<b>Comments / notes on tonight's mission and this interpretation:</b> <b>Bedrock Fire</b> No change to perimeter since last mapping. Has some areas of relatively more intense heat along the northern portion, and a few patches in the southwest, with the interior holding mostly scattered heat. Some isolated heat points were mapped where the scattered heat was not observed. <b>Christy Creek</b> No change to perimeter since last mapping. No heat detected or mapped. Previous IR shapes removed from NIFS. For acreage calculations, Area (geodesic), NAD83 Zone 10, and US Survey Acres
