INCIDENT OBJECTIVES	1. Incident Name Chilcoot, Grizzly, Ridge, Dinner, Brice Creek	2. Date October 04, 2023	3. Time 2000
4. Operational Period: 10/05/2023 0700-2100			
<p>5. General Objectives: Implement a FULL suppression strategy for Chilcoot, Grizzly, Brice Creek, Dinner and Ridge fires:</p> <ul style="list-style-type: none"> • Provide for firefighter and public safety through hazard identification and application of a shared risk management process. • Coordinate public information to provide timely updates to agency partners, cooperators and the public. • Coordinate suppression and repair activities with READs to minimize impacts on the landscape. • Effectively manage and track costs for all five incidents. • Coordinate with agency leadership/administrators to ensure effective and efficient management of firefighting resources. <p>Chilcoot, Grizzly:</p> <ul style="list-style-type: none"> • Chilcoot: provide full incident containment through suppression actions. Grizzly: monitor and evaluate conditions that could lead to fire growth, identify and validate strategic indirect lines. • Coordinate with ODF-DFPA, as needed, for changing conditions specific to fire progression potentially impacting private lands. • Repair indirect lines not currently identified as potential containment features, identify primary line repair options as applicable. • Evaluate a PACE model for the Grizzly fire, develop near-term and long-term modeling based on future potential. • Work with partner/stakeholders (Sierra Pacific) to access, manage private lands within fire perimeter. <p>Dinner, Ridge, Brice Creek:</p> <ul style="list-style-type: none"> • Achieve full containment with suppression actions and ensure adequate mop-up is conducted to reduce the threat of escape. • Implement full repair on all indirect line construction. • Evaluate repair needs for primary line construction. • Monitor access routes "Ingress/Egress" and minimize impact to road systems. • Backhaul all equipment as applicable. 			
<p>5a. Incident Requirements</p> <ul style="list-style-type: none"> • Priority values are firefighter and public safety, critical infrastructure, private land and natural resources. • Provide Agency Administrator updates and briefings on incident status as conditions evolve. • Firefighting operations will implement tactics that offer the highest probability of success to minimize impacts to the landscape and minimize unnecessary exposure to firefighters. 			
<p>5b. Leaders Intent</p> <ul style="list-style-type: none"> • Safety: Firefighter, public and aviation safety will be addressed through hazard/exposure risk mitigation processes. • Risk Management: Utilize an aligned risk assessment process that mitigates exposure to firefighters through evaluation of conditions during the duration of the incident. • Communication: Keep Agency Administrators and firefighters informed of strategic actions, accomplishments and challenges. • Operations: Make informed strategic/tactical decisions suppressing the fire in the right geographic locations with the appropriate resources having the highest probability of success. • Stakeholders: Collaborate with local partners, officials and landowners to provide situational updates pertinent to the fire. • Logistics: Provide support ensuring food, water and shelter for incident responders. • Human Resources: Ensure that all incident personnel are treated with dignity and respect, while having zero tolerance for harassment, alcohol, or illegal drug use. • Public Information: Provide timely and accurate information through media outlets, trap lines, briefings, community meetings and social platforms. • Finance: Monitor and communicate incident cost associated with meeting incident objectives. • Planning: Provide incident documentation, resource tracking and accurate data management.

Spot Forecast for Chilcoot/Grizzly...NW IMT 13
National Weather Service MEDFORD OR - 1121 AM PDT Wed Oct 4 2023

.DISCUSSION... High pressure over the region with a surface thermal trough over the area will bring breezy to gusty easterly ridge winds along with a warming and dry trend through Friday. Winds are expected to lower and become north to northwest Friday afternoon. Warm and dry conditions with breezy to gusty west-northwest afternoon winds are expected Saturday and Sunday. Rain will return Monday.

.THURSDAY...

