# FIRE BEHAVIOR FORECAST

<b>FORECAST NUMBER:</b> 49	<b>TYPE OF FIRE:</b> Wildfire
<b>FIRE NAME:</b> Lookout/Bedrock/Horse Creek/Pothole/Pete's Lake	<b>OPERATIONAL PERIOD:</b> Saturday, 30 September 2023
<b>DATE ISSUED:</b> 29 September 2023	<b>TIME ISSUED:</b> 2000 Hours
<b>UNIT:</b> Willamette NF, OR-WIF	<b>SIGNED:</b> Forrest Ownbey /s/ <i>Forrest Ownbey</i> – FBAN

## INPUTS

**WEATHER SUMMARY:** See Fire Weather Forecast for Details

Persistent moist and cool weather conditions and light winds. Excellent humidity recovery.

**FUELS:**

Fuels in the fire area consist of Timber Litter (TL5) and Timber Understory (TU5) and lichen in the canopy. The Willamette National Forest and area has received approximately one inch of precipitation at the end of September. Live fuel moisture levels are good and resistant to contributing to fire spread. ERC's are well below the 90<sup>th</sup> percentile.

## OUTPUTS

**FIRE BEHAVIOR GENERAL:**

Gravity and steep terrain creates potential for rolling material, fuel moisture content is high and do not create a receptive fuel. Primary fire activity will be smoldering in duff, stumpholes and under dense canopy cover.

- Grass – FM 2 (Timber grass / understory)
  - Rate of Spread – 1 to 3 chains per hour possible with flame lengths up to 1 foot.
- Brush – FM 5 (Shrub fuel type)
  - Rate of Spread – 2 to 4 chains per hour possible with flame lengths up to 2 feet.
- Timber – TU5 & TL5 (Timber Understory, Timber Litter)
  - Rate of Spread – 2 to 4 chains per hour possible with flame lengths up to 4 feet.

PIG 5-15%                      Spotting Distance .0 miles                      Torching Not Likely                      Uphill Crown Not Likely

Fire behavior predictions are for the hottest and driest period of the day, gusts could increase fire behavior rates.

**FIRE BEHAVIOR SPECIFIC:**

Petes Lake & Lookout Fire: Fuels will lag in recovery from the recent precipitation. Expect to see smoldering of stumpholes, duff and heavy fuels.

Bedrock, Pothole and Horse Creek Fire: Fuels will lag in recovery from the recent precipitation. Smoldering of protected fuels will be the excitement for fire activity.

IA: Conditions exist for slow moving fire spread with flame lengths that direct attack should be effective.

**AIR OPERATIONS:**

Cloudy morning with fog is likely to limit visibility, some clearing may occur in the afternoon.

## SAFETY

Wet ash is very slick, along with logs and leaves, watch you footing as you navigate around the fire area. Stump holes and heavy fuels could hold heat through the rain event and monitor for weekend trees.

**With rain coming take a look at the pumps and any fuel storage. Please ensure containment trays are empty, with fresh pads. Use visqueen, p-cord to make a tent over the pump and fuel where possible. Driving around please look for plugged culvert and ditches, and make sure water can flow even if you can't do a full repair.**

## *Engineering and Roads*

- Do not track heavy equipment on paved roads without the proper mitigations (ie. street grousers, rubber mats, etc.).
- If any road issues or concerns are encountered, please contact a REAF.

## *Dozer Lines*

- Please work with Resource Advisors to clear proposed dozer lines.
- Please minimize the depth of the dozer line to the least extent required to meet objectives. Deep cuts are expensive, time consuming, and difficult to repair.

## *Heritage & Cultural*

All cultural resources and human remains are protected by law. **Leave them in place- no collecting.** Call Resource Advisor if cultural resource like arrowheads, flakes/chips, or historic artifacts like cans & bottles are found and they will investigate.

## *Noxious Weeds*

### WEED WASH STATION:

- The Weed Wash stations are operational and located at Lookout Staging (Rock Quarry) and Lookout ICP
- Please use the weed wash upon arrival at the incident, and during demob
- Avoid the following weed: Slender False Brome and Spotted Knapweed

REDUCE THE SPREAD: Brush off packs & boots (especially laces) before leaving fire camp.

## *Tree Felling Operations*

Please keep equipment on road surface to the greatest extent possible

### Log Processing:

- Utilize existing openings and landings for decking, ditch lines/roadside is acceptable
- Process trees down to a 6" top (small end diameter). Use remaining for firewood logs, rehab, or chip
- Preferred Log Lengths (maximize length whenever possible): 41 foot Max – 17 foot Min
- 2' increments below 41', keeping logs as long as possible (41', 39', 37', etc....) Process unburnt trees on the unburnt side of the fireline. Process burnt trees on the burnt side of the fireline.
- Keep processed slash and tops out of decks and off roads
- If possible, sort decks by species and log lengths

### Snags and Hazard Trees:

Old growth is a key value. Limit snagging to operational needs & limit bucking to retain long bowls of large felled trees or snags.

## *Water Quality and Fisheries*

### AERIAL DIPPING:

- Aerial dipping should only occur at approved dip sites. Blue River Res. has a use restriction to facilitate dipping. Check with your REAF for approval of dipping sites.
- Be sure to wash buckets when new aerial resources arrive at the fire, when switching dips sites, or when returning to the fire from off forest.

### WATER DRAFTING:

- Limited Drafting is available at the bridge across Lookout Creek on the 1506 road in section 28. Check with the REAF for additional drafting locations as needed.
- Utilize fish screens when in fish bearing waterbodies (REAFs have these available).
- Maintain sufficient flow as to not dewater downstream reaches
- Utilize splash pans and absorbent pads. REAFs will assist if given the location.

### CHIPPING STANDARDS:

- Provide a 30- foot buffer of no chipping at water crossings or culverts.
- Do not place chips into road ditch.
- Do not chip onto a steep slope where chips will slide back into the ditch.
- Broadcast chipped material, ensuring that chips are no more than 4" deep.

# ***SAFETY MESSAGE***

September 30, 2023

## **Situational Awareness: Complacency**

**Complacency:** self-satisfaction especially when accompanied by unawareness of actual dangers or deficiencies. *When it comes to safety, complacency can be dangerous.* Webster's Dictionary

On parts of the fire, things are winding down and some division assignments are turning from suppression to mop-up/backhaul/repair, not the time to let our guard down if we want to be available for the next dispatch.

- All safety considerations and mitigations in place for suppression apply to the rest of the job.
- Always keep your head on a swivel, keep your situational awareness up and running for all missions.
- Make sure everyone understands the mission, expectations and desired outcome. Leaders intent: task—purpose—end state (IRPG Pg. x white pages)
- End state always includes everyone going home in good health.
- Get your rest, don't let fatigue dull your SA.

**Surprises are nice on your birthday, not on a fire!**

Human Resource Message  
Lookout, Bedrock, Petes Lake Fire  
September 30, 2023

**NWCG and the 2022 IRPG Stress Management Guide**

The stressful conditions fire and emergency medical services (EMS) responders endure are getting more attention as concerning statistics on responder behavioral health are revealed.

Unmanaged or unmitigated stress impacts our fitness for duty and our ability to maintain productive and healthy working relationships.
