Notes	

ICS Form 202	1. INCIDENT NAME	2. DATE	3. TIME	
INCIDENT OBJECTIVES	Bedrock / Lookout / Pothole / Horse Creek / Pete's Lake	09/24/23	1900	
4 OPERATIONAL DEC	DIOD (DATE/TIME)			

4. OPERATIONAL PERIOD (DATE/TIME) 09/25/2023 0700 - 2000

5. GENERAL CONTROL OBJECTIVES FOR THE INCIDENT (INCLUDE ALTERNATIVES)

Strategic Framework

Implement the full spectrum of suppression strategies that include: direct perimeter control on Pothole and Horse Creek Fires; the Lookout Fire will use a combination of direct, indirect, and monitor strategies; the Bedrock Fire will use monitor and control; and the Pete's Lake will be confinement, monitor, and point protection. Values of concern include human safety, communities, private property, commercial timber land, family timber land, Eugene Water and Electric Board Dam, Hwy 46, Hwy 126, Elk Lake Resort, and other identified infrastructure. Apply tactics that offer the highest probability of success to meet intent and objectives while considering risk to personnel.

Leaders Intent

- Human Factors: We will ensure that all personnel be treated with dignity and respect. We have zero tolerance
 for harassment, alcohol, or drug use. We will engage in all work assignments with a high degree of integrity,
 professionalism and provide excellent customer service to our responders, our agencies and our public.
- Safety & Risk Management: Firefighter, responder, aviator and public safety will be addressed through hazard identification, assessment and where practicable, mitigated.
- Operations: Prioritize missions that consider risk benefit trade-offs, provide higher probability of success given
 on scene and expected resource capability. We will consistently evaluate environmental factors and timing of
 implementing strategies.
- Agency Coordination: We will keep the Willamette National Forest, Bureau of Land Management and Oregon Department of Forestry informed of significant accomplishments, foreseen challenges and address concerns.
- Communication: We are committed to and will coordinate with the local community to enhance key partnerships and relationships by effectively ensuring transparent, timely and accurate communication is shared.
- Fiscal Accountability: As a responsibility and duty to the agencies and the public, we will monitor cost effective methods for accomplishing incident objectives and overall management of the incidents.

Management Objectives

- Provide for the safety of firefighters, aviators and public through utilization of strategic and deliberate risk assessment. Use a deliberate risk process that might include Incident Strategic Alignment Process ISAP to evaluate operational hazards, probabilities of success and consequences of failure when designing operational missions.
- Limit impacts to communities at risk, Elk Lake Resort, private land including industrial timber, family forest lands, recreational areas, Eugene Water and Electric Board Dam, H.J. Andrews experimental forest, Hwys 46 & 126, and other identified values of risk.
- 3. Maintain and enhance relationships with the public we serve, the agencies we are assisting and the responders that we are responsible for supporting.
- 4. Provide initial attack support to all lands in the designated TFR's and to those outside of TFR upon request.
- 5. Adhere to the control objectives, task/purpose/end state in each Division Assignment (204) to include mitigating and repairing adverse effects to resources resulting from fire suppression activities. Approved suppression repair plans include specific actions needed to stabilize the adverse effects in the fire areas.

Fire Weather Forecast

Monday September 25, 2023

FORECAST NO:

62

FIRE: Bedrock/Lookout/Horse Creek/

Pothole/Pete's Lake

PREDICTION FOR: ISSUED:

Monday, Sep 25, 2023 2000, Sep 24, 2023 UNIT: Incident Meteorologist: Willamette N.F. Brian Adams (T)

• **DISCUSSION**: A cold front brings more moderate rainfall to the region with slight (20%) chances for thunderstorms this morning and afternoon. Maximum rainfall rates of 0.25-0.50"/hr in any heavy downpours. Gusty south winds will remain relatively strong through this evening, especially along the mountain ridgelines. Additional rain chances and cool temperatures also expected to continue through Tuesday.

