Fluid Replenishment

<u>What is it?</u>	<u>What's Good, What's Bad about it?</u>
WATER	What's GOOD about it? Water refreshes, quenches thirst, cools, hydrates, and helps body systems function at optimum. What's BAD about it? Nothing but the regional taste.
COFFEE, POP,	What's GOOD about it? Flavor, refreshment, moderate fluid replacement.
TEA, JUICE, etc.	What's BAD about it? Caffeine in these products act as diuretics (meaning they make you urinate) and interfere with the body's ability to absorb carbohydrates. Carbonated drinks decrease the amount of fluids that can be consumed and depletes calcium levels.
ELECTROLYTE	What's GOOD about it? Flavor, refreshment, moderate fluid replacement.
DRINKS	What's BAD about it? When sustaining continued fluid loss, such as exercise or firefighting, reliance on electrolyte drinks will further rob the body of moisture as it seeks a chemical balance.

Everyone should drink 1 oz. water for every 2 pounds of body weight. This is an **ideal daily intake** of water, of course your water intake will increase with any physical activity. Prior to work or exercise you should pre-hydrate by drinking equal parts of water and electrolyte drink. Expect to lose 1.5 to 2 pounds of body weight during each hour of work. To keep hydrated you should be drinking water and electrolyte at a 3:1 ratio: 3 quarts of water to 1 quart of electrolyte drink. You will need to drink 16 ounces of fluid for every pound of weight lost or about 3 cups of water and 1 cup of electrolyte every hour. When you are done for the day you should continue to hydrate with the 1:1 mix until cooled down.

BE ALERT KEEP CALM THINK CLEARLY ACT DECISIVELY

Western Washington Incident Management

TYPE III HR Message

Why Is Mutual Respect Important?

A lack of respect makes working in harmony with crew members difficult, if not impossible. It often leads to negative behaviors, such as name-calling, gossip, and bullying. That's why it's important to build mutual respect into your crew operating expectations. Every workplace consists of people with different personality traits, which can lead to misunderstandings, disagreements, and conflict. But with a foundation of mutual trust and respect, the unique contributions of each team member are valued and needed. When you have disputes work to handle them respectfully.

How to Practice Mutual Respect in the Workplace

- **Celebrate the unique contributions of each crew member.** One of the best ways to make crew members feel respected is to affirm the value they bring to the crew. This can help encourage better teamwork and instill a greater sense of self-respect in your coworkers.
- **Practice active listening.** Active listening is paramount in every good relationship. It involves giving your full attention to a person who is speaking. Being a good listener is a highly valued interpersonal skill for crew leaders and overhead.
- **Find common ground with your coworkers.** You may not agree with everything your coworkers say or decide to do, but mutual respect includes finding common ground and treating others with respect. A crucial aspect of this is being able to collaborate with those who share different viewpoints, personality traits, and backgrounds.
- **Report negative behavior to human resources.** Disparaging remarks about religion, sexual orientation, ethnicity, or physical ability are not only disrespectful but could violate anti-discrimination laws. If you witness bullying or disrespectful behavior, report it to any member of the management team. By doing so, you're showing respect to the affected coworker.
