| OBJECTIVES | Horse Creek / Pete's Lake | | |

4. OPERATIONAL PERIOD (DATE/TIME)

09/19/2023 0700 - 09/20/2023 0700

5. GENERAL CONTROL OBJECTIVES FOR THE INCIDENT (INCLUDE ALTERNATIVES)

Strategic Framework

Implement a full suppression strategy on Bedrock, Lookout, Pothole, and Horse Creek fires; and confine, contain, and point protection strategy on Petes Lake fire within the delegation of authority. Values at risk include human safety, communities, private property, commercial timber land, family timber land, Eugene Water and Electric Board Dam, Hwy 46, Hwy 126, Elk Lake Resort, and other identified infrastructure. Apply tactics that offer the highest probability of success to meet intent and objectives while considering risk to personnel.

Leaders Intent

- Human Factors: We will ensure that all personnel be treated with dignity and respect. We have zero
 tolerance for harassment, alcohol, or drug use. We will engage in all work assignments with a high degree
 of integrity, professionalism and provide excellent customer service to our responders, our agencies and
 our public.
- Safety & Risk Management: Firefighter, responder, aviator and public safety will be addressed through hazard identification, assessment and where practicable, mitigated.
- Operations: Prioritize missions that consider risk benefit trade-offs, provide higher probability of success
 given on scene and expected resource capability. We will consistently evaluate environmental factors and
 timing of implementing strategies.
- Agency Coordination: We will keep the Willamette National Forest, Bureau of Land Management and Oregon Department of Forestry informed of significant accomplishments, foreseen challenges and address concerns.
- Communication: We are committed to and will coordinate with the local community to enhance key
 partnerships and relationships by effectively ensuring transparent, timely and accurate communication is
 shared.
- Fiscal Accountability: As a responsibility and duty to the to the agencies and the public, we will monitor
 cost effective methods for accomplishing incident objectives and overall management of the incidents.

Management Objectives

- Provide for the safety of firefighters, aviators and public through utilization of strategic and deliberate risk
 assessment. Use a deliberate risk process that might include Incident Strategic Alignment Process ISAP to
 evaluate operational hazards, probabilities of success and consequences of failure when designing
 operational missions.
- 2. Limit fire spread and impacts to communities at risk, private land including industrial timber, family forest lands, recreational areas, Eugene Water and Electric Board Dam, H.J. Andrews experimental forest, Hwy 126 and other identified values of risk.
- 3. Maintain and enhance relationships with the public we serve, the agencies we are assisting and the responders that we are responsible for supporting.
- 4. Provide initial attack support to all lands in the designated TFR's and to those outside of TFR upon request.
- 5. Adhere to the control objectives, task/purpose/end state in each Division Assignment (204) to include mitigating and repairing adverse effects to resources resulting from fire suppression activities. Approved suppression repair plans include specific actions needed to stabilize the adverse effects in the fire area.

Fire Weather Forecast

Tuesday September 19, 2023

FORECAST NO: PREDICTION FOR: ISSUED:

55 Tuesday, Sep 19, 2023

2000, Sep 18, 2023

FIRE: Bedrock/Lookout/Horse Creek/Pothole UNIT: Willamette N.F.

Incident Meteorologist:

Colin McKellar (T)

 DISCUSSION: A weak, dry cold front will move through the area today, producing cooler temperatures and increased humidities. An upper level low will start to drop southward into the region on Wednesday, with increasing chances for precipitation during the day.

TUESDAY:

- WEATHER: Partly cloudy in the morning, then clearing around 1200.
- WIND (20 FT):
 - Lookout: Valleys/Lwr Slopes: Downslope 2-5 mph until 1200, then NW 3-7 mph. Ridges/Upr Slopes: W
 3-8 mph to 1200, then NW 5-10 mph. Occasional gusts to 15 mph along W-E drainages/Ridges.
 - o Petes Lake: NW 3-8 mph through around 1000, then NW 7-12 mph with gusts 15-20 mph through 2200.
- MAX TEMPERATURES: 66-71 valleys and mid-slopes/55-60 ridges and Petes Lake Fire.
- MIN RH:

o Lookout: 35-45%

Petes Lake: 34-39%

INVERSION: Moderate/Mixed between 1200-1400. MID HAINES: 3.

