Infectious disease – Wear masks, physically distance, wash hands, testing is available

Driving Hazards – Slick roads, congested roads, your job is not complete until you arrive home.

Incident Hazards – Evaluate all hazards in the incident area, flag hazards, use specialized teams.

Human factors barriers to managing risk

➤ **Low experience level**

- ❖ Unfamiliar with work environment

➤ **Distraction from primary task**

- ❖ Conflict
- ❖ Previous errors
- ❖ Collateral duties

➤ **Stress Reactions**

- ❖ Communication deteriorates or grows tense
- ❖ Habitual/repetitive behavior
- ❖ Target fixation – “just try harder”
- ❖ Action tunneling – “losing sight of the big picture”
- ❖ Escalation of commitment – accepting more risk to complete the project

➤ **Hazardous attitudes**

- ❖ Invulnerable – can’t happen to me
- ❖ Anti-authority – disregard team effort
- ❖ Impulsive – do something even if it’s wrong
- ❖ Macho – trying to impress or prove something
- ❖ Complacent – same old stuff
- ❖ Resigned – we can’t make a difference
- ❖ Group think – Afraid to speak-up or disagree

➤ **Fatigue**

- ❖ Dehydration
- ❖ Heat stress
- ❖ Poor fitness level

Safety Teaming

- The greatest problem to communication is the illusion that it has been achieved.
 - ❖ Communicate...Collaborate...Coordinate...Cooperate
- No one of us is as smart as all of us.
 - ❖ Acknowledge hazards and share your awareness with others.
 - ❖ Remove, reduce, or avoid risks.
 - ❖ Tell someone it has been fixed or needs fixed.
- You are the expert in what you do.
 - ❖ Expect both safe and effective conduct from yourself and others.
- Help one another to be successful.
 - ❖ Redeem personal and professional responsibilities to care for yourself and those you are responsible for.
 - ❖ Help others to redeem their responsibilities.

Talking Points

Ongoing firefighting and recovery efforts:

- Areas of significant heat still exist around some of the impacted structures. These heat sources can flare up and produce smoke or visible flame.
- Firefighters will continue to be present in neighborhoods after closures are lifted to mop up remaining hot spots and ensure that they pose no hazard to the fire perimeter or adjacent unburned structures.
- Utility companies continue restoring service and preparing systems to deliver utilities to customers. Please check websites or social media for your service provider, whether that be electric, gas, water, or telecom, for updates.

Resident info and reopening of closed areas:

- A Disaster Assistance Center has been established at 1755 S. Public Road in Lafayette where affected residents can find information on assistance and relief that is available through local, state, and Federal entities.
- All residents affected by the fire are encouraged to visit the Disaster Assistance Center to learn about resources available to them. This includes residents who have been evacuated, staff of businesses that have been closed due to the fire, as well as those with residences that were damaged or destroyed.
- All evacuation orders have been lifted, but some areas remain under a closure. Closures change regularly daily. Please visit the Boulder OEM website (boulderOEM.com) for the most up-to-date information on evacuations and road closures.
- An interactive map showing evacuation areas, shelters, closures, dumpster locations, and more is available for more information. That map can be found through the Boulder OEM website or directly at <https://arcg.is/11STOC0>
- Trash receptacles have been set up in multiple locations. These locations are specifically for spoiled food and unburned trash. Please do not dispose of burned structural waste, ash, or other items damaged by fire in these receptacles. Unburned waste is acceptable in these containers.
