IRIN Comments on imagery: 1 pass, Ortho and Color flown in an east-west direction.		Weather at time of flight: Clear	Flight Objective: Identify and map Heat perimeter, Scattered Heat and Isolated Heat Sources.
Date and Time Imagery Received by Interpreter: 07/27/2018 – 1932 (MDT)		Type of media for final product: Shape files, KMZ, PDF, and IRIN Log	
Date and Time Products Delivered to Incident: 07/27/2018 – 2010 (MDT)		Digital files sent to: NIFC FTP @ https://ftp.nifc.gov/public/incident_specific_data/rocky_mtn/2018/IndianValley/IR/20180728/	

Comments /notes on tonight's mission and this interpretation:

Started IR interpretation from 20180727 IR heat perimeter.

Just a few isolated heat sources within main body of the fire perimeter. There was a small amount of growth on the east side of the fire. One of the areas had a couple heat polygons outside the main fire perimeter in the southwest of section 24 just west of the Tschuddi Gulch. There was also some small growth in section 26 on the southeast side and in section 23 on the northeast side with small pockets of intense heat.
