Flight Time: 2212 (MDT) Flight Date: 10/22/2019	Interpreter(s) location: Lakewood, CO. Interpreter(s) Phone: 303-915-9346 (cell) 303-277-1704 (home)	GACC IR Liaison: Elise Bowne GACC IR Liaison Phone: 303-517-7510	National Coordinator: Tom Mellin National Coord. Phone: 505-842-3845
Ordered By: Joshua Relph SITL	A Number: A90	Aircraft/Scanner System: N149Z / Phoenix	Pilots/Techs: Johnson, Boyce / Mann
IRIN Comments on imagery: 1 pass, Ortho and Color flown in a north-south direction.		Weather at time of flight: Clear	Flight Objective: Identify and map Heat perimeter, Scattered Heat and Isolated Heat Sources.
Date and Time Imagery Received by Interpreter: 10/22/2019 – 2221 (MDT)		Type of media for final product: Shape files, KMZ, PDF, and IRIN Log	
Date and Time Products Delivered to Incident: 10/23/2019 – 0030 (MDT)		Digital files sent to: NIFC FTP @ /incident_specific_data/rocky_mtn/2019/Decker/IR/20191023	
Comments /notes on tonight's mission and this interpretation: I started with the file: FirePolygon_night_20191022_WGS84.shp as provided by the incident. There were no large changes to the exterior perimeter, only creeping edges in small locations. There were also changes to the interior islands. These are continuing to have heat enter them. There are very few and very small areas of intense heat. The area is continuing to cool, with more isolated and fewer scattered heat sources. End – 8910 Acres Start –8898 Acres (area of shapefile) Growth – 12 Acres Questions, comments, please contact the IR interpreter via the info above.
