# FIRE BEHAVIOR FORECAST

FORECAST NUMBER: 01	TYPE OF FIRE: Wildfire
FIRE NAME: Newell Road	OPERATIONAL PERIOD: Day/Night 07/24/23; 0600-0600
DATE ISSUED: 07/23/2023	TIME ISSUED: 2000

## INPUTS

### WEATHER SUMMARY

Red Flag Warning in effect for Gusty winds and Low RH, 1100 to 2300 on Monday, July 24.

Maximum temp: 78-82 for day shift; Minimum temp: 53-59 for night shift.

Relative humidity (min): 22-27% for day shift; RH (max) 73-88% for night shift.

Winds: west 22-32 mph, gusts to 40 mph for day shift; west 27-32, gusts to 40 decreasing to 12-20 overnight.

## OUTPUTS

### FIRE BEHAVIOR

**GENERAL:** the primary feature driving the fire is the Columbia River and its interaction with the topography within and adjacent to the fire. Gusty westerly winds are common in the foothills and accelerate when combined with the daily diurnal flow to higher terrain to the north and deep north-south oriented drainages. Fine fuels dominate the fire area and are quick to respond to changes in relative humidity and wind.

### FIRE BEHAVIOR BY FUEL MODE

Fuel Type	Day (22-40 mph winds)		Night (after Midnight)	
	Flame Length	Rate of Spread	Flame Length	Rate of Spread
Short Grass (GR1)	2-3 feet	20-30 ch/hr	1-3 feet	7 ch/hr
Grass-Shrub (GS1)	6-8 feet	65-85 ch/hr	2-3 feet	to 20 ch/hr
Grass-Shrub (GS2)	9 feet	to 140 ch/hr	3-4 feet	30 ch/hr

Haines: 3 day; 2 increasing to 4 at night.

Probability of Ignition: 80% day, 15% night.

Expected Fine Dead Fuel Moisture: 3-4% day, 12-16% night (*moisture of extinction in grass is 15% FDFM*)

### SPECIFIC:

#### DAY

**All divisions:** Cold frontal passage with low RH will increase potential fire behavior today. Expect any ignition source to have rapid rates of spread through the flashy fuels, where continuous, peaking during the frontal passage around 1400. Watch the channeling effect of wind and drainage alignment, particularly on the west flank of the fire in the Rock Creek Drainage and along Harrison Ridge.

#### EVENING

Transition from high to moderate/low fire behavior as humidity rises and winds begin to reduce in strength late in the evening. Expect good humidity recovery above 1800 feet, moderate recovery at lower elevations.

**AIR OPERATIONS:** Gusty winds may limit aerial operations of lighter aircraft in the early afternoon.

## SAFETY

### Common Denominator #1 of Fire Behavior on Tragedy Fires:

Tragedy fires often occur on relatively small fires or on deceptively quiet areas of large fires.

# HEALTH AND SAFETY MESSAGE

Newell Road Fire

Monday, 7/24/2023

<b>Major Hazards and Risks</b>	
Immediately delay, modify, or abandon suppression activities if strategies and tactics cannot be implemented safely. Identify and document medevac/Helispot sites prior to engaging.	
Driving	Use extreme caution traveling paved and dirt roads. Drive patiently, defensively, and SLOWLY on winding roads with blind corners. Watch out for public traffic who may not be aware of additional traffic along the roads. Roads may have hazards not seen and may not be passable with larger vehicles, so scout out ahead by foot before passing, backing up, or turning around. Make sure your egress is identified and keep in mind your turn around locations.
Steep and Rough Terrain	Watch out for rolling rocks, unstable logs and stump holes. Pace yourself, watch your footing and be aware of personnel down slope. Thick brush makes traveling by foot very difficult and slow. Plan ahead.
Fire Behavior	The potential for high winds could result in active fire behavior, this could result in frequent spot fires outside the containment lines. Keep your SA up at all times.

### Transfer of Command

There is a high potential for fatalities, serious injuries, or incidents during transfer of command periods (some have occurred in the past). Be proactive in mitigating the risks by proper implementation of LCES—Lookout, Communications, Escape Routes, and Safety Zones.

Factors for increased risks to fireline personnel during transition periods include:

- No, or poor, briefing of incoming personnel
- Lack of fire weather and behavior information, both forecast and observed
- Communications: face-to-face briefings may not be possible and radio frequencies may be overextended and/or changing due to the increased demands on the system.
- Initial attack resources may not have checked-in, and the Incident Commander may not be aware of the number, type and location of all resources.
- Location of safety zones and escape routes may not be known and communicated to all resources.
- Not all Resources know who is in command.

