

SYLVAN FIRE

CO-WRF-210187 — P2N3D6 (0215) [P]

JULY 9 - 11, 2021

Day Operational Period 0700-2100

UPPER COLORADO RIVER TEAM

Dan Nielsen

INCIDENT INFORMATION 2021.SYLVAN@FIRENET.GOV

IAP / MAPS

INCIDENT OBJECTIVES (ICS 202)

1. Incident Name:	2. Operational Period: 0700-2100	
SYLVAN FIRE	Date/Time From: 07/09/2021 0700 FRI	Date/Time To: 07/11/2021 2200 SUN
3. Objective(s):		
<p>1. Provide for firefighter and public safety through a deliberate and active process of managing risk and reducing exposure to the lowest level possible.</p> <p>2. To decrease downstream effects on water quality for local and regional water providers, minimize impacts to Brush Creek, Gypsum Creek, and Fryingpan drainages respectively.</p> <p>3. Minimize impacts to values at risk including Xcel transmission lines, private property, structures, Sylvan Lake State Park, cultural resources, historic structures, range allotments, communication site infrastructure, timber sale areas, and sensitive species.</p> <p>4. To the extent possible protect private, state and federal built infrastructure commensurate with risk to firefighters.</p> <p>5. Keep costs commensurate with values at risk.</p>		
4. Operational Period Command Emphasis:		
<p>1. Implement strategies and tactics that commit responders only to operations where and when they can be successful, and under conditions where important values at risk are protected with the least exposure necessary.</p> <p>2. Keep the fire north of Mount Thomas Trail, south and west of Eagle-Thomasville Rd., and east of Hardscrabble Rd. and Lost Lake Trail.</p> <p>3. Utilize a combination of direct, indirect, and point protection tactics to minimize acres burned and damage to private values.</p> <p>4. Scout for control opportunities and right size the organization as needed.</p> <p>5. Coordinate with Resource Advisors to mitigate negative impacts to natural and cultural resources.</p> <p>6. Mop-up only to the extent necessary to prevent escape and protect values at risk.</p> <p>7. Coordinate closures/evacuations with the Eagle County Sheriff's Office as needed.</p> <p>8. Provide for the regular flow of information to the Agency Administrator, Cooperators, Stakeholders, media and the general public.</p> <p>9. Minimize erosion, recreational incursions, and invasive plant introductions by utilizing natural topography and existing roads and trails for fire control features when practical.</p>		
General Situational Awareness:		
<p>Prevent transmission of infectious disease by practicing good personal hygiene.</p> <p>There are numerous sink holes, chasms, and large depressions within and adjacent to the fire area which can be obscured by brush, grass, or smoke.</p> <p>Black bears may be encountered within and near the fire area. Follow bear safety protocols and food storage guidelines.</p>		
5. Site Safety Plan Required? Yes <input type="checkbox"/> No <input checked="" type="checkbox"/>		
Approved Site Safety Plan(s) Located		
6. Incident Action Plan (the items checked below are included in this Incident Action Plan):		
<input checked="" type="checkbox"/> ICS 202 <input checked="" type="checkbox"/> ICS 203 <input checked="" type="checkbox"/> ICS 204 <input checked="" type="checkbox"/> ICS 205 <input type="checkbox"/> ICS 205A <input checked="" type="checkbox"/> ICS 206	<input type="checkbox"/> ICS 207 <input type="checkbox"/> ICS 208 <input checked="" type="checkbox"/> ICS 220 <input type="checkbox"/> Map/Chart <input checked="" type="checkbox"/> Weather Forecast/Tides/Currents	Other Attachments: <input type="checkbox"/> CHECK-IN & DEMOB TIPS <input checked="" type="checkbox"/> FINANCE PROCEDURES <input checked="" type="checkbox"/> BEAR SAFETY <input type="checkbox"/> LINE SUPPLY ORDER

Spot Forecast for Sylvan...USFS

National Weather Service Grand Junction CO 224 PM MDT Thu Jul 8, 2021

Forecast is based on forecast start time of 0700 MDT on July 09. If conditions become unrepresentative...contact the National Weather Service.

