Fire Weather Forecast

FORECAST NO: 5 NAME OF FIRE: Dinner, Grizzly, Brice Creek Fires

FORECAST FOR: Mon, Sep 4, 2023 Day Shift
FORECAST ISSUED: Sun Sep 3, 2023, 1800 PDT
SIGNED: Bob Tobin - IMET

WEATHER DISCUSSION: The upper-level low will get kicked east of the region in response to a trough moving towards the BC border and a weak wave moving into the region from the Pacific. Light to moderate rain will be possible until about mid-morning...but this should come to an end by early afternoon. Several weak disturbances will move through the Pacific Northwest this week with the main energy remaining north of the fire area. While conditions will warm up and dry out, onshore flow should temper this warming trend a bit.

TODAY: Cloudy with a chance of rain in the morning. Decreasing clouds through the afternoon.

Max Temperature(°F): (Valleys) 60-70 (Little change) Min RH: (Valleys) 50-60% (Little Change)

(Ridges) 57-65 (1-3 Warmer) (Ridges) 55-65% (Little Change)

20 FT Winds:

Valleys and Slopes: Becoming Upslope 4-7 mph after 1100.

Ridgetops: Becoming WNW 10-12 mph after 1300.

CWR (0.25"+): 10% Inversion Break/Mixing Heights: 1030/3200 ft. LAL: 1 Haines: 3 (Very Low)

TONIGHT: Becoming clear. Localized fog/low clouds in the valleys/canyons.

Min Temperature (°F): Max RH:

Valleys 40-50 Valleys 90-100% Ridgetops 48-52 Ridgetops 65-75%

20 FT Winds:

Slope/Valleys: Downslope/drainage 3-5 mph after 2000.

Ridgetops: N 6-10 mph...becoming NEE 3-5 mph after 2200

CWR (0.25"+): 0% **LAL:** 1. **INVERSION:** Moderate to strong inversion after 2000.

EXTENDED OUTLOOK:

Tuesday...Morning fog and low clouds in the valleys, otherwise sunny. Highs 65-75 valleys and 62-68 ridges. Relative humidity 40-55% Winds: ESE 3-5 mph in the morning NWN 8-12 after 1100. Wednesday and Thursday...Mostly sunny. Highs 70-80 valleys and 65-75 on the ridges. Humidity: 35-

50% ESE 4-8 mph in the morning, becoming NW 8-10 mph with gusts around 15 mph.

PLEASE submit your weather observations to the IMET.

Snap a picture of your obs and text them to: (509) 844-7003

FIRE BEHAVIOR FORECAST

FORECAST NUMBER: 5	TYPE OF FIRE: Wildfire
FIRE NAME: Dinner, Grizzly, and Brice Creek	OPERATIONAL PERIOD: 0700-1900 September 4, 2023
DATE ISSUED: September 3, 2023	TIME ISSUED: 2000 Hours
UNIT: Umpqua National Forest	SIGNED: Don Strand – FBAN, Bryan Gaines FBAN (t)

INPUTS

WEATHER SUMMARY: See Fire Weather Forecast for Details

FUELS:

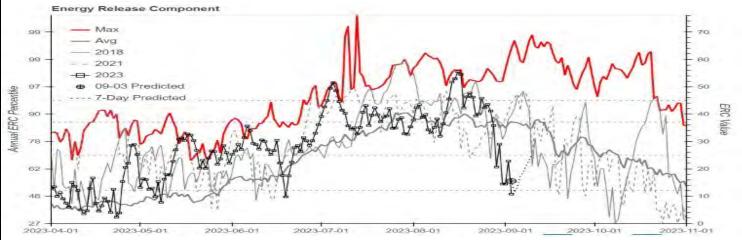

Fuels in the fire area are primarily composed of *Timber Litter*, and *Timber Understory with moss/lichen present in most stands*. Mature conifer stands with western hemlock and Douglas fir present, generally having heavy surface fuel loading. 30 to 50+ year old second growth conifer stands contain needle litter and some down woody debris. Brush and reproduction present in areas with less dense canopies.

OUTPUTS

Rebound of ERC values will lag behind the return of warmer, drier weather conditions.

