1. Incident Name		2. Date Prepared		3. Time Prepared	
Umpqua Fires		9/12/2023		2000	
4. Operational Period (Date and Time)					
From:	9/13/2023	at	700	To:	9/13/2023 at 1900
5. Strategic Framework and Leaders Intent					
Strategic Framework:					
Implement suppression strategies that minimize impacts to identified values at risk, and that ensures firefighter and public safety are the top priority					
Specifically manage risk to firefighters by ensuring hazards are identified, assessed, and where possible mitigated. Be prepared to accept residual risk when exposure is commensurate with values threatened and the probability of achieving objectives is high.					
Leaders Intent:					
Engage in all work assignments with a high degree of professionalism and provide excellent customer service to all parties involved with the incident. All assigned personnel should:					
* Exhibit professional behavior					
* Ensure effective communication					
* Manage personal safety and the safety of others					
* Conduct effective fatigue management and implement work/rest cycles					
6. Management Objectives and Requirements					
Implement operational plans that establish holding features across the entire perimeter of each fire resulting in minimized duration and physical extent of each, and maximizing the protection of:					
* Highway 138 corridor					
* Private timber lands					
* Bohemia Mining District, Fairview Comm Site, Chilcoot Repeater, and other infrastructure					
* Natural and cultural resources					
Coordinate all fire suppression and repair work with Resource Advisors to protect natural and cultural values.					
Maintain effective relationships by ensuring timely information between the IMT, affected agencies, and the public.					
7. Operational Period Command Emphasis					
Transition has occurred and change is ongoing. Designators for Divisions have changed, leadership has changed, even the order of the IAP has changed, however, the strategic plan for this incident has not changed. Ensure you have good communication, know who you are working for and your mission for the day.

FIRE BEHAVIOR FORECAST

FORECAST NUMBER: 14	TYPE OF FIRE: Wildfire
FIRE NAME: Umpqua Fires	OPERATIONAL PERIOD: 0700-1900 hrs. September 13, 2023
DATE ISSUED: September 12, 2023	TIME ISSUED: 20:00 Hours
UNIT: Umpqua National Forest	SIGNED: Sarah Bush – FBAN

INPUTS

WEATHER SUMMARY: See Fire Weather Forecast for Details

FUELS:

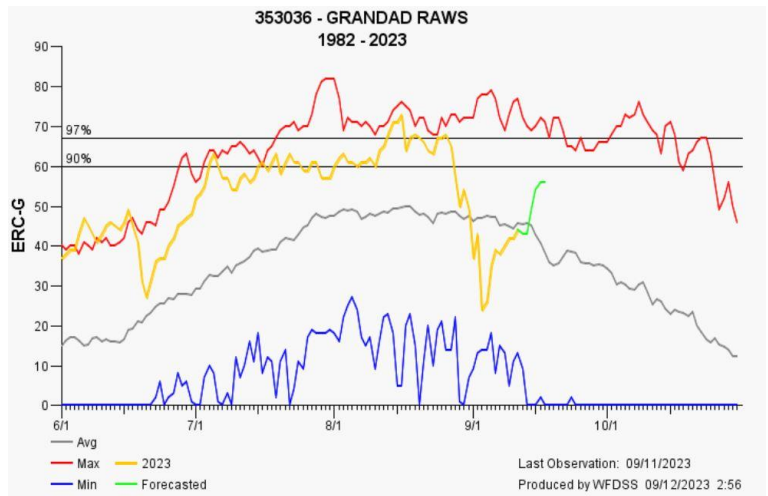

Fuels in the fire area are primarily composed of *Timber Litter*, and *Timber Understory with moss/lichen present in most stands*. Mature conifer stands with western hemlock and Douglas fir present, generally have heavy surface fuel loading. 30 to 50+ year old second growth conifer stands contain needle litter and some down woody debris. Brush and reproduction present in areas with less dense canopies.

Dinner, Brice, Grizzly- Forecast -ERC 71st percentile. Yesterday's obs. 1hr-12%, 10hr-17%, 100hr-15%, 1000hr-18%
 Chilcoot & Ridge- Forecast -ERC 81st percentile. Yesterday's obs. 1hr-12%, 10hr-20%, 100hr-16%, 1000hr-18%

OUTPUTS

FIRE BEHAVIOR GENERAL:

High pressure building over the area will start to bring slightly warmer and drier conditions today compared to yesterday. Fuel conditions will be similar to yesterday. Fire spread potential will remain similar as to what was seen yesterday. Creeping and smoldering in surface fuels will be the most common fire behavior in areas with active burning. The potential for mature timber stands to experience isolated torching where lichen is present still exists and could create increased spotting potential when near the fire's edge. Lichen will become more available to burn as humidity in the valleys dips down to 30%.

FIRE BEHAVIOR SPECIFIC:

Dinner, Brice, Grizzly, Chilcoot, and Ridge

Smoldering and creeping with isolated torching will be the main types of fire. Fire spread potential will still be largely dependent on location, aspect, and exposure/sheltering. Southern aspects may see areas where 1-hr and 10-hr fuels become more available to carry fire as solar radiation reaches its peak between 1100-1500.

