

INCIDENT OBJECTIVES (ICS 202)

1. Incident Name:		2. Operational Period: DAY/NIGHT	
SOURDOUGH		Date/Time From: 08/24/2023 0600 THU	Date/Time To: 08/25/2023 0600 FRI
3. Objective(s):			
<p>Management Objectives for the Sourdough Incident</p> <ul style="list-style-type: none"> • Provide for firefighter and public safety using ongoing risk analysis and reasonable mitigation of identified hazards. Use the Incident Strategic Alignment Process to ensure risks to firefighters are commensurate with Values at Risk. • Utilize the appropriate suppression strategies including point/source protection, confine/contain, and direct suppression based on values at risk and probability of success. • Minimize impacts to communities, park infrastructure, and economic resources including the towns of Newhalem and Diablo, Seattle City Light Infrastructure, Ross Lake Resort, and the North Cascades Environmental Learning Center. • Maintain and enhance relationships with cooperators, stake holders, and communities. • Coordinate with Resource Advisors on suppression and repair activities within the designated fire area. • Treat each other with dignity and respect and act in a professional manner on the fire and in the community. • Manage cost commensurate with values at risk and update Agency Administrators daily. <p>Control Objectives</p> <ul style="list-style-type: none"> • Keep fire North of Diablo and Gorges Lakes and SR 20. • Keep fire East of Goodell Creek. • Keep fire to the South and West of Big Beaver Creek.

Sourdough Fire Weather Forecast

FORECAST NO: 18
PREDICTION FOR: Day and Night Shift
SHIFT DATE: August 24, 2023
FORECAST ISSUED: 1900 PDT 8/23/2023

NAME OF FIRE: Sourdough Fire
UNIT: WA-NCP
SIGNED: Joe Goudsward (IMET)
 Matthew Dehr (IMET-T)

WEATHER DISCUSSION:

The upper-level low pressure that brought the showers to the region yesterday continues to pull out to the east. In its wake, upper-level high pressure will begin to build in from the southeast and will be parked over the region through the weekend. This will result in a warming and drying trend with winds shifting back to an easterly direction and possibly bringing gusty down valley winds to the ICP tonight. Slight chances of thunderstorms return to the forecast Friday afternoon and then again Sunday and Monday.

WEATHER FORECAST: Today

WEATHER: Mainly Clear with areas of smoke. Warmer and drier.

TEMPERATURES Ridge Tops (> 5000 ft): 65-70...Mid Slopes (3000-5000 ft): 70-77...Valleys (< 3000 ft) 80-85.

HUMIDITY: 31-37 percent.

WINDS: East/northeast winds 4-8 mph through morning, turning more east/southeast at 5 to 10 mph in the afternoon. Terrain will largely drive the winds.

HAINES INDEX: 5 (Moderate) **CWR:** 0% **STABILITY:** Stable, inversion lifts by 1300 PDT

WEATHER FORECAST: Tonight

WEATHER: Mostly clear, 0% chance of rain.

TEMPERATURES: Mid Slopes/Ridge Tops: (> 3000 ft): 51-58...Valleys (< 3000 ft): 55-60

HUMIDITY: Mid Slopes/Ridge Tops: (> 3000 ft): 30-35 percent...Valleys (< 3000 ft): 40-45 percent

WINDS: East/southeast 5-10 mph in the evening becoming east to northeast. Stronger winds possible in the ICP.

HAINES INDEX: 3 (Low) **CWR:** 0% **STABILITY:** Stable with low level inversion.

WEATHER FORECAST: Friday

WEATHER: Increasing clouds with a slight chance of afternoon through early evening thunderstorms.

TEMPERATURES Ridge Tops (> 5000 ft): 72-76...Mid Slopes (3000-5000 ft): 73-79...Valleys (< 3000 ft) 81-86.

HUMIDITY: 33-40 percent.

WINDS: East/northeast winds 4-8 mph through morning, turning more west/southwest at 5 to 10 mph in the afternoon. Terrain will largely drive the winds.

