Fire Weather Forecast

FORECAST NO: 6 **NAME OF FIRE:** Umpqua Fires

UNIT: OR-UPF

FORECAST FOR: Tue, Sep 5, 2023 Day Shift FORECAST ISSUED: Mon Sep 4, 2023, 2000 PDT **SIGNED:** Bob Tobin - IMET

WEATHER DISCUSSION: Westerly flow will be over the Pacific NW through the week. Several disturbances are expected to move through the area...but the main energy with all of these will remain well north of the fire area. Expect a warming and drying trend, however the flat westerly flow should temper the high temperatures somewhat. At this time there is no precipitation in the forecast until next week.

TODAY: Localized fog and low clouds in the canyons in the morning...otherwise partly cloudy.

Max Temperature(°F): (Valleys) 65-75 (4-7 warmer) Min RH: (Valleys) 40-50% (Down 5-15%)

(Ridges) 60-68 (5-10 Warmer) (Ridges) 55-65% (Down 10-15%)

20 FT Winds:

Valleys and Slopes: Becoming Upslope 3-5 mph after 1000

Ridgetops: Becoming WNW 10-12 mph after 1300

CWR (0.25"+): 00% Inversion Break/Mixing Heights: 1030/3700 ft. LAL: 1 Haines: 3 (Very Low)

TONIGHT: Clear. Localized fog/low clouds in the valleys/canyons near morning.

Min Temperature (°F): Max RH:

Valleys 40-50 Valleys 80-90% Ridgetops 48-52 Ridgetops 70-80%

20 FT Winds:

Slope/Valleys: Downslope/drainage 3-5 mph after 2000.

Ridgetops: NW 4-7 mph...becoming SSW 3-5 mph after 2100

CWR (0.25"+): 0% LAL: 1 INVERSION: Strong inversion after 2000

EXTENDED OUTLOOK:

Wednesday...Morning fog and low clouds in the valleys, otherwise sunny. Highs 65-75 valleys and 60-65 ridges. Relative humidity 35-50% Winds: SSE 3-5 mph in the morning WNW 8-12 after 1100. Thursday and Friday...Partly cloudy. Highs 70-75 valleys and 60-70 on the ridges. Humidity: 40-50%

ESE 4-8 mph in the morning, becoming NW 8-10 mph with gusts around 15 mph after 1200.

PLEASE submit your weather observations to the IMET.

Snap a picture of your obs and text them to: (509) 844-7003

FIRE BEHAVIOR FORECAST

FORECAST NUMBER: 6	TYPE OF FIRE: Wildfire
FIRE NAME: Umpqua Fires	OPERATIONAL PERIOD: 0700-1900 hrs September 5, 2023
DATE ISSUED: September 4, 2023	TIME ISSUED: 20:00 hours
UNIT: Umpqua National Forest	SIGNED: Don Strand – FBAN, Bryan Gaines FBAN (t), and Andrew Myhra FBAN (t).

INPUTS

WEATHER SUMMARY: See Fire Weather Forecast for Details FUELS:

Fuels in the fire area are primarily composed of *Timber Litter*, and *Timber Understory with moss/lichen present in most stands*. Mature conifer stands with western hemlock and Douglas fir generally have heavy surface fuel loading. 30 to 50+ year old second growth conifer stands contain needle litter and some down woody debris. Brush and reproduction are present in areas with less dense canopies.

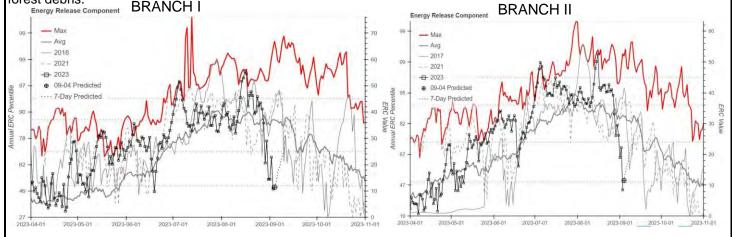

BRANCH I, ERC 46th percentile, 1hr-27%, 10hr-26%, 100hr-21%, 1000hr-19% BRANCH II, ERC 47th percentile, 1hr-29%, 10hr-31%, 100hr-22%, 1000hr-19%

OUTPUTS

Rebound of ERC values will lag behind the return of warmer, drier weather conditions.