MONDAY:

- WEATHER: Cloudy, 90% chance of rain after 0600, 20% chance of thunderstorms in the morning and afternoon.
 Total rainfall through 2000 on Monday of 0.25-0.75", localized amounts up to 1.25" where any thunderstorms and heavier downpours occur.
- WIND (20 FT):
 - o **Lookout**: Valleys/Lwr Slopes: South 3-7 mph through 1000, then south 7-11 mph with gusts to 20 mph. Ridges/Upper Slopes: S 10-15 mph through 1000 then S 13-18 mph with gusts 25 to 30 mph.
 - o Petes Lake: SE 8-13 mph through 1200, then S 15-20 mph with gusts 25-30 mph through 2000.
- MAX TEMPERATURES: 54-60 valleys and mid-slopes, 49-55 ridges and Pete's Lake.
- MIN RH:

o Lookout: 65-75%

Petes Lake: 65-75%

INVERSION: Weak, but persisting through the day. MID HAINES: 2.

MONDAY NIGHT:

- WEATHER: Cloudy. 60% chance of scattered showers overnight, most likely amounts 0.10-0.20".
- WIND (20 FT):
 - o Lookout: Valleys/Lwr Slopes: South 5-9 mph. Ridges/Upr Slopes: S 9-14 mph with gusts to 20 mph.
 - o Petes Lake: South-southwest 10-15 mph with gusts to 25 mph.
- MIN TEMPERATURES: Lookout: 42-48. Petes Lake: 40-45
- MAX RH:

o Lookout: 90-100%

Petes Lake: 90-100%

TUESDAY:

- WEATHER: Cloudy. 80-90% chance of scattered rain during the day, totals of 0.25-0.50" expected.
- WIND (20 FT):
 - Lookout: Valleys/Lwr Slopes: Downslope 2-5, then southwest 5-10 mph with gusts to 15 mph.
 Ridges/Upper Slopes: SW 10-15 with gusts 20-25 mph.
 - Petes Lake: SW 10-15 with gusts 20-25 mph.
- MAX TEMPERATURES: 54-60 valleys and mid-slopes, 47-53 ridges and Pete's Lake.
- MIN RH:
 - o Lookout: 70-80%

Petes Lake: 70-80%

INVERSION: Weak, but persisting through the day. MID HAINES: 2.

Extended outlook: Wednesday through Saturday: A Pacific storm system maintains chances for rain through much of this week. Winds will be onshore through much of the week along with cooler temperatures and high humidity. Rain chances begin to diminish this coming weekend with upper level high pressure expected to start setting in.

Sunrise: 07:03 PDT Sunset: 19:06 PDT

FIRE BEHAVIOR FORECAST

FORECAST NUMBER: 44	TYPE OF FIRE: Wildfire
FIRE NAME: Lookout/Bedrock/Horse Creek/Pothole/Pete's Lake	OPERATIONAL PERIOD: 09/25/2023
DATE ISSUED: 09/24/2023	TIME ISSUED: 2000 Hours
UNIT: OR-WIF, Willamette National Forest	SIGNED: ANDREW TAYLOR Digitally signed by ANDREW TAYLOR Date: 2023.09.24 18:19:08 -07:00

INPUTS

WEATHER SUMMARY: Cooling and wetting weather returns bringing good chances of measurable precipitation to all of the fires over the next several days.

FUELS:

Continued Cooler and wetter weather remains over the fire area resulting in higher daytime RH values, cooler temperatures and chances of rain throughout the day will continue to moderate fire behavior on all fires. Continued storms move into the area bringing chances of more substantial precipitation Monday and Tuesday.

OUTPUTS

FIRE BEHAVIOR GENERAL:

Dead and down fuel loading in timber will be the primary burnable fuels on any of the fires. Primary activity will continue to be smoldering in duff and heavy down and dead fuels, with some areas of heat receiving enough weather to be extinguished this coming week.

