

INCIDENT ACTION PLAN

NEWELL ROAD

WA-SES-464
WA-WFS-408

Sunday

OPERATIONAL PERIOD

7/23/2023 0600
to
7/24/2023 0600

Pay Codes DNR 221-LAQ, FED - PNQEL6, MOBE - 408

INCIDENT OBJECTIVES (ICS 202)

1. Incident Name: Newell Road	2. Operational Period:	Date From: 7/23/2023	Date To: 7/24/2023
		Time From: 0600	Time To: 0600

3. Objective(s):

Management Objectives

- Provide for emergency personnel and public safety at all times.
- Protect property, improvements, and infrastructure.
- Ensure coordinated, timely and accurate release of public information.
- Foster and maintain relationships with all cooperators and stakeholders.
- Protect economic, natural, cultural and heritage resources.
- Maintain fiscal accountability and keep costs commensurate with values at risk.

Control Objectives

- Keep the fire North of Old Highway 8.
- Keep the fire South of Ward Road.
- Keep the fire East of Rock Creek Road.
- Keep the fire West of East Road.

General Situational Awareness:

Steep and rugged terrain, critically dry and receptive fuel beds, active area for fire history and drought stressed trees.

Be aware of aerial hazards when ordering and utilizing aircraft resources.

5. Site Safety Plan Required? Yes No

Fire Weather Forecast

FORECAST NO: 20230723

NAME OF FIRE: Newell Road

PREDITION FOR: Night Shift

SIGNED:

TIME/DATE ISSUED: 12:28 7/23/23

WEATHER DISCUSSION:

Weather pattern will remain dry and windy for the area over the next several days, with windy conditions expected to peak on Monday. RH recoveries will improve in the coming days as the frontal system driving the winds on Monday brings cooler air in behind it. Wind direction will primarily be out of the west. Red Flag conditions, however, are possible Monday even as RHs trend upward.

WEATHER FORECAST FOR TODAY:

Max temperature.....88-93.
Min humidity.....13-18 percent.
Wind (20 ft).....West winds 6 to 12 mph early, increasing to 15 to 20 mph by the afternoon. Gusts could approach 30 mph at times.
Ridgetop wind.....Southwest winds around 10 mph early, shifting West at around 20 mph by the afternoon.
Mixing height.....5300-5700 ft AGL by the afternoon.
Transport winds.....West around 15 mph.
Haines Index.....4 or low potential for large plume dominated fire growth.

WEATHER FORECAST FOR TONIGHT:

Min temperature.....57-62.
Max humidity.....60-65 percent.
Wind (20 ft).....West winds 12 to 18 mph.
Ridgetop wind.....West winds 20 to 25 mph.
Mixing height.....4300-4700 ft AGL early in the evening, becoming near-surface overnight.
Transport winds.....West around 15 mph.
Haines Index.....4 or low potential for large plume dominated fire growth.

OUTLOOK FOR TOMMOROW:

Max temperature.....82-87.
Min humidity.....25-30 percent.
Wind (20 ft).....West winds 20 to 25 mph. Gusts could approach 35 mph at times.
Ridgetop wind.....West winds around 30 mph.
Mixing height.....4500-5000 ft AGL by the afternoon.
Transport winds.....West around 25 mph.
Haines Index.....5 or moderate potential for large plume dominated fire growth.

EXTENDED FORECAST:

TUESDAY...A chance of showers. Partly cloudy. Lows 51 to 56. Highs 77 to 84. West winds 7 to 13 mph.

WEDNESDAY...Clear. Lows 48 to 53. Highs 78 to 85. West winds 5 to 11 mph.

THURSDAY...Clear. Lows 48 to 53. Highs 79 to 86. West winds 5 to 11 mph.

FRIDAY...Clear. Lows 48 to 53. Highs 80 to 87. West winds 5 to 11 mph.

SAFETY MESSAGE

Incident: Newell Road

Date: July 23, 2023

➤ Major Hazards and Risks:

*Rattlesnakes Roads Steep Ground Bees Powerlines...Wind Tower....Grass
Pipeline..... Dehydration Traffic/public Dry Conditions/Fast Rate of Spread
Accountability/Communication Wildland Urban Interface*

Fire Order of the Day – Initiate all actions based on current weather and expected fire behavior

L.C.E.S: Must be in place before you engage, and it is a continuous process. (Risk Mgmt.)

Safety is everyone’s responsibility. All suppression plans and actions must reflect this commitment. Individuals must personally be committed and responsible for their own safety, performance, and accountability.

Steep Terrain: Steep and rocky terrain make foot travel hazardous. Pick your routes and take it slow.

Urban Interface: Expect the unexpected. Use IRPG pg 11.

Power lines: Be aware of hazards associated with working around power lines. Treat them as energized until you know they are not. IRPG pg 22.