Sky/weather.....Sunny (5-15 percent).
Max temperature.....Ridges: 70 to 78
 Valleys 77 to 84
Min humidity.....Ridges: 30 to 40 percent
 Valleys: 25 to 33 percent
Wind (20 ft).....Ridges: Southeast to east 6 to 11 mph gusts to 16
 mph becoming east 6 to 12 mph with gusts to 18 mph
 early in the afternoon.
 Valleys: down valley/downslope 4 to 9 mph becoming
 upslope/upvalley 5 to 10 mph with gusts to 16 mph.
Mixing height.....increasing to 4500-5500 ft AGL in the afternoon.
CWR.....0 percent.
LAL.....1.

.THURSDAY NIGHT...

Sky/weather.....Clear (0-10 percent).
Min temperature.....Ridges: 54 to 58
 Valleys: 47 to 53.
Max humidity.....Ridges: 55-62 percent
 Valleys: 60-70 percent
Wind (20 ft).....Ridges: East to southeast winds 7 to 14 mph with gusts
 to 20 mph.
 Valleys: Upslope/upvalley 5 to 10 mph with gusts
 to 16 mph, becoming downslope/downvalley 3 to 9 mph
 around sunset.
Mixing height.....lowering to 100 ft AGL around sunset.
CWR.....0 percent.
LAL.....1.

.FRIDAY...

Sky/weather.....Sunny (0-10 percent).
Max temperature.....Ridges: 75 to 81
 Valleys 80 to 86
Min humidity.....Ridges: 25-33 percent
 Valleys: 22-26 percent
Wind (20 ft).....Ridges: East to southeast winds 7 to 14 mph with gusts
 to 20 mph becoming north to northwest 5 to 9 mph with
 gusts to 15 mph in the afternoon.
 Valleys: downvalley/downslope 4 to 9 mph becoming
 upslope/upvalley 5 to 9 mph with gusts to 15 mph.
Mixing height.....increasing to 5500-6500 ft AGL in the afternoon.
CWR.....0 percent.
LAL.....1.

Fire Behavior Forecast #36

Incident:	Number:	TYPE OF FIRE: Wildfire
Grizzly	OR-UPF-000341	DATE/TIME ISSUED: 10/4/23 1900
Chilcoot	OR-UPF-000345	OPERATIONAL PERIOD: 10/5/2023 Day Shift
Ridge	OR-UPF-000346	FBAN: Dean Warner
Dinner	OR-UPF-000357	Signed:
Brice Creek	OR-UPF-000359	

Weather Summary - See Incident Weather Forecast: Drying trend

Fuels: Fire areas are primarily composed of *Timber Litter* (TL5), and *Timber Understory* (TU5) with *moss/lichen present in most stands*. Mature conifer stands with western hemlock and Douglas-fir, often have heavy surface fuel loading. 30 to 50+ year old second growth conifer stands contain needle litter and some down woody debris. Brush and reprod are present in open stands of mature timber.

ERC and Fuel Moisture Data	Forecast ERC (Percentile)	1 hour FM % yesterday	10 hour FM % yesterday	100 hour FM % yesterday	1000 hour FM % yesterday
Division Delta	45 ⁺¹⁸	13 ⁻²¹	20 ⁻¹⁴	26 ⁺¹	23 ⁺²
Division Hotel	32 ⁺¹⁶	17 ⁻⁶	23 ⁻⁶	23 ⁺¹	23 ⁺¹

OUTPUTS: Expected Fine Dead Fuel Moisture: 9% POI: 20%

Fire Behavior: Minimal Atmosphere: Stable Max. spot distance: ¼ mile LAL: 1	Fuel/Type Model	Maximum ROS	Maximum Flame Length
	Timber Litter/TL5	3 ch/hr	2 ft.
	Timber Understory/TU5	5 ch/hr	5 ft.

Expected Fire Behavior is Based on the Warmest, Driest, Windiest Conditions Forecasted.