FIRE BEHAVIOR GENERAL:

Minimal fire behavior is expected with little to no perimeter growth. Continued smoldering in duff, larger down logs, and forest debris.

FIRE BEHAVIOR SPECIFIC:

BRANCH I and II.

With additional moisture yesterday 9/04 minimal fire activity is expected with little to no perimeter growth. Areas of heavy dead and downed fuels will continue to consume along with ground fire in the duff. Burning standing dead trees will continue to burn creating arial hazards. The moistened soil will increase the chance of burning rolling debris carrying fire across containment lines. Even though these spot fires may not spread with the high fuel moistures there is a possibility they may when conditions return to a drying trend.

Initial Attack: In the event that resources respond to a new start, recognize that fuels and topography may be different than areas you have previously worked in.

AIR OPERATIONS: "All of us know what right looks like and we know where the line is between safe and unsafe. We must hold ourselves accountable to the standards and accomplish our mission with safety constantly in mind." Lt. Gen Brad Heithold, Commander of Air Force Special Operations Command.

SAFETY

Test your fire behavior skills, anticipate what could happen, be prepared and plan accordingly.

INCIDENT: UMPQUA FIRES OPERATIONAL PERIOD: 0700-1900

TOPICS:

TRANSITION DAY FOR CHILCOOT/RIDGE

NW12 has assumed command of the Chilcoot and Ridge Fires. Take time to develop relationships with new leadership and personnel in your Division or Section. Ensure you develop a common operating picture to ensure continuity of operations.

WHAT IS COMPLACENCY?

Simply put for the wildland environment, complacency can be a lack of awareness of actual risk, dangers or deficiencies.

WHAT ARE THE SIGNS OF COMPLACENCY?

Shortcuts, excuses, silence

HOW DO WE AVOID IT?

Avoid repetition, shake up assignments and responsibility to avoid stagnation, provide regular feedback, follow through with decisions or assignments,

BEWARE OF MINESHAFTS! SEE THE RESOURCE ADVISOR MESSAGE!