FIRE BEHAVIOR GENERAL:

Minimal fire behavior is expected with little to no perimeter growth. Continued smoldering in duff, larger down logs and forest debris. **Dead Fuel Moistures, 1hr 30%, 10hr 24%, 100hr 21%, 1000hr 19%.**

The ERC is a number related to the available energy (BTU) per unit area (square foot) within the flaming front at the head of a fire. The ERC is considered a composite fuel moisture index as it reflects the contribution of all live and dead fuels to potential fire intensity. As live fuels cure and dead fuels dry, the ERC will increase and can be described as a build-up index. The ERC has memory. Each daily calculation considers the past 7 days in calculating the new number. Daily variations of the ERC are relatively small as wind is not part of the calculation.

FIRE BEHAVIOR SPECIFIC:

Dinner Fire, Grizzly, and Brice Creek Fires: With additional moisture yesterday and today's forecast for potentially more moisture, minimal fire activity is expected with little to no perimeter growth. Areas of heavy dead and downed fuels will continue to be consumed along with ground-fire in the duff. Burning standing dead trees will continue to burn creating aerial hazard. The moistened soil will increase the chance of burning rolling debris carrying fire across containment lines. Even though these spot fires may not grow with the high fuel moistures there is a possibility they may when conditions return to a drying trend.

Initial Attack: In the event resources respond to a new start, recognize that fuels and topography may be different than areas you have previously worked in.

AIR OPERATIONS: Low clouds and fog may prohibit air operations over the fires.

SAFETY

Conditions requiring good decision making should be anticipated well in advanced. Better to be an hour ahead than a minute behind. Critical conditions require critical decisions.

INCIDENT: DINNER, BRICE CREEK AND GRIZZLY FIRES OPERATIONAL PERIOD: 0700-1900

TOPICS:

MANAGING FATIGUE

All Firefighters can manage fatigue. Supervisors must set the expectation that all personnel need to stay fit for duty.

It's September and we are seeing small incidents, minor accidents, and unsafe behaviors stack up.

The behaviors that cause accidents, illnesses, and injuries can be related to fatigue and complacency.

Encourage appropriate work/rest ratios.

Encourage good, uninterrupted sleep if possible.

Stay warm and dry.

Maintain your nutrition.

Engage in safe work practices!

MISSION CREEP

Mission Creep is the expansion of a mission or task beyond the original objectives or assignment. In our business this is most often undesirable unless serious life considerations are at risk. Many times, Mission Creep will continue once started until catastrophic failure or undesirable outcomes are encountered. Plans are built based on set and measurable objectives.

Stay in your lane and avoid the urge to creep!

Something is wrong if you keep inheriting bad situations!

BEWARE OF MINESHAFTS! SEE THE RESOURCE ADVISOR MESSAGE!

