Fire Weather Forecast

FORECAST NO: NAME OF FIRE: Umpqua Fires

UNIT: OR-UPF

FORECAST NO. 5 FORECAST FOR: Fri, Sep 8, 2023 Day Shift FORECAST ISSUED: Thu Sep 7, 2023, 2000 PDT **SIGNED:** Bob Tobin - IMET

- WEATHER DISCUSSION: High pressure will build into the Pacific NW behind an exiting

disturbance Friday morning. This will result in continued warming and drying Friday and Saturday. Another deeper disturbance will move through B.C. on Sunday and Monday. This should result in slightly cooler temperatures Sunday and much cooler temperatures Monday and Tuesday. This will also increase ridgetop winds Saturday through Monday. There is little chance of any precipitation through the middle of next week.

TODAY: Sunny and warm.

Max Temperature(°F): (Valleys) 75-82 (2-4 Warmer) Min RH: (Valleys) 30-40% (Down 5-10%)

(Ridges) 65-75 (3-5 warmer) (Ridges) 35-45% (Down 5-10%)

20 FT Winds:

Valleys and Slopes: Becoming Upslope 3-5 mph after 1030. Ridgetops: NW 5-8 mph with gusts to 15 mph after 1200.

CWR (0.25"+): 00% Inversion Break/Mixing Heights: 1100/6900 ft. LAL: 1 Haines: 3 (Very Low)

TONIGHT: Clear and cool.

Min Temperature (°F): Max RH:

Valleys 45-55 Valleys 75-85% Ridgetops 55-65% Ridgetops 50-60

20 FT Winds:

Slope/Valleys: Downslope/drainage 3-5 mph after 2000.

Ridgetops: NW 4-7 mph...becoming SES 4-8 mph after 2100

CWR (0.25"+): 0% LAL: 1. INVERSION: Strong inversion after 2000.

EXTENDED OUTLOOK:

Saturday...Mostly sunny. Highs 77-84 valleys and 68-76 ridges. Relative humidity 30-45% Winds: SE 3-5 mph in the morning...becoming NW 6-10 mph with gusts to 15 mph after 1200.

Sunday and Monday...Partly cloudy. Highs 70-80 valleys and 65-75 on the ridges. Humidity: 35-50% ESE 4-8 mph in the morning, becoming NW 8-10 mph with gusts around 15 mph after 1200.

PLEASE submit your weather observations to the IMET.

Snap a picture of your obs and text them to: (509) 844-7003

FIRE BEHAVIOR FORECAST

FORECAST NUMBER: 9	TYPE OF FIRE: Wildfire
FIRE NAME: Umpqua Fires	OPERATIONAL PERIOD: 0700-1900 September 8, 2023
DATE ISSUED: September 7, 2023	TIME ISSUED: 2000 Hours
UNIT: Umpqua National Forest	SIGNED: Don Strand – FBAN, Miles Pollack FBAN T

INPUTS

WEATHER SUMMARY: See Fire Weather Forecast for Details

FUELS:

Fuels in the fire area are primarily composed of *Timber Litter*, and *Timber Understory with moss/lichen present in most stands*. Mature conifer stands with western hemlock and Douglas fir present, generally have heavy surface fuel loading. 30 to 50+ year old second growth conifer stands contain needle litter and some down woody debris. Brush and reproduction present in areas with less dense canopies.

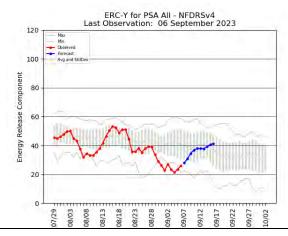

BRANCH I-Forecast for today-ERC 63rd percentile. Yesterday's obs. 1hr-15%, 10hr-18%, 100hr-19%, 1000hr-20% BRANCH II-Forecast for today-ERC 73rd percentile. Yesterday's obs. 1hr-12%, 10hr-15%, 100hr-17%, 1000hr-20%

OUTPUTS

FIRE BEHAVIOR GENERAL: Expect fire behavior potential to slowly increase through the weekend. Continued smoldering in duff, larger down logs, and timber litter with slow fire spread in available fuels. In the afternoon when the RH minimum is reached, a slight uptick in fire behavior is likely in available fuels on southern aspects. Moss and lichens may be a factor in areas where the RH drops below 40% with potential to contribute to spotting. Slight potential for isolated torching in trees with abundant moss/lichen and trees that have been heat treated from previous fire activity.