Today: A full day of drying is on tap today with more to come. Expect light smoke production today and a general increase as the week progresses. Heavy fuels well interior to the fire will continue to consume.

Potential: The ERC level will trend upward through the end of the weekend. Light fuels and lichens in exposed areas will be first to become vulnerable to consumption. After today expect a general increase in light smoke production on a daily basis throughout the week.

Air Operations

Inversion should clear by 1100.

Safety:

The warm dry weather will show more smokes than in the past ten days. Some of this burning will be well interior to the fire. Remember stay on task and aligned with our objectives. Extinguishing burning material well interior may look like a good thing to do but in reality it will put you or your team at unnecessary risk. Don't succumb to mission creep, remain focused on the tasks required to complete our objectives.

PREVENT SEXUAL HARASSMENT

SEXUAL HARASSMENT at work, including emergency incidents, occurs whenever unwelcome conduct on the basis of gender adversely affects a person's ability to do their job and contributes to a hostile work environment. Sexual harassment includes, but is not limited to, the following types of conduct:

- Unwelcome sexual advances
- Requests for sexual favors
- Discussing sexual activities
- Telling off-color jokes
- Unnecessary touching
- Displaying sexually suggestive pictures
- Using demeaning or inappropriate terms
- Using indecent gestures
- Using crude and offensive language
- Commenting on physical attributes

Sexual harassment will not be tolerated. Part of Human Resources job is to be sure everyone is provided a safe and respectful workplace. If you see something say something!

Training

I will be closing out training tomorrow at the end of the business day. If you have an open task book bring me your red card, task book and evaluation. I will enter you into the system to document you on this fire.

Margaret Dietrich
Human Resource Specialist/Training Specialist
Cell 360-701-3154 or Team13trsp@outlook.com

**CHECK-IN Process All Resources**

STEP 1. Scan the QR code to fill out and submit the online check-in form.

- Have your resource order ready, as many questions reference it.

STEP 2. Email your MANIFEST (if appropriate).

Include your request number in the subject line (e.g, E-118, 0-48).

- If you are assigned to the Grizzly, Dinner or Brice Creek incidents, email to 2023.dinner.checkin@firenet.gov
- If you are assigned to the Chilcoot or Ridge incidents, email to 2023.chilcoot.checkin@firenet.gov

STEP 3. See Finance page in IAP for further instructions on how to check in with finance.

STEP 4. Complete vehicle inspection as instructed on your resource order, including contract inspection as needed.

If you have any issues, please contact Check-in at 971-727-5061 or by email at 2023.chilcoot.checkin@firenet.gov or 2023.dinner.checkin@firenet.gov

Dinner-Grizzly-Brice Creek- Chilcoot-Ridge Demob Check-Out Form

RO # _____ Resource Name _____ Fire: _____ Date: _____

Initials

Follow these steps in the order below:

- _____ 1. **Weed Wash** – ALL line resources that went off-road will need to go through a Weed Wash. **If not needed, proceed to step 2.**
- _____ 2. **Ground support** – Contractors must stop to sign their release inspection. The inspection is optional for agency resources. **Agency resources proceed to step 3.**
- _____ 3. **Supply** – Return any items you checked out. All units must have initials from SUPPLY confirming all equipment has been returned.
- _____ 4. **Communications** – Return any items you checked out. All units must have initials from COMMUNICATIONS confirming all radio equipment has been returned.
- _____ 5. **Finance** – Proceed to FINANCE to receive your final timesheet. Having ALL your time turned in will GREATLY speed up the process.
- _____ 6. **Demob – Final step.** Return this completed Demob Check-Out form and any Documentation to Demob/Check-in. Documentation can also be emailed to 2023.chilcoot.docs@firenet.gov. Let Demob know your estimated time of departure, arrival time and destination.

When all above information had been submitted to Demob they will notify Expanded Dispatch to release you from the incident.