SAFETY OFFICERS: Jack Cates, Troy Corn

Deliberate Risk Assessment-Hazard Summary 4 SEPT 2023

Hazard	Mitigation	Post Risk
Extraction Time	Identify medivac sites and helispots. Initiate ground transport to accident site for transport capability. Identify EMT/EMTP from resources assigned to division. Provide line-qualified paramedics to each division as available. Review IWI protocol to ensure familiarity. Consider Short Haul if conditions dictate. Utilize agency, national guard and civilian medivac as treatment/timing dictates. Evaluate ongoing need for repositioning medical personnel. Provide dust abatement on Helispots as needed.	нібн
Aircraft	Utilize Air Attack. Ensure all resources are a safe distance from all bucket and retardant drops. Establish LCES. Utilize air to ground primary for fixed wing and bucket work as needed. Reference IRPG (Safe aircraft operations pg. 61-62). Ensure IA resources have coordination with unassigned local air resources to provide deconfliction.	HIGH
Hazard Trees	Use avoidance to limit exposure time. Fall ahead to avoid exposure. Use qualified fallers or alternate methods if needed. Conduct on- going risk analysis of all work areas. Follow Hazard Tree Safety Guidelines (IRPG page 20-21).	HIGH
Heavy Equipment	Post lookouts around equipment work areas. Establish communications with equipment boss and operator. Do not work down-slope from equipment. Follow agency guidelines for chipping operations.	HIGH
Physical Factors	Maintain hydration schedule. Closely monitor work rate and implement rest periods. Maintain nutrition. Ensure adequate work/rest.	MODERATE
Fire Behavior/Weather	Be aware of burn windows and weather impacts and min/max RH for flashy fuels/local conditions. Report changes to FBAN and IMET. Establish MAP for disengagement to provide for an orderly retreat if there is a lack of safety zones. Have a plan for disengagement that establishes a designated meeting point and maintains personnel accountability.	MODERATE
Steep Terrain/Gravity	Establish LCES. Do not work crews above or below each other. Post lookouts for rolling material. Watch footing in loose soil, rock and around vegetation. Do not work below heavy equipment. Scout and identify travel routes.	MODERATE
Transportation	Sign all incident roads that provide access to divisions. Provide daily updated travel plan maps. Practice defensive driving. In local communities obey the posted speed limits and follow school zone restrictions. Use reader boards to provide advanced warning and control entry to base camp as needed. Identify and evaluate contingency and alternate escape and travel routes. Provide dust abatement and grading as needed. Provide advanced scouting for transport access and bridge weight restrictions. Maintain awareness of logging haul routes.	MODERATE
Unburned Fuels/Firing Ops	Maintain awareness fuel dryness levels. Establish LCES. Ensure management action points are implemented and followed. Weather updates as needed during burning operations. Locate indirect firelines to minimize unburned fuels. Follow Interagency Ignition Guide. Ensure communications between all firing operations. Establish road security at all firing sites. Follow approved firing plan for unburned fuels. If utilizing aerial ignitions, make sure firing plan is in place, communicated to, and understood by all resources. Utilize separate Air to Ground frequencies for operations as appropriate.	MODERATE
Environmental Factors	Assign medical personnel to camp. Assess for known allergies and report to medical personnel. Obtain Bee Bopper/wasp spray and yellow jacket traps. Maintain an awareness of wildlife and poison oak. Identify and report allergies through your chain of command. Work with READs and GISS to evaluate and identify mineshafts. Avoid, flag and communicate locations of mineshafts. Provide visqueen for rainfall protection.	MODERATE
Structure Protection	Review structure protection plan and ground truth whether defensible. Identify and report compromised service poles and maintain one span avoidance area. Identify downed lines. Treat all powerlines as live. Identify and avoid vehicles, tires, propane tanks, gas tanks and heavy fuels concentrations.	MODERATE
Communication	Evaluate dead zones prior to engagement. Utilize human repeaters as needed. Ensure accountability of resources in problem areas. Spiking resources must have communication coverage.	LOW
Viral Transmission Mitigations, Communicable Disease	Maintain awareness of health and perform self-checks. Report and isolate if not feeling well. Use remote briefings, spike camps and logistical layouts that provide for social-distancing as necessary. Establish liaison with Lane County Public Health.	LOW
Public Interaction	Implement area and road closures as necessary. Maintain a lookout for hunters in and out of closure areas. Maintain awareness of evacuation areas and provide accurate information dissemination. Maintain awareness of hunters and holiday recreation.	LOW
Initial Attack	Ensure identified IA resources are briefed of expectations and ensure communication plan is provided. Ensure resources are briefed on IA command structure. Provide identified crews with area maps.	LOW

6. Control Operations/Work Assignments:

TASK: Construct direct and indirect fireline and secure perimeter.

PURPOSE: Prevent fire from impacting values at risk including: communities to the west, commercial timberlands, and T & E habitat.

END STATE: Fire is kept north of the 1745 Road and south of the 1746 Road to protect the values at risk through the remainder of the fire season.

7. Special Instructions:

For this DIV - add DINNER FIRE to all CTRs & Shift tickets

Chloeta Insurance Contract Engine will be doing structure protection / prep in the area of Row River Road / Brice Creek Road at the following 5 residences:

39440 & 39618 Row River Road / 39910, 40186, & 40297 Brice Creek Rd. Lead is JR Olson at 509-668-6437. Resource will attend morning Briefings and check in with divisions when entering fire area.