On northern aspects, 1hr and 10hr dead fuels remain unavailable to carry fire.

Energy Release Component general trend for both Branches indicates ERC is trending up. This brings ERC's to slightly above average for this time of year.

FIRE BEHAVIOR SPECIFIC: BRANCH I and II,

Fuels will continue to dry. Some 1hr and 10hr dead fuels will be available to carry fire on the southern aspects in the afternoon. Generally, smoldering and creeping fire behavior is expected with low intensity in available surface fuels. Minimal fire spread is expected. Areas of heavy dead and downed fuels will continue to consume along with ground fire in the duff. Burning standing dead trees will continue to burn creating arial hazards. Keep an eye out on areas where burning material rolling down slope can cross underslung lines. Spotting is possible from trees with abundant moss and lichen. Also pay attention to trees with fire in the tops as they can send spot fires across your lines.

Initial Attack: In the event resources respond to a new start, recognize that fuels and topography may be different than areas you have previously worked in.

AIR OPERATIONS: Sunny and warm. Inversion lifting around 1100 hrs.

SAFETY

Be mindful of the subtle changes that can happen with the slow warming and drying trend.

INCIDENT: UMPQUA FIRES OPERATIONAL PERIOD: 0700-1900

TOPICS:

RISK MANAGEMENT WEDGE

Be cognizant of the soft elements that fill the wedge. All the small issues will add up. Evaluate and unload the wedge before it reaches the critical point. Pay attention to the soft indicators throughout the day. Don't just accept risk at any level without evaluating if a tangible benefit exists.

"Safety gear: 2 minutes ... Risk Assessment: 5 minutes... Benefit Assessment: 5 minutes...

A mishap that takes a life: "forever"

UTV Use

All employees must be trained and certified to operate a UTV as determined by home agency.

Protective equipment shall be worn in accordance with home unit/agency policy. Use proper riding positions and all passengers must have and use safety belts. Maintain a safe and slow speed for the conditions. Never operate the UTV on hills too steep for the UTV or for your abilities. Travel straight uphill to the maximum extent practicable. If UTV begins to flip, quickly turn front wheels downhill, if possible, dismount on the uphill side. Ensure any loads are balanced and distributed correctly. Secure all loads as appropriate.