Based on Peak Wx and Fuels conditions:

- Fine Dead Fuel Moisture- Saturated beyond moisture of extinction.
- Probability of Ignition 0-10.
- Moisture of extinction: The moisture content of a specific fuel type above which a fire will not propagate itself.

FIRE BEHAVIOR SPECIFIC:

Pete's Lake and Lookout Fire: Continued creeping under thicker canopies until fuels receive precipitation at ground level. Smoldering of dead and down fuels and duff. Heat will start to be extinguished. No fire growth expected.

Bedrock, **Pothole**, **and Horse Creek**: Continued consumption and smoldering of interior pockets with heat becoming extinguished throughout the next few days. Heat will start to be extinguished. No growth predicted.

IA – With potential thunderstorms in the morning hours, new starts are possible, but they will present low resistance to control with current weather conditions.

AIR OPERATIONS:

Weather will limit the needs for air operations over the next several days.

SAFETY

Winds will increase drastically, over the next couple of days increasing the chances of trees to fall in and outside of the fire. Stay aware of other rolling hazards as the ground becomes saturated and roots and other fuels have burnt out.

HEALTH AND SAFETY MESSAGE Pacific Northwest Incident Management Team 2

INCIDENT: Lookout, Bedrock, Pete's Lake DATE: 9/25/23

Psychological Safety

As a community we have invested a lot of energy into developing tools to protect us physically. What do you think was invented first, chainsaws or chaps? Let's not give MTDC a reason to develop a new style of chaps today.

Physical protection is not just about PPE compliance. We have a literal mountain of guides and checklists we abide by to protect us in the fire environment.

These policies, guides and checklists require professional judgement in application. This requires a healthy, acute, and focused mind to make good time critical decisions.

There has been a ground swell of support in recent years to increase our ability to support and care for those struggling psychologically. How do we create mental resiliency in our workforce?

Psychological safety refers to the ability to be safe with oneself, to rely on one's own ability to self-protect against any destructive impulses coming from within oneself or deriving from other people and to keep oneself out of harm's way. Hallmarks of a person with high psychological safety include self-efficacy, self-esteem, self-empowerment and the ability to relate to the world in healthy ways as traumas occur.

Plainly put, the emerging journey around psychological safety is not now, nor will ever be absent of burn-overs, broken trust, shaming, harassment, long-assignments, roll-overs, exclusion, exhausting travel, discrimination, training accidents, indifference, humiliation, flaming fronts, blow-ups, distain and the like. As Gandhi said, "peace is not the absence of conflict, but the ability to cope with it".

Recognize that we have a lot more work to do in this arena. Especially in comparison to the amount of energy we have invested in ensuring our physical protection. Perhaps we need to think of it as developing chaps for the brain?

Please read the "The Big Quiet" https://www.fs.usda.gov/inside-fs/leadership/delving-big-quiet-video.

- * WHEN CLAIMING HAZARD PAY YOU MUST INCLUDE THE SUPPRESSION ACTION BEING PERFORMED. THIS INCLUDES OPERATIONS WHICH DIRECTLY SUPPORT CONTROL OF FIRE (E.G., ACTIVITIES TO EXTINGUISH THE FIRE, FIREFIGHTING, GROUND SCOUTING, SPOT FIRE PATROLLING, SEARCH AND RESCUE OPERATIONS, AND BACKFIRING). PER PMS902 YELLOW BOOK

LOOKOUT and BEDROCK DEMOB LIST (09/25 TO 9/27)

If your Demob method of travel is by air, contact DMOB at (971) 762-8572 at least 72-hours in advance of your last work day.

Day Before Your Demob:

Contact FINANCE 24 hours prior to give them a heads-up you are departing and turn in any outstanding CTR/Shift Ticket. Make sure they are SIGNED. Confirm there is no missing financial documentation.

