Flight Time: 2204 (MDT) Flight Date: 10/17/2019	Interpreter(s) location: Lakewood, CO. Interpreter(s) Phone: 303-915-9346 (cell) 303-277-1704 (home)	GACC IR Liaison: Elise Bowne GACC IR Liaison Phone: 303-517-7510	National Coordinator: Tom Mellin National Coord. Phone: 505-842-3845
Ordered By: bjossart	A Number: A16	Aircraft/Scanner System: N149Z / Phoenix	Pilots/Techs: Johnson, Boyce / Mann
IRIN Comments on imagery: 1 passes, Ortho and Color flown in an north-south direction.		Weather at time of flight: Clear	Flight Objective: Identify and map Heat perimeter, Scattered Heat and Isolated Heat Sources.
Date and Time Imagery Received by Interpreter: 10/17/2019 – 2215 (MDT)		Type of media for final product: Shape files, KMZ, PDF, and IRIN Log	
Date and Time Products Delivered to Incident: 10/18/2019 – 0030 (MDT)		Digital files sent to: NIFC FTP @ /incident_specific_data/rocky_mtn/2019/CowCreek/IR/20191018	
Comments /notes on tonight's mission and this interpretation: There was no previous perimeter to start with. There are two general areas of intensive heat. The larger is on top of what appears to be Green Mountain as Green Mountain Trail crosses it. The other is on the southwest slope of Courthouse Mountain. The Red Creek runs between these, and has one isolated heat source near the creek itself. There are several small polygons of intense heat outside of these larger areas, as well as quite a few isolated heat sources, mostly on the north and east sides. End – 655 Acres Start –0 Acres (area of shapefile) Growth – 655 Acres Questions, comments, please contact the IR interpreter via the info above.