SAFETY OFFICERS: Jack Cates, Troy Corn, Taija Corso

Deliberate Risk Assessment-Hazard Summary 8 SEPT 2023

Hazard	Mitigation	Post Risk
Extraction Time	Identify medivac sites and helispots. Initiate ground transport to accident site for transport capability. Identify EMT/EMTP from resources assigned to division. Provide line-qualified paramedics to each division as available. Review IWI protocol to ensure familiarity. Consider Short Haul if conditions dictate. Utilize agency, national guard and civilian medivac as treatment/timing dictates. Evaluate ongoing need for repositioning medical personnel. Provide dust abatement on Helispots as needed.	HIGH
Aircraft	Utilize Air Attack. Ensure all resources are a safe distance from all bucket and retardant drops. Establish LCES. Utilize air to ground primary for fixed wing and bucket work as needed. Reference IRPG (Safe aircraft operations pg. 61-62). Ensure IA resources have coordination with unassigned local air resources to provide deconfliction.	HIGH
Hazard Trees	Use avoidance to limit exposure time. Fall ahead to avoid exposure. Use qualified fallers or alternate methods if needed. Conduct on- going risk analysis of all work areas. Follow Hazard Tree Safety Guidelines (IRPG page 20-21).	HIGH
Heavy Equipment	Post lookouts around equipment work areas. Establish communications with equipment boss and operator. Do not work down-slope from equipment. Follow agency guidelines for chipping operations.	HIGH
Physical Factors	Maintain hydration schedule. Closely monitor work rate and implement rest periods. Maintain nutrition. Ensure adequate work/rest.	MODERATE
Fire Behavior/Weather	Be aware of burn windows and weather impacts and min/max RH for flashy fuels/local conditions. Report changes to FBAN and IMET. Establish MAP for disengagement to provide for an orderly retreat if there is a lack of safety zones. Have a plan for disengagement that establishes a designated meeting point and maintains personnel accountability.	MODERATE
Steep Terrain/Gravity	Establish LCES. Do not work crews above or below each other. Post lookouts for rolling material. Watch footing in loose soil, rock and around vegetation. Do not work below heavy equipment. Scout and identify travel routes.	MODERATE
Transportation	Sign all incident roads that provide access to divisions. Provide daily updated travel plan maps. Practice defensive driving. In local communities obey the posted speed limits and follow school zone restrictions. Use reader boards to provide advanced warning and control entry to base camp as needed. Identify and evaluate contingency and alternate escape and travel routes. Provide dust abatement and grading as needed. Provide advanced scouting for transport access and bridge weight restrictions. Maintain awareness of logging haul routes.	MODERATE
Unburned Fuels/Firing Ops	Maintain awareness fuel dryness levels. Establish LCES. Ensure management action points are implemented and followed. Weather updates as needed during burning operations. Locate indirect firelines to minimize unburned fuels. Follow Interagency Ignition Guide. Ensure communications between all firing operations. Establish road security at all firing sites. Follow approved firing plan for unburned fuels. If utilizing aerial ignitions, make sure firing plan is in place, communicated to, and understood by all resources. Utilize separate Air to Ground frequencies for operations as appropriate.	MODERATE
Environmental Factors	Assign medical personnel to camp. Assess for known allergies and report to medical personnel. Obtain Bee Bopper/wasp spray and yellow jacket traps. Maintain an awareness of wildlife and poison oak. Identify and report allergies through your chain of command. Work with READs and GISS to evaluate and identify mineshafts. Avoid, flag and communicate locations of mineshafts. Provide visqueen for rainfall protection.	MODERATE
Structure Protection	Review structure protection plan and ground truth whether defensible. Identify and report compromised service poles and maintain one span avoidance area. Identify downed lines. Treat all powerlines as live. Identify and avoid vehicles, tires, propane tanks, gas tanks and heavy fuels concentrations.	MODERATE
Communication	Evaluate dead zones prior to engagement. Utilize human repeaters as needed. Ensure accountability of resources in problem areas. Spiking resources must have communication coverage.	LOW
Viral Transmission Mitigations, Communicable Disease	Maintain awareness of health and perform self-checks. Report and isolate if not feeling well. Use remote briefings, spike camps and logistical layouts that provide for social-distancing as necessary. Establish liaison with Lane County Public Health.	LOW
Public Interaction	Implement area and road closures as necessary. Maintain a lookout for hunters in and out of closure areas. Maintain awareness of evacuation areas and provide accurate information dissemination. Maintain awareness of hunters within and adjacent to the perimeter.	LOW
Initial Attack	Ensure identified IA resources are briefed of expectations and ensure communication plan is provided. Ensure resources are briefed on IA command structure. Provide identified crews with area maps.	LOW

6. Control Operations/Work Assignments:

TASK: Continue to take action to secure fire from the southwest corner of Hipower Creek to the 3803 Rd. Complete fireline preparation on the indirect line off of the 3803 Rd. Monitor conditions and continue preparation for implementing firing plan in indirect areas.

PURPOSE: To prevent fire from impacting nearby communities, private timberland, and critical infrastructure by limiting fire spread.