Day of Demob STEP 1:

Contact DMOB at 971-762-8572 or in person to obtain your Demob Check-Out Form (ICS 221) and to determine your specific next steps since we are pre-clearing personnel that do not have any supplies or communications equipment checked out.

STEP 2:

Have your vehicle "weed washed" at Lookout ICP; Hoodoo FOB or at Rock Quarry Staging Area.

STEP 3 (if directed by DMOB):

SUPPLY - see in person to return issued gear and leftover supplies

COMMUNICATIONS - see in person to return any communications equipment

GROUND SUPPORT - see in person to return incident rental vehicles, contractors to get an inspection, etc.

STEP 4:

Proceed to, or call, FINANCE at (661) 349-1530 at Lookout ICP or (971) 713-0359 at Hoodoo FOB to complete time closeout process and receive signed OF-288 or OF-286

STEP 5:

Return to Demob for final closeout

- Turn in any Unit Logs and Evaluations to Documentation Unit (Documentation Box).
- DMOB will verify check-out completion.
- > Be prepared to address your actual departure date/time; your anticipated arrival date/time; and where you will be staying overnight if travel includes overnight stops.

Social Media - PAUSE Before Posting

PERCEPTION – You are representing the jurisdictional agency and your home unit.

AUTHORITY – Be aware of federal and host agency social media policies.

UNDERSTANDING – Know the incident objectives. Never post negative, controversial, or unsafe messages to personal accounts. Ask a PIO/PAO or supervisor for clarification.

SAFETY – Do not compromise your safety while taking photos and always wear proper PPE. Never post photos of children, inmates, investigations, or cultural sites; be sensitive to burned structures and private information.

EXPECTATION – Share relevant content or photos with PIOs/PAOs to help tell the incident story

SHARE YOUR PHOTOS OR VIDEO

Please share your photos and videos with the Information Officers by email: 2023.Lookout@ firenet.gov. Include your name for photo credit and include basic info about where the photo was taken.

LOST AND FOUND

Located in the Information trailers at the Lookout ICP.

Training Message

ARE YOU ORDERED AS A TRAINEE?

If you are ordered as a trainee, please sign up for the incident trainee program. You will be registered with the incident training specialist by filling out the questionnaire from the QR code in the IAP, please email scans or pictures of your incident qualification card and front cover of your task book to Team10TNSP@yahoo.com. During your time on this incident ensure you work with your trainer to complete the tasks you need evaluated if possible. Ensure your trainer evaluate your position task book tasks you are able to complete, and completes your position task book evaluation page as well as a performance evaluation (ICS-225). These forms are emailed to you once you complete the Trainee form. Upon completion of your assignment (can be a couple days early to speed up demob), please email, scans or pictures of your position task book evaluation and performance evaluation (ICS-225) to Team10TNSP@yahoo.com. These will be checked for accuracy, logged in the system, and sent on to your home unit training contact through email. I am working remotely. Please contact me if you have any further needs Team10TNSP@yahoo.com or phone 360-490-5355, I look forward to serving you.

Training Specialist Neal Cox

Resource Advisor Message - Lookout Fire

James Rudisill, Lead READ - Lookout & Bedrock Fire, 541-505-4773 thomas.rudisill@usda.gov

With rain coming take a look at the pumps and any fuel storage. Please ensure containment trays are empty, with fresh pads. Use visqueen and p-cord to make a tent over the pump and fuel where possible. Driving around please look for plugged culverts and ditches, and make sure water can flow even if you can't do a full

repair. Engineering and Roads

- Do not track heavy equipment on paved roads without the proper mitigations (ie. street grousers, rubber mats, etc.).
- If any road issues or concerns are encountered, please contact a REAF.

Dozer Lines

- Please work with Resource Advisors to clear proposed dozer lines.
- Please minimize the depth of the dozer line to the least extent required to meet objectives. Deep cuts are expensive, time consuming, and difficult to repair.

