ICS Form 202	1. INCIDENT NAME	2. DATE	3. TIME
INCIDENT	Bedrock / Lookout / Pothole /	10/05/23	1900
OBJECTIVES	Horse Creek / Pete's Lake		

4. OPERATIONAL PERIOD (DATE/TIME)

10/06/2023 0700 – 2000

5. GENERAL CONTROL OBJECTIVES FOR THE INCIDENT (INCLUDE ALTERNATIVES)

Leaders Intent

- 1. Human Life is the most important value to be protected. There is no higher value than that of our responders and the public. Utilize deliberate risk assessment and Incident Strategic Alignment Process to ensure hazards are identified and response is commensurate with values at risk.
- Limit impacts to communities at risk. Monitor fire behavior, smoke impacts and fire growth; respond as needed to
 protect life, property, infrastructure, improvements, recreation, cultural, natural resources, and other identified values
 at risk.
- 3. Apply methods and implement suppression and repair strategies appropriate to the values at risk, and where they will have the highest probability of success. Suppression and repair activities will be coordinated with resource advisor and in accordance with approved suppression repair plan.
- Ensure the timely and accurate dissemination of information and maintain positive relationships with cooperating
 agencies and local landowners; along with identified elected state and local officials, business leaders and media
 contacts.
- 5. Manage incident and assigned resources cost effectively, commensurate with the direction of the Agency Administrators and values to be protected.
- 6. Manage human resources assigned to the incident in a manner that promotes a positive harassment free work environment, ensure all are treated with dignity and respect. There will be zero tolerance for drug and alcohol use or possession for those assigned to this incident.

Management Objectives

- Consider, communicate and plan for the safety and wellbeing of assigned personnel, resources and the public, prior to engaging in any and all incident related activities. Emphasize safety in all that we do.
- Engage and limit the negative effects of fire suppression activities to natural resources. Suppression repair plan identifies specific actions needed to stabilize the adverse effects in these fire areas.
- Work with BAER Team to support access and completion of burned area assessment.
- Work with Willamette National Forest Timber READ to facilitate danger tree removal to reduce roadside hazards.
- Protect communities at risk, private properties, industrial timber, family forests, recreational areas, wildlife, cultural
 and natural resources, Eugene Water and Electric Board Dam, H.J. Andrews Experimental Forest, Hwy 126 and other
 identified values at risk.
- Continue to monitor fire behavior, activity and growth and react accordingly.
- Respond to new starts as requested by host agencies.
- Utilize Turn-back Standards document to provide clear direction as to the desired conditions and the requirements for transfer of command for the Bedrock, Lookout, Horse Creek, Pothole, and Pete's Lake Fires back to host unit or to another Incident Management Team.

Fire Weather Forecast

Friday October 6, 2023

FORECAST NO: PREDICTION FOR: ISSUED:

73 Eriday Oct 6

Friday, Oct 6, 2023 2000, Oct 5, 2023 FIRE: Bedrock/Lookout/Horse Creek/Pothole UNIT: Willamette N.F.

Incident Meteorologist: Matt Callihan

DISCUSSION: East winds overnight have allowed morning temperatures to drop into the upper 40s to low 50s under clear skies. Another sunny, warm, and dry day is on tap as the upper level ridge that has been camped along the coast begins its trek east. The ridge axis will be directly over our area this afternoon, allowing for morning winds to decrease through the middle part of the day. The ridge then slowly shifts to our east and weakens as a system develops over the Gulf of Alaska and begins to dig south on Saturday.

FRIDAY:

- WEATHER: Sunny, warmer, and breezy. High temperatures will be 1-4 degrees warmer than on Thursday.
- WIND (20 FT):
 - o Valleys/Lwr Slopes: Downslope 1-3 mph becoming upslope 2-5 mph around 0900.
 - Ridges/Upr Slopes: From the east 5-10 mph with gusts around 15 mph, decreasing to 2-6 mph after 1000.
- MAX TEMPERATURES: 79-84 valleys and mid-slopes, ridges 72-78.
- MIN RH: 18-28%
- INVERSION: Light, lifting around 1000. MID HAINES: 5.