END STATE: Fire is contained east of the forest boundary, west of the HiPower Bluffs and north of the indirect line connected to the 3803 Rd.

7. Special Instructions:

Survey and mitigate aerial hazards including live trees and snags as needed. Implement risk management processes in all tactical decisions. Utilize tactics that minimize impacts to private property. Avoid waterways with retardant. Use screens to reduce impact on Salmon/Steelhead protected populations.

Resource Advisor Message

<u>Objectives</u> - The objective of the fire suppression is to repair areas disturbed by fire suppression activities into a condition that does not negatively affect natural and cultural resources and will not create excessive erosion on the landscape. <u>Without compromising public and firefighter safety.</u>

- Reduce the potential for soil erosion and sedimentation
- Reduce the visual impacts of fire line as well other suppression activities when feasible
- Repair roads and drainage structures to a functioning condition
- Protect natural and cultural resources from additional potential damage

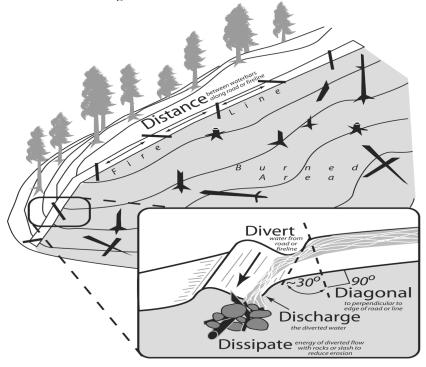

Critical Guidelines

Back-haul all trash, un-needed flagging and signs. Please leave safety flagging in place. **On Firelines, waterbars** should be installed as described below, fire line covered with slash, and entrances blocked.

Water Bars

Fire line Gradient	Distance Between Waterbars (4)
(% slope)	(feet)
0 to 10	100 ft
10 to 20	75 ft
21 to 40	50 ft
>40% (B)	25 ®

- DEPTH AND WIDTH: Waterbars need to be cut into surface, do not simply push up soil.
 - Waterbar depths for **dozer lines** should be at least 6 inches; total height from bottom of ditch to the top of the waterbar should average at least 18 inches and not exceed 24 inches.
 - Waterbar depths for **hand lines** should be at least 4 inches; total height from bottom of ditch to top of waterbar should average at least 8 inches and not exceed 12 inches.

ALL AIR TRAVELERS

Submit your request 72 hours prior to flight date through the QR Code on the IAP Cover. Call 509-432-6143 for any questions or assistance.

NIGHT SHIFT PERSONNEL

All night shift personnel coming off the line will be required to meet work/rest requirements before completing the Demob process.

EXTENSIONS AND CREW SWAPS

All extension and crew swap processes should be done at least 48 hours before your last working day to help facilitate Operational resources and the Demob process.

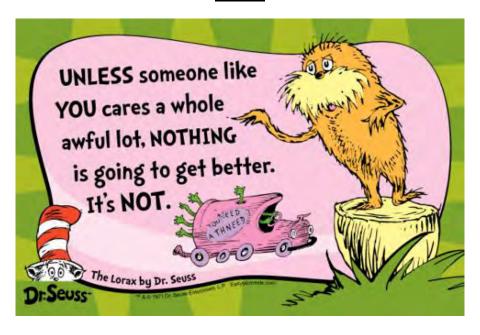

Human Resources Message

September 8, 2023

Care

Care about what you do.
Care about how you do it.
Care that you do it safely.
Care about each other.
Care about yourself.
Please be safe.

Did You Know: About 7% of American adults believe chocolate milk comes from brown cows. While this may not seem like a lot, this is around 16.4 million Americans. Imagine how they would feel when they find out buttermilk doesn't have any butter in it.