Common Denominators of Fire Behavior on Tragedy Fires:

- Most incidents happen on the smaller fires or on isolated portions of larger fires.
- Most fires are innocent in appearance before unexpected shifts in wind direction and/or speed results in “flare-ups” or “extreme fire behavior.” In some cases tragedies occur in the mop-up stages.
- Flare-ups generally occur in deceptively light fuels, such as grass and light brush.
- Fires run uphill surprisingly fast in chimneys, gullies, and on steep slopes.
- Some suppression tools, such as helicopters or air tankers, can adversely affect fire behavior. The blasts of air from low flying helicopters and air tankers have been known to cause flare-ups.

Watch Out Situation of the Day

15. WIND INCREASES AND/OR CHANGES DIRECTION

“Safe Driving Habits”

(a ‘Get Out of Jail Free’ card to health and long life)

- Yield a full lane to oncoming vehicles
- Be prepared to stop in less than half the distance you can see on blind corners and the ridge crests
- Keep your speed down!
Do not force loaded vehicles onto the fill slope

Thanks for the good work everyone is doing, keep up your safety awareness, remain alert and do not let your guard down.

Paul Cal SFR

ASSIGNMENT LIST (ICS 204 WF)

SE WA TYPE 3 Expectations

Work:Rest

- ❖ Work rest requirements apply to all incident resources.
- ❖ For every two hours of work (on shift) there must be one hour of rest (off shift).
- ❖ CTRs or Shift tickets which show work shifts greater than 16 hours must document:
 - The reason for the shift length
 - The plan for meeting 2:1 in the immediate future
 - Obtain the signature of the Incident Commander before turning ticket into Finance

Code of Conduct Incident Personnel

Each individual on this incident is responsible for:

- ☞ Being *ready and able* to perform their assigned duties effectively.
- ☞ Conducting themselves in a manner that treats people with dignity, equality, courtesy, and respect.
- ☞ Abiding by agency ethics and conduct regulations.
- ☞ Reporting any harassment or other inappropriate behavior.

Each individual of this incident has the right to:

- ☞ Work in an environment characterized by safe work practices.
- ☞ Work in a fair and harassment free environment.
- ☞ Say "No" to unwelcome advances or requests for favors.
- ☞ File complaints or grievances through appropriate avenues.

There is zero tolerance for inappropriate behavior while assigned to the incident, including:

- ☞ Illegal drug use
- ☞ Alcohol use
- ☞ Unsafe work practices and activities
- ☞ Discrimination
- ☞ Sexual harassment
- ☞ Fighting, threatening, and abusive behaviors
- ☞ Using social media and electronic communication devices for personal business while engaged in fire assignment duties.
- ☞ Other violations of Fire Service, Washington DNR, and Federal agency standards of conduct.

Failure to adhere to the Code of Conduct could result in dismissal from the incident, with notification to your home unit.

The public expects our best efforts; they see us as professionals in what we say and do. Let's continue to show them we are!

HELICOPTER EXTRACTION OPERATIONS

The intent of helicopter insertion/extraction operations is to facilitate the movement of personnel to and from inaccessible areas. These operations are not meant to be a medical transport resource; life flight and ground transportation should always be ordered in addition to the extraction aircraft and crew.

ORDERING:

- On-scene EMT and/or Incident within Incident IC determines that an extraction helicopter is needed and places the order through the pre-established procedures:
 - Division Supervisor
 - Incident Communications
 - Dispatch Center
- When ordering extraction aircraft provide the following information:
 - Location (Lat/Long) of patient
 - Known Hazards
 - Wind Speed and Direction
 - Terrain
 - Incident Updates

SITE SELECTION:

- The helicopter crew will confirm the extraction location when they arrive on scene. However, a general rule is any clearing that is 10'x10' with visible sight lines to the sky is a suitable extraction site.
- If the terrain is steep, excavating a platform or shelf can make it easier for patient packaging.

QR Code-Short-haul Site Selection Video

CONSIDERATIONS:

- Short-haul and hoist are safe and efficient operations for extracting injured personnel of any severity including "Green" patients.
- Ensure area is clear of non-essential items, hazards, and personnel.
- Rotor wash may affect overhead hazards and blowing dust/debris can create brown out conditions or influence fire behavior.
- Aerial Supervision is valuable for coordinating aviation medevac/extraction missions and should be ordered if available and not currently present.
- The aircrew will make the final assessment of the mission. Always have a contingency plan in case a helicopter cannot complete the request.

DEFINITIONS:

Rescue Hoist: A cable winching device mounted to the helicopter that can lower/raise persons attached to a cable.

- Common cable lengths are 250-300 feet.

Short-haul: To insert or extract one or more persons suspended on a fixed line beneath a helicopter.

- Common short-haul line lengths are 100, 150, and 250 feet. The lines can also be connected for a longer line if the situation requires it.

Emergency Plan

Incident Within an Incident

On Scene Incident Commander

In the event of an accident or medical incident of any size, your primary responsibility is to ensure that the victim(s) receive prompt and effective Triage, Treatment, Extirpation, and Transport.