SAFETY OFFICERS: Jack Cates, Troy Corn

Deliberate Risk Assessment-Hazard Summary 5 SEPT 2023

Hazard	Mitigation	Post Risk
Extraction Time	Identify medivac sites and helispots. Initiate ground transport to accident site for transport capability. Identify EMT/EMTP from resources assigned to division. Provide line-qualified paramedics to each division as available. Review IWI protocol to ensure familiarity. Consider Short Haul if conditions dictate. Utilize agency, national guard and civilian medivac as treatment/timing dictates. Evaluate ongoing need for repositioning medical personnel. Provide dust abatement on Helispots as needed.	HIGH
Aircraft	Utilize Air Attack. Ensure all resources are a safe distance from all bucket and retardant drops. Establish LCES. Utilize air to ground primary for fixed wing and bucket work as needed. Reference IRPG (Safe aircraft operations pg. 61-62). Ensure IA resources have coordination with unassigned local air resources to provide deconfliction.	HIGH
Hazard Trees	Use avoidance to limit exposure time. Fall ahead to avoid exposure. Use qualified fallers or alternate methods if needed. Conduct on- going risk analysis of all work areas. Follow Hazard Tree Safety Guidelines (IRPG page 20-21).	HIGH
Heavy Equipment	Post lookouts around equipment work areas. Establish communications with equipment boss and operator. Do not work down-slope from equipment. Follow agency guidelines for chipping operations.	HIGH
Physical Factors	Maintain hydration schedule. Closely monitor work rate and implement rest periods. Maintain nutrition. Ensure adequate work/rest.	MODERATE
Fire Behavior/Weather	Be aware of burn windows and weather impacts and min/max RH for flashy fuels/local conditions. Report changes to FBAN and IMET. Establish MAP for disengagement to provide for an orderly retreat if there is a lack of safety zones. Have a plan for disengagement that establishes a designated meeting point and maintains personnel accountability.	MODERATE
Steep Terrain/Gravity	Establish LCES. Do not work crews above or below each other. Post lookouts for rolling material. Watch footing in loose soil, rock and around vegetation. Do not work below heavy equipment. Scout and identify travel routes.	MODERATE
Transportation	Sign all incident roads that provide access to divisions. Provide daily updated travel plan maps. Practice defensive driving. In local communities obey the posted speed limits and follow school zone restrictions. Use reader boards to provide advanced warning and control entry to base camp as needed. Identify and evaluate contingency and alternate escape and travel routes. Provide dust abatement and grading as needed. Provide advanced scouting for transport access and bridge weight restrictions. Maintain awareness of logging haul routes.	MODERATE
Unburned Fuels/Firing Ops	Maintain awareness fuel dryness levels. Establish LCES. Ensure management action points are implemented and followed. Weather updates as needed during burning operations. Locate indirect firelines to minimize unburned fuels. Follow Interagency Ignition Guide. Ensure communications between all firing operations. Establish road security at all firing sites. Follow approved firing plan for unburned fuels. If utilizing aerial ignitions, make sure firing plan is in place, communicated to, and understood by all resources. Utilize separate Air to Ground frequencies for operations as appropriate.	MODERATE
Environmental Factors	Assign medical personnel to camp. Assess for known allergies and report to medical personnel. Obtain Bee Bopper/wasp spray and yellow jacket traps. Maintain an awareness of wildlife and poison oak. Identify and report allergies through your chain of command. Work with READs and GISS to evaluate and identify mineshafts. Avoid, flag and communicate locations of mineshafts. Provide visqueen for rainfall protection.	MODERATE
Structure Protection	Review structure protection plan and ground truth whether defensible. Identify and report compromised service poles and maintain one span avoidance area. Identify downed lines. Treat all powerlines as live. Identify and avoid vehicles, tires, propane tanks, gas tanks and heavy fuels concentrations.	MODERATE
Communication	Evaluate dead zones prior to engagement. Utilize human repeaters as needed. Ensure accountability of resources in problem areas. Spiking resources must have communication coverage.	LOW
Viral Transmission Mitigations, Communicable Disease	Maintain awareness of health and perform self-checks. Report and isolate if not feeling well. Use remote briefings, spike camps and logistical layouts that provide for social-distancing as necessary. Establish liaison with Lane County Public Health.	LOW
Public Interaction	Implement area and road closures as necessary. Maintain a lookout for hunters in and out of closure areas. Maintain awareness of evacuation areas and provide accurate information dissemination. Maintain awareness of hunters and holiday recreation.	LOW
Initial Attack	Ensure identified IA resources are briefed of expectations and ensure communication plan is provided. Ensure resources are briefed on IA command structure. Provide identified crews with area maps.	LOW

6. Control Operations/Work Assignments:

ICS 204 WF (1/14)

TASK: Construct containment lines from the 3806 Rd along the perimeter to HiPower Bluffs. Improve control lines and mop up along 3806 Road to DP67. Continue prep along 300 Road.

PURPOSE: To prevent fire from impacting values, such as nearby communities, private timberland, and critical infrastructure by limiting fire spread.

END STATE: Fire is contained west of the 3806 Rd and 300 Road and north of HiPower Bluffs.

6. Control Operations/Work Assignments:

ICS 204 WF (1/14)

TASK: Complete line on north part of Ridge fire. Look for opportunities to secure fire edge in northeast corner of fire below 5851 Rd. Begin repair on 5851 Rd. Continue mop-up and securing on remainder of fire.