FRIDAY NIGHT:

- WEATHER: Mostly clear, with lows about 1-2 degrees warmer than Thursday night.
- WIND (20 FT):
 - o Valleys/Lwr Slopes: E 2-5 mph becoming downslope 1-3 mph.
 - o Ridges/Upr Slopes: E 3-7 with gusts up to 10 mph.
- MIN TEMPERATURES: 48-52.
- MAX RH: 50-60%

SATURDAY:

- WEATHER: Sunny, warmer, and drier. High temperatures will be 2-4 degrees warmer than on Friday.
- WIND (20 FT):
 - o Valleys/Lwr Slopes: Downslope 1-3 mph becoming upslope 2-4 mph around 0900.
 - o Ridges/Upr Slopes: From the east 2-5 mph shifting to the west 3-7 mph after 1000.
- MAX TEMPERATURES: 82-87 valleys and mid-slopes, ridges 77-81.
- MIN RH: 17-27%
- INVERSION: Light, lifting around 1000. MID HAINES: 4.

Extended outlook: The upper level ridge will be to our east on Sunday and begins to break down and flatten through the day. This allows the system over the Gulf of Alaska to dig further south, providing southwest flow aloft to begin and increase humidities across the fire area. This system approaches the Oregon coast late Sunday into Monday, bringing substantial moisture and rain Monday into Tuesday. Current rain amounts of around 0.50" are expected, with isolated areas picking up 0.75" – 1.00". Showers slowly taper off through the day on Tuesday as the front slowly passes to our east. Another upper level ridge will develop along the coast in the wake of the departing system, drying conditions into Wednesday. East winds are then expected to return on Thursday as the ridge continues to strengthen along the coast.

Sunrise: 07:16 PDT Sunset: 18:46 PDT

FIRE BEHAVIO	OR FORECAST

Resource Advisor Message - Lookout and Bedrock Fires

Tom Demeo, Lead READ, 503 267 3943, Thomas.Demeo@usda.gov; James Rudisill, Danger Tree Lead READ, 541-505-4773 Thomas.Rudisill@usda.gov

With rain coming take a look at the pumps and any fuel storage. Please ensure containment trays are empty, with fresh pads. Use visqueen, p-cord to make a tent over the pump and fuel where possible. Driving around please look for plugged culvert and ditches, and make sure water can flow even if you can't do a full repair.

Engineering and Roads

- Do not track heavy equipment on paved roads without the proper mitigations (ie. street grousers, rubber mats, etc.).
- If any road issues or concerns are encountered, please contact a REAF.

Dozer Lines

- Please work with Resource Advisors to clear proposed dozer lines.
- Please minimize the depth of the dozer line to the least extent required to meet objectives. Deep cuts are expensive, time consuming, and difficult to repair.

Heritage & Cultural

All cultural resources and human remains are protected by law. <u>Leave them in place- no collecting</u>. Call Resource Advisor if cultural resource like arrowheads, flakes/chips, or historic artifacts like cans & bottles are found and they will investigate.

Noxious Weeds

WEED WASH STATION:

- The Weed Wash stations are operational and located at Lookout Staging (Rock Quarry) and Lookout ICP
- Please use the weed wash upon arrival at the incident, and during demob
- Avoid the following weed: Slender False Brome and Spotted Knapweed

REDUCE THE SPREAD: Brush off packs & boots (especially laces) before leaving fire camp.

Tree Felling Operations

Please keep equipment on road surface to the greatest extent possible Log Processing:

- Utilize existing openings and landings for decking, ditch lines/roadside is acceptable
- Process trees down to a 6" top (small end diameter). Use remaining for firewood logs, rehab, or chip
- Preferred Log Lengths (maximize length whenever possible): 41 foot Max 17 foot Min
- 2' increments below 41', keeping logs as long as possible (41', 39', 37', etc....) Process unburnt trees on the unburnt side of the fireline. Process burnt trees on the burnt side of the fireline.
- Keep processed slash and tops out of decks and off roads
- If possible, sort decks by species and log lengths

Snags and Hazard Trees:

Old growth is a key value. Limit snagging to operational needs & limit bucking to retain long bowls of large felled trees or snags.

Water Quality and Fisheries

AERIAL DIPPING:

- Aerial dipping should only occur at approved dip sites. Blue River Res. has a use restriction to facilitate dipping. Check with your REAF for approval of dipping sites.
- Be sure to wash buckets when new aerial resources arrive at the fire, when switching dips sites, or when returning to the
 fire from off forest.

WATER DRAFTNG:

- Limited Drafting is available at the bridge across Lookout Creek on the 1506 road in section 28. Check with the REAF for additional drafting locations as needed.
- Utilize fish screens when in fish bearing waterbodies (REAFs have these available).
- · Maintain sufficient flow as to not dewater downstream reaches
- Utilize splash pans and absorbent pads. REAFs will assist if given the location.

