Health & Safety Message

Redundancy or Accident Avoidance

The best way to avoid accidents is to avoid circumstances that place us only one mistake away from failure (injury, close-call, fatality, accident). To do this, we surround ourselves with more than one layer of control. This is called Redundancy. These controls include the following:

- Fire Orders and 18 Watchout Situations
- Implementing LCES
- Following Standard Operating Procedures (SOP's)
- Proper use of Personal Protective Equipment
- Clear and Direct Communication
- Strength of your Situational Awareness
- Strength of your buddy's Situational Awareness
- Supervisory Control

We rarely find ourselves in a situation where none of these exist. Understand that the use of Redundancy of controls is largely what prevents unintended outcomes.

Always maintain Situational Awareness.

FINANCE MESSAGE

Finance Email: 2023.chilcoot.finance@firenet.gov or 2023.dinner.finance@firenet.gov **Finance Phones**: *Contractors*: 971-245-0259 *Agency Personnel*: 971-762-8750

This incident requires electronic documentation. Please email your time to the Finance email address daily. Scanned PDF documents are preferred. Don't forget to add, in the remarks box of your CTR or shift ticket, which fire you worked on.

Required Documents					
Overhead, Agency Crews & Cooperators	Contract Resources

INCIDENT OBJECTIVES

4. Operational Period: 10/04/2023 0700-2100

5. General Objectives:

Implement a FULL suppression strategy for Chilcoot, Grizzly, Brice Creek, Dinner and Ridge fires:

- Provide for firefighter and public safety through hazard identification and application of a shared risk management process.
- Coordinate public information to provide timely updates to agency partners, cooperators and the public.
- Coordinate suppression and repair activities with READs to minimize impacts on the landscape.
- Effectively manage and track costs for all five incidents.
- Coordinate with agency leadership/administrators to ensure effective and efficient management of firefighting resources.

Chilcoot, Grizzly:

- Chilcoot: provide full incident containment through suppression actions. Grizzly: monitor and evaluate conditions that could lead to fire growth, identify and validate strategic indirect lines.
- Coordinate with ODF-DFPA, as needed, for changing conditions specific to fire progression potentially impacting private lands.
- Repair indirect lines not currently identified as potential containment features, identify primary line repair options as applicable.
- Evaluate a PACE model for the Grizzly fire, develop near-term and long-term modeling based on future potential.
- Work with partner/stakeholders (Sierra Pacific) to access, manage private lands within fire perimeter.

Dinner, Ridge, Brice Creek:

- Achieve full containment with suppression actions and ensure adequate mop-up is conducted to reduce the threat of escape.
- Implement full repair on all indirect line construction.
- Evaluate repair needs for primary line construction.
- Monitor access routes "Ingress/Egress" and minimize impact to road systems.
- Backhaul all equipment as applicable.

5a. Incident Requirements

- Provide Agency Administrator updates and briefings on incident status as conditions evolve.
- Firefighting operations will implement tactics that offer the highest probability of success to minimize impacts to the landscape and minimize unnecessary exposure to firefighters.
- Priority values are firefighter and public safety, critical infrastructure, private land and natural resources.

5b. Leaders Intent

- Safety: Firefighter, public and aviation safety will be addressed through hazard/exposure risk mitigation processes.
- **Risk Management:** Utilize an aligned risk assessment process that mitigates exposure to firefighters through evaluation of conditions during the duration of the incident.
- Communication: Keep Agency Administrators and firefighters informed of strategic actions, accomplishments and challenges.
- Operations: Make informed strategic/tactical decisions suppressing the fire in the right geographic locations with the appropriate resources having the highest probability of success.
- Stakeholders: Collaborate with local partners, officials and landowners to provide situational updates pertinent to the fire.
- Logistics: Provide support ensuring food, water and shelter for incident responders.
- Human Resources: Ensure that all incident personnel are treated with dignity and respect, while having zero tolerance for harassment, alcohol, or illegal drug use.
- Public Information: Provide timely and accurate information through media outlets, trap lines, briefings, community meetings and social platforms.
- Finance: Monitor and communicate incident cost associated with meeting incident objectives.
- Planning: Provide incident documentation, resource tracking and accurate data management.