.DISCUSSION...

Lingering moisture beneath the ridge of high pressure to the west will continue to generate isolated storms over the central mountains on Friday. Wetting rain is unlikely through strong outflow winds are probable. Drying expected this weekend with moisture returning early next week. Above normal warmth will continue in the near term.

.FRIDAY...

Sky/weather.....Partly cloudy (30-40%). Isolated showers and thunderstorms in the afternoon.
Max temperature.....78-83 F.
Min humidity.....13-18%.
Wind (20 ft).....Downslope/downvalley 2-5 mph until 1000, then winds becoming northwest 5-10 mph with gusts to around 20 mph in the afternoon. Gusty and erratic winds expected near thunderstorms in the afternoon.
Smoke dispersal.....Fair until 1000, the good, becoming excellent by 1400.
Haines Index.....6 or high.
LAL.....1.
Mixing height.....Rising to 11800 ft AGL by 1400.
Transport winds.....West 15 mph.

.FRIDAY NIGHT...

Sky/weather.....Mostly clear (10-20%).
Min temperature.....50-55 F.
Max humidity.....28-33%.
Wind (20 ft).....Northwest winds 4-8 mph shifting to the southwest around 1900, then downslope/downvalley 2-5 mph after 2100. Gusts up to 20 mph until 2100.
Smoke dispersal.....Excellent until 1900, then very good, decreasing to poor (2000 knot-ft) overnight.
Haines Index.....5 or moderate.
LAL.....1.
Mixing height.....Decreasing to 700 ft AGL overnight.
Transport winds.....West 18 mph decreasing to 5 mph after 2400.

.SATURDAY...

Sky/weather.....Sunny (0-10%).
Max temperature.....74-79 F.
Min humidity.....9-14%.
Wind (20 ft).....Downslope/downvalley winds 2-5 mph until 1000, then north winds 4-8 mph. Gusts up to 25 mph in the afternoon.
Smoke dispersal.....Fair until 1000, then good, becoming very good by 1400.
Haines Index.....5 or moderate.
LAL.....1.
Mixing height.....Increasing to 9500 ft AGL by 1400.
Transport winds.....Northwest 11 mph.

.FORECAST DAYS 3 THROUGH 7...

.SUNDAY...
Clear. Lows 45-55. Highs 72-82. North winds 5 mph with gusts to around 20 mph.
.MONDAY...
Mostly clear. Isolated showers and thunderstorms. Lows 47-57. Highs 74-84. Northwest winds 10 mph with gusts to around 16 mph.
.TUESDAY...
Partly cloudy. Scattered showers and isolated thunderstorms. Lows 49-59. Highs 72-82. Northwest winds 10 mph with gusts to around 16 mph.
.WEDNESDAY...
Partly cloudy. Scattered showers and thunderstorms. Lows 49-59. Highs 69-79.
.THURSDAY...
Partly cloudy. Scattered showers and thunderstorms. Lows 47-57. Highs 68-78.

Division/Group Assignment List (ICS 204 WF)
Controlled Unclassified Information//Basic

1. Incident Name:			3.			
SYLVAN FIRE			Branch:		Division/Group	
2. Operational Period: 0700-2100					A ALPHA

BLM GJ E-2622			WILL BARR	3	SYLVAN LAKE/0700	SYLVAN LAKE/2200
6. Control Operations/Work Assignments:						
Task: Continue mop up where appropriate; commensurate with values at risk. Repair non-essential fire line and add water bars to essential fireline.						
Purpose: Contain fire edge throughout Division ensuring flames and smoke are not a threat to escape fireline.						
End State: Fireline is in the correct location with the right dimensions to contain the fire.						
7. Special Instructions:						
Black bears occupy the fire area. Keep a clean camp and fireline by placing all trash in a bear resistant dumpster. Do not take food or other attractants into your tent. Report all bear sightings to your supervisor.						
Do not dip or draft out of Woods Lake.