CHIPPING STANDARDS:

- Provide a 30- foot buffer of no chipping at water crossings or culverts.
- Do not place chips into road ditch.
- Do not chip onto a steep slope where chips will slide back into the ditch.
- Broadcast chipped material, ensuring that chips are no more than 4" deep.

Safety Message

October 6, 2023

AVOID DROWSY DRIVING

Drowsy-driving crashes:

- 1. Occur most frequently between midnight and 6 a.m., or in the late afternoon. At both times of the day, people experience dips in their circadian rhythm—the human body's internal clock that regulates sleep.
- 2. Often involve only a single driver (and no passengers) running off the road at a high rate of speed with no evidence of braking; and
- 3. Frequently occur on rural roads and highways.

HOW TO AVOID DRIVING DROWSY

- 1. Getting adequate sleep on a daily basis is the only true way to protect yourself against the risks of driving when you're drowsy. Experts urge us to make it a priority to get seven to eight hours of sleep per night.
- 2. Before the start of a long drive, get a good night's sleep, or you could put your entire crew and others at risk.
- 3. Always check your prescription and over-the-counter medication labels to see if drowsiness could result from their use.
 - A. If you take medications that could cause drowsiness as a side effect, have others drive.
- 4. If you drive, avoid driving during the peak sleepiness periods (midnight 6 a.m. and late afternoon). If you must drive during the peak sleepiness periods, stay vigilant for signs of drowsiness, such as crossing over roadway lines or hitting a rumble strip, especially if you're driving alone.
 - A. Follow agency rules.
- 5. Avoid drinking any alcohol before driving. Consumption of alcohol interacts with sleepiness to increase drowsiness and impairment.

Safety Officers: SOF2's Van Woert, McBride, Krech, Wesemann

Hazard	Mitigation
Driving/road conditions	 Reduce windshield time (2:1 work ratio) Signing of all incident roads that provide access to divisions Daily updated travel plan maps Practice defensive driving. In local communities obey the posted speed limits
Overhead hazards Aviation Powerlines	 Select tactics that minimize firefighter exposure Review IRPG pgs. 61-79, when working near air operations Identify hazardous trees and snags, fell as appropriate Review IRPG pgs. 22-23, when working near powerlines
Personal Health/Wellness	 Wash hands/ hand sanitizer Remove dirty Nomex shirts prior to entering chow lines Mask will be available if needed (camp crud, covid, flu)
Repair/ backhaul	 Identify and communicate hazards and manage appropriately, including hazard trees Drive carefully on forest roads and when transiting Hwy. 126 Know the location of the nearest medical resources Use 4X4 or UTV's to shuttle supplies to areas where stake side and van trucks can stay on hardened roads
Public Interaction	Be considerate of the public! We want to interact with the public, answer questions
Communications	Human repeaters Change batteries often
Mental Health	Critical Incident Stress Management Human Resource contacts available for all resources
Gravity Hazards	 Post lookouts Situational awareness of rolling materials. (Rocks, tree's) Situational awareness of falling green/ snag tree's
Heavy Equipment	 Blind zone (Operator) Rolling material (rocks, trees, stumps) Flying debris Tree strikes
IA	Follow protocols and communications links established with NW10 IA resources designated in IAP, use closest forces and leadership assigned to supervise IA forces during a response IA resources must be familiar with IA commo channel group

BEFORE YOU GO TO Finance & DEMOB Check and Follow the schedule

Go through Weed Wash and Inspection

Return Supplies

Return Radios

At Scheduled time......
Finish your Finances

Go to DEMOB Desk to Finalize your Demob process.

Questions Regarding your DEMOB Call 360-259-9120

For an Efficient DEMOB

- Return all items to supply and communications
- Have Inspections completed
- Have Weed Wash done

Arrive to Finance at the time designated on DEMOB list

- If you don't come at your time you will have to stand in line
- When your finances are completed, go to DEMOB to finish process.

DEMOB

HUMAN RESOURCE MESSAGE

Things are not always as they first appear to be. Don't jump to conclusions. Every story has two sides. Wait to

hear both sides before making a decision as to who is right and who is wrong.

If there is any way I can assist you, please do not hesitate to contact me.

Your Human Resource Specialist,

Mike Baines, 724-678-6147

Training Message

ARE YOU ORDERED AS A TRAINEE?

If you are ordered as a trainee, please sign up for the incident trainee program. Please register with the incident training specialist by filling out the questionnaire from the QR code in the IAP, please email scans or pictures of your incident qualification card and front cover of your task book to adam.micone1@outlook.com.