Fire Weather Forecast

FORECAST NO: 35 FORECAST FOR: Day Shift SHIFT DATE: 04 October 2023 DATE AND TIME ISSUED: 03 Oct 23/1800

NAME OF FIRE: Umpqua Fires UNIT: OR-UPF SIGNED: Jack Messick, IMET

WEATHER DISCUSSION: High pressure has moved over the Pacific Northwest, and this means some strong warming over the next couple of days, to more summer like conditions by Thursday. Thursday also features a drying east wind to drive down afternoon humidity to near 25 percent. Rain returns Monday morning.

TODAY:

WEATHER: Areas of valley fog during the morning, otherwise sunny.

	Maximum Temperatures	Minimum Humidity
Ridges (3500-4500 ft)	57° to 65° (Up 11°)	58% to 66% (Down ~40%)
Valleys (2500-3500 ft)	64° to 72° (Up 13°)	44% to 54% (Down ~25%)

20-FOOT WIND:

Upper slope/Ridge: Northeast 8 to 12 mph, by 1000 becoming north 4 to 12 mph gusts to 18 mph. **Mid-slope/Valley:** Down valley/downslope 1 to 5 mph, becoming upslope/up valley 4 to 9 mph gusts to 14 mph.

AVIATION: Morning fog and low clouds should clear by 1000.

CWR (≥ 0.25 "): ZeroLAL: 1HAINES: 4INVERSION BREAK TIME/MIXING HEIGHT: Partial lifting to 4400ft elevation for the bottom.CAMP FORECAST:ICP: 71F.

TONIGHT:

WEATHER: Clear.

	Minimum Temperatures	Maximum Humidity
Ridges (3500-4500 ft)	43° to 51° (Up 3°)	70% to 80% (Down ~20%)
Valleys (2500-3500 ft)	42° to 50° (Up 2°)	80% to 88% (Down ~15%)

20-FOOT WIND:

Upper slope/Ridge: North 2 to 8 mph gusts to 12 mph, by 0100 becoming east 6 to 12 mph. **Mid-slope/Valley:** Up valley/upslope 2 to 7 mph, becoming downslope/down valley 3 to 9 mph.

CWR (≥ 0.25"): Zero	LAL: 1	INVERSION: Inversion top 3600ft elevation
CAMP FORECAST:	ICP: 49F.	

EXTENDED OUTLOOK: Thursday: Sunny. High temperature: Ridges 70° to 78°. Valleys 76° to 84°. Minimum humidity: Ridges 32% to 40%. Valleys 25% to 33%. Ridge wind southeast 8 to 14 mph gusts to 20 mph, by 1200 becoming east 8 to 14 mph gusts to 20 mph. Valley wind down valley/downslope 4 to 10 mph, becoming upslope/up valley 6 to 12 mph gusts to 18 mph. **Thursday night/Friday:** Clear/Mostly sunny. Low 50 to 60. High 74 to 86. Fair humidity recovery, then 22% to 32%. Ridge wind southeast 4 to 11 mph gusts to 21 mph. **Friday night/Saturday:** Mostly clear/mostly sunny. Low 49 to 59. High 72 to 84. Slightly higher afternoon humidity. Afternoon ridge wind west northwest 5 to 12 mph gusts to 20 mph.

Human Resources Message

Please remind your folks to practice Mutual Respect as you complete your assignments. We are all professionals here. For those of you that are new, here is a reminder of our expectations.

Each individual on this incident is responsible for:

- Being ready and able to perform their assigned duties effectively.
- Conducting themselves appropriately at all times.

There is **ZERO tolerance** for inappropriate behavior while assigned to this incident, including such conduct as:

- Drug and alcohol use
- Discrimination
- Sexual harassment
- Hostile Work Environment
- Lewd comments, off color jokes, rumor, innuendo, name calling, etc.

Consequences?

Anything less than strict adherence to these guidelines may result in immediate dismissal from the incident. IF there is anything our team can do **for you** or if you see something that needs our attention please let us know.

> Margaret Dietrich Human Resource Specialist/Training Specialist Cell 360-701-3154 or Team13trsp@outlook.com

CHECK-IN Process All Resources

STEP 1. Scan the QR code to fill out and submit the online check-in form.

• Have your resource order ready, as many questions reference it.

STEP 2. Email your MANIFEST (if appropriate). Include your request number in the subject line (e.g, E-118, 0-48).