Contact Information – Todd Buchholz, (541) 580-4890

Public Information Message

PHOTOS: Your fireline photos and short videos help us build understanding with the public. Community members want to see what you see because you go where others can't safely go. We are looking for any pictures of the fire line, fire engines and equipment, mop-up work, and **fire resources working on the fire line in their PPE.** You can send photos to:

Brice Creek/Dinner/Grizzly Fires

Email: 2023.dinner@firenet.gov

Text: 509-388-1475

Chilcoot/Ridge Fires

Email: 2023.chilcoot@firenet.gov

Text: 541-200-4485

Please make sure you're wearing PPE and conveying a professional and respectful attitude toward the homes and land in this community. Thanks for helping us out!

QUESTIONS FROM THE PUBLIC: If community members have questions that you do not feel equipped to answer professionally, please have them call: (541) 900-5862.

LOST AND FOUND: We have a lost and found set up in the PIO shop at the Strader ICP and the Sharps Creek Base Camp.

MAIL: Mail for Sharps Creek can be sent to the Dorena Post Office:

C/O (Your Name) Dorena Post Office 75694 Wicks Road Dorena, OR 97434

Persons picking up the mail will have to present ID for their mail. Business hours: 9 AM-1 PM Mon-Fri and Saturday 11:00-12:00 (noon). Closed Sundays.

Mail for Strader ICP in Glide can be sent to:

C/O (Your Name) Chilcoot Fire Camp 373 French Creek Road Glide, OR 97443

Mail can be picked up with the PIOs at the Strader ICP in Glide.

