

INFRARED INTERPRETER'S DAILY LOG

Incident Name: Pete's Lake OR-WIF-230409	IR Interpreter(s): Max Wahlberg	Local Dispatch Phone: Central Oregon Interagency Dispatch Center (541-316-7777)	Interpreted Size: 318 acres Growth last period: <1 acre
Flight Time: 2140 PDT Flight Date: 9/1/2023	Interpreter(s) location: Bend, OR Interpreter(s) Phone: 503-319-9582	GACC IR Liaison: Jim Grace GACC IR Liaison Phone: 541-771-4521	National Coordinator: Jan Johnson National Coord. Phone:
Ordered By: OR-COC	A Number: A-27	Aircraft/Scanner System: N350SM / Tk9	Pilots/Techs: Tech: W. Scott
IRIN Comments on imagery: Clean imagery, good rectification, clouds in scan, but not directly over the fire area.		Weather at time of flight: Clear	Flight Objective: Map heat
Date and Time Imagery Received by Interpreter: 09/01/2023 @ 2200 PDT		Type of media for final product: PDF Map, gdb, kmz.	
Date and Time Products Delivered to Incident: 9/1/2023 @ 2315 PDT		Digital files sent to: NIFS, NIFC FTP.	
Comments / notes on tonight's mission and this interpretation: Tonight's mapping used the previous IR as a base. Note: some clouds were present in the scan area. While they did not obscure the fire perimeter itself, portions of the scanbox directly south of the fire were obscured. Unmapped heat may exist in these areas. All products depict cloud cover showing areas where the imagery was obscured. Negligible perimeter growth was mapped, resulting in less than 1 acre in growth. The amount of heat has dissipated since the previous IR on Pete's Lake. No intense heat was mapped tonight. A few smaller pockets of scattered heat remain along the fire's western southern and eastern edges. Isolated heat sources were mapped throughout the fire area.