Dinner-Brice Creek-Grizzly Fire Demob Check-Out Instruction Form

Pick up Demob Check-Out form at BRIEFING or the PLANS TENT to begin Process

Resourc	ce Order #	Date:
		See the CURRENT IAP for specific locations
<u>Initial</u>		Follow these steps in the order below:
		sh – ALL line resources that went off-road will need to go through Weed at Layng Creek Staging. If not needed, proceed to step 2.
		pport – Contractors must stop to sign their release inspection. The optional for agency resources. Agency resources proceed to step 3 .
	• • •	eturn any items you checked out. All units must have initial from rming they have no equipment from the incident.
		cations – Return any items you checked out. All units must have initial UNICATIONS confirming they have no radio equipment from the
		Proceed to finance to receive your final timesheet. Having ALL your in and up to date will GREATLY speed up the process.
	any Docume departure, a	Final step. Return completed Demob Check-Out form to Check-in and Intation. Contact Demob at 509-432-6143 with your estimated time of Trival time and destination. You will not be released from the incident in until this is completed.

ALL AIR TRAVELERS

Submit your request 72 hours prior to flight date through the QR Code on the IAP Cover. Call 509-432-6143 for any questions or assistance.

NIGHT SHIFT PERSONNEL

All night shift personnel coming off the line will be required to meet work/rest requirements before starting the Demob process.

EXTENSIONS AND CREW SWAPS

All extension and crew swap processes <u>should</u> be done <u>at least 48 hours</u> before your last working day to help facilitate Operational resources and the Demob process.

Human Resource Message

September 4, 2023

Mindfulness

Mindfulness is paying attention, on purpose, in the present moment. In wildland fire, research shows that when we are operating at our best, we are often engaging mindfully.

Through practice we can become more mindful or mentally fit to catch more errors more of the time. Practice the following exercises for one minute each:

- Focus on the breath coming in your nose, into your lungs, and pushing back out, watching the breath move; if your mind wanders gently refocus it back on the breath.
- Walk around very slowly and pay attention to the feeling of your foot contacting the ground with each step; if your mind wanders gently bring it back and refocus.
- When doing something that is "routine", see if you can notice 2-3 new things about what you are doing rather than doing them on autopilot.
- Practice being in the moment as much as possible. The more often you
 practice, the more able you will be to utilize this skill in the dynamic
 environments in which we work.

Mind Full, or Mindful?

Sharps Creek Base Camp

In Camp Medical Procedure

If Red or Yellow

Yell for help and stay with patient

Provide first aid as appropriate

Contact Dinner Communications at **208-891-8093** or by radio

If Green

Go to camp medical tent for evaluate and treatment

Public Information Message

PHOTOS: Your fireline photos help us build understanding with the public. Community members want to see what you see because you go where others can't safely go. We are looking for any pictures of the fire line, fire engines and equipment, mop-up work, and **fire resources working on the fire line in their PPE.** You can send photos to:

Email: 2023.dinner@firenet.gov

Text: 509-388-1475

As always, make sure you're wearing all your PPE and conveying a professional, caring, and respectful attitude toward the homes and land in this community. Thanks for helping us out!

QUESTIONS FROM THE PUBLIC: If community members have questions that you do not feel equipped to answer professionally, please give them our fire information line: (541) 900-5862.

Liaison Message

Please click on the QR code and answer a few questions to be added to our Cooperators list. You will then be provided with a daily update and cooperators meeting invitation.

EMERGENCY PLAN INCIDENT WITHIN AN INCIDENT

ON SCENE INCIDENT COMMANDER

In the event of an accident or medical incident of any size, your primary responsibility is to ENSURE that the victim(s) receive prompt and effective Triage, Treatment, Extrication and Transport.

- ENSURE THE MEDICAL INCIDENT REPORT IN THE INCIDENT ACTION PLAN IS BEING USED AND FOLLOWED- * IF DETERMINED TO BE A GREEN, DO NOT DECLARE EMERGENCY TRAFFIC AND ONLY COMPLETE LINE 1-4 ON MIR*.
- Conduct size-up of the incident, including nature of accident, number type of resources involved, latitude and longitude location (DD° MMM.MM format). Notify incident communications center and supervisor. Request assistance as needed.
- Order and coordinate medical and support response to the accident.
- Evaluate special needs (law enforcement, haz mat, etc.).
- Clear the command frequency if medical emergency. Coordinate with incident communications and air attack for air medical transportation needs.
- Preserve and photograph the scene for accident investigation.
- Remain aware of surroundings and the status of the main incident (delegate personnel to monitor the main fire) to ensure safety of medical treatment personnel.
- Until relieved, supervise and manage all personnel involved at the incident scene.
