<b>Comments /notes on tonight's mission and this interpretation:</b>  <p><b>Minor</b> growth north of NW 'corner'. Intense heat still exists south central of main body from Big Creek Lakes along South Fork Big Creek, major heat in new extension of leg adjacent east side Big Creek Lake towards Republic Creek, and again in leg going south from Swede Group Mines - main growth and intense heat on west side of the leg. FAR EAST LEG, north edge little growth, <b>FEW SPOT FIRES</b> and intense heat and south end</p> <p>All isolated points have a lat/long in the attribute table.</p>