PURPOSE: Prevent impact to nearby values by limiting fire spread towards Fuller Lake, the Willamette NF, and Boulder Creek Wilderness.

END STATE: Fire is contained east of Fuller Lake, and north and west of the 5851 Rd.

Transition and Communication

Team Transition from California Team 12 to NW Team 12.

Chilcoot and Ridge fires are under new management! California Team 12 did an outstanding job of managing the Chilcoot and Ridge fires and as of this morning, they have turned that responsibility over to NW Team 12. We appreciate their professionalism and support and look forward to working with them in the future.

As we adjust to the ongoing changes and challenges of picking up additional fire responsibilities, we want to make sure that we keep the lines of communication open and clear. If you have any questions, please reach out to any NW Team 12 member.

NW Team 12 continues to manage Dinner, Grizzly, and Brice Creek fires. We will continue to support all fire personnel at Sharps Creek Base Camp and at the Strader ICP. We have overhead staff in each location to provide that support. If there is anything you need, please let us know.

With any team transition, there will be differences in management styles however, our objectives have not changed nor have our responsibilities. We are here to support you!

Human Resources will be located at the Strader ICP. Please reach out to Susie Manezes or Todd Buchholz, (HRSPs), as they serve as focal points for informal resolution of issues or concerns.

Work safely and have a good day!

Contact Information - Susie Manezes, (602) -571-9327 Todd Buchholz, (541) 580-4890

Public Information Message

PHOTOS: Your fireline photos help us build understanding with the public. Community members want to see what you see because you go where others can't safely go. We are looking for any pictures of the fire line, fire engines and equipment, mop-up work, and **fire resources working on the fire line in their PPE.** You can send photos to:

Email: 2023.dinner@firenet.gov

Text: 509-388-1475

As always, make sure you're wearing all your PPE and conveying a professional, caring, and respectful attitude toward the homes and land in this community. Thanks for helping us out!

QUESTIONS FROM THE PUBLIC: If community members have questions that you do not feel equipped to answer professionally, please give them our fire information line: (541) 900-5862.

Liaison Message

Please click on the QR code and answer a few questions to be added to our Cooperators list. You will then be provided with a daily update and cooperators meeting invitation.

Sharps Creek Base Camp

In Camp Medical Procedure

If Red or Yellow

Yell for help and stay with patient

Provide first aid as appropriate

Contact Dinner Communications at **208-891-8093** or by radio

If Green

Go to camp medical tent for evaluate and treatment

EMERGENCY PLAN INCIDENT WITHIN AN INCIDENT

ON SCENE INCIDENT COMMANDER

In the event of an accident or medical incident of any size, your primary responsibility is to ENSURE that the victim(s) receive prompt and effective Triage, Treatment, Extrication and Transport.

- ENSURE THE MEDICAL INCIDENT REPORT IN THE INCIDENT ACTION PLAN IS BEING USED AND FOLLOWED- * <u>IF DETERMINED TO BE A</u>

 <u>GREEN, DO NOT DECLARE EMERGENCY TRAFFIC AND ONLY COMPLETE</u>

 <u>LINE 1-4 ON MIR*</u>.
- Conduct size-up of the incident, including nature of accident, number type of resources involved, latitude and longitude location (DD° MMM.MM format). Notify incident communications center and supervisor. Request assistance as needed.
- Order and coordinate medical and support response to the accident.
- Evaluate special needs (law enforcement, haz mat, etc.).
- Clear the command frequency if medical emergency. Coordinate with incident communications and air attack for air medical transportation needs.
- Preserve and photograph the scene for accident investigation.
- Remain aware of surroundings and the status of the main incident (delegate personnel to monitor the main fire) to ensure safety of medical treatment personnel.
- Until relieved, supervise and manage all personnel involved at the incident scene.