TUESDAY NIGHT:

- WEATHER: Partly cloudy, becoming mostly cloudy after Midnight.
- WIND (20 FT):
 - o Lookout: Valleys/Lwr Slopes: Downslope 2-5 mph. Ridges/Upr Slopes: NW 3-8 mph.
 - o Petes Lake: NW 4-9 mph.
- MIN TEMPERATURES: Lookout: 40-46. Petes Lake: 35-39.
- MAX RH:
 - o Lookout: 85-95%

Petes Lake: 75-85%

WEDNESDAY:

- WEATHER: Mostly cloudy with a 50% chance of showers between 0600-1200, becoming partly cloudy with a 20% chance of showers between 1200-1800.
- WIND (20 FT):
 - Lookout: Valleys/Lwr Slopes: Downslope 3-5 mph through 1200, then NW 4-8 mph. Ridges/Upper Slopes: NW 3-7 mph through 1200 then NW 5-10 mph with gusts 13-18 mph.
 - Petes Lake: NW 4-8 mph through 1000, then NW 10-15 mph with gusts 20-25 mph through 2200.
- MAX TEMPERATURES: 54-59 valleys and mid-slopes, 45-50 ridges and Pete's Lake.
- MIN RH:

o Lookout: 60-70%

Petes Lake: 50-60%

INVERSION: Moderate/Mixed between 1200-1400. MID HAINES: 3.

Extended outlook: Thursday through Sunday: There is a slight chance for showers on Thursday as the upper level low pressure continues to track southward into Nevada. This will lead to several days of below average temperatures with excellent overnight humidity recoveries. The pattern remains active into next weekend.

Sunrise: 06:56 PDT Sunset: 19:17 PDT

FIRE BEHAVIOR FORECAST

| FORECAST NUMBER: 38 | TYPE OF FIRE: Wildfire |
|--|--|
| FIRE NAME: Lookout/Bedrock/Horse Creek/Pothole/Petes Lake | OPERATIONAL PERIOD: 09/19/2023 (day/night) |
| DATE ISSUED: 09/18/2023 | TIME ISSUED: 2000 Hours |
| UNIT: OR-WIF, Willamette National Forest | SIGNED: ANDREW TAYLOR Digitally signed by ANDREW TAYLOR Date: 2023.09.18 20:36:42 -07:00 |

INPUTS

WEATHER SUMMARY: Cooling and wetting weather pattern persisting through the week.

FUELS:

Today will start a more significant cooling and wetting trend. Expect temperatures decreasing and RH values increasing over the next few days. 100 hr, and 1000 hr dead fuels will be the main contributors to fire behavior. Good overnight Humidity recoveries will contribute to diminished potential during the day. There is a chance of precipitation over all of the fires starting Wednesday morning and lasting through the day.

OUTPUTS

FIRE BEHAVIOR GENERAL:

Moderate fire weather conditions are expected to continue through the week and even through the weekend. Dead and down fuel loading in timber will be primary mechanism on any of the fires. The fires have been reliant on sunlight, hot temperatures and low RH values over the past couple of days and had become active in the afternoon and evening when the inversion had lifted. There was a noticeable decline in fire behavior on both Lookout and Pete's Lake Fire yesterday due to cooler temperatures and higher RH values. Pete's Lake has higher probability of wind/ slope alignment and forward growth to the East with ROS of 2 to 3 ch/hr possible but unlikely.

Based on Peak Wx and Fuels conditions:

- Fine Dead Fuel Moisture- 6-9% Petes Lake, 7-11% Lookout
- PIG around 40-50% (shaded/unshaded), lower under the canopy in the compact duff.
- Spotting up to ¼ mile (Pete's Lake) but mostly short range and primarily through roll out on Lookout fire.

FIRE BEHAVIOR SPECIFIC:

South Aspects/Exposed Ridges – South aspects have the highest potential for burning when they can be exposed more to sun and wind. Still expect low rates of spread due to higher fuel moisture levels in the 1- and 10-hour fuels. Most spread will be through short range roll out and backing fire. There may be some isolated single tree torching when there is a heavy enough fuel concentration and wind and slope line up.

North Aspects – Rates of spread on the north slopes will remain low and will be primarily through the larger fuels, aided by roll out. Fire North end of Lookout and on the Pete's Lake Fire will remain active through backing and produce occasional single tree torching as it finds heavy fuel concentrations. Could see isolated short runs upslope where fuels can align with wind and slope but will be isolated and rare.

IA – New starts will present low resistance to control with current weather conditions.