Mitigation actions to take:

- Lookouts: Post and maintain your own lookouts.
- Communications: Maintain existing communications with your own and adjacent resources, as well as your original supervisor while you are developing communications with incoming adjacent resources and your new supervisor.
- Escape routes and safety zones: Identify escape routes and assure incoming resources are aware of their locations; be aware that your original escape routes and safety zones may no longer be accessible due to changing fire behavior or your increased distance from them.  
Utilize the Incident Response Pocket Guide transition checklist.

## Medical Incident Report

FOR A NON-EMERGENCY INCIDENT, WORK THROUGH CHAIN OF COMMAND TO REPORT AND TRANSPORT INJURED PERSONNEL AS NECESSARY.

FOR A MEDICAL EMERGENCY: IDENTIFY ON SCENE INCIDENT COMMANDER BY NAME AND POSITION AND ANNOUNCE "MEDICAL EMERGENCY" TO INITIATE RESPONSE FROM IMT COMMUNICATIONS/DISPATCH.

Use the following items to communicate situation to communications/dispatch.

1. **CONTACT COMMUNICATIONS / DISPATCH** (Verify correct frequency prior to starting report)  
*Ex: "Communications, Div. Alpha. Stand-by for Emergency Traffic."*
2. **INCIDENT STATUS:** Provide incident summary (including number of patients) and command structure.  
*Ex: "Communications, I have a Red priority patient, unconscious, struck by a falling tree. Requesting air ambulance to Forest Road 1 at (Lat./Long.) This will be the Trout Meadow Medical, IC is TFLD Jones. EMT Smith is providing medical care."*

Severity of Emergency / Transport Priority	<input type="checkbox"/> <b>RED / PRIORITY 1</b> Life or limb threatening injury or illness. Evacuation need is <b>IMMEDIATE</b> <i>Ex: Unconscious, difficulty breathing, bleeding severely, 2<sup>o</sup> - 3<sup>o</sup> burns more than 4 palm sizes, heat stroke, disoriented.</i> <input type="checkbox"/> <b>YELLOW / PRIORITY 2</b> Serious Injury or illness. Evacuation may be <b>DELAYED</b> if necessary. <i>Ex: Significant trauma, unable to walk, 2<sup>o</sup> - 3<sup>o</sup> burns not more than 1-3 palm sizes.</i> <input type="checkbox"/> <b>GREEN / PRIORITY 3</b> Minor Injury or illness. Non-Emergency transport <i>Ex: Sprains, strains, minor heat-related illness.</i>	
Nature of Injury or Illness & Mechanism of Injury		Brief Summary of Injury or Illness <i>(Ex: Unconscious, Struck by Falling Tree)</i>
Transport Request		Air Ambulance / Short Haul/Hoist Ground Ambulance / Other
Patient Location		Descriptive Location & Lat. / Long. (WGS84)
Incident Name		Geographic Name + "Medical" <i>(Ex: Trout Meadow Medical)</i>
On-Scene Incident Commander		Name of on-scene IC of Incident within an Incident <i>(Ex: TFLD Jones)</i>
Patient Care		Name of Care Provider <i>(Ex: EMT Smith)</i>

**3. INITIAL PATIENT ASSESSMENT:** Complete this section for each patient as applicable (start with the most severe patient)

Patient Assessment: See IRPG page 106

Treatment:

**4. TRANSPORT PLAN:**

Evacuation Location (if different): (Descriptive Location (drop point, intersection, etc.) or Lat. / Long.) Patient's ETA to Evacuation Location:

Helispot / Extraction Site Size and Hazards:

**5. ADDITIONAL RESOURCES / EQUIPMENT NEEDS:**

*Example: Paramedic/EMT, Crews, Immobilization Devices, AED, Oxygen, Trauma Bag, IV/Fluid(s), Splints, Rope rescue, Wheeled litter, HAZMAT, Extraction*

**6. COMMUNICATIONS: Identify State Air/Ground EMS Frequencies and Hospital Contacts as applicable**

Function	Channel Name/Number	Receive (RX)	Tone/NAC *	Transmit (TX)	Tone/NAC *
COMMAND					
AIR-TO-GRND					
TACTICAL					

**7. CONTINGENCY: Considerations:** If primary options fail, what actions can be implemented in conjunction with primary evacuation method? Be thinking ahead.

**8. ADDITIONAL INFORMATION:** Updates/Changes, etc.

**REMEMBER:** Confirm ETA's of resources ordered. Act according to your level of training. Be Alert. Keep Calm. Think Clearly. Act Decisively.