ALL AIR TRAVELERS

Submit your air request 72 hours prior to flight date through the QR code on the IAP Cover. Call 971-727-5061 for any questions or assistance.

Extensions and Crew Swaps – NW 13

This is the Team Standard Operating procedure based on national policy

- **Resources may be demobed, regardless of crew status, if it is no longer needed.**
- Contract Crews are generally not extended unless replacement resources are scarce. Crews may swap crew members if needed by utilizing the crew swap form at the QR code below.
- Resources ordered on 'O' numbers cannot swap crew members (exception - some medical resources). These resources can extend depending on availability and needs of the incident. See Plans for a resource extension form.

Contracted Fireline Equipment Crew Swap Procedure

- Contract equipment may stay on the incident until it is no longer needed, a maximum dollar amount is reached, or replacement crew members cannot be provided.
- It is the responsibility of the contract owner to track their crew members and ensure they maintain proper work/rest ratios. The IMT assumes contracted equipment will swap crew members as needed to provide adequate rest for their employees.
- Non-fireline equipment personnel (like hand wash stations) are not tracked other than a current onsite contact.
- If replacement crew members cannot be provided, this must be documented on an ICS-213 and provided to Operations and Plans at least 72 hours prior to the 14th workday. The resource will be demobed after 14 shifts OR an extension form may be completed based on operational need, see Plans for this form.
- Crew swaps MUST be tracked through the below QR code form as soon as known, no later than 1800 on the day prior to the swap. If the new crew member is the primary operator and any information in the IAP is incorrect, correct information MUST be provided to the Division Supervisor immediately following the operational briefing/division breakout.
- We prefer all members of a resource swap at once if possible. The crew swap form will need to be filled out for each individual crew member.
- Replacement workers must provide proof of current annual training upon request.

QR code link to Umpqua Fires FTP page, then find button named **Crew Swap Form**

Please contact Plans after the briefing, at their office, or at Check-in if you have questions or wish to understand how your last workday/demob date was determined.

Resource Advisor Message

Objectives – One objective of the fire suppression is to repair areas disturbed by fire suppression activities into a condition that does not negatively affect natural and cultural resources and will not create excessive erosion on the landscape. Without compromising public and firefighter safety:

- Reduce the potential for soil erosion and sedimentation.
- Repair roads and drainage structures to a functioning condition.
- Avoid driving any kind of machinery on severely burned soils.
- Reduce the visual impacts of fire line as well other suppression activities when feasible.
- Avoid dragging large trees across soils, especially severely burned soils.
- Avoid driving machinery on moist soils.
- Avoid bucking up large, downed wood. Leave logs in as long of piece as possible.
- **Leave no trace.** Pack out trash if cans are overflowing, avoid leaving trash next to overflowing trash cans.

General Road Rules

Roads can be damaged easily during rainfall events. Signs of road distress include the following:

- Surface deformities such as: potholes, soft spots, ruts, etc. greater than 2" deep
- Pooling water, indicating drainage not functioning as designed.
- Slurry or conditions that causes loss of traction.
- Utilize 4-wheel drive on gravel roads in order to reduce impacts to the road surface.

Roads with signs of distress should not be driven on. Work with REAFs to implement erosion control measures.

General Water Bar Specifications:

- Facing the slope, standing at the bottom of a repair feature or existing water bar, the next water bar constructed should be placed at eye level.
- Water bars should be constructed into compacted soil and not constructed by simply pushing up loose soil and duff.
- Water bars should direct runoff away from the burned area where possible (into the green).
- Water bars should have out-sloped trenching at 30-45 ° from perpendicular to the fire line.
- Assure that the downslope end of the water bar is open and has adequate length to allow free flow of water off the line.
- Logs can be incorporated into water bars if they are embedded or anchored in a trench.
- Slash can be placed below outlet of water bar to help slow runoff and help collect sediment.

Do you or the public need to reach the PIOs?