During your time on this incident ensure you work with your trainer to complete the tasks you need evaluated if possible. Ensure your trainer evaluates your position task book tasks that you can complete, and they complete your position task book evaluation page as well as a performance evaluation (ICS-225). I have a training folder within the QR Code with both a position task book evaluation record and a performance evaluation for your trainer to use if needed. Upon completion of your assignment (please complete a couple days early to speed up demob), please email, scans or pictures of your position task book evaluation and performance evaluation (ICS-225) to adam.micone1@outlook.com. These will be checked for accuracy, logged in the system, and sent on to your home unit training contact through email. Adam is working remotely. Please contact me if you have any further questions, please reach out to adam.micone1@outlook.com or 509-589-1387, we look forward to serving you.

Have a great Day!

Adam Micone

NW Team 10 Incident Training Specialist (t)

MEDICAL PLAN (ICS 206 WF)

Controlled Unclassified Information//Basic

FOR A NON-EMERGENCY INCIDENT, WORK THROUGH CHAIN OF COMMAND TO REPORT AND TRANSPORT INJURED PERSONNEL AS NECESSARY.

FOR A MEDICAL EMERGENCY: IDENTIFY ON SCENE INCIDENT COMMANDER BY NAME AND POSITION AND ANNOUNCE "MEDICAL EMERGENCY" TO INITIATE RESPONSE FROM IMT COMMUNICATIONS/DISPATCH.

Use the following items to communicate situation to communication	s/dispatcl	h.
---	------------	----

- CONTACT MUD LICK COMMUNICATIONS / DISPATCH (Verify correct frequency prior to starting report)
 Ex: "Communications, Div. Alpha. Stand-by for Emergency Traffic."
 INCIDENT STATUS: Provide incident summary (including number of patients) and command structure.

Ex: "Communications, I have a Red priority patient, unconscious, struck by a falling tree. Requesting air ambulance to Forest Road 1 at (Lat./Long.) This will be the Trout Meadow Medical, IC is TFLD Jones. EMT Smith is providing medical care."								
	ergency / Transport riority	□RED / PRIORITY 1 Life or limb threatening injury or illness. Evacuation need is IMMEDIATE Ex: Unconscious, difficulty breathing, bleeding severely, 2° – 3° burns more than 4 palm sizes, heat stroke, disoriented. □YELLOW / PRIORITY 2 Serious Injury or illness. Evacuation may be DELAYED if necessary. Ex: Significant trauma, unable to walk, 2° – 3° burns not more than 1-3 palm sizes. □GREEN / PRIORITY 3 Minor Injury or illness. Non-Emergency transport Ex: Sprains, strains, minor heat-related illness.						
	njury or Illness & ism of Injury						of Injury or Illness Struck by Falling Tree)	
Transport Request		Air Ambulance / Short Haul/Ho Ground Ambulance / Other					and the contract of the contra	
Patient Location			Descriptive Location & Lat. / Long. (W				& Lat. / Long. (WGS84)	
Incident Name						Geographic Name + "Medical" (Ex: Trout Meadow Medical)		
On-Scene Incident Commander						Name of on-scene IC of Incident within a Incident (Ex: TFLD Jones)		
Pati	ent Care					Name of Care Provider (Ex: EMT Smith)		
3. INITIAL PATI	3. INITIAL PATIENT ASSESSMENT: Complete this section for each patient as applicable (start with the most severe patient)							
Patient Assessment: See IRPG PAGE 106								
Treatment:								
4. TRANSPORT PLAN:								
Evacuation Location (if different): (Descriptive Location (drop point, intersection, etc.) or Lat. / Long.) Patient's ETA to Evacuation Location:								
Helispot / Extraction Site Size and Hazards:								
5. ADDITIONAL RESOURCES / EQUIPMENT NEEDS:								
Example: Paramedic/EMT, Crews, Immobilization Devices, AED, Oxygen, Trauma Bag, IV/Fluid(s), Splints, Rope rescue, Wheeled litter, HAZMAT, Extrication								
6. COMMUNICATIONS: Identify State Air/Ground EMS Frequencies and Hospital Contacts as applicable								
Function	Channel Name/Number	Receiv	e (RX)	Tone/NAC *	Trar	nsmit (TX)	Tone/NAC *	
COMMAND								
AIR-TO-GRND								
TACTICAL								
7. CONTINGENCY: Considerations: If primary options fail, what actions can be implemented in conjunction with primary evacuation method? Be thinking								

- ahead.
- 8. ADDITIONAL INFORMATION: Updates/Changes, etc.

REMEMBER; Confirm ETAs of resources ordered. Act according to your level of training. Be Alert. Keep Calm. Think Clearly. Act Decisively.
