INPUTS

WEATHER SUMMARY: See Fire Weather Forecast for Details

FUELS:

Fuels in the fire area are primarily composed of *Timber Litter*, and *Timber Understory with moss/lichen present in most stands*. Mature conifer stands with western hemlock and Douglas fir present, generally have heavy surface fuel loading. 30 to 50+ year old second growth conifer stands contain needle litter and some down woody debris. Brush and reproduction present in areas with less dense canopies.

Dinner, Brice, Grizzly- Forecast -ERC 82nd percentile. Yesterday's obs. 1hr-11%, 10hr-18%, 100hr-16%, 1000hr-18% Chilcoot & Ridge- Forecast -ERC 88th percentile. Yesterday's obs. 1hr-11%, 10hr-16%, 100hr-16%, 1000hr-17%

OUTPUTS

FIRE BEHAVIOR GENERAL:

The high-pressure system over SW Oregon is bringing hotter and drier conditions over the fire areas. The 1000-hr fuels are slowly losing moisture due to these conditions, making them more available to fully consume. Expect lichen to be completely available to burn in mature stands of timber with potential for torching, due to RH less than 30%.

Exposed one and 10-hr fuels will be more available due to drying. Creeping and smoldering in surface fuels will be the most common fire behavior in areas with active burning.

Fire Danger-Umpqua National Forest

Local Thresholds - Watch Out: Combinations

of any of these factors can greatly increase fire behavior: 20' Wind Speed over 13 mph, RH less than 25%, Temperature over 85, 1000-Hour Fuel Moisture less than 12%

FIRE BEHAVIOR SPECIFIC:

Dinner, Brice, Grizzly, Chilcoot, and Ridge

Smoldering and creeping with isolated torching will be the main types of fire. Fire spread potential will be largely dependent on location, aspect, and exposure/sheltering. Southern aspects may see areas where 1-hr and 10-hr fuels become significantly more available to carry fire in the peak of the day.

Areas of heavy dead and downed fuels will continue to fully consume.

Fires with black edge up to containment features should experience minimal fire behavior and isolated to interior portions of the fire.

Spotting distance up to 0.2 mi, Probability of Ignition- 60% shaded; 90% unshaded

Initial Attack: In the event resources respond to a new start, recognize that fuels, topography, and conditions may be different than areas you have previously worked in.

AIR OPERATIONS: Warm and dry today. No concerns.

SAFETY

Base all actions on current and expected fire behavior. The fire environment will be experiencing 2 of the 4 local thresholds for increased fire behavior, temperature >85 and Rh < 25%.

HEALTH AND SAFETY MESSAGE

SAFETY starts with **YOU**

We are ALL accountable for SAFE behaviors

INCIDENT: Chilcoot/Grizzly/Dinner/Ridge/Brice DATE: 9/14/2023 TIME: 24 Hours

Major Hazards and Risks:

- ➤ **Distraction-**It's all around us, transition, demise of the Pac-12, busy fire season, personal life, whatever it is, keep your head in the game!
- > Complacency-Small accidents are starting to occur, maintain our vigilance and SA.
 Resources are starting to forget PPE. HAVE IT, WEAR IT, or earn a one-way trip home.
- > **Driving**-Fatigue, long drive times, animal encounters, sun angle, dusty windshields, narrow roads, soft shoulders, traffic.

Fire Order of the Day – Maintain Control of your forces at all times

Narrative:

COMPLACENCY/DRIVING-Work with your folks, slow down to go fast. Utilize backers, chock your tires, do PM checks and re-evaluate your SA.

RESPIRATORY ILLNESS-Ensuring adequate rest periods, proper hydration, good hygiene, and adequate nutrition will help boost immune function to fight against camp crud, heat illness and other ailments.

HORNETS/WASPS-They are Hungry, Angry and want to fight you. They will Sting and Bite you for the sheer joy of doing so. Avoid them, remove food sources, and mark known nests.

Swiss Cheese Model

Little problems, add up to become larger ones. We can't ignore those small failures; they may be signs of larger system failures. Recognizing these early warning signs can prevent major injuries!

Driving Safety

- ➤ Has anyone else noticed that as the days go by on the incident and the assignments become less challenging/or routine we tend to drop our guard and make careless mistakes?
- To prevent accidents, make concessions to other drivers who are thoughtless, unskilled, or ignorant of the hazards they create. Drive defensively and yield the right-of-way even when by all rules of the road it is yours.
- ➤ Keep well to the right side on narrow roads and blind curves. Be able to stop within less than half of the visible distance. However, don't drive on the shoulders that may be soft and give way easily.
- ➤ Keep headlights, taillights, mirrors, and all windows clean and clear. When conditions limit visibility, slow down, and double check to ensure your lights are on.

Extensions and Crew Swaps – NW 6

This is the Team Standard Operating procedure based on national policy

- Resources ordered as 'O' numbers cannot swap crew members (except some medical resources). They can extend an additional 7 or 14 days, depending on their availability and the needs of the incident. See Plans for an extension form.
- Contract Crews are generally not extended unless replacement resources are scarce
- Hand crews may swap crew members if needed, the IMT must be notified through the crew swap form through the QR code
- Resources may be demobed regardless of crew status if it is no longer needed
- Contract equipment may stay on the incident until is no longer needed, a maximum dollar amount is reached, or replacement operators cannot be provided
- It is the responsibility of the Contract Owner to track their workers and ensure the workers maintain proper work/rest
- > The IMT will assume contracted equipment will swap crew members as necessary to provide adequate rest for their workers
- Non-fireline equipment personnel (like hand wash stations) are not tracked other than a current, onsite contact
- Specific to Contracted Fireline Equipment
 - If replacement personnel cannot be provided, this information must be documented on an ICS-213, provided to Operations and Plans at least 72 hours prior to the 14th workday, and the resource will be demobed after 14 shifts. Or, an extension form may be completed under certain circumstances, based on operational need, see Plans for this form.
 - Crew swaps/replacements MUST be tracked through the provided QR code form (or a previously obtained form from a past IMT) as soon as known and/or at least by 1800 the day prior to the change. If the new worker is the primary operator and any information in the IAP is incorrect, correct information MUST be provided to their Division Sup immediately following the operational briefing/division breakout.
 - > Replacement workers must provide proof of current annual training upon request
 - The IMT will **NOT** track a last work day for these resources in the IAP unless
 - > It was determined to be excess to the needs of the incident and will demob
 - A resource was unable to provide replacement workers and will demob

Please contact Plans after the briefing, at their office at either camp, or at Check-in if you have questions or wish to understand how your last work day/demob date was determined.

Disease Prevention

Take everyday preventive actions to stop the spread of germs.

- Take everyday preventive actions that are recommended to reduce the spread of flu, camp crud, and Covid.
 - Avoid close contact with people who are sick.
 - If you are sick, limit contact with others as much as possible to keep from infecting them.
- Cover coughs and sneezes.
 - Cover your nose and mouth with a tissue when you cough or sneeze. Throw the tissue in the trash after you use it.
 - Cough into your sleeve or jacket.
- Wash your hands often with soap and water. If soap and water are not available, use an alcohol-based hand rub.
- Avoid touching your eyes, nose, and mouth. Germs spread this way.
- Clean and disinfect surfaces and objects that may be contaminated.
- CDC recommends that people stay home for at least 24 hours after their fever is gone except to get medical care or other necessities.
 Fever should be gone without the need to use a fever-reducing medicine.