HAINES INDEX: 5 (Moderate) **CWR:** 0% **STABILITY:** Stable, inversion lifts by 1300 PDT

EXTENDED FORECAST: Saturday and Sunday

SATURDAY: Partly to mostly sunny and hot. Highs in the mid-80s to low 90s in the valleys and low-to-mid 70s on the ridges. Lows in the 60s. Winds east/northeast in the morning, becoming west/southwest 10-12 mph with gusts in the afternoon. Terrain will largely drive the winds.

SUNDAY: Partly to mostly sunny and hot. Highs in the upper 80s to mid-90s in the valleys and mid to upper 70s on the ridges. Lows in the 60s. Winds east/northeast in the morning, becoming west/southwest 10-12 mph with gusts in the afternoon. Terrain will largely drive the winds. Isolated thunderstorms.

FIRE BEHAVIOR FORECAST

FORECAST NUMBER: 18	TYPE OF FIRE: Wildfire
FIRE NAME: Sourdough	OPERATIONAL PERIOD: 8/24/2023
DATE ISSUED: 8/23/2023	TIME ISSUED: 1900
UNIT: North Cascades National Park	SIGNED: <i>James Hampton</i> Jim Hampton FAN

INPUTS

WEATHER SUMMARY

Maximum temp: 80-85 valleys, 65-70 ridges.
Relative humidity: 31-37%.
Winds: See accompanying weather forecast for wind information.

OUTPUTS

FIRE BEHAVIOR

FUELS: Fuels in the fire area are primarily composed of **Timber Litter (TL5)**, **Timber with Understory (TU5)**, and **Shrub (SH3)**. Primary tree species include mixed sizes of Douglas Fir, and hemlock, with scattered True Fir and cedar. Upper slopes are dominated by brush. Duff layers are generally shallow on the lower third of slopes with some deeper pockets on more heavily timbered benches.

FIRE BEHAVIOR BY FUEL MODEL

Fuel Type	Head Spread Rate	Flame Length	Spot Distance
Heavy load timber/understory (TU5)	8 ch/hr.	6 feet	.1 mile
Heavy load timber Litter (TL5)	5 ch/hr.	2 feet	.1 mile
Shrub (SH3)	3 ch/hr.	2 feet	< .1 mile

Haines: 5; **POI:** 40% day; 35% night; **DFM:** 9 day; 7-10 night; **CWR:** 0

Today's Fire Behavior

Fuels will begin to recover from the moist conditions of the past two days. By late afternoon, exposed fine fuels will be in the upper single digits. Fuels that were smoldering the past few days will easily kindle to a flame by late afternoon. Single and small group torching potential with short range spotting. Fairly calm winds will keep spotting distances minimal. Increasing instability will provide for increasing ventilation of fuels.

Specific

Div. A and Z: Most of the surface fuels have been altered by fire or other activity greatly reducing fire potential. Conditions are favorable for holding these divisions.

Div. B: Existing spot fires on the northwest flank of the fire will continue to consolidate. Large woody debris will contribute scattered pockets of higher intensity. Easterly flow and poor ridgetop humidity recovery will produce increasingly active fire behavior from previously smoldering fuels.

Div. Y: Fire deep in Sourdough Creek will be surface based. Expect creeping surface fire with single tree torching if limbs reach the surface fuels. Easterly wind component is favorable for holding line in Sourdough Creek.

Night Shift: Fine fuels will dry rapidly over the next few days. Nightly increase in fire potential.

AIR OPERATIONS: Effectiveness of light aircraft may be limited by morning inversion.

SAFETY

Very low overnight ridgetop humidity recovery could produce surprising nighttime fire behavior.

6. Control Operations/Work Assignments:

(IA) Denotes Initial Attack
TASK: Patrol Hwy 20 and the Diablo townsite. Mop up where safe to do so. Monitor fire spread west into the Goodall Fire scar and utilize aviation resources as necessary.
PURPOSE: Keep the fire north of Hwy 20 and the Diablo townsite and powerhouse.
END STATE: Private property and critical infrastructure protected. Undesirable impacts to natural/cultural resources are minimized.

