ICS Form 202 INCIDENT OBJECTIVES	1. INCIDENT NAME Bedrock / Lookout / Pothole / Horse Creek / Pete's Lake	2. DATE 10/06/23	3. TIME 1900									
4. OPERATIONAL PERIOD (DATE/TIME) 10/07/2023 0700 – 2000												
5. GENERAL CONTROL OBJECTIVES FOR THE INCIDENT (INCLUDE ALTERNATIVES) Leaders Intent <ol style="list-style-type: none"> Human Life is the most important value to be protected. There is no higher value than that of our responders and the public. Utilize deliberate risk assessment and Incident Strategic Alignment Process to ensure hazards are identified and response is commensurate with values at risk. Limit impacts to communities at risk. Monitor fire behavior, smoke impacts and fire growth; respond as needed to protect life, property, infrastructure, improvements, recreation, cultural, natural resources, and other identified values at risk. Apply methods and implement suppression and repair strategies appropriate to the values at risk, and where they will have the highest probability of success. Suppression and repair activities will be coordinated with resource advisor and in accordance with approved suppression repair plan. Ensure the timely and accurate dissemination of information and maintain positive relationships with cooperating agencies and local landowners; along with identified elected state and local officials, business leaders and media contacts. Manage incident and assigned resources cost effectively, commensurate with the direction of the Agency Administrators and values to be protected. Manage human resources assigned to the incident in a manner that promotes a positive harassment free work environment, ensure all are treated with dignity and respect. There will be zero tolerance for drug and alcohol use or possession for those assigned to this incident. Management Objectives <ul style="list-style-type: none"> Consider, communicate and plan for the safety and wellbeing of assigned personnel, resources and the public, prior to engaging in any and all incident related activities. Emphasize safety in all that we do. Engage and limit the negative effects of fire suppression activities to natural resources. Suppression repair plan identifies specific actions needed to stabilize the adverse effects in these fire areas. Work with BAER Team to support access and completion of burned area assessment. Work with Willamette National Forest Timber READ to facilitate danger tree removal to reduce roadside hazards. Protect communities at risk, private properties, industrial timber, family forests, recreational areas, wildlife, cultural and natural resources, Eugene Water and Electric Board Dam, H.J. Andrews Experimental Forest, Hwy 126 and other identified values at risk. Continue to monitor fire behavior, activity and growth and react accordingly. Respond to new starts as requested by host agencies. Utilize Turn-back Standards document to provide clear direction as to the desired conditions and the requirements for transfer of command for the Bedrock, Lookout, Horse Creek, Pothole, and Pete's Lake Fires back to host unit or to another Incident Management Team.

Fire Weather Forecast

Saturday October 7, 2023

FORECAST NO: 74
PREDICTION FOR: Saturday, Oct 7, 2023
ISSUED: 2000, Oct 6, 2023

FIRE: Bedrock/Lookout/Horse Creek/Pothole
UNIT: Willamette N.F.
Incident Meteorologist: Matt Callihan

- **DISCUSSION:** East winds have again allowed for morning temperatures to drop into the low 50s under clear skies. The final day of the warming and drying trend ends today as high temperatures will break into the mid to upper 80s and afternoon humidities will drop between 15-25%. Winds will initially be from the east before shifting from the west by 1100, as the upper level ridge pushes to our east and the dropping upper level trough begins to eye the Oregon coast. An initial system will move onshore over Southern British Columbia on Sunday, eroding the back end of the ridge and weakening it substantially as a stronger system begins to approach the coast late Sunday.

SATURDAY:

- **WEATHER:** Sunny, warmer, and drier. High temperatures will be 2-4 degrees warmer than on Friday.
- **WIND (20 FT):**
 - **Valleys/Lwr Slopes:** Downslope 1-3 mph becoming upslope 3-6 mph around 0900.
 - **Ridges/Upr Slopes:** From the east 2-5 mph shifting to the west 3-7 mph by 1100.
- **MAX TEMPERATURES:** 84-89 valleys and mid-slopes, ridges 79-83.
- **MIN RH:** 15-25%
- **INVERSION:** Light, lifting around 1000. **MID HAINES:** 3.