Night Shift – Fire behavior will moderate earlier and to a greater extent than previous nights with much better humidity recovery, and cooler temperatures forecasted. Heavy fuels will continue smolder through the night with little movement expected. Rollout and snag fall will continue.

AIR OPERATIONS:

Use the appropriate aircraft for the mission. Are Air operations necessary?

SAFETY

As fire continues to consume fuels and move through timber, asses work locations for fire weakened trees and other hazards such as stump holes.

HEALTH AND SAFETY MESSAGE

Pacific Northwest Incident Management Team 2

INCIDENT: Lookout~Bedrock DATE: 9/19/23

"TAKE YOUR TIME TO DO IT SAFELY"

- Use time wisely to focus on safety issues, there is <u>NOTHING</u> that is more important.
- Do not let a sense of urgency, or the hazardous mindsets of "impulsiveness" or "mission fixation" compromise your safety.
 - Any time spent planning for safety will pay dividends in the end.

| | Major Hazards | |
|----------|----------------------|--------------------|
| CHIPPING | COMPLACENCY | HEAVY EQUIPMENT |
| BEES | LOG HAULING | HAZARD GREEN TREES |
| SNAGS | STEEP TERRAIN | ROLLING DEBRIS |

Stay Hydrated

Drink fluids before, during, and after the shifts.

For every 2 bottles of water, drink 1 bottle of Gatorade.

At 2% dehydration, performance will fall off by 10-20% and is the #1 trigger of fatigue.

https://www.hsph.harvard.edu/nutritionsource/energydrinks/

Hazard Tree Felling

Felling a hazard tree requires accurate risk assessment and complexity analysis, and demands the sawyer's full situational awareness. In all cases, remember to establish and maintain a secure felling area.

Do not bypass hazard trees without taking some action such as felling or establishing a No-Work-Zone.

Degree of hazard varies with tree size, species, and type/location of defect:

- Stem defects resulting in tree failure
- Weakened sapwood resulting in loss of control when falling trees and limits solid wood for wedging.
- Overhead hazards, i.e., dead or hanging limbs falling on the faller.

- **★** PLEASE SHOW YOUR LUNCH BREAK IF NO BREAK SHOWN IT MUST BE JUSTIFIED IN COMMENTS
- * WHEN CLAIMING HAZARD PAY YOU MUST INCLUDE THE SUPPRESSION ACTION BEING PERFORMED. THIS INCLUDES OPERATIONS WHICH DIRECTLY SUPPORT CONTROL OF FIRE (E.G., ACTIVITIES TO EXTINGUISH THE FIRE, FIREFIGHTING, GROUND SCOUTING, SPOT FIRE PATROLLING, SEARCH AND RESCUE OPERATIONS, AND BACKFIRING). PER PMS902 YELLOW BOOK

LOOKOUT and BEDROCK DEMOB LIST (09/19 TO 9/21)

If your Demob method of travel is by air, contact DMOB at (971) 762-8572 at least 72-hours in advance of your last work day.

Day Before Your Demob:

Contact FINANCE 24 hours prior to give them a heads-up you are departing and turn in any outstanding CTR/Shift Ticket. Make sure they are SIGNED. Confirm there is no missing financial documentation.

Day of Demob STEP 1:

Contact DMOB at 971-762-8572 or in person to obtain your Demob Check-Out Form (ICS 221) and to determine your specific next steps since we are pre-clearing personnel that do not have any supplies or communications equipment checked out.

STEP 2:

Have your vehicle "weed washed" at Lookout ICP; Hoodoo FOB or at Rock Quarry Staging Area.

STEP 3 (if directed by DMOB):

SUPPLY - see in person to return issued gear and leftover supplies

COMMUNICATIONS - see in person to return any communications equipment

GROUND SUPPORT - see in person to return incident rental vehicles, contractors to get an inspection, etc.

STEP 4:

Proceed to, or call, FINANCE at (661) 349-1530 at Lookout ICP or (971) 713-0359 at Hoodoo FOB to complete time closeout process and receive signed OF-288 or OF-286

STEP 5:

Return to Demob for final closeout

- Turn in any Unit Logs and Evaluations to Documentation Unit (Documentation Box).
- > DMOB will verify check-out completion.
- > Be prepared to address your actual departure date/time; your anticipated arrival date/time; and where you will be staying overnight if travel includes overnight stops.