BEAR SAFETY and FOOD STORAGE

Most encounters with an aggressive black bear involve a bear in search of food or garbage. Signs of aggression are eye contact with you and appearance of being unafraid of humans. Aggressive bears have laid back ears, lowered head, sway back and forth, snort, and clack or pop their jaws.

- Face the bear and slowly back away.
- Talk or make noise to signal you are human and in control. Raise your arms or otherwise appear bigger.
- Back away slowly, at least 100ft, get in a vehicle or enclosed building if uncertain that the bear has left. If this is not possible, travel an alternative route.
- If charged, stand your ground and immediately appear bigger, tougher, and more confident than ever before. If knocked over, fight back, preferably with solid objects, a pack, anything until the bear gets off you. Then get up and slowly back away. **DO NOT RUN**, but leave the area.

Food Storage

- A bear resistant dumpster should be placed in a central location away from sleeping areas, preferably near the food area. The lid should be **lowered and secured** at night so that trash is unavailable to bears. All trash should also be secured and removed from camps regular basis.

Attractants shall not be buried, discarded, or burned in an open campfire. Leftover food or food waste may be placed in an appropriate sealed container and packed out with the garbage. **It is not recommended to burn leftover food, garbage or attractants because the odors can be broadcast intensely and widely in this manner.**

Expanded Dispatch – (970) 257-4588

Sylvan Fire Suppression Damage Repair Guidelines

Rehabilitation of dozer lines, handlines, drainages, staging areas, safety zones, drop points, helispots, drafting locations, fuels storage, remote radio repeaters, and roads should be initiated only when it is determined that rehabilitation efforts will not adversely affect ongoing suppression/ mop up operations. Rehabilitation operations should avoid creating new disturbance.

Common to All Areas

Remove all litter, flagging (except resource sensitive flagging), signs, and other materials from fire suppression area.

All cut vegetation along roads will be spread onto black areas or adjacent road side slopes to reduce erosion.

Hand line & Dozer Line (All Divisions as Appropriate)

Water bar spacing:	Fireline Slope	Max Spacing
	10-15%	150 ft.
	15-30%	100 ft.
	30-40%	50 ft.
	40%+	25 ft.

- On slopes <40%, water bars shall be placed at 20 to 30 degrees to the fire lines. On slopes > 40%, water bars shall be placed at 30 to 45 degrees to the fire lines. Always place a water bar at a slope change.
- Obliterate the first 300 feet of hand line that ties into or crosses existing roads and trails, and the first 100 feet of fire line that ties directly into or crosses active or dry stream beds.
- Knock down/re-contour dozer line berms to blend with surrounding topography.
- Spread out all "cat piles" to cover dozer lines; do not remove live standing vegetation to cover dozer lines.
- Re-establish berms and other water control features where dozer lines cross wet or dry stream channels. Fully repair stream bank conditions to prevent further erosion, and to minimize sedimentation risk to adjacent stream habitats.
- Utilize existing downed material to camouflage the entrance and prevent off-road access to fire line that could potentially be used by motorized vehicles.
- Restore trails and roads to pre-fire width and prevent erosion by contour falling snags and using debris along road/trail sides.

Spike Camps, Drop Points, Staging Areas, Helispots, Dip Sites

- Scatter brush and woody debris back over the area (*where appropriate*).
- Block access to non-system roads/paths/trails with tank traps, fencing or rock.

Hazard Tree Removal

- Remove immediate road and trailside hazards as necessary for the safety of crews and equipment.

Roads

- Roads damages by suppression operations should be repaired through coordination with the Resource Advisor.

Fences

- Repair all fences that were impacted by suppression activity.