SATURDAY NIGHT:

- **WEATHER:** Mostly clear, with lows 1-2 degrees cooler than Friday night.
- **WIND (20 FT):**
 - **Valleys/Lwr Slopes:** S 1-4 mph becoming downslope 1-3 mph.
 - **Ridges/Upr Slopes:** S 2-6 with gusts less than 10 mph.
- **MIN TEMPERATURES:** 48-52.
- **MAX RH:** 73-83%

SUNDAY:

- **WEATHER:** Mostly sunny, cooler, and more moist. High temperatures will be 4 to 8 degrees cooler than on Saturday.
- **WIND (20 FT):**
 - **Valleys/Lwr Slopes:** Downslope 1-4 mph becoming upslope 2-5 mph around 0900.
 - **Ridges/Upr Slopes:** From the south 2-4 mph shifting to the west 3-6 mph after 1000.
- **MAX TEMPERATURES:** 78-83 valleys and mid-slopes, ridges 75-79.
- **MIN RH:** 22-32%
- **INVERSION:** Light, lifting around 1000. **MID HAINES:** 3.

Extended outlook: The system that has been strengthening in the Gulf of Alaska and dropping south since Saturday evening will begin to push onshore early Monday as a cold front brings the first round of showers across the fire area Monday morning. Showers will continue through the day as the upper level trough slides through during the afternoon, allowing west flow aloft to moisten the atmosphere as another front and associated upper trough pushes onshore Tuesday. Rainfall will be more efficient at reaching the ground with this second system as the atmosphere will be rather moist. Rain amounts of between 0.10-0.25" are expected Monday, with amounts between 0.50-0.75" on Tuesday. Light showers will linger into the early afternoon on Wednesday before another upper level ridge sets up along the coast.

Sunrise: 07:17 PDT **Sunset:** 18:44 PDT

FIRE BEHAVIOR FORECAST

FORECAST NUMBER: 56	TYPE OF FIRE: Wildfire
FIRE NAME: Lookout/Bedrock/Horse Creek/Pothole/Pete's Lake	OPERATIONAL PERIOD: Saturday, 07 October 2023
DATE ISSUED: 06 October 2023	TIME ISSUED: 2000 Hours
UNIT: Willamette NF, OR-WIF	SIGNED: Forrest Ownbey /s/ Forrest Ownbey – FBAN

INPUTS

WEATHER SUMMARY: See Fire Weather Forecast for Details

Sunny fall day, hot and dry, light winds. Good relative humidity recovery.

FUELS:

Fuels in the fire area consist of Timber Litter (TL5) and Timber Understory (TU5) and lichen in the canopy. The Willamette National Forest and area has received approximately one inch of precipitation at the end of September. Live fuel moisture levels are good and resistant to contributing to fire spread. ERC's are well below the 90th percentile.

OUTPUTS

FIRE BEHAVIOR GENERAL:

Gravity and steep terrain creates potential for rolling material, fuel moisture content is high and do not create a receptive fuel. Primary fire activity will be smoldering in duff, stumpholes and under dense canopy cover.

- Grass – FM 2 (Timber grass / understory)
 - Rate of Spread – 12 to 17 feet per minute possible with flame lengths up to 5 foot.
- Brush – FM 5 (Shrub fuel type)
 - Rate of Spread – 8 to 11 feet per minute possible with flame lengths up to 4 feet.
- Timber – TU5 & TL5 (Timber Understory, Timber Litter)
 - Rate of Spread – 3 to 6 feet per minute possible with flame lengths up to 6 feet.

PIG S/U 45/75% Spotting Distance .1 miles Torching Not Likely Uphill Crown Not Likely
 Fire behavior predictions are for the hottest and driest period of the day, gusts could increase fire behavior rates.

FIRE BEHAVIOR SPECIFIC:

Petes Lake & Lookout Fire: Heavy fuels moistures have increased and likely to remain high, drying will make fine fuel, needle cast available. Expect to see smoldering of stumpholes, duff and heavy fuels. Some growth could occur, shorter daylight should limit burn period and keep to minimal growth.

Bedrock, Pothole and Horse Creek Fire: Fine fuels are dry enough to carry fire spread on surface in needle cast, possible creeping. Large logs and stumpholes continue to consume with smoldering is likely.

IA: Sun and exposed areas will make fine fuels available and increase rates of spread, fireline intensity could be at a level that could make direct attack challenging. Monitor your flame lengths and initiate engagement with a solid anchor point.

