Datum NAD83

- NTFB Barrier
- BURN PERIOD**
- 07/05
- 07/06
- 07/07
- 07/08
- 07/09

Note: Modeled fire spread (Near Term Analysis) projection for 5 days, 7/5 to 7/9. Logchute RAWs observations used for wx predictions from gridded forecast data (no precipitation is projected in this analysis). No suppression is assumed except barriers (roads, completed control lines, natural breaks) that don't allow surface spread. Results show the projected spread of the fire to be 1 to 2.5 miles towards the west, north, and northeast over the next 5 days.
