| <b>Date and Time Products Delivered to Incident:</b><br>08/31/2020 @ 0400 MDT   |   | <b>Digital files sent to:</b><br>NIFC FTP:<br><a href="https://ftp.nifc.gov/public/incident_specific_data/rocky_mtn/2020/GrizzlyCreek/IR/">https://ftp.nifc.gov/public/incident_specific_data/rocky_mtn/2020/GrizzlyCreek/IR/</a> |  |
| <b>Comments / notes on tonight's mission and this interpretation:</b><br>*Reduction in acreage due to incident modifications to fire polygon in cold portions of the fire area.<br>Limited perimeter change was mapped tonight, with very minimal changes to the heat perimeter.<br>No intense heat was observed in the fire area, and only a few small polygons of scattered heat were observed.<br>Two isolated heat sources were once again mapped southeast of the fire's perimeter on the east side of Dock Flats. |   |   |  |