Heritage & Cultural

All cultural resources and human remains are protected by law. <u>Leave them in place- no collecting</u>. Call Resource Advisor if cultural resource like arrowheads, flakes/chips, or historic artifacts like cans & bottles are found and they will investigate.

Noxious Weeds

WEED WASH STATION:

- The Weed Wash stations are operational and located at Strubb Flat, Kickbrush & Hoodoo
- Please use the weed wash upon arrival at the incident, and during demob
- Avoid the following weed: Slender False Brome and Spotted Knapweed

REDUCE THE SPREAD: Brush off packs & boots (especially laces) before leaving fire camp.

Tree Felling Operations

Please keep equipment on road surface to the greatest extent possible

Log Processing:

- Utilize existing openings and landings for decking, ditch lines/roadside is acceptable
- · Process trees down to a 6" top (small end diameter). Use remaining for firewood logs, rehab, or chip
- Preferred Log Lengths (maximize length whenever possible): 41 foot Max 17 foot Min
- 2' increments below 41', keeping logs as long as possible (41', 39', 37', etc....) Process unburnt trees on the unburnt side of the fireline. Process burnt trees on the burnt side of the fireline.
- · Keep processed slash and tops out of decks and off roads
- If possible, sort decks by species and log lengths

Snags and Hazard Trees:

Old growth is a key value. Limit snagging to operational needs & limit bucking to retain long bowls of large felled trees or snags.

Water Quality and Fisheries

AERIAL DIPPING:

- Aerial dipping should only occur at approved dip sites. Blue River Res. has a use restriction to facilitate dipping. Check with your REAF for approval of dipping sites.
- Be sure to wash buckets when new aerial resources arrive at the fire, when switching dips sites, or when returning to the fire from off forest.

WATER DRAFTNG:

- Limited Drafting is available at the bridge across Lookout Creek on the 1506 road in section 28. Check with the REAF for additional drafting locations as needed.
- Utilize fish screens when in fish bearing waterbodies (REAFs have these available).
- · Maintain sufficient flow as to not dewater downstream reaches
- Utilize splash pans and absorbent pads. REAFs will assist if given the location.

GROUND BASED RETARDANT APPLICATION:

Provide a 75 foot buffer from riparian areas with live water when applying ground based retardant.

CHIPPING STANDARDS:

- · Provide a 30- foot buffer of no chipping at water crossings or culverts.
- Do not place chips into road ditch.
- Do not chip onto a steep slope where chips will slide back into the ditch.
- Broadcast chipped material, ensuring that chips are no more than 4" deep.

Pete's Lake - - READ MESSAGE

Shaded Fuel Break Specifications

· Treat off of road road shoulder as directed, leaving a minimum of one tree every 20 feet spacing

Preferred leave tree species (from most desired leave to least desired):

Whitebark pine – do not cut

READS

Western White Pine – do not cut

Jason Gritzner 541-408-1846

o Spruce

Jason Wilcox 503-319-2408

- o Mountain Hemlock
- o Douglas-fir
- o Ponderosa Pine
- o White Fir
- o Lodgepole Pine
- Preferred log length to a minimum 5 inch top:
 - 0 16' 6", 25', 29', 33'
- 8 in. minimum trees to deck
- Max Cut 17 in. DBH
- · Keep slash in landings a minimum 25 feet from dripline of live standing trees.
- Log Landings size approximately 100ft. by 100 ft.; consult with READ on locations.
- Tracked equipment no activity within 50 feet of live water.
- · Tracked equipment no activity within 30 feet of dry stream.
- Avoid removing trees that have signs/blazes on them as much as possible

Fuels Treatment Specifications around Recreation Sites (specified by READs)

- Thin trees less than 4 in. DBH as directed
- Avoid removing trees that have signs/blazes on them as much as possible
- 10 foot spacing between leave trees for 20 feet off roads
- 20 foot spacing between leave trees interior to 20 feet off roads
- · Cut lodgepole pine first
- Flush cut stumps within 50 feet from Highway 46
- Do not leave sharp stumps in recreation area
- Retain trees along streams (don't cut any trees within 20 feet of wet or dry stream banks, unless deemed hazard trees or otherwise directed).