7. Special Instructions:

O-169.8 SOF2 Dan Ridenour will rove Division A/B, checking in with Division Supervisors.
 Work with Resource Advisors to minimize damage to natural or cultural values.
 Work with Seattle City Light lookouts on potential powerline closures due to fire.

Task/Mission/Assignments such as Recon, buckets, crew transport, Aerial Supervision, supply, etc are subjected to availability and weather conditions. Please use chain of command which will contact Helibase. Recon pick up locations can be discussed.

2023 Sourdough Fire READ Brief

General Fire Operations

Confer with READs before:

- constructing any fireline
- siting helispots or spike camps
- applying fire retardant chemicals
- utilizing new dipsites

Use of Fire Retardant and Heavy Equipment: The application of fire retardant chemicals and use of any heavy equipment for fire suppression or suppression damage repair must be authorized in advance by the North Cascades National Park Complex Superintendent.

Use of Approved Dipsites: Ross Lake, Diablo Lake, Gorge Lake, Azure Lake, Sourdough Lake, Bouck Lake are currently the only approved dipsites on the incident. Contact READs before using any new dipsites.

Fire Suppression in Wilderness: Much of the Sourdough Fire is situated in the Stephen Mather Wilderness. Confer with READs as to Wilderness Resource Protection Measures.

Prevent the Establishment and Spread of Invasive Species:

- Sanitize helicopter buckets and drafting gear upon arrival to the incident using a heated pressure washer and after dipping from off-incident dipsites.
- Avoid the introduction or spread of invasive weeds and aquatic species. Backcountry portions of the park are predominantly weed-free.
 - Weeds are present at ICP, along the Hwy 20 corridor, along the roads adjacent to Diablo and Ross Lakes, and at the outlet of Big Beaver valley.
 - Use boot brushes to treat boots, clothing, and equipment working in reed canarygrass areas in the lower Big Beaver valley.
 - Conduct visual inspections of helicopter cargo nets and other transported materials for invasive weed seed and propagules before transport to/from the fire.
 - Build and stage cargo loads in weed-free areas.

Protect Water Quality

- Ensure that containment barriers and absorbent pads are installed correctly under pumps and jerry cans to prevent fuel contamination to waterways.

Sensitive Species Habitat

- Avoid cutting large diameter trees and snags whenever possible.
- Air operations should avoid peregrine falcon activity areas in cliff bands along Gorge, Diablo, and Ross Lakes to the greatest degree possible. Refer to the Air Operations Avoidance Map for location specifics.
- As feasible, avoid disturbing ptarmigan populations along Sourdough Ridge. Gently shoo birds away from helispots in advance of helicopter landings. Do not separate ptarmigan chicks from their parents.
- Whitebark pine may be present on ridges. Avoid the cutting of any short 5-needle pines above 4500 ft.
- Fish screens are required on all engine and portable pump draft hoses.

Sensitive cultural resource sites: There are known sensitive archeological sites in the fire area, and there is a high likelihood that additional sites have not yet been identified. Avoid ground disturbance in open, flat areas and viewpoints as much as possible. Contact READs if you identify exposed artifacts.

North Cascades National Park appreciates your support in the protection of sensitive resources!

QUESTIONS: Cedar Drake: Lead READ 360.630.3231 cedar_drake@nps.gov

Sourdough -WA- NCP-000262

Date:8/24/2023

Safety Concerns and Mitigation:

Highway 20: There is public/commercial traffic entering the fire area . Highway 20 has been posted with 35 MPH signs along the road. There is a “no stopping” order along the highway within the fire area. Be alert of Non-Fire personnel entering the pull off areas If you find yourself or crew in a situation that requires assistance, follow your chain of command to get the help you need. Be aware of speeding vehicles and maintain situational awareness. While in ICP, if you need to cross the road, use the cross walk!

Gravity Hazards: We did receive a small amount of moisture within the fire area. Beware of rock/log hazards along the road. Minimize time spent along roadways.