Areas of heavy dead and downed fuels will continue to consume and could initiate torching in lichen covered ladder fuels.

Fires with black edge up to containment features should experience minimal fire behavior and isolated to interior portions of the fire.

Initial Attack: In the event resources respond to a new start, recognize that fuels, topography, and conditions may be different than areas you have previously worked in.

AIR OPERATIONS: Slight inversion breaking around 10 am.

SAFETY MESSAGE

Today's the day - TRANSITION TO A NEW OVERHEAD TEAM

Continue transition of new resources onto incident. Check communications medical, and air operations plan in IAP. If you're leaving, close the loop by identifying completed or remaining work items, hazards, work procedures etc. If you're arriving, ask questions. Get to know new partners, share what you know, help each other be successful as soon as possible. When in transition, things slow down. Fight fire with this in mind. Ensure new resources are accounted for, and control retained.

TRANSPORTATION SAFETY

By air, sea, or land, that's how we're getting there. Ensure proper safety procedures and hazard mitigation are identified and being followed for whatever transport method people are using. Be particularly careful driving home as the incident doesn't end until everyone is home.

EVERYONE IS A SAFETY OFFICER

There are 800+ people currently assigned to this incident. Each person needs to be a safety officer for the welfare of themselves, their co-workers, and their families. We are all counting on each other. Your actions in identifying hazards or potential safety problems and taking the time to mitigate them is a critical responsibility in your position and will help to ensure the safest work environment possible for everyone.

THANKS FOR YOUR COMMITMENT TO SAFETY, SOFs: Theall, Augustine, Risdal, Baumgartner, McConell

Four Critical Errors that are made while driving

1. Eyes not on the task – Texting while you drive or looking at the scenery.
2. Mind not on task – Talking on the phone or radio while driving.
3. Being in the line of fire – The oncoming vehicle is in your lane.
4. Losing our balance or traction – We are driving too fast for the road conditions.

Respiratory Hygiene/Cough Etiquette

What is respiratory hygiene/cough etiquette?

These are infection prevention measures designed to limit the transmission of respiratory pathogens spread by droplet or airborne routes, such as campylobacter, flu, RSV, and COVID-19. Implement measures to prevent the spread of respiratory infections from anyone in a health care setting with signs or symptoms.

- Following respiratory hygiene/cough etiquette principles: Fire personnel should be advised to cover their nose and mouth with a tissue when coughing or sneezing. If using a tissue, they should immediately throw away the tissue away after use and wash or sanitize their hands as described above.
- Performing hand hygiene: When soap and water are available all fire personnel should wash their hands often for at least 20 seconds, especially after coughing or sneezing. This is especially true when a fire personnel's hands are visibly dirty, after touching commonly touched surfaces like porta potty doors, tables, and equipment, after using the toilet, or before eating. If soap and water are not readily available, alcohol-based hand sanitizers with at least 60% alcohol should be used.
- Social distance
- Limit time in enclosed areas

Medical Incident Report

FOR A NON-EMERGENCY INCIDENT, WORK THROUGH CHAIN OF COMMAND TO REPORT AND TRANSPORT INJURED PERSONNEL AS NECESSARY.

FOR A MEDICAL EMERGENCY: IDENTIFY ON SCENE INCIDENT COMMANDER BY NAME AND POSITION AND ANNOUNCE "MEDICAL EMERGENCY" TO INITIATE RESPONSE FROM IMT COMMUNICATIONS/DISPATCH.

Use the following items to communicate situation to communications/dispatch.

1. CONTACT COMMUNICATIONS / DISPATCH (**Verify correct frequency prior to starting report**)

Ex: "Communications, Div. Alpha. Stand-by for Emergency Traffic."

2. INCIDENT STATUS: *Provide incident summary (including number of patients) and command structure.*

Ex: "Communications, I have a Red priority patient, unconscious, struck by a falling tree. Requesting air ambulance to Forest Road 1 at (Lat./Long.) This will be the Trout Meadow Medical, IC is TFLD Jones. EMT Smith is providing medical care."

Severity of Emergency / Transport Priority	<input type="checkbox"/> RED / PRIORITY 1 Life or limb threatening injury or illness. Evacuation need is IMMEDIATE <i>Ex: Unconscious, difficulty breathing, bleeding severely, 2° – 3° burns more than 4 palm sizes, heat stroke, disoriented.</i> <input type="checkbox"/> YELLOW / PRIORITY 2 Serious Injury or illness. Evacuation may be DELAYED if necessary. <i>Ex: Significant trauma, unable to walk, 2° – 3° burns not more than 1-3 palm sizes.</i> <input type="checkbox"/> GREEN / PRIORITY 3 Minor Injury or illness. Non-Emergency transport <i>Ex: Sprains, strains, minor heat-related illness.</i>	
Nature of Injury or Illness & Mechanism of Injury		<i>Brief Summary of Injury or Illness (Ex: Unconscious, Struck by Falling Tree)</i>