- **Ensure the medical incident report in the incident action plan is being used and followed- *If the patient is determined to be green, do not declare emergency traffic and only complete lines 1 – 4 on the MIR*.**
- Conduct a size-up of the incident, nature of the accident, number and type of resources involved, and a latitude and longitude location (DD°MMM.MM format): notify the communications center and your supervisor, and request assistance as needed.
- Order and coordinate medical and support responses to the incident.
- Evaluate special needs (law enforcement, hazmat, etc.).
- Clear the command frequency if a medical emergency, coordinate with incident communications and air attack for any medical transportation needs.
- Preserve and photograph the scene for the accident investigation.
- Remain aware of the surroundings and the status of the main incident (delegate personnel to monitor the main fire) to ensure the safety of medical treatment personnel.
- Until relieved, supervise and manage all personnel involved at the incident scene.

MEDICAL PLAN (ICS 206 WF)

Controlled Unclassified Information//Basic

Medical Incident Report

FOR A NON-EMERGENCY INCIDENT, WORK THROUGH CHAIN OF COMMAND TO REPORT AND TRANSPORT INJURED PERSONNEL AS NECESSARY.

FOR A MEDICAL EMERGENCY: IDENTIFY ON-SCENE INCIDENT COMMANDER BY NAME AND POSITION AND ANNOUNCE "MEDICAL EMERGENCY" TO INITIATE RESPONSE FROM IMT COMMUNICATIONS/DISPATCH.

Use the following items to communicate situation to communications/dispatch.

1. CONTACT COMMUNICATIONS / DISPATCH (Verify correct frequency prior to starting report)

Ex: "Communications, Div. Alpha. Stand-by for Emergency Traffic."

2. INCIDENT STATUS: Provide incident summary (including number of patients) and command structure.

Ex: "Communications, I have a Red priority patient, unconscious, struck by a falling tree. Requesting air ambulance to Forest Road 1 at (Lat./Long.) This will be the Trout Meadow Medical, IC is TFLD Jones. EMT Smith is providing medical care."

Severity of Emergency / Transport Priority	<input type="checkbox"/> RED / PRIORITY 1 Life or limb threatening injury or illness. Evacuation need is IMMEDIATE <i>Ex: Unconscious, difficulty breathing, bleeding severely, 2° – 3° burns more than 4 palm sizes, heat stroke, disoriented.</i> <input type="checkbox"/> YELLOW / PRIORITY 2 Serious Injury or illness. Evacuation may be DELAYED if necessary. <i>Ex: Significant trauma, unable to walk, 2° – 3° burns not more than 1-3 palm sizes.</i> <input type="checkbox"/> GREEN / PRIORITY 3 Minor Injury or illness. Non-Emergency transport <i>Ex: Sprains, strains, minor heat-related illness.</i>	
Nature of Injury or Illness & Mechanism of Injury		<i>Brief Summary of Injury or Illness (Ex: Unconscious, Struck by Falling Tree)</i>
Evacuation Request		<i>Air Ambulance / Short Haul/Hoist Ground Ambulance / Other</i>
Patient Location		<i>Descriptive Location & Lat. / Long. (WGS84)</i>
Incident Name		<i>Geographic Name + Medical (Ex: Trout Meadow Medical)</i>
On-Scene Incident Commander		<i>Name of on-scene IC of Incident within an Incident (Ex: TFLD Jones)</i>
Patient Care		<i>Name of Care Provider (Ex: EMT Smith)</i>

3. INITIAL PATIENT ASSESSMENT: Complete this section for each patient as applicable (start with the most severe patient)

Patient Assessment: See IRPG PAGE 106

Treatment:

4. EVACUATION PLAN:

Evacuation Location (if different): (Descriptive Location (drop point, intersection, etc.) or Lat. / Long.) Patient's ETA to Evacuation Location:

Helispot / Extraction Site Size and Hazards:

5. ADDITIONAL RESOURCES / EQUIPMENT NEEDS:

Example: Paramedic/EMT, crews, immobilization devices, AED, oxygen, trauma bag, IV/fluid(s), splints, rope rescue, wheeled litter, HAZMAT, extrication

6. COMMUNICATIONS: Identify State Air/Ground EMS Frequencies and Hospital Contacts as applicable

Function	Channel Name/Number	Receive (RX)	Tone/NAC *	Transmit (TX)	Tone/NAC *
COMMAND					
AIR-TO-GRND					
TACTICAL					

7. CONTINGENCY: Considerations: If primary options fail, what actions can be implemented in conjunction with primary evacuation method? Be thinking ahead..

8. ADDITIONAL INFORMATION: Updates/Changes, etc.

REMEMBER: Confirm ETAs of resources ordered. Act according to your level of training. Be Alert. Keep Calm. Think Clearly. Act Decisively.
