We will be donating the unwanted food items to the Powers Community Food Bank.

The Powers Community Food Bank thanks you in advance for your kindness and generosity and they want you to know that all the donated food items will be going out to families in need.

"Never doubt that a small group of thoughtful, committed citizens can change the world: indeed, it is the only thing that ever has." -Margaret Mead

Contact Information - Human Resource Specialist: Susie Manezes

Cell Phone: 602-571-9327 Email: smanezes@blm.gov

Diversity, Teamwork, Appropriate Behavior, Mutual Respect - You Make the Difference!

WHY WE WEED WASH?

Scan the QR code to find out. Hint: it's not to make your truck look pretty!

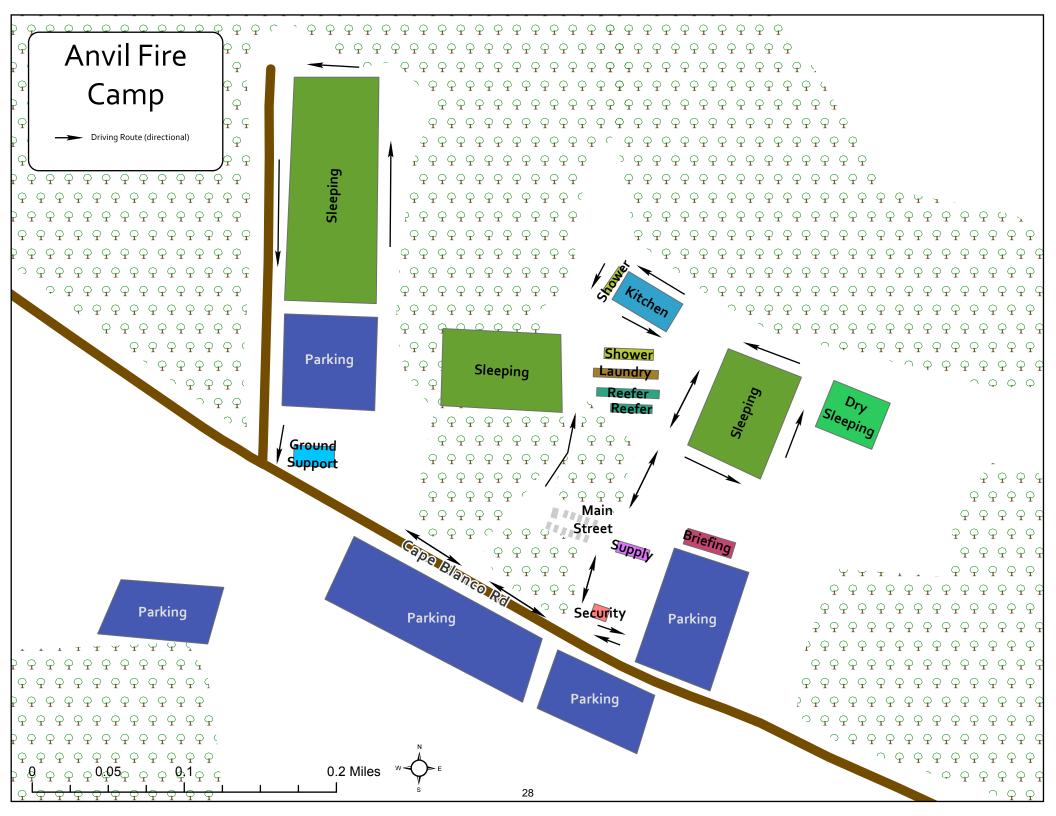

http://bit.ly/anvil-weed-wash

Thank you to the resources who have taken the time to visit the weed wash daily. It truly will make a difference for the community.

In Camp Medical Procedure

If Red or Yellow

Yell for help and stay with patient

Provide first aid as appropriate

Call Anvil communications at **971-713-0379** or by radio

If Green

Go to camp medical tent for eval and treatment

EMERGENCY PLAN INCIDENT WITHIN AN INCIDENT

ON SCENE INCIDENT COMMANDER

In the event of an accident or medical incident of any size, your primary responsibility is to ENSURE that the victim(s) receive prompt and effective Triage, Treatment, Extrication and Transport.

- ENSURE THE MEDICAL INCIDENT REPORT IN THE INCIDENT ACTION PLAN IS BEING USED AND FOLLOWED- *IF DETERMINED TO BE A GREEN, DO NOT DECLARE EMERGENCY TRAFFIC AND ONLY COMPLETE LINE 1-4 ON MIR*.
- Conduct size-up of the incident nature of accident, number type of resources involved, latitude and longitude location (DD°MMM.MM format): notify incident communications center and supervisor, request assistance as needed.
- Order and coordinate medical and support response to the accident.
- Evaluate special needs (law enforcement, haz mat, etc.).
- Clear the command frequency if medical emergency, coordinate with incident communications and air attack for air medical transportation needs.
- Preserve and photograph the scene for accident investigation.
- Remain aware of surroundings and the status of the main incident (delegate personnel to monitor the main fire) to ensure safety of medical treatment personnel.
- Until relieved, supervise and manage all personnel involved at the incident scene.
