

Warning- **Predominate Cloud Interference******

Papoose
Infrared Imagery Map
Imagery Flown July 05, 2013 - 2303 hours
Interpreted Acres: 48,652 Acres
IRIN: Bob Brantlinger

Legend

- Isolated Heat Source
- IR_CloudCover

0 0.425 0.85 1.7 2.55 Miles

Note: The majority of the Papoose fire was under cloud cover and unable to detect heat at the time of this flight. A raw heat detection file was created and the few Isolated heat source locations were interpreted for this map. No Intense, Scattered or change to Heat Perimeter was able to be interpreted from the raw data. The IR flight tech sent message after run 3 of 7, "Unable to finish mapping West Fork Run will be end of mission mirrors icing no ground contact".