LOOKOUT/BEDROCK/HORSE CREEK/POTHOLES FIRES HUMAN RESOURCE MESSAGE

"Years ago, anthropologist Margaret Mead was asked by a student what she considered to be the first sign of civilization in a culture. The student expected Mead to talk about fishhooks or clay pots or grinding stones.

But no. Mead said that the first sign of civilization that she found in ancient culture was a femur (thigh bone) that had been broken and then healed. Mead explained that in the animal kingdom, if you break your leg, you die. You cannot run from danger, get to the river for a drink or hunt for food. You are meat for prowling beasts. No animal survives a broken leg long enough for the bone to heal.

A broken femur that has healed is evidence that someone has taken time to stay with the one who fell, has bound up the wound, has carried the person to safety, and has tended the person through recovery. Helping someone else through difficulty is where civilization starts, Mead said."

We are at our best when we serve others. Be civilized.

If there is any way we can assist you, please do not hesitate to contact us. Your Human Resource Specialists,

Mike Baines, 724-678-6147 Teresa Smergut 541-263-2283

Training Message

ARE YOU ORDERED AS A TRAINEE?

If you are ordered as a trainee, please sign up for the incident trainee program. You will be registered with the incident training specialist by filling out the questionnaire from the QR code in the IAP, please email scans or pictures of your incident qualification card and front cover of your task book to Team10TNSP@yahoo.com. During your time on this incident ensure you work with your trainer to complete the tasks you need evaluated if possible. Ensure your trainer evaluate your position task book tasks you are able to complete, and completes your position task book evaluation page as well as a performance evaluation (ICS-225). These forms are emailed to you once you complete the Trainee form. Upon completion of your assignment (can be a couple days early to speed up demob), please email, scans or pictures of your position task book evaluation and performance evaluation (ICS-225) to Team10TNSP@yahoo.com. These will be checked for accuracy, logged in the system, and sent on to your home unit training contact through email. I am working remotely. Please contact me if you have any further needs Team10TNSP@yahoo.com or phone 360-490-5355, I look forward to serving you.

Training Specialist Neal Cox

Resource Advisor Message - Lookout Fire

Monte Kuk, Lead READ - Lookout & Bedrock Fire, 458-239-4080 monte.kuk@usda.gov

<u>Divisions doing Suppression Repair please take a look around where you are working and pick up any trash at the end of your shift. Divisions doing mop up please remember to keep down logs as intact as possible - don't buck into pieces unless necessary. Weed wash if moving between Bedrock and Lookout fires if in weed areas.</u>

Engineering and Roads

- Do not track heavy equipment on paved roads without the proper mitigations (ie. street grousers, rubber mats, etc.).
- If any road issues or concerns are encountered, please contact a REAF.

Dozer Lines

- Please work with Resource Advisors to clear proposed dozer lines.
- Please minimize the depth of the dozer line to the least extent required to meet objectives. Deep cuts are expensive, time consuming, and difficult to repair.

Heritage & Cultural

All cultural resources and human remains are protected by law. <u>Leave them in place- no collecting</u>. Call Resource Advisor if cultural resource like arrowheads, flakes/chips, or historic artifacts like cans & bottles are found and they will investigate.

Noxious Weeds

WEED WASH STATION:

- The Weed Wash stations are operational and located at Strubb Flat, Kickbrush & Hoodoo
- · Please use the weed wash upon arrival at the incident, and during demob
- Avoid the following weed: Slender False Brome and Spotted Knapweed

REDUCE THE SPREAD: Brush off packs & boots (especially laces) before leaving fire camp.

Tree Felling Operations

Please keep equipment on road surface to the greatest extent possible

Log Processing:

- Utilize existing openings and landings for decking, ditch lines/roadside is acceptable
- Process trees down to a 6" top (small end diameter). Use remaining for firewood logs, rehab, or chip
- Preferred Log Lengths (maximize length whenever possible): 41 foot Max 17 foot Min
- 2' increments below 41', keeping logs as long as possible (41', 39', 37', etc....) Process unburnt trees on the unburnt side of the fireline. Process burnt trees on the burnt side of the fireline.
- · Keep processed slash and tops out of decks and off roads
- If possible, sort decks by species and log lengths

Snags and Hazard Trees:

Old growth is a key value. Limit snagging to operational needs & limit bucking to retain long bowls of large felled trees or snags.