- If you are assigned to the Grizzly, Dinner or Brice Creek incidents, email to 2023.dinner.checkin@firenet.gov
- If you are assigned to the Chilcoot or Ridge incidents, email to 2023.chilcoot.checkin@firenet.gov

STEP 3. See Finance page in IAP for further instructions on how to check in with finance.

STEP 4. Complete vehicle inspection as instructed on your resource order, including contract inspection as needed.

If you have any issues, please contact Check-in at 971-727-5061 or by email at 2023.chilcoot.checkin@firenet.gov or 2023.dinner.checkin@firenet.gov

Extensions and Crew Swaps – NW 13

This is the Team Standard Operating procedure based on national policy

- Resources may be demobed, regardless of crew status, if it is no longer needed.
- Contract Crews are generally not extended unless replacement resources are scarce. Crews may swap crew members if needed by utilizing the crew swap form at the QR code below.
- Resources ordered on 'O' numbers cannot swap crew members (exception some medical resources). These resources can extend depending on availability and needs of the incident. See Plans for a resource extension form.

Contracted Fireline Equipment Crew Swap Procedure

- Contract equipment may stay on the incident until it is no longer needed, a maximum dollar amount is reached, or replacement crew members cannot be provided.
- It is the responsibility of the contract owner to track their crew members and ensure they maintain proper work/rest ratios. The IMT assumes contracted equipment will swap crew members as needed to provide adequate rest for their employees.
- Non-fireline equipment personnel (like hand wash stations) are not tracked other than a current onsite contact.
- If replacement crew members cannot be provided, this must be documented on an ICS-213 and provided to Operations and Plans at least 72 hours prior to the 14th workday. The resource will be demobed after 14 shifts OR an extension form may be completed based on operational need, see Plans for this form.
- Crew swaps <u>MUST</u> be tracked through the below QR code form as soon as known, <u>no later</u> <u>than 1800</u> on the day prior to the swap. If the new crew member is the primary operator and any information in the IAP is incorrect, correct information <u>MUST be provided</u> to the Division Supervisor immediately following the operational briefing/division breakout.
- > We prefer all members of a resource swap at once if possible. The crew swap form will need to be filled out for each individual crew member.
- > Replacement workers must provide proof of current annual training upon request.

QR code link to Umpqua Fires FTP page, then find button named **Crew Swap Form**

Please contact Plans after the briefing, at their office, or at Check-in if you have questions or wish to understand how your last workday/demob date was determined.

Resource Advisor Message

<u>**Objectives**</u> – One objective of the fire suppression is to repair areas disturbed by fire suppression activities into a condition that does not negatively affect natural and cultural resources and will not create excessive erosion on the landscape. <u>Without compromising public</u> and firefighter safety:

- Reduce the potential for soil erosion and sedimentation.
- Repair roads and drainage structures to a functioning condition.
- Avoid driving any kind of machinery on severely burned soils.
- Reduce the visual impacts of fire line as well other suppression activities when feasible.
- Avoid dragging large trees across soils, especially severely burned soils.
- Avoid driving machinery on moist soils.
- Avoid bucking up large, downed wood. Leave logs in as long of piece as possible.
- Leave no trace. Pack out trash if cans are overflowing, avoid leaving trash next to overflowing trash cans.

General Road Rules

Roads can be damaged easily during rainfall events. Signs of road distress include the following:

- Surface deformities such as: potholes, soft spots, ruts, etc. greater than 2" deep
- Pooling water, indicating drainage not functioning as designed.
- Slurry or conditions that causes loss of traction.
- Utilize 4-wheel drive on gravel roads in order to reduce impacts to the road surface.

Roads with signs of distress should not be driven on. Work with REAFs to implement erosion control measures.

General Water Bar Specifications:

- Facing the slope, standing at the bottom of a repair feature or existing water bar, the next water bar constructed should be placed at eye level.
- Water bars should be constructed into compacted soil and not constructed by simply pushing up loose soil and duff.
- Water bars should direct runoff away from the burned area where possible (into the green).
- Water bars should have out-sloped trenching at 30-45 ° from perpendicular to the fire line.
- Assure that the downslope end of the water bar is open and has adequate length to allow free flow of water off the line.
- Logs can be incorporated into water bars if they are embedded or anchored in a trench.
- Slash can be placed below outlet of water bar to help slow runoff and help collect sediment.

Do you or the public need to reach the PIOs?