MEDICAL PLAN (ICS 206 WF)

Controlled Unclassified Information//Basic

Medical Incident Report

FOR A NON-EMERGENCY INCIDENT, WORK THROUGH CHAIN OF COMMAND TO REPORT AND TRANSPORT INJURED PERSONNEL AS NECESSARY.

FOR A MEDICAL EMERGENCY: IDENTIFY ON-SCENE INCIDENT COMMANDER BY NAME AND POSITION AND ANNOUNCE "MEDICAL EMERGENCY" TO INITIATE RESPONSE FROM IMT COMMUNICATIONS/DISPATCH.

Use the following items to communicate situation to communications/dispatch.

1. CONTACT COMMUNICATIONS / DISPATCH (Verify correct frequency prior to starting report)

Ex: "Communications, Div. Alpha. Stand-by for Emergency Traffic."

2. INCIDENT STATUS: Provide incident summary (including number of patients) and command structure.

Ex: "Communications, I have a Red priority patient, unconscious, struck by a falling tree. Requesting air ambulance to Forest Road 1 at (Lat./Long.) This will be the Trout Meadow Medical, IC is TFLD Jones. EMT Smith is providing medical care."

Severity of Emergency / Transport Priority	<input type="checkbox"/> RED / PRIORITY 1 Life or limb threatening injury or illness. Evacuation need is IMMEDIATE <i>Ex: Unconscious, difficulty breathing, bleeding severely, 2° – 3° burns more than 4 palm sizes, heat stroke, disoriented.</i> <input type="checkbox"/> YELLOW / PRIORITY 2 Serious Injury or illness. Evacuation may be DELAYED if necessary. <i>Ex: Significant trauma, unable to walk, 2° – 3° burns not more than 1-3 palm sizes.</i> <input type="checkbox"/> GREEN / PRIORITY 3 Minor Injury or illness. Non-Emergency transport <i>Ex: Sprains, strains, minor heat-related illness.</i>	
Nature of Injury or Illness & Mechanism of Injury		<i>Brief Summary of Injury or Illness (Ex: Unconscious, Struck by Falling Tree)</i>
Evacuation Request		<i>Air Ambulance / Short Haul/Hoist Ground Ambulance / Other</i>
Patient Location		<i>Descriptive Location & Lat. / Long. (WGS84)</i>
Incident Name		<i>Geographic Name + Medical (Ex: Trout Meadow Medical)</i>
On-Scene Incident Commander		<i>Name of on-scene IC of Incident within an Incident (Ex: TFLD Jones)</i>
Patient Care		<i>Name of Care Provider (Ex: EMT Smith)</i>

3. INITIAL PATIENT ASSESSMENT: Complete this section for each patient as applicable (start with the most severe patient)

Patient Assessment: See IRPG PAGE 106

Treatment:

4. EVACUATION PLAN:

Evacuation Location (if different): (Descriptive Location (drop point, intersection, etc.) or Lat. / Long.) Patient's ETA to Evacuation Location:

Helispot / Extraction Site Size and Hazards:

5. ADDITIONAL RESOURCES / EQUIPMENT NEEDS:

Example: Paramedic/EMT, crews, immobilization devices, AED, oxygen, trauma bag, IV/fluid(s), splints, rope rescue, wheeled litter, HAZMAT, extrication

6. COMMUNICATIONS: Identify State Air/Ground EMS Frequencies and Hospital Contacts as applicable

Function	Channel Name/Number	Receive (RX)	Tone/NAC *	Transmit (TX)	Tone/NAC *
COMMAND					
AIR-TO-GRND					
TACTICAL					

7. CONTINGENCY: Considerations: If primary options fail, what actions can be implemented in conjunction with primary evacuation method? Be thinking ahead..

8. ADDITIONAL INFORMATION: Updates/Changes, etc.

REMEMBER: Confirm ETAs of resources ordered. Act according to your level of training. Be Alert. Keep Calm. Think Clearly. Act Decisively.
