3. Objective(s):		
<ul style="list-style-type: none"> • Identify, evaluate and reduce risks to firefighters and the public through the use of Deliberate Risk Assessment process. • Minimize acres burned and impacts to communities and infrastructure by completing a strategic risk assessment to guide operations in the development of strategies and tactics to be implemented by fire personnel. • Protect historical, tribal, cultural, aquatic and wildlife resources, and sensitive plant sites. • Provide initial attack response and assistance for private and public lands within the delegated area. • Maintain and enhance relationships with cooperators, stake holders, landowners, and communities by providing accurate and timely information. • Manage cost commensurate with values at risk and maintain fiscal accountability. • Treat each other with dignity and respect and act in a professional manner while on the fire and in the community. 		
4. Operational Period Command Emphasis:		
Implement strategies and tactics to achieve incident objectives with the least amount of risk practical, with the highest probability of success.		
General Situational Awareness:		
Fighting fire in light flashy fuels under hot, dry, and windy conditions poses great potential for rapid fire growth. Anticipate changes in fire behavior before it happens and ensure Lookouts, Communications, Escape Routes, and Safety Zones are adequate. Maintain accountability of all assigned resources while engaged on the fire line.

FIRE BEHAVIOR FORECAST

FORECAST NUMBER: 2	TYPE OF FIRE: WILDFIRE
FIRE NAME: Tunnel Five	OPERATIONAL PERIOD: July 5-6, 2023
DATE ISSUED: July 4, 2023	TIME ISSUED: 2000 HOURS
UNIT: SE Region	SIGNED: DON STRAND, FBAN

INPUTS

WEATHER SUMMARY:

Sunny, warm and dry. Max temps 92 to 95. Minimum humidities 15-20%. Winds northeast-southeast 8-12 with gusts to 15 MPH. Winds shifting to the west 10-12 with gusts to 20 MPH between 1600-1800 hours.

FUELS: Fuels in the area are short grass, timber needle litter with areas down woody debris, timber litter with light brush and Oak with leaf litter. Surface litter is definitely dry enough for continuous fire spread. Live foliage moisture has some greenness but the conifer foliage is dry enough to support isolated torching where ladder fuels are present. On steep slopes short crown runs possible. The cheat grass is cured and will easily carry fire.

OUTPUTS

FIRE BEHAVIOR

GENERAL: Fire behavior potential will remain high. Note-Winds shifting to west in late afternoon. Areas of dirty burn may experience increased fire activity. Expect surface fire spread in timber and brush litter. Generally, lower rates of spread where fire is backing and flanking. When there's wind and or slope alignment, potential exists for short upslope crown runs. Fire spread in cheat grass can quickly accelerate and change spread directions with increases in wind and or slope. Spotting appears to be short range although with group torching, be watching out to about 0.25 of a mile. Potential for hold over spot fires from previous fire activity exists. Spotting from roll outs is likely on the steep slopes. Probability of ignition will be near range from 70% (shaded) to 90% unshaded.

SPECIFIC:

DIV A, D: Pay attention to areas of dirty burn near fire lines, in these areas stronger wind gusts could increase fire intensity that could contribute to spotting. Fire spread will generally be backing, flanking and where fire is positioned below unburned fuels where ladder fuels are present. Watch for hold over spots from previous fire activity.

DIV Z: Roll outs likely on the steep slopes where fire can finger down into available fuels, moving back upslope. In areas with ladder fuels, short upslope crown runs possible. Areas of cheat grass on the southern aspects easily carry fire.

DIV G: Roll outs likely on the steep slopes.

Night Shift: In areas where fire was active during the day, it will likely continue to be active overnight where available fuels are present. Potential exists for hold over spot fires.

Initial Attack: In the event resources respond to a new start. In light fuels expect rapid rates of spread in grass and brush fuels. In conifer timber litter, potential for surface fire transitioning to single and group torching likely. Spotting likely from any new start.

AIR OPERATIONS: Strong inversion lifting around 1100 hours. Smoke may impact visibility.

SAFETY

- Fire damaged trees are likely to become overhead hazards.
- Roll outs on the steep slopes are likely and may also contribute to other rolling debris.
- Wind switch anticipated in late afternoon may cause an increase in fire activity in unburned islands and areas of dirty burns.

SAFETY MESSAGE

5-6 July 2023

INCIDENT: TUNNEL FIVE

OPERATIONAL PERIOD: 0600-0600

TOPICS:

TRANSPORTATION/DRIVING

Driving may be one of most taken for granted activities we engage in. Traffic accidents are rapidly becoming one of top causes for firefighter injuries and fatalities. Use ALL safety equipment; seat belts, frequently check your mirrors, keep lights on and always use a spotter in all circumstances with blind spots. Practice good road SA. Anticipate vehicles on blind curves, maintain proper speed for conditions, look where you want to go, not where you are. Mark known driving hazards, communicate turn-around sites and manage flow of traffic. If in doubt, SLOW DOWN. Leave the cell phone in your pocket and avoid other items/activities that compete for your attention.