AIR OPERATIONS:

Early fog may limit some areas but clear sky throughout the day should be good flying day.

SAFETY

Weather becoming hotter and drier. "Watch Out Situation 14". Fire activity could start earlier and end later, monitor for increased activity. Patchy burn may not create solid black near fireline, monitor re-burn potential in your area.

Resource Advisor Message - Lookout and Bedrock Fires

Tom Demeo, Lead READ, 503 267 3943, Thomas.Demeo@usda.gov; James Rudisill, Danger Tree Lead READ, 541-505-4773 Thomas.Rudisill@usda.gov

With rain coming take a look at the pumps and any fuel storage. Please ensure containment trays are empty, with fresh pads. Use visqueen, p-cord to make a tent over the pump and fuel where possible. Driving around please look for plugged culvert and ditches, and make sure water can flow even if you can't do a full repair.

Engineering and Roads

- Do not track heavy equipment on paved roads without the proper mitigations (ie. street grousers, rubber mats, etc.).
- If any road issues or concerns are encountered, please contact a REAF.

Dozer Lines

- Please work with Resource Advisors to clear proposed dozer lines.
- Please minimize the depth of the dozer line to the least extent required to meet objectives. Deep cuts are expensive, time consuming, and difficult to repair.

Heritage & Cultural

All cultural resources and human remains are protected by law. **Leave them in place- no collecting.** Call Resource Advisor if cultural resource like arrowheads, flakes/chips, or historic artifacts like cans & bottles are found and they will investigate.

Noxious Weeds

WEED WASH STATION:

- The Weed Wash stations are operational and located at Lookout Staging (Rock Quarry) and Lookout ICP
- Please use the weed wash upon arrival at the incident, and during demob
- Avoid the following weed: Slender False Brome and Spotted Knapweed

REDUCE THE SPREAD: Brush off packs & boots (especially laces) before leaving fire camp.

Tree Felling Operations

Please keep equipment on road surface to the greatest extent possible

Log Processing:

- Utilize existing openings and landings for decking, ditch lines/roadside is acceptable
- Process trees down to a 6" top (small end diameter). Use remaining for firewood logs, rehab, or chip
- Preferred Log Lengths (maximize length whenever possible): 41 foot Max – 17 foot Min
- 2' increments below 41', keeping logs as long as possible (41', 39', 37', etc....) Process unburnt trees on the unburnt side of the fireline. Process burnt trees on the burnt side of the fireline.
- Keep processed slash and tops out of decks and off roads
- If possible, sort decks by species and log lengths

Snags and Hazard Trees:

Old growth is a key value. Limit snagging to operational needs & limit bucking to retain long bowls of large felled trees or snags.

Water Quality and Fisheries

AERIAL DIPPING:

- Aerial dipping should only occur at approved dip sites. Blue River Res. has a use restriction to facilitate dipping. Check with your REAF for approval of dipping sites.
- Be sure to wash buckets when new aerial resources arrive at the fire, when switching dips sites, or when returning to the fire from off forest.

WATER DRAFTING:

- Limited Drafting is available at the bridge across Lookout Creek on the 1506 road in section 28. Check with the REAF for additional drafting locations as needed.
- Utilize fish screens when in fish bearing waterbodies (REAFs have these available).
- Maintain sufficient flow as to not dewater downstream reaches
- Utilize splash pans and absorbent pads. REAFs will assist if given the location.

CHIPPING STANDARDS:

- Provide a 30- foot buffer of no chipping at water crossings or culverts.
- Do not place chips into road ditch.
- Do not chip onto a steep slope where chips will slide back into the ditch.
- Broadcast chipped material, ensuring that chips are no more than 4" deep.

SAFETY MESSAGE

"ALL SHIFTS"

October 7, 2023

Ask yourself were you successful yesterday?

Is the answer Yes?

Are you guaranteed success today?

The answer is No.

You must earn your success in safety each day.

What do you do when it is an unsuccessful day and someone gets hurt?

Fill out the Medical Incident Report and call it in to ICP on the Command channel.

Make sure your Supervisor has knowledge of your incident.

Administer aid as needed

Act according to your level of training.

Remember you are the incident commander of the incident within the incident until you are relieved.