Dehydration: Cooler temperatures tend to make us forget to maintain hydration. Please keep up on your water intake as the next few days are forecasted for hot and dryer conditions.

DON'T FEED THE BEARS! A bear has been reported in the Learning Center area! Please be sure to pack out your trash! Want to minimize the impact of our presence!

WASH YOUR HANDS!

DON'T FEED THE BEARS!

**HAZARD TREE SAFETY
SUMMARIZED FROM THE IRPG PAGE :**

“Hazard trees, both dead snags and live green trees, are one of the most common risks encountered on the fireline. All firefighters should frequently survey their work area for potential hazard trees.”

HAZARD TREE INDICATORS:

- Trees burning for any period of time
- Numerous downed trees
- Dead, broken or burning tops and limbs overhead
- Accumulation of downed limbs
- Absence of needles, bark or limbs
- Leaning or hung up

Safety Officers: Jeff Bishop, Jerry Van Dyne, Renee Lamoreaux, Dan Ridenhour, Dan Hauswald (T)

Team Ordering/Timeline Process:

1100 - Last call to change spike camp resource hot food location.
 1600 - DIVS to have next day's resource order ready for Planning OPS.

- All crew level orders will be placed through DIVS or Branch.
- DIVS or Branch will place all orders through Supply -
- All orders will be tracked using the process found on the front of this form.

GPS Datum: NAD 83- Degrees, Decimal, Minutes (DDMM.MM)

Definitions

FOB-Forward Operating Base is a secure forward position established to strategize, design and discuss tactics, and for personnel to transfer information and meet.

Line Spike Camp-Managed by Operations at the DIVS level; mobile, short duration and self- sufficient.

Spike Camp-Supported by Logistics, listed in the IAP, numbers in camp are set by 1100, named by Plans.

Emergency Medevac- Life threatening situation requiring immediate medical attention. Handled as per IAP med plan and team SOP's. Communications to clear command channel radio traffic.

Medical Transport-Transport of less serious injury/illness managed by Operations or line-Medics back to camp for evaluation and/or treatment.

Human Resource Message

Sourdough Fire Aug 24, 2022

Trust

Building a foundation of trust is crucial for leaders to create cohesive teams capable of achieving synergy.

Recognizing that communication is the key to building trust, we communicate openly with team members and make sure we convey the essence of our values, mission, and vision. In order for our teams to trust us, we must communicate information about ourselves.

Unlike respect, which may be inherently offered due to an individual's position or stature in the organization, trust for an individual must be earned and offered in faith. Leaders build trust through consistent actions over time.

Trust is delicate; like most delicate things, it must be cared for. As trust may be earned, it may also be lost. All leaders, especially emerging ones, must know that trust can be lost faster than earned. Once lost, regaining it can be daunting.

Rockport, WA 98283

Sourdough Fire

Demob Instructions

Follow these steps in the order below:

- 1. **Ground Support** – Contractors must stop to sign their release inspection. The inspection is optional for agency resources.
- 2. **Supply** - Return any items you checked out.
- 3. **Communications** - Return any items you checked out.
- 4. **Finance** - Proceed to the Finance yurt to receive your final timesheet or invoice.
- 5. **Documentation** - Drop any documentation in the box at Plans in Currier Hall.
- 6. **DMOB Unit** – **FINAL STEP: Stop by DMOB in Currier Hall.** Provide DMOB with your estimated time of departure and arrival home. You are not completely demobed until you inform DMOB.

TRAINING MESSAGE

THE POSITION TASK BOOK

1. Did you know that a Position Task Book (PTB) is valid for 3 years from the date of initiation? Look at the date on the cover page of your PTB.
2. Upon documentation of the first evaluator (the first person to put ink in your PTB), the 3-year time limit is reset from that new date.
3. If your PTB is about to expire and you are near completion, talk to your training officer at home and request additional time to complete your PTB.
4. It is your responsibility as a trainee to keep track of your expiration date and work with your training officer to find out how best you can get through the task book before it expires.

Come to the Plans section if you have any questions. Plans is in Currier Hall.

