Date and Time Products Delivered to Incident: 09/02/2023 01:15 PDT			
Comments /notes on tonight's mission and this interpretation: Bedrock Fire No change to perimeter since last mapping. has some intense heat along the northern portion, and a couple intense areas in the southwest, with the interior holding mostly scattered heat. In the eastern parts, isolated heat sources were mapped. Christy Creek OR-WIF-230434 The new fire's name and Incident ID, this was mentioned in the previous log as being detected and mapped at 10 acres in the Alpine Ridge area near Chalk Creek. Clouds obscured heat from being visible in this area during the most recent scan.