Be Alert, Keep Calm, Think Clearly, Act Decisively

Safety Officers: Van Woert, McBride, Wesemann, Krech

IAP Component Deliberate Risk Assessment Hazard Summary October 7, 2023	
Hazard	Mitigation
Driving/road conditions	<ul style="list-style-type: none"> • Reduce windshield time (2:1 work ratio) • Signing of all incident roads that provide access to divisions • Daily updated travel plan maps • Practice defensive driving. In local communities obey the posted speed limits
Overhead hazards Aviation Powerlines	<ul style="list-style-type: none"> • Select tactics that minimize firefighter exposure • Review IRPG pgs. 61-79, when working near air operations • Identify hazardous trees and snags, fell as appropriate • Review IRPG pgs. 22-23, when working near powerlines
Personal Health/Wellness	<ul style="list-style-type: none"> • Wash hands/ hand sanitizer • Remove dirty Nomex shirts prior to entering chow lines • Mask will be available if needed (camp crud, covid, flu)
Repair/ backhaul	<ul style="list-style-type: none"> • Identify and communicate hazards and manage appropriately, including hazard trees • Drive carefully on forest roads and when transiting Hwy. 126 • Know the location of the nearest medical resources • Use 4X4 or UTV's to shuttle supplies to areas where stake side and van trucks can stay on hardened roads
Public Interaction	<ul style="list-style-type: none"> • Be considerate of the public! We want to interact with the public, answer questions
Communications	<ul style="list-style-type: none"> • Human repeaters • Change batteries often
Mental Health	<ul style="list-style-type: none"> • Critical Incident Stress Management • Human Resource contacts available for all resources
Gravity Hazards	<ul style="list-style-type: none"> • Post lookouts • Situational awareness of rolling materials. (Rocks, tree's) • Situational awareness of falling green/ snag tree's
Heavy Equipment	<ul style="list-style-type: none"> • Blind zone (Operator) • Rolling material (rocks, trees, stumps) • Flying debris • Tree strikes
IA	<ul style="list-style-type: none"> • Follow protocols and communications links established with NW10 • IA resources designated in IAP, use closest forces and leadership assigned to supervise IA forces during a response • IA resources must be familiar with IA comms channel group

Go to DEMOB Desk to Finalize your Demob process.

**Questions Regarding your DEMOB Call
360-259-9120**

For an Efficient DEMOB

- Return all items to supply and communications
- Have Inspections completed
- Have Weed Wash done

Arrive to Finance at the time designated on DEMOB list

- If you don't come at your time you will have to stand in line
- When your finances are completed, go to DEMOB to finish process.

Human Resource Message

Soon, we will all leave. We will be gone. We will start forgetting some of what we said here. Later, we will start forgetting some of the things we did here.

But we will never forget how we felt here.

We want everyone to leave here safe and sound. We want the memories to be good. So keep your SOCIAL SITUATIONAL AWARENESS on high alert and watch out for each other. Stay safe.

Remember, try not to offend anyone – try harder not to be offended!

**Virtual Human Resource Specialist
Debbie Robinson --- 509-899-5010**

Training Message

ARE YOU ORDERED AS A TRAINEE?

If you are ordered as a trainee, please sign up for the incident trainee program. Please register with the incident training specialist by filling out the questionnaire from the QR code in the IAP, please email scans or pictures of your incident qualification card and front cover of your task book to adam.micone1@outlook.com.

During your time on this incident ensure you work with your trainer to complete the tasks you need evaluated if possible. Ensure your trainer evaluates your position task book tasks that you can complete, and they complete your position task book evaluation page as well as a performance evaluation (ICS-225). I have a training folder within the QR Code with both a position task book evaluation record and a performance evaluation for your trainer to use if needed. Upon completion of your assignment (***please complete a couple days early to speed up demob***), please email, scans or pictures of your position task book evaluation and performance evaluation (ICS-225) to adam.micone1@outlook.com. These will be checked for accuracy, logged in the system, and sent on to your home unit training contact through email. Adam is working remotely. Please contact me if you have any further questions, please reach out to adam.micone1@outlook.com or 509-589-1387, we look forward to serving you.

Have a great Day!