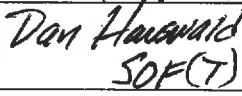

MEDICAL PLAN (ICS 206 WF)

Controlled Unclassified Information//Basic

Medical Incident Report

FOR A NON-EMERGENCY INCIDENT, WORK THROUGH CHAIN OF COMMAND TO REPORT AND TRANSPORT INJURED PERSONNEL AS NECESSARY.

FOR A MEDICAL EMERGENCY: IDENTIFY ON-SCENE INCIDENT COMMANDER BY NAME AND POSITION AND ANNOUNCE "MEDICAL EMERGENCY" TO INITIATE RESPONSE FROM IMT COMMUNICATIONS/DISPATCH.

Use the following items to communicate situation to communications/dispatch.

1. CONTACT COMMUNICATIONS / DISPATCH (Verify correct frequency prior to starting report)

Ex: "Communications, Div. Alpha. Stand-by for Emergency Traffic."

2. INCIDENT STATUS: Provide incident summary (including number of patients) and command structure.

Ex: "Communications, I have a Red priority patient, unconscious, struck by a falling tree. Requesting air ambulance to Forest Road 1 at (Lat./Long.) This will be the Trout Meadow Medical, IC is TFLD Jones. EMT Smith is providing medical care."

Severity of Emergency / Transport Priority	<input type="checkbox"/> RED / PRIORITY 1 Life or limb threatening injury or illness. Evacuation need is IMMEDIATE <i>Ex: Unconscious, difficulty breathing, bleeding severely, 2° – 3° burns more than 4 palm sizes, heat stroke, disoriented.</i> <input type="checkbox"/> YELLOW / PRIORITY 2 Serious Injury or illness. Evacuation may be DELAYED if necessary. <i>Ex: Significant trauma, unable to walk, 2° – 3° burns not more than 1-3 palm sizes.</i> <input type="checkbox"/> GREEN / PRIORITY 3 Minor Injury or illness. Non-Emergency transport <i>Ex: Sprains, strains, minor heat-related illness.</i>	
Nature of Injury or Illness & Mechanism of Injury		Brief Summary of Injury or Illness <i>(Ex: Unconscious, Struck by Falling Tree)</i>
Evacuation Request		Air Ambulance / Short Haul/Hoist Ground Ambulance / Other
Patient Location		Descriptive Location & Lat. / Long. (WGS84)
Incident Name		Geographic Name + Medical <i>(Ex: Trout Meadow Medical)</i>
On-Scene Incident Commander		Name of on-scene IC of Incident within an Incident <i>(Ex: TFLD Jones)</i>
Patient Care		Name of Care Provider <i>(Ex: EMT Smith)</i>

3. INITIAL PATIENT ASSESSMENT: Complete this section for each patient as applicable (start with the most severe patient)

Patient Assessment: See IRPG PAGE 106

Treatment:

4. EVACUATION PLAN:

Evacuation Location (if different): (Descriptive Location (drop point, intersection, etc.) or Lat. / Long.) Patient's ETA to Evacuation Location:

Helispot / Extraction Site Size and Hazards:

5. ADDITIONAL RESOURCES / EQUIPMENT NEEDS:

Example: Paramedic/EMT, crews, immobilization devices, AED, oxygen, trauma bag, IV/fluid(s), splints, rope rescue, wheeled litter, HAZMAT, extrication

6. COMMUNICATIONS: Identify State Air/Ground EMS Frequencies and Hospital Contacts as applicable

Function	Channel Name/Number	Receive (RX)	Tone/NAC *	Transmit (TX)	Tone/NAC *
COMMAND					
AIR-TO-GRND					
TACTICAL					

7. CONTINGENCY: Considerations: If primary options fail, what actions can be implemented in conjunction with primary evacuation method? Be thinking ahead..

8. ADDITIONAL INFORMATION: Updates/Changes, etc.

REMEMBER: Confirm ETAs of resources ordered. Act according to your level of training. Be Alert. Keep Calm. Think Clearly. Act Decisively.