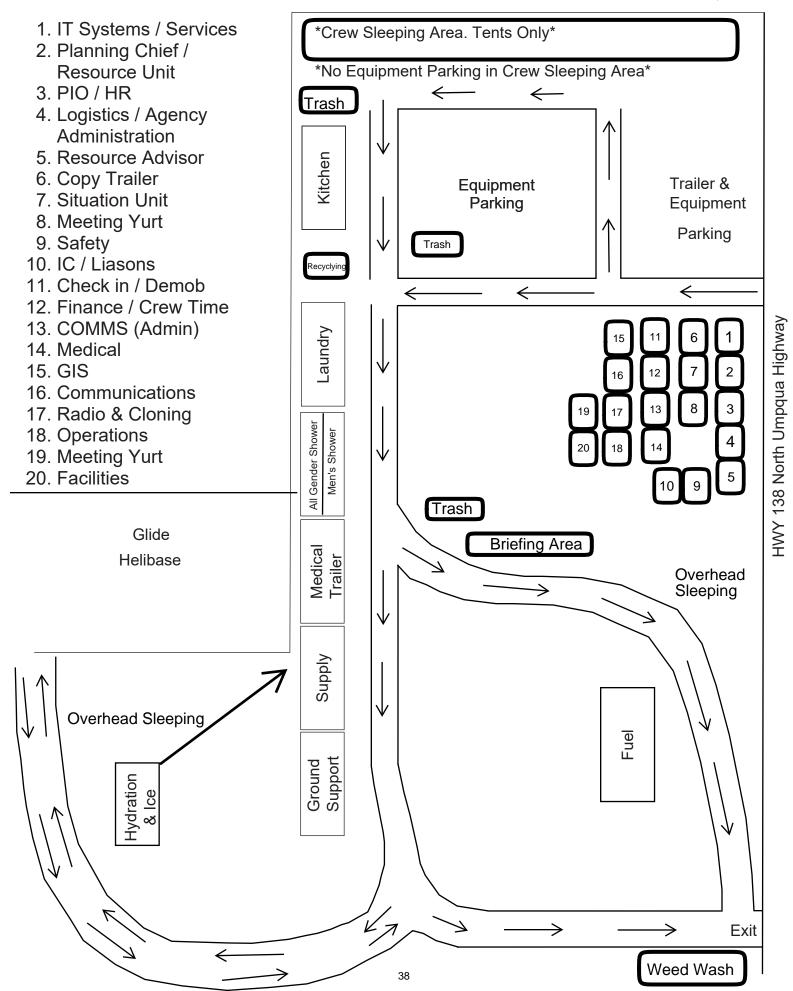

Liaison Message

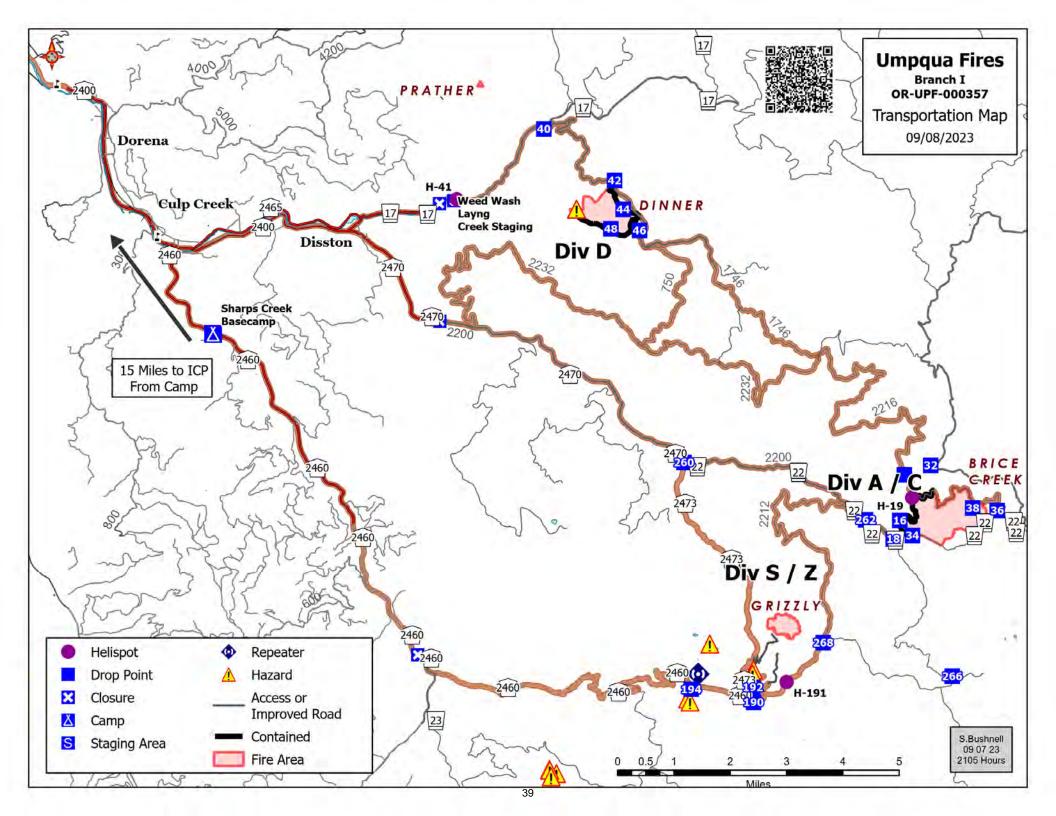

Please click on the QR code and answer a few questions to be added to our Cooperators List. You will then be provided with a daily fire update and invitations to upcoming cooperators meetings.

In-Camp Medical Procedure

Sharps Creek Basecamp

If Red or Yellow

Yell for help and stay with patient.

Provide first aid as appropriate.

Contact Dinner communications at **208-891-7538** or by radio.

If Green

Go to camp medical tent for eval and treatment.

For Night Emergencies

Go to camp medical tent.

If you cannot leave the patient Contact

Dinner communications at

208-891-7538.

Chilcoot Basecamp

If Red or Yellow

Yell for help and stay with patient.

Provide first aid as appropriate.

Contact Chilcoot communications at **208-891-8093** or by radio.

If Green

Go to camp Cardinal medical trailer for eval and treatment.

For Night Emergencies

Go to camp Cardinal medical trailer.

If you cannot leave the patient contact
Chilcoot communications at

208-891-8093.