Flagging Guide

Blue: ATP (Area to Protect)...refer to flags for written specifications

Orange: End Haul Site location (slash, logs, chips, etc.)

Chipping Specifications

Spread chipped material to a max depth of 3 inches unless otherwise directed to pile.

HELICOPTER EXTRACTION OPERATIONS

The intent of helicopter insertion/extraction operations is to facilitate the movement of personnel to and from inaccessible areas. These operations are not meant to be a medical transport resource; life flight and ground transportation should always be ordered in addition to the extraction aircraft and crew.

ORDERING:

- On-scene EMT and/or Incident within Incident IC determines that an extraction helicopter is needed and places the order through the pre-established procedures:
 - Division Supervisor
 - Incident Communications
 - Dispatch Center
- When ordering extraction aircraft provide the following information:
 - o Location (Lat/Long) of patient
 - o Known Hazards
 - Wind Speed and Direction
 - o Terrain
 - o Incident Updates

SITE SELECTION:

- The helicopter crew will confirm the extraction location when they arrive on scene. However, a general rule is any clearing that is 10'x10' with visible sight lines to the sky is a suitable extraction site.
- If the terrain is steep, excavating a platform or shelf can make it easier for patient packaging.

QR Code-Short-haul Site Selection Video

CONSIDERATIONS:

- Short-haul and hoist are safe and efficient operations for extracting injured personnel of any severity including "Green" patients.
- Ensure area is clear of non-essential items, hazards, and personnel.
- Rotor wash may affect overhead hazards and blowing dust/debris can create brown out conditions or influence fire behavior.
- Aerial Supervision is valuable for coordinating aviation medevac/extraction missions and should be ordered if available and not currently present.
- The aircrew will make the final assessment of the mission. Always have a contingency plan in case a helicopter cannot complete the request.

DEFINITIONS:

Rescue Hoist: A cable winching device mounted to the helicopter that can lower/raise persons attached to a cable.

· Common cable lengths are 250-300 feet.

Short-haul: To insert or extract one or more persons suspended on a fixed line beneath a helicopter.

 Common short-haul line lengths are 100, 150, and 250 feet. The lines can also be connected for a longer line if the situation requires it.

EMERGENCY PLAN INCIDENT WITHIN AN INCIDENT

ON SCENE INCIDENT COMMANDER

In the event of an accident or medical incident of any size, your primary responsibility is to ENSURE that the victim(s) receive prompt and effective Triage, Treatment, Extrication and Transport.

- ENSURE THE MEDICAL INCIDENT REPORT IN THE INCIDENT ACTION
 PLAN IS BEING USED AND FOLLOWED- *IF DETERMINED TO BE A
 GREEN THAT REQUIRES TRANSPORT BACK TO CAMP OR TO A
 MEDICAL FACILITY, DO NOT DECLARE EMERGENCY TRAFFIC AND ONLY
 COMPLETE LINE 1-4 ON MEDICAL INCIDENT REPORT*.
- Conduct size-up of the incident nature of accident, number type of resources involved, latitude and longitude location (DD°MMM.MM format): notify incident communications center and supervisor, request assistance as needed.
- Order and coordinate medical and support response to the accident.
- Evaluate special needs (law enforcement, haz mat, etc.).
- Clear the command frequency if medical emergency, coordinate with incident communications and air attack for air medical transportation needs.
- Preserve and photograph the scene for accident investigation.
- Remain aware of surroundings and the status of the main incident (delegate personnel to monitor the main fire) to ensure safety of medical treatment personnel.
- Until relieved, supervise and manage all personnel involved at the incident scene.