Water Quality and Fisheries

AERIAL DIPPING:

- Aerial dipping should only occur at approved dip sites. Blue River Res. has a use restriction to facilitate dipping. Check with your REAF for approval of dipping sites.
- Be sure to wash buckets when new aerial resources arrive at the fire, when switching dips sites, or when returning to the fire from off forest.

WATER DRAFTNG:

- Limited Drafting is available at the bridge across Lookout Creek on the 1506 road in section 28. Check with the REAF for additional drafting locations as needed.
- Utilize fish screens when in fish bearing waterbodies (REAFs have these available).
- Maintain sufficient flow as to not dewater downstream reaches
- Utilize splash pans and absorbent pads. REAFs will assist if given the location.

GROUND BASED RETARDANT APPLICATION:

Provide a 75 foot buffer from riparian areas with live water when applying ground based retardant.

CHIPPING STANDARDS:

- Provide a 30- foot buffer of no chipping at water crossings or culverts.
- Do not place chips into road ditch.
- Do not chip onto a steep slope where chips will slide back into the ditch.
- Broadcast chipped material, ensuring that chips are no more than 4" deep.

HELICOPTER EXTRACTION OPERATIONS

The intent of helicopter insertion/extraction operations is to facilitate the movement of personnel to and from inaccessible areas. These operations are not meant to be a medical transport resource; life flight and ground transportation should always be ordered in addition to the extraction aircraft and crew.

ORDERING:

- On-scene EMT and/or Incident within Incident IC determines that an extraction helicopter is needed and places the order through the pre-established procedures:
 - Division Supervisor
 - Incident Communications
 - o Dispatch Center
- When ordering extraction aircraft provide the following information:
 - Location (Lat/Long) of patient
 - o Known Hazards
 - Wind Speed and Direction
 - o Terrain
 - o Incident Updates

SITE SELECTION:

- The helicopter crew will confirm the extraction location when they arrive on scene. However, a general rule is any clearing that is 10'x10' with visible sight lines to the sky is a suitable extraction site.
- If the terrain is steep, excavating a platform or shelf can make it easier for patient packaging.

QR Code-Short-haul Site Selection Video

CONSIDERATIONS:

- Short-haul and hoist are safe and efficient operations for extracting injured personnel of any severity including "Green" patients.
- Ensure area is clear of non-essential items, hazards, and personnel.
- Rotor wash may affect overhead hazards and blowing dust/debris can create brown out conditions or influence fire behavior.
- Aerial Supervision is valuable for coordinating aviation medevac/extraction missions and should be ordered if available and not currently present.
- The aircrew will make the final assessment of the mission. Always have a contingency plan in case a helicopter cannot complete the request.

DEFINITIONS:

Rescue Hoist: A cable winching device mounted to the helicopter that can lower/raise persons attached to a cable.

Common cable lengths are 250-300 feet.

Short-haul: To insert or extract one or more persons suspended on a fixed line beneath a helicopter.

 Common short-haul line lengths are 100, 150, and 250 feet. The lines can also be connected for a longer line if the situation requires it.

EMERGENCY PLAN INCIDENT WITHIN AN INCIDENT

ON SCENE INCIDENT COMMANDER

In the event of an accident or medical incident of any size, your primary responsibility is to ENSURE that the victim(s) receive prompt and effective Triage, Treatment, Extrication and Transport.

- ENSURE THE MEDICAL INCIDENT REPORT IN THE INCIDENT ACTION
 PLAN IS BEING USED AND FOLLOWED- *IF DETERMINED TO BE A
 GREEN THAT REQUIRES TRANSPORT BACK TO CAMP OR TO A
 MEDICAL FACILITY, DO NOT DECLARE EMERGENCY TRAFFIC AND ONLY
 COMPLETE LINE 1-4 ON MEDICAL INCIDENT REPORT*.
- Conduct size-up of the incident nature of accident, number type of resources involved, latitude and longitude location (DD°MMM.MM format): notify incident communications center and supervisor, request assistance as needed.
- Order and coordinate medical and support response to the accident.
- Evaluate special needs (law enforcement, haz mat, etc.).
- Clear the command frequency if medical emergency, coordinate with incident communications and air attack for air medical transportation needs.
- Preserve and photograph the scene for accident investigation.
- Remain aware of surroundings and the status of the main incident (delegate personnel to monitor the main fire) to ensure safety of medical treatment personnel.
- Until relieved, supervise and manage all personnel involved at the incident scene.
