INCIDENT OBJECTIVES (ICS 202)

1. Incident Name:		2. Operational Period: DAYS	
NEWELL ROAD		Date/Time From: 07/28/2023 0600 FRI	Date/Time To: 07/28/2023 1800 FRI
3. Objective(s):			
Management Objectives for Newell Road			
<ul style="list-style-type: none"> • Provide for firefighter and public safety using ongoing risk analysis and reasonable mitigation of identified hazards. • Minimize impacts to communities, infrastructure, and economic resources. Minimize acres burned on all lands throughout Klickitat County. • Maintain and enhance relationships with cooperators, stake holders, landowners, and communities. • Provide accurate and timely information to the public. • Protect Tribal, cultural, aquatic and wildlife resources by coordinating with Resource Advisors. • Treat each other with dignity and respect and act in a professional manner on the fire and in the community. • Manage cost commensurate with values at risk and update Agency Administrators daily. 			
Control Objectives			
<ul style="list-style-type: none"> • Keep fire North of Old Highway 8 • Keep fire East of Rock Creek Road • Keep fire to the South of Bickleton Highway and the town of Bickleton • Keep fire West of East Road 			
4. Operational Period Command Emphasis:			
General Situational Awareness:			
5. Site Safety Plan Required? Yes <input type="checkbox"/> No <input checked="" type="checkbox"/>			
Approved Site Safety Plan(s) Located

Spot Forecast for NEWELL ROAD...PNWIMT 8
National Weather Service Pendleton OR
428 PM PDT Thu Jul 27 2023

Forecast is based on forecast start time of 0400 PDT on July 28.
Thunderstorms imply gusty and erratic winds
Winds are 20 foot 10-minute averages
CWR-Chance of wetting rain 0.10 or greater

.DISCUSSION...A trough offshore will bring an increasingly southwest flow over the area with warmer and continued dry conditions Friday. Winds will continue to be breezy in the afternoons though Saturday and Sunday will be stronger than today or Friday. Temperatures will be a few degrees cooler Saturday and Sunday before warming up next week.

.FRIDAY...

Sky/weather.....Sunny (0-10 percent).
CWR.....0 percent.
LAL.....1.
Max temperature.....86-91.
Min humidity.....12-17 percent.
Wind (20 ft).....West winds 5 to 10 mph increasing to 12 to 21 mph in the afternoon.
Ridgetop wind.....West winds 6 to 12 mph increasing to 10 to 18 mph in the afternoon.
Transport winds.....West winds 10 to 17 mph becoming southwest in the afternoon.
Haines Index.....3 or very low potential for large plume dominated fire growth.

.FRIDAY NIGHT...

Sky/weather.....Clear (0-10 percent).
CWR.....0 percent.
LAL.....1.
Min temperature.....56-61 above 1000 feet and 62-67 below
1000 feet.
Max humidity.....52-58 above 1000 feet and 46-51 below
1000 feet.
Wind (20 ft).....West winds 10 to 18 mph.
Ridgetop wind.....West winds 12 to 21 mph.
Transport winds.....West winds 14 to 22 mph.
Haines Index.....3 or very low potential for large plume dominated fire growth.

.SATURDAY...

Sky/weather.....Sunny (0-10 percent).
CWR.....0 percent.
LAL.....1.
Max temperature.....85-91.
Min humidity.....15-20 percent.
Wind (20 ft).....Breezy. West winds 12 to 19 mph increasing to 17 to 26 mph in the
afternoon.
Ridgetop wind.....West winds 14 to 22 mph increasing to 20 to 30 mph in the afternoon.
Transport winds.....West 13 to 20 mph increasing to around 26 mph late in the afternoon.
Haines Index.....3 to 4 or very low to low potential for large plume dominated fire
growth.

FIRE BEHAVIOR FORECAST

FORECAST NUMBER: 05	TYPE OF FIRE: Wildfire
FIRE NAME: Newell Road	OPERATIONAL PERIOD: 07/28/23 0600-1800
DATE ISSUED: 07/27/2023	TIME ISSUED: 2000
UNIT: Multi Agency.	SIGNED: <u>Jim Hampton</u> Jim Hampton FBAN

INPUTS

WEATHER SUMMARY

Maximum temp: 91
Relative humidity (min): 12-17%
Winds (20'): West 5-10 increasing to 12-21 in the afternoon.

OUTPUTS

FIRE BEHAVIOR

GENERAL: the primary feature driving the fire is the Columbia River and its interaction with the topography within and adjacent to the fire. Gusty westerly winds are common in the foothills and accelerate when combined with the daily diurnal flow to higher terrain to the north and deep north-south oriented drainages. Fine fuels dominate the fire area and are quick to respond to changes in relative humidity and wind. Patchy oak savannah is also present within the fire perimeter.

FIRE BEHAVIOR BY FUEL MODEL

Fuel Type	Head Spread Rate	Flame Length	Spotting Distance
Short, Sparse Dry Climate Grass (GR1)	25 ch/hr.	3 feet	.1
Low Load, Dry Climate Grass-Shrub (GS1)	40 ch/hr.	6 feet	.2
Moderate Load, Dry Climate Grass-Shrub (GS2)	70 ch/hr.	9 feet	.4

Haines: 3 LAL: 1 POI: 95% FDFM: 2% CWR: 0 Spotting Distance:

Today's Fire Behavior

Find Dead Fuel Moistures will be in the 2-3% range. Spot fires or new starts will be very resistant to control. Mechanized and/or aerial resources are likely to be needed for direct attack where decadent brush is present with grass or ungrazed coarse grass exists and is exposed to 20' winds. Watch the channeling effect of wind and drainage alignment! Several past large fires have been the result of drainage and diurnal/wind alignment.

Specific

All Divisions:

Conditions are favorable for holding and securing line. The problem areas are going to remain the drainages with oak and pine. Large woody debris, snags and stumps.

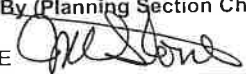

AIR OPERATIONS: Gusty afternoon winds may impact light aircraft.

SAFETY

Common Denominator #1 of Fire Behavior on Tragedy Fires:

Tragedy fires often occur on relatively small fires or on deceptively quiet areas of large fires.

INCIDENT: Newell Road

DATE: 7/28/23

YOUR DAILY SAFETY MESSAGE:

DRIVING

- Obey Speed Limits, Drive cautiously, Watch out for livestock and Wildlife.
- Be alert for other traffic and roadway hazards.
- Slow down, keep right, and expect someone around every blind corner.
- If you are driving, that should be the only thing you're doing.

COMPLACENCY

- Complacency - One of the standard fire orders stresses the importance of staying alert. Complacency and staying alert are not compatible. The hazards haven't gone away so we need to stay focused on them. It only takes a second of complacency for an accident to occur.

EQUIPMENT OPERATIONS

Heavy equipment provides suppression and support capability for fire operations. When working on or around equipment on the fireline, it is important to respect the following guidelines:

- When working with heavy equipment stay at least 100 feet in front or 50 feet behind the equipment. In timber that distances should be increased up to 2 ½ times the canopy height.
- Operators are required to carry the proper PPE, including a fire shelter. Hardhat will be worn while outside of the equipment.
- Never approach the equipment until you have made eye contact with the operator and all implements have been lowered to the ground and equipment is idled down.
- Avoid working downhill from equipment where rolling material will impact safety.
- Equipment operators have difficulty seeing ground personnel; take responsibility for your safety and all those around you.

Your NW Team 8 Safety Group

LOGISTICS

Line/Supply Orders Process:

All line orders will be submitted by DIV or Branch through Communications or sent directly to supply at 2023.NewellRoad.Ordering@Firenet.Gov
-Any water handling supply requests will have an extended lag time. Plan accordingly.

Ground Support:

Mechanic Needs: Place request through Communications with Exact Location, POC info, E#/C#/O#, Vehicle Make model and estimated issue. The more info for help the better.
NERV Damaged Tires: Bring to Ground Sport at either camp and give all info requested in mechanic needs line. AOV will require WEX/Credit Cards and all info.
Fuel: Fuel tender is stationary at Bickleton

Bickleton

Medical Room: 0530-0900
Showers: 0500-1100
Fuel Tender: 0530-0830
Mechanic: 0530-0830
Breakfast 0600-0900
Lunches/water/ice at Refer 0530-0900

Goldendale ICP

Showers: 0500-1200, 1400-2200 (Closed for cleaning 1200-1400)
Handwash: 0530-2200
Ground Support: 0600 - 2200
Breakfast 0600-0830 **Dinner** 1800-2100
Lunches/water/ice at Refer 0600-2100

All resources return to Goldendale ICP/Base at end of shift

Team Ordering/Timeline Process:

1100 - Last call to change spike camp resource hot food location.
 1600 - *DIVS* to have next day's resource order ready for Planning OPS.

- All crew level orders will be placed through *DIVS* or Branch.
- *DIVS* or Branch will place all orders through Supply -
- All orders will be tracked using the process found on the front of this form.

GPS Datum: NAD 83- Degrees, Decimal, Minutes (DDMM.MM)

Definitions

FOB-Forward Operating Base is a secure forward position established to strategize, design and discuss tactics, and for personnel to transfer information and meet.

Line Spike Camp-Managed by Operations at the *DIVS* level; mobile, short duration and self- sufficient.

Spike Camp-Supported by Logistics, listed in the IAP, numbers in camp are set by 1100, named by Plans.

Emergency Medevac- Life threatening situation requiring immediate medical attention. Handled as per IAP med plan and team SOP's.
 Communications to clear command channel radio traffic.

Medical Transport-Transport of less serious injury/illness managed by Operations or line Medics back to camp for evaluation and/or treatment.

Human Resource Message

Newell Road Fire July 28, 2023

Helping Your Coworker Complain Less

Some people complain without acting primarily to feel heard, which delivers relief. This requires listeners. Unfortunately, you're a captive audience at work, so not listening may be a tough assignment.

Offering a solution is the instinctive response, but it seldom works because it misses the mark—the other person needs to feel heard. The solution? Offer a genuine heart-felt, empathetic response. Also, do that each time a complaint comes forth. Do you think this will make the complaining worse? It won't.

Empathy gives your coworker what he or she wants. Try it and notice the result.

TRAINING MESSAGE

Educating trainees on their responsibilities.

Initiating a Taskbook

- ❖ To initiate a taskbook for a trainee, they must first meet the required **work experience** for the position. (Ex: FFT1 to Engine Boss)
- ❖ Having met the required work experience, a taskbook can be initiated without having completed all the **required classroom training**. However all the required classroom training must be completed before the taskbook can be submitted for certification.
- ❖ As you advance in your qualifications, it is important to know that you cannot have an **initiated** taskbook for a position that is higher than the training position that you are currently in.
- ❖ Initiating a taskbook is the responsibility of the trainee's Home Unit. However a taskbook can be initiated on an incident by the Training Specialist (TNSP) with approval from the trainee's home unit.

Attention

We are quickly approaching the end of the incident.
If you haven't **registered** please do it now.

If you are **demobing**, please use the
QR Codes to Close-Out/Exit ... or see the Training Specialist.

Registration

Close-Out/Exit

Newell Road Fire

Demob Instructions

Follow these steps in the order below:

- 1. **Ground Support** – Contractors must stop to sign their release inspection. The inspection is optional for agency resources.
- 2. **Supply** - Return any items you checked out.
- 3. **Communications** - Return any items you checked out.
- 4. **Documentation** - Drop any documentation in the box at Plans.
- 5. **Finance** - Proceed to the Finance table to receive your final timesheet or invoice.
- 6. **DMOB Unit** – **FINAL STEP: Stop by DMOB.** Provide DMOB with your estimated time of departure and arrival home. You are not completely demobed until you inform DMOB.

MEDICAL PLAN (ICS 206 WF)

Medical Incident Report

FOR A NON-EMERGENCY INCIDENT, WORK THROUGH CHAIN OF COMMAND TO REPORT AND TRANSPORT INJURED PERSONNEL AS NECESSARY.

FOR A MEDICAL EMERGENCY: IDENTIFY ON-SCENE INCIDENT COMMANDER BY NAME AND POSITION AND ANNOUNCE "MEDICAL EMERGENCY" TO INITIATE RESPONSE FROM IMT COMMUNICATIONS/DISPATCH.

Use the following items to communicate situation to communications/dispatch.

1. **CONTACT COMMUNICATIONS / DISPATCH (Verify correct frequency prior to starting report)**
Ex: "Communications, Div. Alpha. Stand-by for Emergency Traffic."
2. **INCIDENT STATUS: Provide incident summary (including number of patients) and command structure.**
Ex: "Communications, I have a Red priority patient, unconscious, struck by a falling tree. Requesting air ambulance to Forest Road 1 at (Lat./Long.) This will be the Trout Meadow Medical, IC is TFLD Jones. EMT Smith is providing medical care."

Severity of Emergency / Transport Priority	<input type="checkbox"/> RED / PRIORITY 1 Life or limb threatening injury or illness. Evacuation need is IMMEDIATE <i>Ex: Unconscious, difficulty breathing, bleeding severely, 2° - 3° burns more than 4 palm sizes, heat stroke, disoriented.</i> <input type="checkbox"/> YELLOW / PRIORITY 2 Serious Injury or illness. Evacuation may be DELAYED if necessary. <i>Ex: Significant trauma, unable to walk, 2° - 3° burns not more than 1-3 palm sizes.</i> <input type="checkbox"/> GREEN / PRIORITY 3 Minor Injury or illness. Non-Emergency transport <i>Ex: Sprains, strains, minor heat-related illness.</i>	
Nature of Injury or Illness & Mechanism of Injury		<i>Brief Summary of Injury or Illness (Ex: Unconscious, Struck by Falling Tree)</i>
Evacuation Request		<i>Air Ambulance / Short Haul/Hoist Ground Ambulance / Other</i>
Patient Location		<i>Descriptive Location & Lat. / Long. (WGS84)</i>
Incident Name		<i>Geographic Name + Medical (Ex: Trout Meadow Medical)</i>
On-Scene Incident Commander		<i>Name of on-scene IC of Incident within an Incident (Ex: TFLD Jones)</i>
Patient Care		<i>Name of Care Provider (Ex: EMT Smith)</i>

3. INITIAL PATIENT ASSESSMENT: Complete this section for each patient as applicable (start with the most severe patient)

Patient Assessment: See IRPG PAGE 106

Treatment:

4. EVACUATION PLAN:

Evacuation Location (if different): (Descriptive Location (drop point, intersection, etc.) or Lat. / Long.) Patient's ETA to Evacuation Location:

Helispot / Extraction Site Size and Hazards:

5. ADDITIONAL RESOURCES / EQUIPMENT NEEDS:

Example: Paramedic/EMT, crews, immobilization devices, AED, oxygen, trauma bag, IV/fluid(s), splints, rope rescue, wheeled litter, HAZMAT, extrication

6. COMMUNICATIONS: Identify State Air/Ground EMS Frequencies and Hospital Contacts as applicable

Function	Channel Name/Number	Receive (RX)	Tone/NAC *	Transmit (TX)	Tone/NAC *
COMMAND					
AIR-TO-GRND					
TACTICAL					

7. CONTINGENCY: Considerations: If primary options fail, what actions can be implemented in conjunction with primary evacuation method? Be thinking ahead.

8. **ADDITIONAL INFORMATION: Updates/Changes, etc.**

REMEMBER: Confirm ETA's of resources ordered. Act according to your level of training. Be Alert. Keep Calm. Think Clearly. Act Decisively.