Medical Incident Report

FOR A NON-EMERGENCY INCIDENT, WORK THROUGH CHAIN OF COMMAND TO REPORT AND TRANSPORT INJURED PERSONNEL AS NECESSARY.

FOR A MEDICAL EMERGENCY: IDENTIFY ON SCENE INCIDENT COMMANDER BY NAME AND POSITION AND ANNOUNCE "MEDICAL EMERGENCY" TO INITIATE RESPONSE FROM IMT COMMUNICATIONS/DISPATCH.

Use the following items to communicate situation to communications/dispatch.

1. CONTACT COMMUNICATIONS / DISPATCH (Verify correct frequency prior to starting report)

Ex: "Communications, Div. Alpha. Stand-by for Emergency Traffic."

2. INCIDENT STATUS: Provide incident summary (including number of patients) and command structure.

Ex: "Communications, I have a Red priority patient, unconscious, struck by a falling tree. Requesting air ambulance to Forest Road 1 at (Lat./Long.) This will be the Trout Meadow Medical, IC is TFLD Jones. EMT Smith is providing medical care."

Severity of Emergency / Transport Priority	<input type="checkbox"/> RED / PRIORITY 1 Life or limb threatening injury or illness. Evacuation need is IMMEDIATE <i>Ex: Unconscious, difficulty breathing, bleeding severely, 2° – 3° burns more than 4 palm sizes, heat stroke, disoriented.</i> <input type="checkbox"/> YELLOW / PRIORITY 2 Serious Injury or illness. Evacuation may be DELAYED if necessary. <i>Ex: Significant trauma, unable to walk, 2° – 3° burns not more than 1-3 palm sizes.</i> <input type="checkbox"/> GREEN / PRIORITY 3 Minor Injury or illness. Non-Emergency transport <i>Ex: Sprains, strains, minor heat-related illness.</i>	
Nature of Injury or Illness & Mechanism of Injury		Brief Summary of Injury or Illness <i>(Ex: Unconscious, Struck by Falling Tree)</i>
Transport Request		Air Ambulance / Short Haul/Hoist Ground Ambulance / Other
Patient Location		Descriptive Location & Lat. / Long. (WGS84)
Incident Name		Geographic Name + "Medical" <i>(Ex: Trout Meadow Medical)</i>
On-Scene Incident Commander		Name of on-scene IC of Incident within an Incident <i>(Ex: TFLD Jones)</i>
Patient Care		Name of Care Provider <i>(Ex: EMT Smith)</i>

3. INITIAL PATIENT ASSESSMENT: Complete this section for each patient as applicable (start with the most severe patient)

Patient Assessment: See IRPG page 106

Treatment:

4. TRANSPORT PLAN:

Evacuation Location (if different): (Descriptive Location (drop point, intersection, etc.) or Lat. / Long.) Patient's ETA to Evacuation Location:

Helispot / Extraction Site Size and Hazards:

5. ADDITIONAL RESOURCES / EQUIPMENT NEEDS:

Example: Paramedic/EMT, Crews, Immobilization Devices, AED, Oxygen, Trauma Bag, IV/Fluid(s), Splints, Rope rescue, Wheeled litter, HAZMAT, Extrication

6. COMMUNICATIONS: Identify State Air/Ground EMS Frequencies and Hospital Contacts as applicable

Function	Channel Name/Number	Receive (RX)	Tone/NAC *	Transmit (TX)	Tone/NAC *
COMMAND					
AIR-TO-GRND					
TACTICAL					

7. CONTINGENCY: Considerations: If primary options fail, what actions can be implemented in conjunction with primary evacuation method? Be thinking ahead.

8. ADDITIONAL INFORMATION: Updates/Changes, etc.

REMEMBER: Confirm ETA's of resources ordered. Act according to your level of training. Be Alert. Keep Calm. Think Clearly. Act Decisively.