Adam Micone

NW Team 10 Incident Training Specialist (t)

MEDICAL PLAN (ICS 206 WF)

Controlled Unclassified Information//Basic

<p>FOR A NON-EMERGENCY INCIDENT, WORK THROUGH CHAIN OF COMMAND TO REPORT AND TRANSPORT INJURED PERSONNEL AS NECESSARY.</p> <p>FOR A MEDICAL EMERGENCY: IDENTIFY ON SCENE INCIDENT COMMANDER BY NAME AND POSITION AND ANNOUNCE "MEDICAL EMERGENCY" TO INITIATE RESPONSE FROM IMT COMMUNICATIONS/DISPATCH.</p>					
<p>Use the following items to communicate situation to communications/dispatch.</p>					
<p>1. CONTACT MUD LICK COMMUNICATIONS / DISPATCH (Verify correct frequency prior to starting report) <i>Ex: "Communications, Div. Alpha. Stand-by for Emergency Traffic."</i></p> <p>2. INCIDENT STATUS: Provide incident summary (including number of patients) and command structure. <i>Ex: "Communications, I have a Red priority patient, unconscious, struck by a falling tree. Requesting air ambulance to Forest Road 1 at (Lat./Long.) This will be the Trout Meadow Medical, IC is TFLD Jones. EMT Smith is providing medical care."</i></p>					
Severity of Emergency / Transport Priority	<p><input type="checkbox"/> RED / PRIORITY 1 Life or limb threatening injury or illness. Evacuation need is IMMEDIATE <i>Ex: Unconscious, difficulty breathing, bleeding severely, 2° – 3° burns more than 4 palm sizes, heat stroke, disoriented.</i></p> <p><input type="checkbox"/> YELLOW / PRIORITY 2 Serious Injury or illness. Evacuation may be DELAYED if necessary. <i>Ex: Significant trauma, unable to walk, 2° – 3° burns not more than 1-3 palm sizes.</i></p> <p><input type="checkbox"/> GREEN / PRIORITY 3 Minor Injury or illness. Non-Emergency transport <i>Ex: Sprains, strains, minor heat-related illness.</i></p>				
Nature of Injury or Illness & Mechanism of Injury			<p><i>Brief Summary of Injury or Illness (Ex: Unconscious, Struck by Falling Tree)</i></p>		
Transport Request			<p><i>Air Ambulance / Short Haul/Hoist Ground Ambulance / Other</i></p>		
Patient Location			<p><i>Descriptive Location & Lat. / Long. (WGS84)</i></p>		
Incident Name			<p><i>Geographic Name + "Medical" (Ex: Trout Meadow Medical)</i></p>		
On-Scene Incident Commander			<p><i>Name of on-scene IC of Incident within an Incident (Ex: TFLD Jones)</i></p>		
Patient Care			<p><i>Name of Care Provider (Ex: EMT Smith)</i></p>		
<p>3. INITIAL PATIENT ASSESSMENT: Complete this section for each patient as applicable (start with the most severe patient)</p>					
<p>Patient Assessment: See IRPG PAGE 106</p>					
<p>Treatment:</p>					
<p>4. TRANSPORT PLAN:</p>					
<p>Evacuation Location (if different): (Descriptive Location (drop point, intersection, etc.) or Lat. / Long.) Patient's ETA to Evacuation Location:</p>					
<p>Helispot / Extraction Site Size and Hazards:</p>					
<p>5. ADDITIONAL RESOURCES / EQUIPMENT NEEDS:</p>					
<p><i>Example: Paramedic/EMT, Crews, Immobilization Devices, AED, Oxygen, Trauma Bag, IV/Fluid(s), Splints, Rope rescue, Wheeled litter, HAZMAT, Extraction</i></p>					
<p>6. COMMUNICATIONS: Identify State Air/Ground EMS Frequencies and Hospital Contacts as applicable</p>					
Function	Channel Name/Number	Receive (RX)	Tone/NAC *	Transmit (TX)	Tone/NAC *
COMMAND					
AIR-TO-GRND					
TACTICAL					
<p>7. CONTINGENCY: Considerations: If primary options fail, what actions can be implemented in conjunction with primary evacuation method? Be thinking ahead.</p>					
<p>8. ADDITIONAL INFORMATION : Updates/Changes, etc.</p>					
<p>REMEMBER: Confirm ETAs of resources ordered. Act according to your level of training. Be Alert. Keep Calm. Think Clearly. Act Decisively.</p>