EXTRACTION

Review extraction routes and methods. Identify equipment on hand and needed to facilitate extraction over rough terrain. Recognize precautions that need to be taken for different types of injuries. Review your options for transport while keeping the “Golden Hour” as your objective. Close the window between triage and arrival at definitive care.

SAFETY OFFICERS: Troy Corn, Jack Cates, Mitch Wilson

Deliberate Risk Assessment-Hazard Summary

5-6 July 2023

Hazard	Mitigation	Post Risk
Extraction Time	Identify medivac sites and helispots. Initiate ground transport to accident site for transport capability. Utilize civilian medivac and short haul as needed and available. Ensure VMED frequency is identified in radios. Identify EMT/EMTP from resources assigned to division. Provide line qualified paramedics to each division as available. Review IWI protocol to ensure familiarity. Utilize agency and civilian medivac as treatment/timing dictates. Evaluate on-going need for repositioning medical personnel. Provide Dust abatement on Helispots as needed.	HIGH
Aircraft	Utilize Air Attack. Ensure all resources are a safe distance from all bucket and retardant drops. Establish LCES. Utilize air to ground fixed wing and bucket work. Reference IRPG (Safe aircraft operations pg. 61-62). Ensure IA resources have coordination with unassigned local air resources to provide deconfliction.	HIGH
Hazard Trees	Use avoidance to limit exposure time. Fall ahead to avoid exposure. Use qualified fallers or alternate methods if needed. Conduct on-going risk analysis of all work areas. Follow Hazard Tree Safety Guidelines (IRPG page 20-21).	HIGH
Heavy Equipment	Post lookouts around equipment work areas. Establish communications with equipment boss and operator. Do not work down slope from equipment.	HIGH
Railroad Right-of-Way	Implement work windows/slow orders with BNSF when personnel are working near the right-or-way. Post lookouts at each end of work zones.	HIGH
Physical Factors	Maintain hydration schedule. Closely monitor work rate and implement rest periods. Maintain nutrition. Ensure adequate work/rest.	MODERATE
Fire Behavior	Be aware of burn windows and weather impacts and min/max RH for flashy fuels/local conditions. Report changes to FBAN and IMET. Establish MAP for disengagement to provide for an orderly retreat given lack of safety zones. Have a plan for disengagement that establishes a designated meeting point and maintains personnel accountability.	MODERATE
Steep Terrain/Gravity	Establish LCES. Do not work crews above or below each other. Post lookouts for rolling material. Watch footing in loose soil, rock and around vegetation. Do not work below heavy equipment. Scout and identify travel routes.	MODERATE
Transportation	Utilize reader boards on HWY 14 to slow traffic. Sign all incident roads that provide access to divisions. Provide daily updated travel plan maps. Practice defensive driving. In local communities obey the posted speed limits. Use reader boards to provide advanced warning and control entry to base camp as needed. Identify and evaluate contingency and alternate escape and travel routes. Provide dust abatement and grading as needed. Provide advanced scouting for transport access and bridge weight restrictions.	MODERATE
Unburned Fuels/Firing Ops	Establish LCES. Ensure management action points are implemented and followed. Weather updates as needed during burning operations. Locate indirect firelines to minimize unburned fuels. Follow Interagency Ignition Guide. Ensure communications between all firing operations. Establish road security at all firing sites. Follow approved firing plan for unburned fuels.	MODERATE
Environmental Factors	Assign medical personnel to camp. Assess for known allergies and report to medical personnel. Obtain Bee Bopper/wasp spray and yellow jacket traps. Maintain an awareness wildlife and poison oak. Identify and report allergies to your chain of command.	MODERATE
Public Interaction	Implement area and road closures as necessary. Maintain awareness of evacuation areas and provide accurate information dissemination.	LOW
Initial Attack	Ensure identified IA resources are briefed of expectations and ensure communication plan is provided. Ensure resources are briefed on IA command structure. Provide identified crews with area maps.	LOW

HUMAN RESOURCE MESSAGE TUNNEL FIVE FIRE

July 5-6, 2023

The Washington State Department of Natural Resources (DNR) and NW Team 12 are committed to doing everything we can to help support all fire personnel assigned to this incident. We are focused on promoting a safe and healthy workplace for all employees where everyone is treated with dignity and respect.

Dignity is our inherent value and worth as human beings; everyone is born with it. Respect, on the other hand, is earned through one's actions.

As with any work assignment, there will be conflict. You can change the way you resolve conflict by truly understanding what you are discussing. To feel healthy and safe in our workplace, we need to be seen, heard, listened to, and treated fairly.

Mutual Respect involves showing respect for others and expecting the same in return. When mutual respect is present, it creates an atmosphere of trust and cooperation. Keeping this in mind, when you experience conflict, try to resolve issues and concerns by honoring other people's dignity. In the process, you will strengthen your own.

While on this incident, should you encounter any conflict that is too difficult to deal with, talk with your supervisor and if you need additional resolution information, reach out to Human Resource Specialist (HRSP), Susie Manezes.

The HRSP office is located across from the Medical Unit at the Incident Command Post (ICP). Phone: 602-571-9327, or email at smanezes@blm.gov.