EMERGENCY PLAN INCIDENT WITHIN AN INCIDENT

ON SCENE INCIDENT COMMANDER

In the event of an accident or medical incident of any size, your primary responsibility is to ENSURE that the victim(s) receive prompt and effective Triage, Treatment, Extrication and Transport.

- ENSURE THE MEDICAL INCIDENT REPORT IN THE INCIDENT ACTION PLAN IS BEING USED AND FOLLOWED- * IF DETERMINED TO BE A GREEN, DO NOT DECLARE EMERGENCY TRAFFIC AND ONLY COMPLETE LINE 1-4 ON MIR*.
- Conduct size-up of the incident, including nature of accident, number type of resources involved, latitude and longitude location (DD° MMM.MM format). Notify incident communications center and supervisor. Request assistance as needed.
- Order and coordinate medical and support response to the accident.
- Evaluate special needs (law enforcement, haz mat, etc.).
- Clear the command frequency if medical emergency. Coordinate with incident communications and air attack for air medical transportation needs.
- Preserve and photograph the scene for accident investigation.
- Remain aware of surroundings and the status of the main incident (delegate personnel to monitor the main fire) to ensure safety of medical treatment personnel.
- Until relieved, supervise and manage all personnel involved at the incident scene.

Controlled Unclassified Information//Basic

Medical Incident Report

FOR A NON-EMERGENCY INCIDENT, WORK THROUGH CHAIN OF COMMAND TO REPORT AND TRANSPORT INJURED PERSONNEL AS NECESSARY.

FOR A MEDICAL EMERGENCY: IDENTIFY ON SCENE INCIDENT COMMANDER BY NAME AND POSITION AND ANNOUNCE "MEDICAL EMERGENCY" TO INITIATE RESPONSE FROM IMT COMMUNICATIONS/DISPATCH.

Use the following items to communicate situation to communications/dispatch.

١.	CONTACT COMMUNICATIONS	DISPATCH (Verif	correct fred	uency	prior to	o starting	repo	rt)

Ex: "Communications, Div. Alpha. Stand-by for Emergency Traffic."

INCIDENT STATUS: Provide incident summary (including number of patients) and command structure.

Meadow Medical, IC is TFLD Jones. EMT Smith is providing medical care."										
	RED / PRIORITY 1 Life or limb threatening injury or illness. Evacuation need is IMMEDIATE Ex: Unconscious, difficulty breathing, bleeding severely, 2° - 3° burns more than 4 palm sizes, heat stroke, disoriented. YELLOW / PRIORITY 2 Serious Injury or illness. Evacuation may be DELAYED if necessary. Ex: Significant trauma, unable to walk, 2° - 3° burns not more than 1-3 palm sizes. GREEN / PRIORITY 3 Minor Injury or illness. Non-Emergency transport Ex: Sprains, strains, minor heat-related illness.									
		Ex: Sprains, strains, minor he	at-related illness.							
	njury or Illness & sm of Injury				Brief Summary of Injury or Illness (Ex: Unconscious, Struck by Falling Tree)					
Transpo	Transport Request Air Ambulance / Short Hau Ground Ambulance / O									
Patient	t Location				Descriptive Location & Lat. / Long. (WGS84)					
Incide	ent Name				Geographic Name + "Medical" (Ex: Trout Meadow Medical)					
On-Scene Inci	dent Commander				Name of on-scene IC of Incident within an Incident (Ex: TFLD Jones)					
Patie	ent Care				Name of Care Provider (Ex: EMT Smith)					
3. INITIAL PATI	ENT ASSESSMENT:	: Complete this section for each pati	ent as applicable (start wi	ith the most severe patient)						
Patient Assessm	ent: See IRPG page	106								
Treatment:										
4. TRANSPORT	PLAN:									
Evacuation Loca	tion (<i>if different</i>): (Des	escriptive Location (drop point,	intersection, etc.) or	Lat. / Long.) Patient'	s ETA to Evacuation Location:
