Sourdough Fire Weather Forecast

FORECAST NO: 14

PREDICTION FOR: Day and Night Shift

SHIFT DATE: August 20, 2023

FORECAST ISSUED: 1900 PDT 8/19/2023

NAME OF FIRE: Sourdough Fire

UNIT: WA-NCP

SIGNED: Steven Van Horn

(IMET)

Submit Weather Observations to 240-778-5285

WEATHER DISCUSSION:

...Red Flag Warning for Hot, Dry, and Unstable Conditions through 2300 PDT Today...

A thermal trough will cross over the Cascades this afternoon. East winds will funnel through the gorge and fan out into Newhalem through the morning hours. Winds will be particularly gusty on the east end of Gorge Lake, through the canyon and out into ICP in the morning, but lighter winds on the fire. A thick layer of smoke has enveloped over the Northwest and will limit surface heating today, but a better potential for mixing will increase the potential for critical fire weather conditions in the afternoon. Winds look to shift back onshore on Monday with temperatures cooling back into the 80s with westerly winds and better relative humidity recovery and a 20 percent chance of light rain Tuesday night.

WEATHER FORECAST: Sunday

...RED FLAG WARNING IN EFFECT UNTIL 2300 PDT...

WEATHER: Smokey and very warm. Filtered sun through the smoke.

TEMPERATURES: Ridge Tops (> 5000 ft): 72-78...Mid Slopes (3000-5000 ft): 76-85...Valleys (< 3000 ft) 84-90.

HUMIDITY: 14-18 percent.

WINDS: East-Northeast 4-8 mph in the morning becoming southwest 6-11 mph after 1200 PDT. In ICP, wind gusts up to 15-20 mph through 1000 PDT in the morning.

HAINES INDEX: 6 (High)

STABILITY/INVERSION: Unstable. Inversion breaking around 1600 PDT.

WEATHER FORECAST: Sunday night

WEATHER: Smoky.

TEMPERATURES: Mid Slopes/Ridge Tops: (3000-5000 ft): 58-64...Valleys (< 3000 ft) 53-57.

HUMIDITY: Mid Slopes/Ridge Tops: (> 3000 ft): 38-46 percent...Valleys (< 3000 ft): 46-57 percent.

WINDS: Southwest winds 3-7 mph in the evening becoming downslope/downvalley after 2100 PDT.

HAINES INDEX: 5 (Moderate)

STABILITY/INVERSION: Stable with low level inversion.

WEATHER FORECAST: Monday

WEATHER: Smoky in the morning then sunny and warm with hazy skies in the afternoon.

TEMPERATURES: Ridge Tops (> 5000 ft): 68-74...Mid Slopes (3000-5000 ft): 73-83...Valleys (< 3000 ft) 82-88.

HUMIDITY: 21-25 percent.

WINDS: Downslope/Downvalley winds 1-4 mph in the morning becoming southwest 9-14 mph after 1100 PDT. Gusts up to 20 mph mid to late afternoon.

HAINES INDEX: 5 (Moderate)

STABILITY/INVERSION: Unstable. Inversion lifting around 1400 PDT.

EXTENDED FORECAST: Tuesday and Wednesday

TUESDAY AND WEDNESDAY: Partly cloudy. Cooler. A 20 percent chance of showers. Highs in the upper 70s to mid 80s valleys and in the mid 60s to low 70s on ridges. Lows in the lower to mid 50s. West winds 10-15 mph. Gusts up to 20-25 mph on west facing slopes and ridges in the afternoon.

FIRE BEHAVIOR FORECAST

<u> </u>	
FORECAST NUMBER: 14	TYPE OF FIRE: Wildfire
FIRE NAME: Sourdough	OPERATIONAL PERIOD: 8/20/2023
DATE ISSUED: 8/19/2023	TIME ISSUED: 1900
UNIT: North Cascades National Park	SIGNED: James Hamps
	Jim Hampton BAN

INPUTS

WEATHER SUMMARY

Maximum temp: 84-90 valleys, 72-78 ridges.

Relative humidity: 14-18%.

Winds: See accompanying weather forecast for wind information.

OUTPUTS

FIRE BEHAVIOR

FUELS: Fuels in the fire area are primarily composed of **Timber Litter (TL5)**, **Timber with Understory (TU5)**, and **Shrub (SH3)**. Primary tree species include mixed sizes of Douglas Fir, and hemlock, with scattered True Fir and cedar. Upper slopes are dominated by brush. Brush and understory species include kinnikinnick, and shrub-form Maple. Duff layers are generally shallow on the lower third of slopes with some deeper pockets on more heavily timbered benches. Fuels are extremely dry with the last measurable rain over a month ago.

FIRE BEHAVIOR BY FUEL MODEL

Fuel Type	Head Spread Rate	Flame Length	Spot Distance
Heavy load timber/understory (TU5)	8 ch/hr.	5-7 feet	.4 mile
Heavy load timber Litter (TL5)	6 ch/hr.	3 feet	.3 mile
Shrub (SH3)	3 ch/hr.	2 feet	< .1 mile

Haines: 6; POI: 70% shaded, 85% unshaded; FDFM: 3-4% unshaded, 7-9% shaded; CWR: 0

Today's Fire Behavior

Increased instability and hot, dry conditions continue the increased fire behavior potential today with isolated torching, backing, flanking and short duration uphill runs.

Specific

Div. A: Most of the surface fuels have been altered by fire or other activity greatly reducing fire potential.

Div. B: Continued spread to the west into the Goodell Fire scar. Fuels are discontinuous with little canopy. Movement through fine fuels is possible with large woody debris providing for scattered pockets of higher intensity. Standing snags provide 'chimney' potential. Aviation assets would be very effective on this division.

Div. Y and Z: East wind is favorable for east side of fire. Continued use of aviation assets to limit spot fire potential on the east side and hold main fire to the west side of Sourdough Creek is recommended.

Night Shift: Moderate burning conditions as easterly winds diminish. Better humidity recovery next few days.

AIR OPERATIONS: Effectiveness of light aircraft may be limited by morning smoke and wind.

SAFETY

RED FLAG WARNING UNTIL 11 PM PDT SUNDAY FOR HOT, DRY AND UNSTABLE CONDITIONS!

(IA) Denotes Initial Attack

TASK: hold fire north of Hwy 20. Mop up where safe to do so. Post road guards for travel through identified areas of concern. Patrol the community of Diablo.

PURPOSE: Keep the fire north of Hwy 20, maintain escape routes for resources. Protect identified values.

END STATE: Strategy and tactics utilized minimized undesirable impacts to natural/cultural resources and roads used as control line. Private property and critical infrastructure protected within the fire boundaries.

7. Special Instructions:

O-78.15 SOF2 Jill Ritter will rove all divisions, checking in with Division Supervisors. O-169.8 SOF2 Dan Ridenour will rove Division A/B, checking in with Division Supervisors.

All resources are required to weed wash upon arrival at the incident and prior to DMOB.

Work with Resource Advisors to minimize damage to natural or cultural values. Work with Seattle City Light lookouts on potential powerline closures due to fire.

Strike Team / Task Force / Resource Designator			Number Persons	Drop Off PT./Time	Pick Up PT./Time		
6. Control Operations/Work Assignments	:				<u> </u>		

TASK: Implement structure protection around the Learning Center structures. Improve control line between learning Center and Ross Dam. Use aviation to monitor and hold fire west of Sourdough Creek.

PURPOSE: Minimize risk and potential impacts to structures, infrastructure and other values at risk.

END STATE: Structure protection actions taken to reduce loss of structure values at risk. Containment lines will hold fire under current and expected fire behavior.

7. Special Instructions:

O-78.15 SOF2 Jill Ritter will rove all divisions, checking in with Division Supervisors.

O-169.7 SOF2 Renee Lamoreaux will rove Division Y/Z, checking in with Division Supervisors.

All resources are required to weed wash upon arrival at the incident and prior to DMOB.

Work with Seattle City Light lookouts on potential powerline closures due to fire.

Work with Resource Advisors to minimize damage to natural or cultural values.

2023 Sourdough Fire READ Brief

General Fire Operations

Confer with READs before:

- constructing any fireline
- siting helispots or spike camps
- applying fire retardant chemicals
- utilizing new dipsites

<u>Use of Fire Retardant and Heavy Equipment</u>: The application of fire retardant chemicals and use of any heavy equipment for fire suppression or suppression damage repair must be authorized in advance by the North Cascades National Park Complex Superintendent.

<u>Use of Approved Dipsites</u>: Ross Lake, Diablo Lake, Gorge Lake, Azure Lake, Sourdough Lake, Bouck Lake are currently the only approved dipsites on the incident. Contact READs before using any new dipsites.

<u>Fire Suppression in Wilderness:</u> Much of the Sourdough Fire is situated in the Stephen Mather Wilderness. Confer with READs as to Wilderness Resource Protection Measures.

Prevent the Establishment and Spread of Invasive Species:

- Sanitize helicopter buckets and drafting gear upon arrival to the incident using a heated pressure washer and after dipping from off-incident dipsites.
- Avoid the introduction or spread of invasive weeds and aquatic species. Backcountry portions of the park are predominantly weed-free.
 - Weeds are present at ICP, along the Hwy 20 corridor, along the roads adjacent to Diablo and Ross Lakes, and at the outlet of Big Beaver valley.
 - Use boot brushes to treat boots, clothing, and equipment working in reed canarygrass areas in the lower Big Beaver valley.
 - Weed wash vehicles and heavy equipment upon arrival and departure from incident.
 - Conduct visual inspections of helicopter cargo nets and other transported materials for invasive weed seed and propagules before transport to/from the fire.
 - Build and stage cargo loads in weed-free areas.

Protect Water Quality

• Ensure that containment barriers and absorbent pads are installed correctly under pumps and jerry cans to prevent fuel contamination to waterways.

Sensitive Species Habitat

- Avoid cutting large diameter trees and snags whenever possible.
- Air operations should avoid peregrine falcon activity areas in cliff bands along Gorge, Diablo, and Ross Lakes to the greatest degree possible. Refer to the Air Operations Avoidance Map for location specifics.
- As feasible, avoid disturbing ptarmigan populations along Sourdough Ridge. Gently shoo birds away from helispots in advance of helicopter landings. Do not separate ptarmigan chicks from their parents.
- Whitebark pine may be present on ridges. Avoid the cutting of any short 5-needle pines above 4500 ft.
- Fish screens are required on all engine and portable pump draft hoses.

<u>Sensitive cultural resource sites</u>: There are known sensitive archeological sites in the fire area, and there is a high likelihood that additional sites have not yet been identified. Avoid ground disturbance in open, flat areas and viewpoints as much as possible. Contact READs if you identify exposed artifacts.

North Cascades National Park appreciates your support in the protection of sensitive resources! QUESTIONS: Cedar Drake: Lead READ 360.630.3231 cedar_drake@nps.gov

Sourdough Fire

Sunday 8/20/2023

	Major Hazards and Risks
Immediately del	ay, modify or abandon suppression activities if strategies and tactics cannot be
impleme	ented safely. Identify and document Helispot's sites prior to engaging.
Driving	Use extreme caution leaving ICP and traveling on HWY- 20 or within populate areas. Watch out for public traffic who may not be aware of additional fire activity along the roads ways.
	Make sure your egress is identified and keep in mind turn around locations.
Powerlines	Communicate all known hazards to line personal, obtain radio check-back if needed. Identify the extent of the hazard by tracking all lines two poles on either side. Isolate and flag the area, post guards if necessary
Gravity Hazards	References: IRPG pgs. 20-21. Assess trees or other hazards, establish decision points for disengagement. Flag trees or known hazards, post lookouts in hazard areas, and adjust mop-up standards as needed. Be alert to rotor wash effects. Assess area where congregating, ie parking, briefing, etc

Transfer of Command

There is a high potential for fatalities, serious injuries, or other incidents during transfer of command periods (some have occurred in the past). Be proactive in mitigating the risks by proper implementation of LCES—Lookout, Communications, Escape Routes, and Safety Zones.

Factors for increased risks to fireline personnel during transition periods include:

- No, or poor, briefing of incoming personnel
- Lack of fire weather and behavior information, both forecast and observed
- Communications; face-to-face briefings may not be possible and radio frequencies may be overextended and/or changing due to the increased demands on the system.
- Initial attack resources may not have checked-in and the Incident Commander/Operations may not be aware of the number, type and location of all resources.
- Location of safety zones and escape routes may not be known and communicated to all resources.
- Not all Resources know who is in command.

Mitigation actions to take:

- Lookouts: Post and maintain your own lookouts.
- Communications: Maintain existing communications with your own and adjacent resources, as well as your original supervisor while you are developing communications with incoming adjacent resources and your new supervisor.
- Escape routes and safety zones: Identify escape routes and assure incoming resources are aware
 of their locations; be aware that your original escape routes and safety zones may no longer be
 accessible due to changing fire behavior or your increased distance from them.
 Utilize the Incident Response Pocket Guide transition checklist.

Team Ordering/Timeline Process:

1100 - Last call to change spike camp resource hot food location.

1600 - DIVS to have next day's resource order ready for Planning OPS.

- All crew level orders will be placed through DIVS or Branch.
- DIVS or Branch will place all orders through Supply -
- · All orders will be tracked using the process found on the front of this form.

GPS Datum: NAD 83- Degrees, Decimal, Minutes (DDMM.MM)

Definitions

FOB-Forward Operating Base is a secure forward position established to strategize, design and discuss tactics, and for personnel to transfer information and meet.

Line Spike Camp-Managed by Operations at the DIVS level; mobile, short duration and self- sufficient.

Spike Camp-Supported by Logistics, listed in the IAP, numbers in camp are set by 1100, named by Plans.

Emergency Medevac- Life threatening situation requiring immediate medical attention. Handled as per IAP med plan and team SOP's.

Communications to clear command channel radio traffic.

Medical Transport-Transport of less serious injury/illness managed by Operations or line Medics back to camp for evaluation and/or treatment.

Human Resource Message

Sourdough Fire Aug 20, 2023

Welcome Message

Hi, my name is Stew Souders. I'm the Human Resource Specialist with NW Team 8 on this incident.

My responsibilities are monitoring camp and fire line activities to ensure an appropriate work environment, assisting in facilitating personnel-related issues, and providing general information.

Don't hesitate to get in touch with me if I can assist you in any way while on this incident. My workspace is at the ICP.

Please be safe and stay hydrated!

Stew Souders
Human Resource Specialist
360-259-3288
stew_souders@firenet.gov

Thought for the Day:

"Hardships often prepare ordinary people for an extraordinary destiny." - C.S. Lewis

FIRE INFORMATION

Phone: 360-370-4169

Email: 2023.sourdough@firenet.gov

Inciweb: https://inciweb.wildfire.gov/incident-information/warlp-sourdough-fire

SHARE YOUR PHOTOS - Help us tell the story of this fire with your pictures.

Catch us during the morning briefing or send to the PIO team via email to 2023.sourdough@firenet.gov

Please provide your name for photo credit and include basic information about where the photo was taken and what's happening in it.

LOST AND FOUND - Location: Currier Hall (Corner of Main St and Silk Stocking Road)

PACKAGES (Pick-up at Currier Hall)

Your Name

Sourdough Fire ICP

178 Seattle City Light St.

Rockport, WA 98283

Sourdough Fire Demob Instructions

Follow these steps in the <u>order below</u>:

1. Weed Wash –All vehicles that have driven off the pavement need to complete a weed wash. Weed wash at Ground Support.
2. Ground Support – Contractors must stop to sign their release inspection. The inspection is optional for agency resources.
3. Supply - Return any items you checked out.
4. Communications - Return any items you checked out.
5. Finance - Proceed to the Finance yurt to receive your final timesheet or invoice.
☐ 6. Documentation - Drop any documentation in the box at Plans in Currier Hall.
7. DMOB Unit – FINAL STEP: Stop by DMOB in Currier Hall. Provide DMOB with your estimated time of departure and arrival home. You are not completely demobed until you inform DMOB

MEDICAL PLAN (ICS 206 WF) Controlled Unclassified Information//Basic

FOR A NON-EMERGENCY INCIDENT, WORK THROUGH CHAIN OF COMMAND TO REPORT AND TRANSPORT INJURED PERSONNEL AS NECESSARY.

FOR A MEDICAL EMERGENCY: IDENTIFY ON SCENE INCIDENT COMMANDER BY NAME AND POSITION AND ANNOUNCE "MEDICAL EMERGENCY" TO INITIATE RESPONSE FROM IMT COMMUNICATIONS/DISPATCH.

4. TRANSPORT PLAN: Evacuation Location (if different): (Descriptive Location (drop point, intersection, etc.) or Lat. / Long.) Patient's ETA to Evacuation Location: Helispot / Extraction Site Size and Hazards: 5. ADDITIONAL RESOURCES / EQUIPMENT NEEDS: Example: Paramedic/EMT, Crews, Immobilization Devices, AED, Oxygen, Trauma Bag, IV/Fluid(s), Splints, Rope rescue, Wheeled litter, HAZMAT, Extrication 6. COMMUNICATIONS: Identify State Air/Ground EMS Frequencies and Hospital Contacts as applicable Function Channel Name/Number Receive (RX) Tone/NAC * COMMAND	Use the following items to communicate situation to communications/dispatch. 1. CONTACT MUD LICK COMMUNICATIONS / DISPATCH (Verify correct frequency prior to starting report) Ex: "Communications, Div. Alpha. Stand-by for Emergency Traffic." 2. INCIDENT STATUS: Provide incident summary (including number of patients) and command structure. Ex: "Communications, I have a Red priority patient, unconscious, struck by a falling tree. Requesting air ambulance to Forest Road 1 at (Lat./Long.) This will be the Trout Meadow Medical, IC is TFLD Jones. EMT Smith is providing medical care."								
Mechanism of Injury Transport Request Transport Request Air Ambulance / Short Haul/Hoist Ground Ambulance / Other Patient Location Patient Location On-Scene Incident Name On-Scene Incident Commander On-Scene Incident Commander Patient Care Name of on-scene IC of Incident within an Incident (Ex: TFLD Jones) Patient Care Name of Gare Provider (Ex: EMT Smith) Name of Gare Provider (Ex: EMT Smith) Name of Gare Provider (Ex: EMT Smith) 1. INITIAL PATIENT ASSESSMENT: Complete this section for each patient as applicable (start with the most severe patient) Patient Assessment: See IRPG PAGE 106 Treatment: Evacuation Location (if different): (Descriptive Location (drop point, Intersection, etc.) or Lat. / Long.) Patient's ETA to Evacuation Location: Helispot / Extraction Site Size and Hazards: 5. ADDITIONAL RESOURCES / EQUIPMENT NEEDS: Example: Parametic/EMT, Crews, Immobilization Devices, AED, Oxygen, Trauma Bag, IV/Fluid(s), Splints, Rope rescue, Wheeled litter, HAZMAT, Extrication 6. COMMUNICATIONS: Identify State Air/Ground EMS Frequencies and Hospital Contacts as applicable Function Channel Name/Number Receive (RX) Tone/NAC* Transmit (TX) Tone/NAC* One/NAC Transmit (TX) Tone/NAC * Transmit (TX) Tone/	•	rgency / Transport ority	Ex: Unconscious, difficulty breathing, bleeding severely, 2° – 3° burns more than 4 palm sizes, heat stroke, disoriented. YELLOW / PRIORITY 2 Serious Injury or illness. Evacuation may be DELAYED if necessary. Ex: Significant trauma, unable to walk, 2° – 3° burns not more than 1-3 palm sizes. GREEN / PRIORITY 3 Minor Injury or Illness. Non-Emergency transport
